

Maryland Produce Prescription (Produce Rx) Program

Produce Rx Vendor Directory

Thank you again for your interest in the Maryland Department of Health's Produce Rx program and its impact on the health of Marylanders. It has been terrific to receive communication about all of the potential resources available from service vendors to our state and in support of the program's efforts.

As a result, the Produce Rx Directory is made available to connect vendors to stakeholders. The information serves as a networking resource by which stakeholders can reach out to potential vendors based on their specific areas of work. Inclusion in the Vendor Directory does not constitute endorsement of these vendors nor their services by the Maryland Department of Health. The directory is solely intended for networking and informational purposes.

If you need to update your company information, please reach out to bronte.nevins@maryland.gov to request revisions.
