

WE TAKE PRECAUTIONS FOR YOU

Because you, our patients, are important to us, we are taking special steps to protect you and your health.

These Steps Include:

Performing Hand Hygiene

... washing our hands before and after patient care with soap and water or using an alcohol based handrub.

Wearing Gloves

... each and every time hands are in any part of the mouth. Gloves are changed between each patient.

Disposing of Used Needles and Sharp Objects

... by placing them in a puncture proof container.

Putting on a Mask, Eye Protection, and a Gown

... if splash or splatter of blood or bloody fluids is likely to occur.

Sterilizing all Dental Instruments Using FDA Approved Devices

... including dental handpieces (dental drills).

Cleaning our Surroundings and Equipment

... by using surface cleaners and disinfectants and following the infection control guidelines published by the Centers for Disease Control and Prevention (CDC).

If you don't think all of these precautions are being taken, talk with your health care provider, or you may contact the Maryland State Board of Dental Examiners @ 410-402-8500.
