

# Free Opioid Education

For Prescribers and Pharmacists

Providing excellent patient care can be demanding. We can help you stay up to date on opioid research, prescribing guidelines, and best practices to provide the best support for your patients. Our goal is to increase the use of evidence-based recommendations for opioid prescribing, opioid safety, and other best practices.

## We're Here to Help

- Our team of trained outreach educators can share information, resources, and tools to help streamline your workflow and improve outcomes for your patients.
- Education sessions can be virtual or in-person - whatever works for you.

## Sign Up for Free, Personalized Sessions

Topics include:

- Offering safe and effective pain management
- Prescribing evidence-based non-opioid treatment options
- Tapering opioids to safe levels
- Reducing risk for high-risk patients
- Identifying patients who may have opioid use disorder
- Exploring harm reduction and medication-assisted treatment options
- Complying with opioid prescribing guidelines
