Specimens collected for COVID-19 and Mpox testing can be stored and transported on cold packs refrigerated (2-8°C) for up to 72 hours after collection before delivery to the MDH Central Laboratory for testing. Specimens that cannot be delivered for testing at the MDH Central Laboratory within 72 hours after collection must be frozen and stored at < -70°C and transported frozen on dry ice. Therefore, please plan the COVID-19 and Mpox specimen collection accordingly over the

holiday. For urgent rabies exposure testing and other after hour emergency testing requests see instructions on page 7 of the Guide to Public Health Laboratory Services on the MDH Laboratory’s homepage:
