West Baltimore Health Enterprise Zone Focus

- **Geographic and Target Population:**
  - **86,000** West Baltimore residents within the 21216, 21217, 21223, and 21229 zip codes
  - **1,200** High Utilizers

- **Core Disease and Target Conditions:**
  - Cardiovascular Disease (CVD)
  - CVD Risk Factors (i.e., Diabetes and Hypertension)

- **Overarching Strategies:**
  - Care Coordination (Hospital High-Utilizers)
  - Community-Based Risk Factor Reduction
Care Coordination

- Partnered with The Coordinating Center
- Hospitals: University of Maryland Medical Center, University of Maryland Midtown, St. Agnes, Bon Secours, and Sinai
- Provided Care Coordination services to **1,194** HEZ residents as of March 2017 with **2500+** encounters
- Average Readmission Rate is **14%** for high utilizers
  - Baseline 17%
  - Prior Year 15%
- CRISP Pre/Post Analysis shows reduction in ED visits and Hospital charges
- Successfully connected high utilizers to a CHW and a Primary Care Provider
Patient Story

“I was unable to get back and forth to see my doctor and infectious disease specialist because Johns Hopkins is too far. I preferred to have care at St. Agnes Hospital. I am much happier now. Ms. Quiana taught me how to change my main doctor on my medical assistance card to the doctor she helped me find at St. Agnes Hospital. She helped me set up a new patient appointment with my new doctor, Dr. Bajaj and he was then able to refer me to an infectious disease specialist at St. Agnes as well. I had a visit from Mr. David from the Health Department and I was very nervous because he made me feel like I was doing something wrong and that I was putting other people’s lives at risk because of my HIV. I know I have HIV and I would never do anything to hurt other people. Ms. Quiana spoke to Mr. David and he was able to see that I was in the process of getting a new doctor and infectious disease specialist at a different hospital. He was satisfied so all I had to do is call him once I got my new appointment. Thanks to Ms. Quiana I now have a new doctor, a new infectious disease doctor and I am compliant with the health department. I also get my prescriptions from the pharmacy at St. Agnes. I won’t have any problems now going to see my doctor. The Get Well program is very helpful. I always wanted a new doctor closer to me but I didn’t know how to do it.”
Community-Based Risk Factor Reduction

- Increased Identification & Screening of Residents
- Recruitment of Primary Care Professionals
- Community Outreach & Health Awareness Education
- Community Partnership Grants
- Health Careers Scholarships
- Physical Activity
Increased Identification and Screening of Residents

• HEZ Providers reported on NQF and UDS quality measures (Diabetes, Hypertension, Smoking Screening, BMI) to track their identification, screening, and management efforts of individuals with risk factors for CVD.
Community-Based Risk Factor Reduction

Recruitment of Primary Care Professionals

- To date we have spent $170k in tax credits for 25 providers in the Zone
- Provided 4 Community Health Worker (CHW) training sessions
Community Outreach and Health Awareness Education

- Offered free CVD health promotion courses on nutrition, physical activity, smoking cessation, and stress relief
- Provide care coordination and community health outreach services at the public and senior housing sites
- In conjunction with community partners, sponsored community outreach activities focused on health and wellness
Community Partnership Grants

• Partnered with and awarded grants to community-based organizations to support community programs that align with WB CARE goals and strategies to improve cardiovascular health and to reduce CVD risk factors
• Awarded a total of 16 grants to date totaling $130k

Health Freedom Inc. walking program
Health Careers Scholarships

- Offered scholarships and career readiness trainings to community members to support enrollment in technical professional programs for health and social service careers (e.g., Cardiovascular Technician, Nursing Assistant, Social Worker, Phlebotomist, etc.)
- Awarded a total of 105 scholarships to date totaling $338k
“Hello Everyone my name is Rodney Butler and I am a recipient of the west Baltimore cares scholarship program. I would like to express my gratitude and pleasure to the HEZ department and everyone involved with the scholarship program because it has benefited me in a way that I believe will make my future as a college graduate so much more gainful. I am currently in school to become a respiratory therapist, the curriculum and the journey so far has been tasking, tedious and challenging but worth every minute. While attending college I am able to not only help myself but inspire my children to always seek higher education and strive to be as productive as possible. Becoming a college graduate has always been a goal that I wanted to accomplish and with the help of the scholarship program my goal is coming to fruition.”
Physical Activity

• Partnered with neighborhood Recreation Centers and churches to offer free fitness classes (11 one hour weekly classes for 12 weeks)
• Provided Biometric Assessments to all fitness participants
  o From 2015-2016, avg. wt. decrease ~15lbs, avg. BMI decreased ~1.5
• Over 4,700 fitness class encounters
Readmission Rates

All-Cause Unplanned Readmission Rates, 2012-2015
