* Data sources: Maryland's NEDSS and STD*MIS databases. Data is current as of July 13, 2011. These are active databases and counts may vary slightly over time, as well as differ slightly from counts published by the Centers for Disease Control and Prevention (CDC). HIV/AIDS data are not included here but available at http://ideha.dhmh.maryland.gov/CHSE/statistics.aspx.

**Due to very small numbers the county rate for Congenital Syphilis is calculated only for the combined counties (excluding Baltimore City). The total county rate is 23.8 per 100,000 live births.

The case status classifications (confirmed, probable or suspect) included in these totals are specific to the condition, and depend in part on the CDC case definitions for surveillance, where those exist (see http://www.cdc.gov/osels/ph_surveillance/nndss/PHS/infdis2010.htm). There may be additional "suspect" cases for the following conditions: Anaplasmosis, Babesiosis, Campylobacteriosis, Creutzfeldt-Jakob disease, Ehrlichiosis, Legionellosis, Lyme disease, Measles, Mumps, and Spotted Fever rickettsiosis.
