

Health Home Monthly Report

Office of Health Services
Policy & Compliance, Behavioral Health Division
September 2014

EXECUTIVE SUMMARY

As of September 30th, 2014, the Department has received 89 Health Home site applications and approved 60 including 46 Psychiatric Rehabilitation Programs (PRP), ten Mobile Treatment providers (MT), and four opioid treatment programs (OTP). These programs span 19 of Maryland's 23 counties and have a cumulative enrollment of 4,309 participants. The Department continues its technical assistance efforts including quarterly Health Home Advisory Committee meetings as well as Health Home Site Visits. Additionally, the Department continues to outreach to potential provider applicants with an emphasis on OTP providers.

Total claims paid during the first year of implementation are approximately \$2.1 million. Claim submissions have fluctuated monthly with an overall upward trend, peaking at \$329,000 dollars in August 2014. A preliminary analysis of the Health Home population at year one shows many participants experience co-occurring disorders, as well as a high rate of overweight/obesity and hypertension.

OUTREACH & TECHNICAL ASSISTANCE

In September, the Department continued efforts to support approved Health Home providers and outreach to potential applicants. This included a presentation at the Johns Hopkins Bayview Integrated Care Conference, at which the Department shared outcomes and lessons learned from year one of the program. The Department also continues to work with members of the Health Home Advisory Committee and Site Visit teams to prepare additional training and technical assistance opportunities. Outreach to the provider community resulted in receipt of several new provider applications.

POPULATION OVERVIEW

After the first year of Health Home implementation, the program’s population is heavily skewed towards adults served by mental health providers, with approximately 80% of participants falling into this category. However, nearly half of the total participant population reports having a substance use disorder, indicating a high rate of co-occurring disorders. Preliminary analysis of participant records also indicates the majority of the Health Home population is overweight or obese, and roughly 25% experience hypertension. This data confirms that much of the population experiences multiple and complex diagnoses.
