

PCIS2 Incident Reporting
Person Support, Supported Living, Pilot, and Early Adopters

Incident reporting for all DDA service recipients will continue in PCIS2 regardless of services that transition into LTSS for billing purposes. Please see DDA's [Incident Report Policy](#)

Although Personal Supports (PS) and Supported Living (SL) services are being billed in LTSS effective 12/1/20 across all regions, CCS agencies and providers can still submit Incident Reports in PCIS2. This is also the case for pilot participants and early adopters.

To assist providers who have transitioned PS/SL service billing into LTSS, pilot participants, and early adopters, please review the **attached powerpoint** which reviews how to submit an incident report for someone who is not listed on your list of service recipients in PCIS2.

If you have any questions regarding how to complete an incident report in PCIS2, please reach out the DDA service desk at:
