MARYLAND BOARD OF NURSING

\* \* \* \* \*

OPEN SESSION

\* \* \* \* \*

The Maryland Board of Nursing board meeting was held on Wednesday, August 25, 2021, at 4140 Patterson Avenue, Baltimore, Maryland 21215, commencing at 9:10 a.m., before Edward Bullock, Notary Public in and for the State of Maryland.

Job No.: 56023

REPORTED BY: Edward Bullock, Notary Public

AUDIO RECORDING TRANSCRIBED BY: Edward Bullock, DCR

1 APPEARANCES:

2

3 MICHAEL CONTI, Assistant Attorney General

4 MARGARET LANKFORD, Assistant Attorney General

5 Office of the Attorney General

6 State of Maryland

7 Department of Health & Mental Hygiene

8 300 West Preston Street

9 Baltimore, Maryland 21201

1 P R O C E E D I N G S

2 MR. HICKS: Let's get started. If I could get a  
3 motion to go into Open Session.

4 MS. DILLON: So moved, Dillon.

5 MR. HICKS: Dillon.

6 MS. STEELE: Second, Steele.

7 MR. HICKS: Steele. All in favor?

8 ALL: Aye.

9 MR. HICKS: Opposed?

10 (No oppositions)

11 MR. HICKS: Motion carries. We will do roll call  
12 this morning. We will do online first. I believe, Ann Turner?

13 MS. TURNER: Present, Ann Turner, RN member.

14 MR. HICKS: I don't believe I have anyone else  
15 online. Is there any other board members online?

16 (No responses)

17 MR. HICKS: All right, hearing none. We will go  
18 around the room.

19 MR. NEUSTADT: Charles Neustadt, consumer member.

20 MS. GIBBONS-BAKER: Emalie Gibbons-Baker, RN member,  
21 advanced practice.

1 MS. DILLON: Mariah Dillon, advanced practice board  
2 member.

3 MR. RAYMOND: Greg Raymond, board member.

4 MS. STEELE: Jenell Steele, RN member.

5 MS. HARROD-OWUAMANA: Charlene  
6 Harrod-Owuamana, LPN member.

7 MS. HAYWARD: Dawne Hayward, RN member.

8 MS. ROBIN HILL: Dr. Robin Hill, practical nursing  
9 educator member.

10 MS. CASSIDY: Audrey Cassidy, consumer member.

11 MS. POLK: Laura Polk, RN member.

12 MR. HICKS: All right, thank you everyone. So, we  
13 will go ahead and start with Ms. Evans with for and Board  
14 Updates.

15 MS. EVANS: Good morning everyone.

16 ALL: Good morning.

17 MS. EVANS: The first is, for me, it's a personal  
18 triumph. I will have an executive assistant on September 22nd.

19 (Applause)

20 MS. EVANS: So, I'm really excited about that.

21 Other news that you should be made aware of is that the

1 Governor's Order is over. We received approximately 1,500  
2 applications from August 13th to August 15th. That's it. So,  
3 one of the things, we had 40,000 who had not renewed at that  
4 time. But in the past, we really haven't done any type of  
5 research to see what the normal amount of individuals who do not  
6 renew. So, this could be a number that's already been there, we  
7 just don't know.

8           So, these are individuals who have not renewed since  
9 February of 2020. So, approximately 8,000 were LPNs and RNs;  
10 15,000 CNAs; and 16,000 MTs. MTs, I'm not too concerned about  
11 because we usually have a period when they don't renew. There's  
12 usually a lot, and a lot of times it's because they're going on  
13 to do their CNAs. So, that number doesn't bother me. The two  
14 numbers that do, however, are the RNs, LPNs, as well as the  
15 CNAs. So, moving forward we will be looking at these numbers  
16 moving forward so that we can start tracking and do an analysis  
17 of it.

18           The Maryland Department of Health sent out a survey  
19 to all the individuals who are non-renewed. So, once I receive  
20 that feedback from the survey, I will let everyone know what it  
21 is. Just asking them, Gary and I assisted them with pulling a

1 survey together as far as why did the individuals leave. Now  
2 remember, we've been in COVID since March of 2020, right? And  
3 so, a lot of it can be people leave the profession. It's been  
4 taxing, you know? Throughout the country we've had suicides,  
5 we've had everything else. So, COVID has really done some  
6 damage in the nursing field. Individuals could have passed  
7 away. They could have moved to another state. We had a lot of  
8 people endorse in. So, that's possible. It could be some other  
9 reasons, they want to retire, whatever the case may be. So,  
10 hopefully that survey that MDH has put out for us will be able  
11 to provide us with some answers to that.

12 The next area is, I think, a win-win for the  
13 Maryland State as a whole. I have been elected into the  
14 National Counsel of State Boards of Nursing Board of Directors.

15 (Applause)

16 MS. EVANS: Thank you, as the Area 4 Director. So,  
17 that covers Maryland and all the up the east coast to the New  
18 England states.

19 Secondly, I was also selected to be a member of the  
20 National Advisory Council on Nursing Education and Practice.

21 (Applause)

1 MS. EVANS: So, I think it's a win-win for our Board  
2 for the amount of information that I learn that I can bring  
3 back, and a win-win for Maryland because we haven't been in  
4 these avenues for a very long time. So, I'm just happy to be  
5 able to represent Maryland and, of course, our Board, which is  
6 my favorite. I'm a little biased. But I think that will be a  
7 win-win for us with that.

8 One most important thing that's going on beginning  
9 tomorrow is that our website will be shut down. It's going  
10 through modernization with Share Point, and it will be down for  
11 three weeks. We will have a notice on there, so, just to let  
12 you know about that. Having said that today, I'm asking IT to  
13 remove  
14 - update our website to remove federal tax ID numbers. We no  
15 longer can accept that. It's not part of the - Mike, what's the  
16 Health Occupation Code?

17 MR. CONTI: It's the Family Law Article, Section  
18 10-119.3.

19 MS. EVANS: Okay. So, we can only accept Social  
20 Security numbers, okay? Yes, Dr. Hill?

21 MS. ROBIN HILL: With the website being down does

1 that mean we can't look up nursing license numbers?

2 MS. EVANS: No, we just can't make changes. You can  
3 still look up nursing. Everything else will be there as they  
4 migrate to the new Share Point. We just can't make any updates  
5 at all.

6 MS. STEELE: So, renewals won't be affected either?

7 MS. EVANS: No, nothing will be affected as far as  
8 looking up a license or renewing online, or initial applications  
9 that are online.

10 So, I just wanted to make everyone aware about the  
11 federal tax ID. Plus, it's not a part of NLC either, the  
12 nursing licensure compact.

13 NLC held its annual meeting last week as well as  
14 NCSBN. Long days, huh, Gary?

15 MR. HICKS: I'd say so.

16 MS. EVANS: The last item is, there are a lot of  
17 nurse practitioners getting scam calls from someone stating that  
18 they work for the Board of Nursing, and they send them a letter  
19 that is not on our letterhead. It's on our old letterhead, not  
20 our current letterhead. And so, what they're looking for is the  
21 DEA numbers. And they say that if you don't do this that we

1 have a case against them, we need their numbers. We would never  
2 ask for that, one, because that's not our area, that goes  
3 through DEA - and who's the other person, Rhonda?

4 MR. CONTI: OCSA.

5 MS. EVANS: OCSA, thank you. OCSA. So, I just want  
6 everyone to know that it's on our website so that everyone knows  
7 as far as any advanced care nurse practitioner or whoever has  
8 their DEA. But I just wanted to say it so that constituents who  
9 are on the call are aware that it is a scam.

10 That's all for now.

11 MR. HICKS: That was a lot. Any questions for  
12 Karen?

13 MS. STEELE: Congratulations.

14 MR. HICKS: That's great for Maryland and for the  
15 Maryland Board of Nursing.

16 MS. EVANS: Thank you.

17 MR. HICKS: And, you know, just a lot of thanks to  
18 Karen and Mike, over the last couple of weeks just trying to  
19 navigate through this massive number of folks that have not  
20 renewed and the Secretary, you know, weekly calls with the  
21 Secretary's Office to try to understand where we are and what we

1 need to do to get these folks recertified or renewed in their  
2 licenses. So, a lot of work has been done over the last couple  
3 of weeks. So, thank you both for doing that.

4 So, if I can get a motion to approve the Consent  
5 Agenda?

6 MS. ROBIN HILL: So moved, Dr. Hill.

7 MR. HICKS: Dr. Hill.

8 MS. POLK: Second, Polk.

9 MR. HICKS: Polk. All in favor?

10 ALL: Aye.

11 MR. HICKS: Opposed?

12 (No oppositions)

13 MR. HICKS: Motion carries. And for the record,  
14 that's Robin Hill, Dr. Robin Hill.

15 Moving on, Items for Removal from the Consent  
16 Agenda?

17 MS. EVANS: All right. We have a forensic nurses',  
18 FNE, Adult and Pediatric Training Program that was submitted by  
19 Jennifer McNew for seeking approval for Meritus Medical Center  
20 for an initial FNE Adult and Pediatric Training Program. They  
21 already have an Adult, but they want to do an Adult and

1 Pediatric course. They have met all of the requirements under  
2 COMAR 10.27.21 for the forensics. They have all of the  
3 information. They are also using the current curriculum that  
4 was approved - one was approved in March, the Adult was approved  
5 in March, the Pediatric was approved in May or June. So, they  
6 are using the current curriculum that was approved by the Board.  
7 You have the checklist in your documents and you will see that  
8 they have met everything.

9 So, I am asking for approval for the Adult and  
10 Pediatric Training Programs submitted by Jennifer McNew.

11 Can I ask, Jennifer, are you on the call?

12 (No response)

13 MS. EVANS: Okay.

14 MR. HICKS: All right. Is there a motion to approve  
15 Meritus Medical Center's FNE both for Adult and Pediatric  
16 Program?

17 MS. GIBBONS-BAKER: So moved, Gibbons-Baker.

18 MR. HICKS: Gibbons-Baker.

19 MS. STEELE: Second, Steele.

20 MR. HICKS: Steele. All in favor?

21 ALL: Aye.

1 MR. HICKS: Opposed?

2 (No oppositions)

3 MR. HICKS: Motion carries. We will move down to 4,  
4 Education. Dr. Green, are you -- you're here. Okay.

5 MS. GREEN: Good morning.

6 MR. HICKS: Sorry, I didn't see you sitting in the  
7 corner, Dr. Green.

8 MS. GREEN: You get to really see me these days.

9 (Laughter)

10 MS. GREEN: There are two items that we would like  
11 to bring to your attention for the minutes. I'm sorry, my name  
12 is Dr. Sheila Green, and I am the education consultant with the  
13 Maryland Board of Nursing, and I am very delighted to be here  
14 with you this morning.

15 Our first item, 4A, is a report on Washington  
16 Adventist University and the collaborative virtual site visit  
17 report that we completed. The actual visit went March 31st  
18 through April 2nd of 2021. And this was collaborative because  
19 we were there on virtual at the same time that CCNE, the  
20 Commission for Collegiate Nursing Education, was engaged in  
21 their site visit as well. So, we did a collaborative visit

1 together.

2           This is Dr. Tijuana Griffin. She is the director of  
3 nursing at Washington Adventist University, and we also have  
4 Cohost Kisinzu, who is also from Washington Adventist University  
5 this morning. So, we thank you for being here, and you may join  
6 us here. Yes, thank you.

7           The documents that you have, 4A, references the fact  
8 that Dr. Kennedy and I finished the collaborative virtual site  
9 visit with the peer review of the Commission on Collegiate  
10 Nursing Education. The purpose of our visit, of course, was to  
11 assess the programs and nursing education operations at  
12 Washington Adventist in accordance with COMAR 10.27.03.02  
13 through .16 in Nursing Education Programs, as well as Program  
14 Evaluation falling under COMAR 10.27.03.15(a) through (d), and  
15 .16. You're looking at the annual review and unacceptable  
16 performance on NCLEX licensure examination.

17           Our findings were that the Washington Adventist  
18 University's Entry Into Practice BSN Nursing Education Program  
19 met COMAR 10.27.03.02 through .15(a) through (d), Program  
20 Evaluation, and all of nursing program evaluations. The annual  
21 review, which is under COMAR 10.27.03.16(a) to (b), they did not

1 meet our COMAR 10.27.03.16(d), which is, Unacceptable  
2 Performance on Licensure Examination.

3           We put into our report a special note to say that  
4 the Washington Adventist University is currently operating under  
5 conditional status in accordance with COMAR 10.27.03.15 and .16  
6 requirements. The program obtained Board approval November 18th  
7 of 2020 for their submitted Action Plan, which is Attachment A  
8 to the document that you have in front of you. And that Action  
9 Plan addressed the components here; the curriculum revisions,  
10 the review of faculty policies, review and additions of student  
11 learning outcomes and course outcomes, and more robust use of  
12 ATI resources, test taking strategies, NCLEX-RN examination  
13 preparation. They've embarked on a purchase of new equipment,  
14 particularly computers for students use, enriched classroom  
15 learning modalities, the realignment of philosophy and  
16 objectives for the program outcomes and evaluation, the  
17 engagement and use of a Board-approved consultant, that was Dr.  
18 Bonita Jenkins, which our Board did approve prior to utilization  
19 of her services. Dr. Griffin, our director of nursing program  
20 at Washington Adventist, submitted a copy of this CCNE visit  
21 report summary to the Board. That is also included in your

1 packet, and that occurred April 28th. They met all of the CCNE  
2 standards. The final CCNE determination will be provided to  
3 Washington Adventist in October of 2021, and they in turn will  
4 provide the Board a copy of the letter that they receive from  
5 CCNE regarding their standing.

6 Our recommendation, we've brought forward to the  
7 Practice and Education Committee on August 13, 2021 requesting  
8 approval and advancement to the Board for these recommendations  
9 that are before you now regarding Washington Adventist  
10 University. Our request is that the Board consider continuation  
11 of the conditional approval status for Washington Adventist  
12 University's Nursing Education Program in accordance with COMAR  
13 10.27.03.16(d). And Bullet 2, accept the Maryland Board of  
14 Nursing virtual site visit conducted in March 31st to April 2nd  
15 as a required site visit, and accept the current report as  
16 identified in COMAR 10.27.03.16(d) (3) and (b). This is  
17 particularly - the second bullet is a particular interest to you  
18 because, number one, we are in compliance with the site visit  
19 requirements for Washington Adventist University; and, number  
20 two, we wanted to relate that with the COMAR requirement whereby  
21 a program that's in conditional status would be reviewed and

1 part of a site visit, which we now want to duly couple those  
2 together as a part of what we've accomplished with this  
3 particular visit if the Board is amenable to doing that. Number  
4 three, that the Board consider requiring a submission of an  
5 Action Plan Progress Report from Washington Adventist University  
6 on October 22, 2021. That would give us about a year, because  
7 the Board approved the initial Action Plan in November of 2020,  
8 and October 2021 brings us right around the annual time at which  
9 time our team within the Board staff would look at the report  
10 and provide that as a submission summary follow-up to the Board  
11 probably in November of 2021. And then finally, four, based on  
12 the findings of the Action Plan Progress Report due October 2,  
13 2021 the Board will determine any additional requirements in  
14 accordance with COMAR 10.27.03.16(d) regarding annual review and  
15 acceptable licensure information. And if there may need to be  
16 advancement to 10.27.03.17 removal from the approval list, then  
17 that would be post the progress report that the Board would  
18 receive in November of this year.

19 Are there any questions that I can entertain? All  
20 of the supporting documents are here in terms of the actual site  
21 visit report as well as the Action Plan report, Attachment A,

1 and the CCNE report is Attachment B. And if there is anything  
2 else you all would like to add, please do so at this time.

3 MS. KISINZU: Thank you. I think we would like to  
4 express our appreciation. There's been an observation by John  
5 Maxwell, who is a recognized leader, that no organization rises  
6 any higher than its leaders, and Dr. Evans, Dr. Green, Dr.  
7 Kennedy represent in a stellar, compelling, rigorous way the  
8 State's commitment to excellence in healthcare and through  
9 excellence in nursing education.

10 It has been a rigorous renewal for us at Washington  
11 Adventist University, but it is humbly represented to you as a  
12 renewal. We are grateful to be able to certify to you that when  
13 students graduate from our nursing program that we have two  
14 benchmarks that confirm that they are NCLEX ready. What we have  
15 found, especially during this last year with the pandemic and  
16 even before, is that for our students the priorities of life's  
17 demands from a multi-cultural perspective impact their  
18 mindfulness of the importance of testing within 60 days of  
19 graduation. They come from diverse cultures. They are often  
20 influenced and expected to respond to those demands of those  
21 cultures. And blending that mindfulness of the sweetness of

1 those cultures they will need complete in a timely fashion that  
2 which they started on behalf of their own well-being and on  
3 behalf of those that they serve is a commitment that we are  
4 anchoring in their minds with greater intentionality.

5           So, we continue to also include in our review, not  
6 only a mindfulness of the mindset of our students, and degree  
7 progression requirements and competency requirements, but was  
8 there any other barrier that was keeping our students from  
9 testing in a timely fashion. At the University we have a  
10 practice that we had to implement by the Board that students do  
11 not have access to their transcripts or confirmation of degree  
12 confirm unless they paid off their balance because there were  
13 just huge balances that were being accumulated without that in  
14 place. However, when we noticed that our nursing students were  
15 not testing in a timely fashion, I was blessed to be able to go  
16 to the president, go to the Board and ask that we be able to  
17 waive that requirement for nursing students, such that we can  
18 let the Board know immediately upon confirmation of their  
19 degrees that they indeed were credentialled and ready to be able  
20 to be licensed in a timely fashion pending Dr. Griffin's  
21 signature, which is a huge statement by the Board on behalf of

1 the commitment of timely degree completion for our students.

2 We are blessed to also serve within a collaborative  
3 partnership with an entity called Adventist Healthcare System.  
4 It is the largest private employer in Montgomery County. We  
5 were birthed together in 1904, and nursing was their first - at  
6 that time it was a hospital-based program, as we know, because  
7 WAU program is the oldest here in the State of Maryland. And we  
8 quarterly with their VP for HR and with their nursing directors  
9 - I think you all know that I am a nurse. I think I shared that  
10 with you in the past. I love all the students, but there's a  
11 special love that I have for the renewal of this program because  
12 I think we all agree that never before has there been a need for  
13 healing in our state and our country and in our world.

14 Adventist Healthcare has made a formal commitment to  
15 the vibrancy of the program at WAU. They did so this year by  
16 giving \$100,000; 50,000 of that was for scholarships. We meet  
17 with the nursing directors for each of their entities so that  
18 there is a preferred pathway for hiring for our graduates. The  
19 graduate schools, they can confirm as competent, but also  
20 reflecting the compassion as expressed for the lack in teachings  
21 of Christ. They also gave \$50,000 for an endowed share in honor

1 of the work that Dr. Griffin has done for the program's renewal.  
2 When I met with their vice president for HR two weeks ago, they  
3 renewed that commitment.

4 We recognize that the credibility of the nursing  
5 students in a shared commitment, and we are confident that  
6 three-year affirmation through your continued support that not  
7 only will the standards for the Maryland Board of Nursing be met  
8 but, once again, the benchmark for the program of nursing at WAU  
9 that a 100 percent passage rate will be re-attained and  
10 sustained for such a time as this. Thank you.

11 MR. HICKS: Are there any questions for Dr. Green or  
12 Dr. Griffin?

13 (No questions posed)

14 MR. HICKS: I just have one question, and that is in  
15 terms of the report that's going to come in October. Is knowing  
16 that the Next Gen is coming as a new testing method, will that  
17 report reflect what your intent is to prepare your students for  
18 Next Gen? Because it's just going to get a little bit tougher,  
19 especially if you have a population of students that are  
20 stretching theirtime of testing.

21 MS. GRIFFIN: Yes, actually this summer we as a team

1 has had workshops ourselves to prepare us for the Next Gen. We  
2 are also having study groups weekly to prepare us to become  
3 certified nurse educators. And by God's grace we are in the  
4 process of hiring - and the first word I want to use for her is  
5 "caring". There's a lot of rules and regulations with nursing,  
6 but because of our population there's an extra need that they  
7 have, and so we are hiring a retention coach and she's known to  
8 be caring, but yet she is still firm. So, we're looking at that  
9 aggressively.

10           The Action Plan that we submitted last year has  
11 taken a 120 degree turn because we reached out to a school  
12 called South University, who uses ATI. We reached out to Dr.  
13 Jay Griffin, who's a specialist, who is also is meeting with our  
14 priest. That's amazing. This is a process that's been  
15 humbling. It's a process that takes quite a bit of time and  
16 energy. So, our mindset is for the success of the students.  
17 The emotions that they've experienced afterward have not been  
18 successful. It's not been pleasant, and we don't want that.  
19 And so, we're looking at Next Gen aggressively, really, to see  
20 how we can make it work, and by God's grace we will. Yes, we  
21 are looking at it aggressively.

1 MS. GREEN: That is incorporated in the initial  
2 Action Plan that we have in our possession now. It will be  
3 interesting to see what the progress report will show because  
4 that Next Generation is coming quickly now.

5 MR. HICKS: Correct, and you're not alone. You're  
6 not going to be alone in this, but knowing that you're already  
7 having some struggles with success rates, Next Gen is kind of  
8 going to add another layer to that.

9 MS. GRIFFIN: It is. There are multiple reading  
10 levels. And that was one of the things that we were talking  
11 about that some of the students, what can we do to strengthen  
12 it? But at the same time, if they didn't meet criteria, it's  
13 painful to say no now, but it's painful later if they have to  
14 bail out their first semester or get to the end of the program  
15 and they're not successful. So, we're really scrutinized in our  
16 criteria for admission. We are holding to it like we have to  
17 for their sake as well as ours, and then to give them their  
18 foundation. Yeah, it's important.

19 MR. HICKS: I would like to see in that report in  
20 October that what exactly you have done in terms of getting your  
21 students prepared for Next Gen, but also your faculty, right, to

1 make sure that your faculty is, you know, prepared for testing  
2 methods like Next Gen, so.

3 MS. KISINZU: Thank you.

4 MR. HICKS: Any other questions?

5 (No questions posed)

6 MR. HICKS: All right. So, we will -there's  
7 actually, I think, three votes here. The first is to accept the  
8 virtual visit report that Dr. Green has outlined for Washington  
9 Adventist from March 31st through April the 2nd.

10 Is there a motion to accept that report?

11 MS. DILLON: So moved, Dillon.

12 MR. HICKS: Dillon. Is there a second?

13 MS. HARROD-OWUAMANA: Second,  
14 Harrod-Owuamana.

15 MR. HICKS: Harrod-Owuamana. All in favor?

16 ALL: Aye.

17 MR. HICKS: Opposed?

18 (No oppositions)

19 MR. HICKS: Motion carries. And then, the next is a  
20 motion to approve Washington Adventist to continue their program  
21 under a conditional status.

1 MS. DILLON: So moved, Dillon.

2 MR. HICKS: Dillon.

3 MS. POLK: Second, Polk.

4 MR. HICKS: Polk. All in favor?

5 ALL: Aye.

6 MR. HICKS: Opposed?

7 (No oppositions)

8 MR. HICKS: Motion carries. And then, I think the

9 third was to approve the requirement of submission of the Action

10 Plan by Washington Adventist by 10/2021. That's correct, right?

11 MS. GREEN: That's correct, the Action Plan Progress

12 Report, yes.

13 MR. HICKS: Okay.

14 MS. ROBIN HILL: So moved, Robin Hill.

15 MR. HICKS: Dr. Robin Hill.

16 MS. STEELE: Second, Steele.

17 MR. HICKS: Steele. All in favor?

18 ALL: Aye.

19 MR. HICKS: Opposed?

20 (No oppositions)

21 MR. HICKS: Motion carries. I think that is

1 everything, correct?

2 MS. GREEN: That is correct. Thank you very much.

3 MS. KISINZU: Thank you all.

4 MS. GRIFFIN: Thank you so much.

5 MR. HICKS: Thank you.

6 MS. GREEN: The second report, 4B, from the  
7 Education Department is the fiscal year 2021 NCLEX-RN and  
8 NCLEX-PN performance summary report. And just to provide  
9 background to the Board, according to the memorandum attached,  
10 you have the actual summary reports. All Maryland-based nursing  
11 education programs received their four quarterly reports, their  
12 calendar year reports, and their fiscal year summary reports  
13 during the current fiscal year 2021 - well, it just ended any  
14 way - in accordance with COMAR 10.27.03.16(b).

15 Our findings were that there are four baccalaureate  
16 nursing education programs that did not meet COMAR  
17 10.27.03.16(b) requirements; Bowie State University, Morgan  
18 State University, Notre Dame of Maryland University, and  
19 Washington Adventist University. All remaining nursing  
20 education programs met COMAR 10.27.03.16(b), and that includes  
21 our baccalaureate programs, our masters into practice programs,

1 and our associate degree programs.

2           Number two finding was Universidad del Turabo of  
3 Capitol Area Campus, also known as Anna G. Mendez del Turabo  
4 Campus, was a baccalaureate degree program that closed in the  
5 State of Maryland December 31, 2020 in accordance with the  
6 Maryland Higher Education Commission and the Maryland Board of  
7 Nursing regulatory requirements related to voluntary program  
8 closure. Both Maryland organizations worked very closely and  
9 collaboratively with this program to ensure the teach out  
10 requirements and the final student educational requirements were  
11 met.

12           Our third finding from this report is that Prince  
13 George's Community College met two consecutive fiscal years with  
14 pass rates above the Maryland standard requirements. The Action  
15 Plan progress report and the onboarding report were submitted in  
16 June, 2021 from Mrs. Vivian Kuawogai, who's at the helm of the  
17 program at Prince George's Community College. And this was  
18 required as a part of the Board-approved site visit report that  
19 occurred in April 28th of 2021. The Prince George's Community  
20 College's associate degree program has met the requirements  
21 stipulated by the Ad Hoc Committee - Board Committee, I'm sorry,

1 and those required as follow-up to the virtual site visit.  
2 Attached to your packet, Attachments A and B, are the progress  
3 reports for onboarding. They have done an incredible job in  
4 recruiting. They have brought on nine new faculty members and  
5 have successfully completed the onboarding process. The eight  
6 have stayed, the one did leave for personal reasons, and they  
7 have been in the process of finalizing the recruitment for the  
8 replacement for that person.

9 In Section A is the onboarding plan with Mrs.  
10 Kuawogai's summary of what has occurred since the onboarding  
11 plan was initiated. And then Attachment B is the Action Plan  
12 progress report. And if you'll note under Attachment B there is  
13 a summary of the COMAR, Prince George's Community College, where  
14 we looked at the standards under 10.27.03. And these are  
15 summaries of the areas that are included in the Action Plan  
16 progress report that's attached to this. I thought it would be  
17 helpful for the Board to have a summation of this information to  
18 know what has been met, and they have met all requirements.  
19 They've done a remarkable job in faculty development, student  
20 educational requirements, and they had achieved - they advanced  
21 from ACEN from advanced from accredited with good cause to full

1 accreditation, and their next ACEN visit is 2024. They have  
2 introduced an incredible amount of development, as I mentioned  
3 earlier, for faculty as well as enhanced a lot of information  
4 and requirements in learning for students. The resource usage  
5 has expanded at Prince George's Community College. The  
6 curriculum, they have done extensive mapping, they have looked  
7 at curriculum gap analyses. They did engage a  
8 Board-approved consultant, Dr. Janet McMahon, who worked with  
9 them, and this was in 2016-2017 academic year, in terms of what  
10 they needed to consider. And they have also engaged other  
11 consultants across the country like Dr. Linda Caputi, and they  
12 worked with a nurse team as well, and now their NCLEX success  
13 for fiscal year 2020 was 86.24 percent, and in fiscal year 2021,  
14 88.89 percent. This information has been reviewed, both the  
15 actual performance for fiscal year 2021. Both the RN programs  
16 and the LPN programs are before you in addition to the things  
17 that we thought would be helpful in preparation for looking at  
18 Prince George's Community College.

19 Our final recommendations that request that the  
20 Board consider, first of all, is to approve the fiscal year 2021  
21 NCLEX-RN and NCLEX-PN reports. They have been verified,

1 scrutinized, and they are accurately portrayed. The second is  
2 to notify in writing the four nursing education programs that  
3 did not meet the Maryland Board of Nursing pass rate  
4 requirements with inclusion of COMAR 10.27.03.16 and COMAR  
5 10.27.03.17 relevant to each program. The third bullet requests  
6 the considerations to remove the current conditional status and  
7 reinstate Prince George's Community College to full approval  
8 status in accordance with COMAR 10.27.03.16(b). And the fourth  
9 is to officially recognize the Universidad del Turabo Capitol  
10 Area Campus, also known as Ana G. Mendez del Turabo Campus, as a  
11 closed nursing education program in the State of Maryland.

12 I would like to ask, Mrs. Kuawogai, are you on the  
13 line?

14 MS. KUAWOGAI: Good morning, Dr. Green, I am.

15 MS. GREEN: Very good.

16 MS. KUAWOGAI: I would like to thank all of you very  
17 much for all the support from the Board. I also have on here  
18 with me the dean of health sciences - I'm sorry, health,  
19 wellness, and hospitality division colleague.

20 Angie, can you hear me? Would you like to say  
21 something?

1 MS. ANDERSON: Hi, I'm here. Thank you for all your  
2 support.

3 MS. GREEN: Thank you. We thank you for being  
4 present on the line for this part of the report. If there's  
5 anything else you would like to add just let us know, the Board  
6 is right here.

7 MS. KUAWOGAI: I would just like to add I heard a  
8 question about Next Gen, and I want the Board to know that we  
9 actually had a workshop and we looked at all the nursing  
10 programs across the state. We are actively working and  
11 beginning to access for training on clinical instructions. So,  
12 we are actively working, and I really appreciate your support  
13 and the support of the Education Committee.

14 MS. GREEN: Thank you. Are there any questions from  
15 the Board?

16 MR. HICKS: Are there any questions for Dr. Green?

17 (No questions posed)

18 MR. HICKS: All right. So, the first is that a  
19 motion to accept or approve the 2021 NCLEX report presented by  
20 Dr. Green.

21 MS. GIBBONS-BAKER: So moved, Gibbons-Baker.

1 MS. DILLON: Second, Dillon.

2 MR. HICKS: Gibbons-Baker, Dillon. All in favor?

3 ALL: Aye.

4 MR. HICKS: Opposed?

5 (No oppositions)

6 MR. HICKS: Motion carries. Next, motion to approve

7 the Education Committee to notify the four programs, four BSN

8 programs, that did not meet the Board minimum requirements.

9 MS. STEELE: So moved, Steele.

10 MR. HICKS: Steele.

11 MS. HARROD-OWUAMANA: Harrod-Owuamana.

12 MR. HICKS: Harrod-Owuamana. All in favor?

13 ALL: Aye.

14 MR. HICKS: Opposed?

15 (No oppositions)

16 MR. HICKS: Motion carries. Third is a motion to

17 remove the conditional status of Prince George's Community

18 College and put them back on full approval status.

19 MS. STEELE: So moved, Steele.

20 MR. HICKS: Steele.

21 MS. GIBBONS-BAKER: Gibbons-Baker.

1 MR. HICKS: Gibbons-Baker. All in favor?

2 ALL: Aye.

3 MR. HICKS: Opposed?

4 (No oppositions)

5 MR. HICKS: Motion carries. And the final is a  
6 motion to acknowledge the Universidad del Turabo is officially  
7 closed. So, is there a motion to accept?

8 MS. HARROD-OWUAMANA: Harrod-Owuamana.

9 MR. HICKS: Harrod-Owuamana.

10 MS. DILLON: Second, Dillon.

11 MR. HICKS: Dillon. All in favor?

12 ALL: Aye.

13 MR. HICKS: Opposed?

14 (No oppositions)

15 MR. HICKS: Motion carries. Thank you.

16 MS. GREEN: Thank you. I just want to give  
17 accolades to us and to MHEC. Just so the Board is aware, that  
18 was a very intense period working with Universidad del Turabo,  
19 and our opportunity to meet with them at least monthly, because  
20 we had to safeguard our citizens of Maryland, i.e., the students  
21 in the program as well as the integrity of the program as they

1 were completing the teach out and the preparation of where these  
2 graduates or those who still needed to finish the program that  
3 they started, where they could go. And it was a valiant  
4 opportunity to look at the collaborative relationship between  
5 Maryland Higher Education Committee and the Board of Nursing in  
6 making sure that we were in synch with what was going on with  
7 that program.

8 MR. HICKS: Dr. Green, do you know how many students  
9 were affected by that?

10 MS. GREEN: It was at least 100 students that were  
11 affected. It was an interesting process looking at contacts  
12 with various schools in the area. And also, Universidad has an  
13 online component still operating in Florida, and many of the  
14 graduates finished through that avenue as well.

15 And so, we did all we could to not have anyone fall  
16 through the cracks. That was a major concern for us because we  
17 know how easily it can happen in a nursing education  
18 environment, any environment. So, it was, indeed, a wonderful  
19 working collaborative working relationship between the two  
20 organizations.

21 MR. HICKS: Good.

1 MS. GREEN: Yes, thank you. Thank you all very  
2 much.

3 MR. HICKS: Thank you. Karen?

4 MS. EVANS: I forgot to add something very  
5 important, and that is our Board president was elected to be  
6 part of NCSBN NCLEX item writer.

7 MR. HICKS: Correct.

8 (Applause)

9 MS. EVANS: I'm sorry. I knew there was something  
10 else, but I couldn't remember until Dr. Green spoke. And then I  
11 was like, 'Oh, my gosh, I forgot.' So, the Board is moving and  
12 we're moving in a positive direction. So, I thank you for going  
13 out there with me.

14 MR. HICKS: No problem. We will move onto the next  
15 item, which is Certification. Jaray?

16 MS. RICHARDSON: Good morning. Today I am going to  
17 do annual statistics for the fiscal years 2018 through 2021.

18 For certified nursing assistants in fiscal year 2018  
19 we had 180,660; in 2019 it was a 1.04 percent increase; and 2020  
20 it was a 1.03 increase; and in 2021 we have 203,303 CNAs, which  
21 is a 1.4 percent increase. For geriatric nursing assistants, in

1 fiscal year 2018 we had 80,858; in 2019 it was a 1.03 increase;  
2 and fiscal year 2020 it was a 1.02 increase; fiscal year 2021 it  
3 was a 1.1 percent increase; and we have 87,228. Certified  
4 medicine aides in fiscal year 2018 we had 4,728; in fiscal year  
5 2019 we had a 1.2 increase; and fiscal year 2020 we had a 1.01  
6 increase; and in 2021 we had a 1 percent increase, and we have  
7 4,885 certified medicine aides. For home health aides, in  
8 fiscal year 2018 we had 550; in 2019 we had a .99 percent  
9 decrease. On the form it says increase, which is an error, it's  
10 a decrease. In 2019 there's a 1 percent decrease; and in 2021  
11 it was a 1 percent decrease, and we have 549 home health aides.  
12 Dialysis technicians, fiscal year 2018 we had 2,947; in fiscal  
13 year 2019 it was a 1.09 increase; in 2020 it was a 1.06  
14 increase; and 2021 it was a 1.8 percent increase, we have 3,745  
15 dialysis technicians. School health aides, in fiscal year 2018  
16 we had 917; in 2019 it was a 1.19 percent increase; in fiscal  
17 year 2020 it was a 1 percent increase; in fiscal year 2021 it  
18 was a 1 percent increase, and we have 1,101 school health aides.  
19 For medication technicians, in fiscal year 2018 we had 155,748;  
20 fiscal year 2019 it was a 1.06 increase; fiscal year 2020 it was  
21 a 1.04 increase; and fiscal year 2021 it was a 1.4 percent

1 increase, we have 179,318 medication technicians. That's it.

2 MR. HICKS: All right. Are there any questions for  
3 Jaray?

4 MS. STEELE: And these are all active?

5 MS. RICHARDSON: Yes.

6 MR. HICKS: Did you have a follow-up for that,  
7 Jenell?

8 MS. STEELE: No.

9 MR. HICKS: Any other questions?

10 (No questions posed)

11 MR. HICKS: All right, hearing none. Thank you.

12 MS. RICHARDSON: All right, thank you.

13 MR. HICKS: We will move onto Licensure and Advanced  
14 Practice. Kellie Smith?

15 MS. SMITH: Good morning.

16 MR. HICKS: Good morning.

17 MS. SMITH: I will be presenting the annual  
18 statistics for fiscal year 2018 to 2021. In fiscal year 2018  
19 for registered nurse by exam we had 2,634; 2019, 1.02 increase;  
20 fiscal year 2020 we had 1.01 percent increase; by fiscal year  
21 2021 we had 11.5 percent increase with a total of 3,137. For

1 registered nurse by endorsement in fiscal year 2018 we had  
2 2,509; fiscal year 2019 we had an increase of 1.076 percent; in  
3 fiscal year 2020 we had a 0.75 percent increase; for fiscal year  
4 2021 we had a 1.19 percent increase, we are at 2,423. For  
5 licensed practical nurse by exam for fiscal year 2018 we were at  
6 297; 2019 we had an increase of 1.28 percent increase; for  
7 fiscal year 2020 we had 1.02 increase; and by fiscal year 2021  
8 we had a 1.0 percent increase at 417. For licensed practical  
9 nurse by endorsement, fiscal year 2018 we had 254; fiscal year  
10 2019 we had a 0.99 decrease; in fiscal year 2020 we had a 0.68  
11 decrease; and by 2021 we had a 0.84 decrease, and we are at 144.  
12 Advanced compact nurses for fiscal year 2018 we were at 265;  
13 for fiscal year 2019 we had a 1.56 percent increase; 2020, 1.07  
14 increase; and by 2021 we had a 1.30 increase, we are at 575.  
15 Advanced practice nurses in all categories in fiscal year 2018  
16 we had 1,014; fiscal year 2019 we had a 1.24 percent increase;  
17 2020 we had 0.98 percent decrease; and in 2021 we had a 1.06  
18 percent increase, and we are at 1,313. Total advanced practice  
19 nurses, APRN, in fiscal year 2018 we had 1,279; fiscal year 2019  
20 we had a 1.31 percent increase; 2020 we had a 1.0 increase; and  
21 in 2021 we had a 0.11 percent increase, and we are at 1,888.

1 Forensic nurse examiners for fiscal year 2018 we had 70; 2019,  
2 70 as well with zero increase; fiscal year 2020 we had a 0.73  
3 percent increase; in 2021 we had a 1.02 percent increase, and we  
4 are at 52. Worker's Compensation medical case managers in 2018  
5 we had 110; in 2019 we had an increase of 1.23 percent; in  
6 fiscal year 2020 we had a 0.61 decrease; and in fiscal year 2021  
7 we had a 0.72 percent decrease.

8 This is for renewals, the next section. In 2018 we  
9 had 4,903. We had an increase of 0.92 percent in fiscal year  
10 2019; fiscal year 2020 we had an increase of 7.08 percent; and  
11 by 2020 we had a 1.33 percent increase, and we are at 42,339.  
12 Licensed practical nurse, fiscal year 2018 we had 1,058; in 2019  
13 we had a decrease of 0.9 percent; in 2020 we had an increase of  
14 4.05 percent; and in fiscal year 2021 we had an increase of 1.3  
15 percent, 5,418. Advanced compact in fiscal year 2018 we had  
16 101; in fiscal year 2019 we had an increase of 1.36 percent; in  
17 fiscal year 2020 we had 2.89 percent increase; and in fiscal  
18 year 2021 we had a 1.14 percent increase. Advanced practice  
19 nurses in all categories, fiscal year 2018 has 439 with an  
20 increase of 1.10 increase in 2019; in fiscal year 2020 we had an  
21 increase of 6.7 percent; in 2021 we had an increase of 1.48

1 percent, we are at 4,804. The total advanced practice  
2 registered nurse, APRN, for 2018 we had 540; 2019 we had an  
3 increase of 1.5 percent; in fiscal year 2020 we had an increase  
4 of 5.86 percent; and in 2021 fiscal year we had a 1.44 increase  
5 with a total of 5,255. Forensic nurse examiners for fiscal year  
6 2018 we had 33 with an increase of 2.09 percent in fiscal year  
7 2019; in fiscal year 2020 we had an increase of 1.14 percent  
8 increase; and in fiscal year 2021 we had a decrease of 0.85  
9 percent, and we are at 67. Worker's Compensation medical case  
10 managers for fiscal year 2018 we had 72 with an increase of 1.38  
11 percent in fiscal year 2019; in 2020 we had an increase of 1.73  
12 percent; and in 2021 fiscal year we had an increase of 1.27  
13 percent with a total of 217.

14 MS. EVANS: Thank you, Kellie. So, for Kellie and  
15 Jaray, let me just clarify the numbers. So, those are the  
16 amount of applications that we received that year, not the total  
17 amount that we have in our system. Does that help you? I was  
18 looking at the faces.

19 MS. STEELE: So, just to clarify for 5A, this is  
20 203,000 applicants in 2021 for the CNAs?

21 MR. CONTI: I don't think so. I think the first one

1 is the overall number of certificate holders.

2 MS. EVANS: Kellie's is the applications and Jaray's  
3 is the overall numbers.

4 MS. STEELE: It would be helpful to see the  
5 statistics presented in this same way or labeled with more  
6 information.

7 MS. EVANS: Like a key?

8 MS. STEELE: Like a key, yes, to be able to absorb  
9 all of this and what she's saying.

10 MS. EVANS: Yes. So, I appreciate the feedback.  
11 Just know that I am trying to challenge the team members to  
12 provide better data to you. So, it's a work in progress. Thank  
13 you for the feedback.

14 MS. ROBIN HILL: I would be helpful to have Kellie's  
15 report put in the drive.

16 MS. EVANS: Yes, I didn't know it was not there. We  
17 will work on that as well. That's another work in progress.  
18 But, yes, we will. Because before you were just getting numbers  
19 and they really meant nothing, right?

20 MS. STEELE: Right.

21 MS. EVANS: So, our move is to provide information

1 to you. You're fine, Kellie.

2 (Laughter)

3 MS. SMITH: Thank you.

4 MS. SCOTT: Kellie didn't do the report.

5 MS. EVANS: Right, Kellie did not do these numbers.

6 She's filling in for someone. So, but I value that feedback and  
7 we will make sure that we do that. We want to make sure that  
8 when you come to Open Session that it's meaningful and not just  
9 numbers that's nice to know, but what does it mean. So, what  
10 I'm doing is, I'm moving to quarterly reports for statistics of  
11 numbers instead of doing that every month just so you can see  
12 what has happened during the quarter, and then we will move to  
13 the annual when we get to next July.

14 MS. STEELE: Thank you.

15 MS. HARROD-OWUAMANA: It is helpful this way.

16 MS. STEELE: So, Kellie, that means you may or may  
17 not be able to clarify this for me.

18 MS. EVANS: You can ask her.

19 MS. STEELE: On the renewals, what's the difference  
20 between the advanced practice nurse in all categories and total  
21 advanced practice nurses?

1 MS. HARROD-OWUAMANA: One says APRN and one says -

2 MS. EVANS: Well, it's probably because it will  
3 include Workmen's Comp as well as FNEs.

4 MS. STEELE: Okay.

5 MR. HICKS: It might be interesting to break that  
6 out a little bit.

7 MS. EVANS: Yes. Thank you for your feedback.

8 MS. STEELE: Thank you for clarifying.

9 MS. EVANS: No problem.

10 MR. HICKS: Any other questions.

11 MS. HARROD-OWUAMANA: I just didn't know what the  
12 numbers mean. So, I was just looking at the numbers like,  
13 'Whoa'.

14 MS. EVANS: Rhonda is going to have to put a key  
15 together to explain the numbers and the categories and  
16 everything. I talked to her about that. So, we thank you for  
17 participating in our infancy of moving forward.

18 MS. POLK: I do appreciate seeing the trend. So,  
19 the numbers are more meaningful in this report than previous  
20 reports that I've seen. I feel this is a building block and  
21 going in the right direction. Thank you to the team for putting

1 those together.

2 MS. EVANS: COVID has taught us a lot. For me,  
3 things that I had not been able to do when I first came onboard  
4 till now has taught us what we haven't done in the past as far  
5 as research, as far as tracking, and a few things that we're not  
6 doing that now we're going to be putting into practice. So, I  
7 thank you for your patience as we do these. So, I may be giving  
8 some of you a call as far as your tracking and researching  
9 things like that. So, I appreciate your patience.

10 MR. HICKS: Thank you.

11 MS. SMITH: You're welcome.

12 MR. HICKS: All right. We will move down to  
13 Legislative Affairs. Iman?

14 MS. FARID: Hi. Good morning, can everyone hear me?

15 MR. HICKS: Yep. We can hear you, Iman. Go ahead.

16 MS. FARID: Thank you. So, good morning everyone.  
17 Today I will be presenting an overview of the Board's 2021  
18 annual report. This report was submitted to the Department of  
19 Health by September 1st, and to the General Assembly by October  
20 1st. As this report is a bit lengthy, I will go over some  
21 sections superficially while others I will try to go more in

1 depth.

2           You will find, for starters, with this annual report  
3 in comparison to the ones that we submitted in the past that it  
4 is much more detailed. It's about 57 pages. This report not  
5 only includes the statistics that we are required to submit to  
6 the legislators, but it offers our constituents a better idea of  
7 the Board's operations as far as the goals and hardships the  
8 Board had to accomplish and overcome within this past year.

9           So, first I would like to draw your attention to  
10 Pages 2 through 5. These pages present an introduction to the  
11 Board's goals and its membership. Most of this information is  
12 already published on the Board's website. This report only  
13 consolidates that information. The new information that you  
14 will find within these pages are the vision statements, the core  
15 values, and initiatives. Just to go through the new  
16 information, the business statement currently reads, to serve as  
17 a national leader that works to inspire public confidence in the  
18 profession of nursing through championing regulatory excellence  
19 and revering human dignity. The core values include;  
20 accountability, customer service, equity, innovation, and  
21 integrity.

1           If you move onto to Page 3 you will find the Board's  
2 strategic goals for the next five years. The overall goals  
3 include; engagement, excellence in regulation, technology  
4 initiative, compliance, and accountability.

5           If you move to Pages 4 and 5 you will find a list of  
6 the Board members as they are currently published on the Board's  
7 website. You will also find a brief description of the make-up  
8 of the Board and who sits on the Board currently in terms of the  
9 discipline that the Board oversees.

10           If you turn to Page 6 you will find a place holder  
11 for either the Board president or the executive director. If we  
12 move forward with including this section, the content will  
13 definitely be up to either Mr. Hicks or Ms. Evans on what they  
14 would like to write about.

15           On Page 7 you will find the Board's organizational  
16 structure. I apologize for the orientation, I wanted to make  
17 sure I could put everything on this page. This structure  
18 primarily outlines the different units that comply with the  
19 Board, how we are connected to each other, and definitely the  
20 reporting structure.

21           On Page 8, this provides an actual introduction to

1 the report and the reasons why the Board must submit it. There  
2 is a brief summary of the Board's authority and referencing the  
3 disciplines that we oversee. I've also included on the bottom  
4 of the page, the Board's annual budget for the past few years as  
5 well. So, fiscal year 2019, 2020, and 2021. This budget and  
6 the numbers that are provided were previously provided by the  
7 director of operations, so it should not be any new information.

8 On Pages 9 through 13 you will find an overview of  
9 the Board's operations and committees. The summary that was  
10 provided to you includes a brief statement on the  
11 responsibilities of each unit and committee. As a courtesy I  
12 won't go through each and every one, but this allows more  
13 transparency on the different units that the Board has, as well  
14 as the internal and external committees that the Board must  
15 oversee.

16 Starting from Page 14 through 16 you will find the  
17 Board's statistics. The Board is requested to submit this data  
18 to the General Assembly every year. So, I will be going through  
19 each table and presenting the numbers. So, Table 1, Initial  
20 Licenses; registered nurses, 5,560; licensed practical nurses,  
21 561; licensed electrologists, 4; and licensed direct entry

1 midwives, 1; for a total of 6,121. Initial certificates;  
2 certified nursing assistants, 6,466; certified medication  
3 technicians, 5,969; for a total of 12,435.

4 Table 2, Renewal of Licenses; registered nurses;  
5 47,143; licensed practical nurses; 5,418; licensed  
6 electrologists, 0; licensed electrologists instructors, 0;  
7 licensed direct entry midwives, 0; for a total of 52,561.  
8 Renewal of Certificates; certified nursing assistants, 25,121;  
9 certified medication technicians, 12,121; for a total of 37,242.

10 Table 3, Criminal History Record Checks; positive  
11 criminal history record check, 307; negative history record  
12 checks, 21,868; for a total of 22,175.

13 Table 4, Denial of Licenses and Certificates; for a  
14 positive criminal history record check, 1; and for denial for  
15 other reasons, 4; for a total of 5.

16 Table 5, Complaints; new complaints received in  
17 fiscal year 2021, 501; total open complaints including the  
18 backlog at the end of fiscal year 2021, 5,575.

19 Table 6, Most Common Grounds for Complaints;  
20 abandonment and neglect, 15 percent; standards of practice, 19  
21 percent; abuse, 10 percent; diversion/substance abuse, 4

1 percent.

2           And Table 7, Numbers and Types of Disciplinary  
3 Actions Taken by the Board; suspensions not for child support,  
4 28; suspensions for non-payment of child support, 2; revocation,  
5 4; reprimand, 18; probation, 12; denial of license or  
6 certificate, 5; and surrender of license for violation, 19.

7           What you will also find is that I also included an  
8 addendum for the direct entry midwife report. This is to let  
9 the legislative know that the Board is also required to submit  
10 this report as a letter and to meet the deadline of December  
11 1st.

12           On Pages 17 and 18 you will find a view graph and  
13 tables for trends in licensure and certification from fiscal  
14 year 2017 to 2021. These are graphs and tables including the  
15 total number of active licenses year-by-year. As you will see  
16 when looking at the graph and the tables, that the number of  
17 registered nurses has increased from approximately 81,000 in  
18 2017 to be about 90,000 in 2021, that's a 12 percent increase.  
19 The number of licensed practical nurses, however, has stabilized  
20 at around 12,000 licensees since fiscal year 2017. And the  
21 number of advanced practice certifications has also increased,

1 similarly to the registered nurses, and back in 2017 it was  
2 around 8,500 to about 13,000 in 2021.

3           On Page 18 you will find the certifications,  
4 primarily the CNAs and the CMTs. The CNAs have increased from  
5 approximately 64,000 in 2017 to about 72,000 in 2021. That's  
6 about a 12 percent increase as well. And CMTs have increased  
7 about 36,000 to about 49,000. That's a 36 percent increase.

8           On Pages 19 to about 23, are the important updates  
9 that the Board has accomplished in the past year, as well as the  
10 hardships the Board has been experiencing, and that may be  
11 further discussed in the future. So, starting on Page 19, I  
12 would like to first go very briefly over the important  
13 legislative updates. Within this past Legislative Session, the  
14 Board was able to provide legislation, Senator Eckardt,  
15 regarding the CNA refresher course and the CNA Advisory  
16 Committee. Both of those will have passed and will be going  
17 into effect soon. The Board had also had a few important  
18 regulatory updates regarding licensure and examination, nursing  
19 education programs, and the teaching of nursing functions as it  
20 relates to medical cannabis administration in schools as well as  
21 having a code of ethics approved for the licensed direct entry

1 midwives.

2           What you will find at the bottom of Page 20 and  
3 going to Page 22 is a timeline of the Board's progress and  
4 current status with the Joint Department of Education and their  
5 compliance. As you may recall, the Board in early 2020 was  
6 reviewed by the USDOE staff, and in May of 2020 we had actually  
7 lost our accreditation as an agency for Maryland. After this  
8 suspension the Board had filed an appeal with the secretary of  
9 the Department of Education, had provided additional information  
10 about certain rcriteria that the Department of Education had  
11 said the Board was not compliant with. And luckily, in early  
12 2021 the Board had received a continued recognition for the next  
13 twelve months under the condition that the Board would submit  
14 progress reports, and by 2022 submit a final report addressing  
15 all of the concerns that the Department of Education had at the  
16 time.

17           On Page 22, as of right now I have listed one goal  
18 for the Board, which includes restarting a quarterly Board  
19 newsletter. I believe it's been stated in the past this was a  
20 service that the Board had provided, but was discontinued. So,  
21 this is something that we'll be looking forward to in the future

1 and having this published for our constituents. You will also  
2 find the hardships for the Board. I have provided for you  
3 current staffing conditions and a brief fiscal analysis. The  
4 Board has been for some time understaffed. I have provided some  
5 numbers that in fiscal year 2011 the Board had acquired  
6 approximately 73 acquired positions, but those positions have  
7 reduced over time to the current 60 authorized positions. So,  
8 this is something that should definitely lead you to the  
9 increase in workload as well as productivity and efficiency of  
10 our Board's operation.

11 I've also included a fiscal analysis primarily for  
12 the fees that the Board has charged the constituents. As you  
13 will see the license fee for the Board has not changed since  
14 fiscal year 2008. They have stayed the same year-by-year with  
15 our current 2021 numbers. Although the Board has seen an  
16 increase in the number of licensees and certificate holders, the  
17 revenues that are generated by these applications cannot  
18 sufficiently support the Board's operations, as you may see  
19 through the revenues and expenditures that were listed earlier  
20 on in this report. So, our goal, hopefully, for the Board is to  
21 reassess these fees in fiscal year 2022 and continue to work on

1 improving them in making sure that the rates are both  
2 appropriate for our constituents, but also appropriate for  
3 continuing Board operations.

4 And finally, at the end of this report you will find  
5 an appendix. This report is just a definition for licensees,  
6 certificate holders, and nursing disciplines. And after the  
7 definitions you will find a table that is currently listed on  
8 the Board's website underneath the information tab. These  
9 numbers are from August 12, 2021, and it breaks down the  
10 different licensing and certificates, as well as the disciplines  
11 in the areas of interest for each of these disciplines.

12 So, this is the end of the report. I would be happy  
13 to answer any questions, comments, or concerns regarding the  
14 content that's been provided.

15 MR. HICKS: Any questions for Iman?

16 (No questions posed)

17 MR. HICKS: Iman, just one question on Page 25 with  
18 your active licenses and certifications.

19 MS. FARID: Yes.

20 MR. HICKS: For the total number of registered  
21 nurses, you have that number but then you have, like, the CRNAs

1 and the APRNs. Since they have to maintain a license, a  
2 registered nurse license as well as their advanced degree, is  
3 that 90,000 counted into that number? Do you know what I'm  
4 asking?

5 MS. STEELE: Does it include the advanced?

6 MR. HICKS: Yeah. Did we take out the CNRAs and the  
7 APRNs out of that big number because they technically still hold  
8 an RN license?

9 MS. EVANS: No, I think they count them under their  
10 APRN. We don't count them.

11 MR. HICKS: So, the 90,000 registered nurses are  
12 just those that have a registered nursing license?

13 MS. EVANS: I will double check.

14 MR. HICKS: Okay. So, just when we calculate these  
15 numbers, the accurate number that we're looking at.

16 MS. EVANS: I will double check.

17 MR. HICKS: That's fine. Any other questions? Yes,  
18 Monica?

19 MS. MENTZER: Iman, this is Monica. I just had a  
20 question about the number of initial direct entry midwife on the  
21 annual report. You did have some that were licensed this year.

1 MS. EVANS: Hold on, Monica.

2 MS. FARID: Monica, I couldn't hear you.

3 MS. EVANS: Monica, just hold on. I have Rhonda  
4 checking some things for us.

5 MS. MENTZER: Oh, okay.

6 MS. EVANS: So, just hold on for a second.

7 MS. CASSIDY: So, Iman, this is Audrey Cassidy. I  
8 have one suggestion if you want to take it. I think you said  
9 that Table 1 was all the statuses and certifications as of  
10 August 12, 2021. Do you think you should footnote that this is  
11 as of 8/12? Because you're going to present this report two  
12 months from now, and I think you need to probably have a date of  
13 where these numbers come from in case someone else looks on the  
14 website and they say, 'Oh, wait, 90,000, and I have 102, or  
15 whatever.' You know what I mean.

16 MS. EVANS: So, the process has changed. Yes, Iman  
17 can definitely add that. The process has changed for a couple  
18 of things this year. One of the reasons why we needed to bring  
19 it to the board meeting today is because we will need to get  
20 approval before we can send it to OGA. So, that's a process we  
21 have not had in the past. Once it goes to OGA then it's

1 forwarded to the legislator. So, that's a brand-new process  
2 that we just found out about.

3 MS. CASSIDY: Yeah.

4 MR. HICKS: So, we will table the vote for the  
5 approval of the Annual Report until we get some further  
6 clarification, but for time acknowledgment, we're going to keep  
7 moving forward.

8 MS. EVANS: Yes.

9 MR. HICKS: So, up next under Legislative Affairs -  
10 so, Iman, please stay on the line just until we do the vote.

11 MS. FARID: Absolutely.

12 MR. HICKS: Okay. So, the question that I raised  
13 was, in the overall RN number of 90,631, those advanced folks,  
14 such as APRNs, CRNAs, and so on and so forth, were they included  
15 in that 90,000; and the answer to that is yes. So, if you are  
16 looking at numbers then don't take, like, all of the CRNAs and  
17 so forth and add those to the 90,000 because they are already  
18 included in that number.

19 MS. EVANS: So, what we can do moving forward is we  
20 can make sure that's clear.

21 MR. HICKS: Yeah, okay.

1 MS. STEELE: Monica, what was your question? Or, do  
2 we not before we move on, do we need to?

3 MS. EVANS: Well, the question that was on hand had  
4 to do with the 90,000. That was the question on hand. So, were  
5 you going to speak to the 90,000, Monica?

6 MS. MENTZER: No, my question was related to the  
7 number of initial licensed direct entry midwives in the annual  
8 report.

9 MS. EVANS: What's your question?

10 MS. MENTZER: I believe the number Iman stated was  
11 zero, but there were. I don't have the number in front of me,  
12 but there were licensed direct entry midwives for initial  
13 licensure.

14 MR. HICKS: We have 34 on the report.

15 MS. HARROD-OWUAMANA: It was before that.

16 MS. EVANS: Was that number submitted?

17 MS. MENTZER: Yes, that number was submitted.

18 MS. EVANS: That's something we can -

19 MR. MENTER: I just wanted to check to make sure  
20 that number was correct.

21 MS. EVANS: All right. So, can you find out right

1 now because I would like to be able to add that so that the  
2 Board can make a decision and approve it? So, can you find out  
3 right this minute? So, Monica is saying it's more.

4 MS. HARROD-OWUAMANA: It says zero.

5 MR. CONTI: Yeah, Page 14 at the bottom.

6 MS. EVANS: Just so you know the process, before any  
7 of the information is put in here Rhonda sends out an email to  
8 all those who have parts in this and ask them to provide her  
9 with the information, and then that's passed on to Iman. So,  
10 that's why I asked the question whether it was submitted. I  
11 just wanted to make sure we have all the program numbers.

12 MS. ROBIN HILL: I sent Iman an email asking her to  
13 update my credentials for me because it doesn't have my DNP on  
14 it.

15 MS. EVANS: Yes, she took it off the website.

16 MS. ROBIN HILL: Yes, it's not on the website  
17 either.

18 MS. EVANS: I will get that as well. That's my  
19 fault. I forgot to tell her.

20 MS. HAYWARD: I have a question.

21 MR. HICKS: So, we are going to table -

1 MS. EVANS: Dawne has a question.

2 MR. HICKS: I'm sorry.

3 MS. HAYWARD: Page 26, with the CMTs, I wonder where  
4 49,000 of them are since none of this adds up to anywhere close  
5 to that. Assisted living, school health, DDA; if there's any  
6 idea of where all of these people are practicing.

7 MS. EVANS: What number are you speaking of?

8 MS. HAYWARD: 26, the medication technicians count.

9 MS. STEELE: What page are you looking at?

10 MS. HAYWARD: Page 26.

11 MS. HARROD-OWUAMANA: And what about them?

12 MS. HAYWARD: It states that there's 49,000  
13 medication technicians, but if you add up these areas of service  
14 it doesn't come close to that. So, I was curious as to where  
15 they are functioning. They need to be delegated to, so.

16 MS. EVANS: So, those are -

17 MS. HARROD-OWUAMANA: Those are just medicine techs,  
18 they're probably CNAs.

19 MS. EVANS: There's more medicine techs outside of  
20 that?

21 MS. HARROD-OWUAMANA: Yes.

1 MS. EVANS: So, those numbers, just like the APRN  
2 numbers, for those specific areas that's included in the 49,000.

3 MS. HARROD-OWUAMANA: So, some med techs stand  
4 alone, they're not CNAs.

5 MS. HAYWARD: Right.

6 MS. HARROD-OWUAMANA: I think that's why that number  
7 is so high.

8 MS. HAYWARD: So, are they included with the CNAs as  
9 well, or not?

10 MS. HARROD-OWUAMANA: I think, like, these assisted  
11 living, school, DDA, and juvenile -

12 MS. EVANS: Those are for specific areas.

13 MS. HARROD-OWUAMANA: Yeah.

14 MS. EVANS: So, Rhonda is checking on that. Here  
15 she is. Go ahead, Monica.

16 MS. MENTZER: Iman?

17 MS. FARID: Yes, I'm here.

18 MS. MENTZER: For the fiscal year 2021, the licensed  
19 electrologists that were initial licenses were four, and there  
20 was one initial licensed electrology instructor.

21 MS. FARID: Okay.

1 MS. MENTZER: For the direct entry midwives, the  
2 initial licensed -  
3 MS. EVANS: Wait, hold on. For the instructor, was  
4 that in 2021 or was that in fiscal year 2022?  
5 MS. MENTZER: No, it was 2021.  
6 MS. EVANS: What month, Monica, do you remember?  
7 MS. MENTZER: I believe it was May.  
8 MS. EVANS: May, okay. Go ahead.  
9 MS. MENTZER: On licensed direct entry midwives,  
10 initial licensure was 6; renewals were zero.  
11 MS. FARID: Okay.  
12 MS. EVANS: Okay. So -  
13 MS. MENTZER: It was 6. I think you had said that  
14 it was zero.  
15 MS. EVANS: It was one.  
16 MS. HARROD-OWUAMANA: Yeah, it was one.  
17 MS. EVANS: It was one. So, Iman can you make those  
18 corrections, please?  
19 MS. FARID: Yes.  
20 MS. EVANS: Okay.  
21 MR. HICKS: So, we are going to table this until we

1 get what we need to vote.

2 We will move onto the JCR report. Mark O'Neill?

3 MS. EVANS: I need to say something first. So,  
4 everyone, this is Mark O'Neill. Mark, you can step up to the  
5 table. I just wanted to tell you the purpose of Mark's report.

6 So, the legislators asked for the Board to do a  
7 workload and staffing adequacy. And the Budget Committee are  
8 concerned with the staffing levels at the Board and its ability  
9 to meet workload demands. This is a particular concern given  
10 the additional burdens placed on the Board during COVID-19  
11 pandemic in its role moving forward in expanding the nursing  
12 workforce. The Budget Committee's requests that the Board of  
13 Nursing submit a report on the adequacy of the current staffing  
14 levels given the current workloads. A discussion of the Board's  
15 role in COVID-19 recovery and the further staffing needs that  
16 may arise in fulfilling this duty. In this the staffing  
17 shortages are identified. A discussion of opportunities to  
18 address these shortages.

19 So, this is another report that we have to give to  
20 OGA by September 1st for it to be presented to legislator in  
21 October 1st of 2021. Mark is a consultant - oh, Mark, I forgot

1 the company, I'm sorry.

2 MR. O'NEILL: Hagerty.

3 MS. EVANS: Thank you. And so, he's been with us  
4 since July 12th meeting with all key directors, our Board  
5 counsel, our Board president, past employees here that have a  
6 knowledge of the Board. So, Mark's going to present the  
7 executive summary of the Board. But he's done intense work, and  
8 it's been eye opening for me as well, and for things that we  
9 need to do to improve the Board. And so, I'm glad that we have  
10 an objective person come in to see the Board as it is, and what  
11 we can do moving forward to take it to the next level.

12 Mark, thank you for being here.

13 MR. O'NEILL: Absolutely. Thank you, Karen, for the  
14 invitation and, Gary, to address you today, and the Board  
15 members. I appreciate you having me in.

16 As Karen mentioned, I'm Mark O'Neill with Hagerty  
17 Consulting. It's a disaster response and management firm out of  
18 Illinois, which at first glance may seem kind of odd. You know,  
19 what's the disaster? Well, there is one. I found it over the  
20 last six weeks. It is serious. There's some things in this  
21 report that may be difficult to read. But thanks to Karen's

1 transparency, and really everyone on her staff, no one here has  
2 been off limits. I have been given really free reign to speak  
3 to whomever I wished, including recent retirees and former  
4 employees. Digging deep into the records, and going back really  
5 into the late '70s to kind of figure out what is going on here.  
6 What's happened? This did not happen overnight.

7           As Karen mentioned, the original charge on the JCR  
8 report was to really look at - it was just supposed to be at  
9 COVID, how was the Board of Nursing impacted by COVID? And, of  
10 course, you pull on the thread, the issues go far beyond COVID.  
11 COVID is almost footnote in terms of being an effective  
12 explanation for what's happened in guiding what needs to be done  
13 going forward.

14           So, with that said, I've been here with twenty  
15 nurses plusing up the staff here. So, I've been working on this  
16 specific project with the JCR in doing the interviews and doing  
17 the research. Meanwhile, twenty RNs on a separate contract that  
18 Hagerty is managing, staff nurses have come in from different  
19 parts of the country to work the backlog. You know, 10,000  
20 emails in a box that have been sitting, and they have been  
21 whittling that down now to a much more manageable level. I

1 don't have the most recent stats, but they're pretty amazing.  
2 That's a real success story that the most pressing customer  
3 service issues have been addressed. So, we can at least have  
4 that fire put out for the moment, but if changes aren't made,  
5 we're going to find ourselves right back in another fire very  
6 soon. So, that's the team that's been with me. They are here  
7 through September 30th. This is the end of my sixth week, and  
8 I'm likely going to be moving on, you know, to a new project  
9 shortly.

10           This all came about, you know, through COVID.  
11 Hagerty had a contract with MEMA, the Maryland Emergency  
12 Management Agency. It's important to know the background here  
13 of how I even got here. It took a fair amount of effort. A lot  
14 of folks had to be in agreement just to get this done. So, MDH  
15 asked MEMA for resources due to COVID. They are the lead agent  
16 on all the COVID issues related to the State of Maryland, and  
17 had asked that I go here with Karen's invitation and permission,  
18 which is great, which she kindly gave and also allowed the  
19 twenty nurses to come in. They were offered generously by the  
20 Secretary to provide some assistance. So, that's the route that  
21 led me here today.

1           Karen mentioned that I'm objective, and I think  
2   that's true. I'm also a sympathetic objective individual. My  
3   grandmother was a nurse, my great-great aunt was the first  
4   registered nurse in my home county in Pennsylvania. So, this is  
5   a very personal project for me. I did my graduate work at  
6   Hopkins in healthcare finance management, and then was  
7   commissioned in the Navy as a patient administration officer at  
8   Bethesda Naval Hospital where I was actually mentored by one of  
9   the original CRNPs. So, I really learned bread and butter  
10  hospital management administration not from a hospital  
11  administrator but from a nurse - from a nurse practitioner, who  
12  is my dear friend to this day who is just incredibly talented.  
13  So, that's just some of the background. I've been in the  
14  private sector for the last fifteen or so years managing  
15  physician groups, being the CEO of groups answering to a board.  
16  So, I've been in the hot seat in the past. So, that's kind of  
17  where I'm coming from.

18           It's been a great run here. The people I've talked  
19  with, the culture here has really, what I can tell, has changed  
20  dramatically from where it was, certainly when Karen first  
21  arrived. Some of the executive summary notes goes into that.

1 You know, a lot of work has been done to get us to this point.  
2 As serious as things are today, they were infinitely worse a  
3 year ago and two years ago. So, things are on the upswing, but  
4 it's a very sensitive time. I'm kind of liking it to a patient  
5 who is still in great trouble, and then the nurse says, you  
6 know, the next 24 hours are critical determining which way  
7 things are going to go. I think the Board really finds itself  
8 at this inflection point. It's either going to crest and we're  
9 going to enter a new golden age. I think that's how good things  
10 could be, but it is also in grave danger of rolling back down  
11 the hill, and there's a big pit that Karen has kind of been  
12 trying to pull the entire organization out of. So, that's kind  
13 of the preface to the remarks.

14 You know, what did I find? Get to it, Mark, what  
15 did you find? So, a number of things, on Page 4, what ails the  
16 Board of Nursing the most is a workforce breakdown that sees too  
17 few employees running the highly complex organization with an  
18 enormous mission where finances are inadequate, chronic  
19 vacancies abound, and limited IT resources contribute to  
20 inefficiencies and poor service. So, this is all wrapped  
21 around, really, the Operations Division in the Board of Nursing

1 staff area; Fiscal, IT, and HR. Organizations fail when those  
2 three entities are lacking, and all three are in serious trouble  
3 here. So, that's where a lot of the resources have to be put to  
4 start turning this around.

5 But jumping back to the summary, the first page, you  
6 know, this report is supposed to be helpful, right? It isn't  
7 just here to throw stones and make accusations. The goal is to  
8 get you money and people to fix a lot of the issues here. So,  
9 to do that you have to tell a compelling story. What I found is  
10 that most folks, and again it's certainly the general public and  
11 even within the state government, it's certainly within MDH,  
12 they don't understand what you do here. They really don't know,  
13 or they know just a sliver. There's a lot of what they think  
14 they know. And I came in, of course as a former patient admin  
15 officer, I did a little bit of hospital credentialing work,  
16 right, just enough to be dangerous, and all I thought of was, of  
17 course, licensures and certifications, right? Well, that's just  
18 the tip of the iceberg here, right? There are kind of four big  
19 elements as to what goes on here, right? Licensure and  
20 certification being the first, and then the enormous amount of  
21 people, but second is this accountability and this enforcement

1 apparatus. I've tried to describe it as, you know, similar to a  
2 county government. It's really its own detective agency. You  
3 know, you police your own. This is the Board of peers. That's  
4 huge, huge missions with the internal affairs, in a sense, for  
5 the nursing profession. You're IAB. I don't think that's  
6 understood, nor the fact that you really have this judiciary  
7 function, you're a courthouse. You're not funded as such, but  
8 yet that mission is being carried out. Then we move into  
9 education and exams, right? No other board or commission in  
10 Maryland has this education mission to certify every education  
11 program. It's simply massive. And there's one individual, one  
12 single person, who's certifying and accrediting all of the CNA  
13 programs in the State of Maryland. That's a crushing workload.  
14 It's impossible, frankly, for anybody to do that effectively.  
15 So, these are the stories that have to be told, right? There's  
16 a big political element to this so you have to have anecdotes  
17 that resonate. I just can't read dry statistics and expect that  
18 people will understand what's going on here. So, there's a  
19 storytelling element that you'll find in this report.

20           And then finally, legislative policy, right?  
21 Legislators are looking for guidance from you, and yet the

1 director of Legislative Affairs retired in December of 2019.  
2 The position has been vacant. That is, like, one of the four  
3 core services that you provide, and we have a key leader who's  
4 absent. So, you can kind of see it, and these are themes that  
5 are repeated over and over again for years on end.

6 So, first, people have to understand what you do.  
7 So, that's elicited in the first page. The second page, and  
8 this is where I think we have endless conflicts with MDH, is  
9 they want to for expediency to say, 'Well, what are the other  
10 boards doing?' 'What's going on with the other boards and  
11 commissions?' Well, it's really irrelevant because this board  
12 doesn't have any peers. Nobody is anywhere close to your size,  
13 and no one else has this enormous education mission. So,  
14 whatever, you know, the Board of Podiatry is doing with, you  
15 know, 550 podiatrists, I think statewide, really has nothing to  
16 offer you, right? So, we have to start to change the paradigm  
17 here that we're not going to get a lot of help or guidance based  
18 on what other boards are doing. So, that's important. Seventy  
19 percent of all health occupational professionals in this state,  
20 that's everybody; doctors, nurses, everybody. It happens right  
21 here. It's huge. So, you have no true peers.

1           Next, there's a lot of confusion because they  
2    changed the name in 1987 from the Board of Nurse Examiners,  
3    which is really who you are, right, versus the Board of Nursing  
4    Staff. So, people are using the terms interchangeably but they  
5    don't mean the same things. Like, you're adjudicating issues  
6    very well here, right? The Board, 95 percent what the Board  
7    does is related to nursing practice and policy. That part is  
8    going well. When things get here, they are being adjudicated.  
9    The business of the State is getting done, but that's not where  
10   the lion's share of the problem is, right? It's all over here,  
11   for the most part, in the staff in office, right? But that's  
12   not clearly understood partly because you both have the same  
13   name. There's The Board and then there's The Board of Nursing.  
14   Now, is that clear as mud? Especially for the people who are in  
15   charge of your fate, if they don't understand that or that's  
16   unclear then that's not helpful. So, understanding that piece  
17   is another element.

18           Why so much trouble, right? Why are the legislators  
19    only hearing about the Board of Nursing? Why is MDH only  
20    hearing complaints about the Board of Nursing, right, in recent  
21    years, right? Well, I got deep into the history. The Board

1 enjoyed an incredible period of stability from about 1981  
2 through about 2007. You had an executive director here, Donna  
3 Dorsey, you know, a 35-year run for the Board. The Board was  
4 operating well. From 2007 to date is a very unstable period,  
5 right? We've had a succession of executive directors, Karen is  
6 the latest and will hopefully be here for some time to come, but  
7 came in following kind of a murderer's row of previous executive  
8 directors, and there's always that period of transition. There  
9 was an interim that was here for an entire year. This level of  
10 instability makes it very difficult to make fundamental changes.  
11 Meanwhile, this leadership, you know, revolving door was going  
12 on the things in the staff office are going downhill, right?  
13 So, that's basically what's happened. That's important to note.

14           So, I made ten key findings after these six weeks of  
15 interviews. I am going to start with the most important, and I  
16 think it's the one that has the most political resonance to get  
17 you the help that you need. You know, the Board really has two  
18 missions, right, to protect the public, preserve the profession,  
19 if you had to boil it down to just two things that you do.  
20 That's why it's all on one page. No one wants to read more than  
21 a page. No one will read more than a page to get you the help

1 that you need. Public safety is in jeopardy in the  
2 Investigation Department within the accountability. Enforcement  
3 Division, it's frightening. It's the scariest thing I saw here.  
4 Word about this has to get out. There are four levels of  
5 priority, right? The top one, we have 715 cases, Priority 1  
6 cases where there is serious danger to the public. We have six  
7 investigators carrying 250 to 300 cases each. That's  
8 outrageous, and that's been going on for years. The managing  
9 for results data indicates that you haven't met the low-level  
10 basic standard for investigations for over five years. So, none  
11 of this is new information in this report, too. I didn't  
12 uncover anything that was kind of previously unknown. All of  
13 this was kind of here. It was just, how do you get it out of  
14 the Board, how do you get the people that can help in the know?  
15 So, that's got to be number one, right? Life and death issues  
16 come first. So, let's get that fixed. That is going to have to  
17 be a collaborative effort with MDH, with the PIN Committee, with  
18 HR, with DBM. This is not something that can fixed internally.  
19 The problems are so deep and so entrenched here, we have to  
20 build better relationships with other entities, we have to  
21 leverage the relationships that you have in the legislature with

1 individuals like Senator Eckhardt, a great advocate, to push for  
2 meaningful change. You know, the things that can be done are  
3 being done by Karen and Rhonda and the team here. There's some  
4 fabulous people here, but it's asking too much of them to make  
5 some of these fundamental changes.

6           The leadership structure that I found was  
7 disorganized, span of control for the executive director was too  
8 wide, and that's no reflection on Karen's leadership. You can  
9 be a fabulous leader, but if your span of control is too wide,  
10 if you have too many direct reports. Those of you who have been  
11 out in the field, you know, a dozen people all reporting  
12 directly is not a good fit. It's inefficient, it just slows  
13 down the leadership. They can't make the strategic directional  
14 changes that need to be made because they're in the weeds  
15 dealing with operations. So, we have a new work chart that's in  
16 the packet here. That's just one of the issues. So, reduce the  
17 span of control. We have people that are dual-hatted in really,  
18 really important roles that can't be dual-hatted. You can  
19 dual-hat somebody to do two smaller things. For instance, we  
20 have a deputy director, and Rhonda is dual-hatted in running the  
21 Accountability Division. You can't run a division, especially a

1 division as critical as Enforcement. And the deputy director,  
2 typically in an organization, is running the day-to-day  
3 operations. The executive director, Karen, is supposed to be  
4 outward facing. She's the one interfacing with the legislators,  
5 with the National State Board of State - what is it?

6 MS. EVANS: The National Conference for State Board  
7 of Nursing.

8 MR. O'NEILL: Thank you. These enterprises and  
9 organizations that are external dealing with Maryland Board of  
10 Nursing, the Maryland Hospital Association, that's where your  
11 executive director should be most of the time, right? She  
12 should only really be into the organization when Rhonda says,  
13 'Hey, I've got an issue here that's serious enough and is rising  
14 to the level where you need to get involved.' But that's not  
15 happening according to the multiple interviews. I can  
16 understand why when you have multiple fires, there's no time to  
17 go have meetings in Annapolis, there's no time to advocate for  
18 nursing policy because you're just trying to keep getting the  
19 phones answered. We have 10,000 emails in a box. This is  
20 madness, right?

21 So, we've got a new org chart proposed and endorsed

1 by Karen that I think will make a big difference, but  
2 everybody's got to be disciplined and committed to abide by  
3 that, right? You have to staff. You can't have giant holes,  
4 which we have right now, at the top of the org chart, right?

5           Number three, I kind of opened with this, right,  
6 what ails the Board the most is the operations divisional  
7 breakdown. So, that needs its own investigation to see what's  
8 going on there and to make those kinds of changes. But that's  
9 critical because Karen can't operate without a Fiscal, IT, and  
10 HR department that's effective. And I'm here to tell you, that  
11 department has really been vacant, what looks like, for years.  
12 That's appalling, that's shocking, but that's the truth.  
13 There's nobody home in this entire division. So, that is in  
14 serious, serious need of attention.

15           Let's talk about fiscal policy. Iman touched on  
16 this regarding the fees. Not raising the fees since 2008? Just  
17 what we're going through in the last year with inflation, let  
18 alone with what's going on, and when it was raised in 2008 it  
19 wasn't even raised enough then. It was, like, \$35.00 to get  
20 your registration in 1975, so adjusted for inflation it should  
21 have been about \$140.00 charged when they raised in 2008. So,

1 we're \$40.00 short just to keep up with inflation, not to  
2 actually increase it because there's a whole lot more nursing  
3 going on than 1975. Nurses are everywhere. Healthcare is the  
4 porch of the economy, it's enormous. So, even at the last  
5 increase, right, which was long before anybody was here in this  
6 room, you know, the business wasn't being taken care of. And  
7 that's important to know, and that's why I started with the  
8 history of going back this far. It's very easy to scapegoat  
9 either current board members or the current leaders or this  
10 particular director, but we are way, way beyond that. These are  
11 problems that go back at least a decade. Closer to fifteen  
12 years now would be more accurate. So, everybody should always  
13 kind of take a breath and keep in mind that it was a long way to  
14 get into this hole, it's going to take some time to get out.  
15 It's supremely unhelpful to, you know, look for blaming any  
16 current actors on the stage. We want to spend all our time  
17 working on getting out of this. So, that starts with, let's get  
18 the fee increased approved here at the Board level and get it  
19 moving through the process, right? And people said,  
20 politically, fees are going to be difficult. That's true. The  
21 Governor is pretty against raising fees, but we need to try. We

1 need to at least raise the issue and bring it forward and let  
2 MDH help advocate because, you know, rubber is going to meet the  
3 road. The whole fee-based policy, of course, didn't think about  
4 something like COVID where 40,000 people suddenly won't renew.  
5 But when you are fee-based, right, that puts your entire -- your  
6 entire revenue model is at risk. So, it works outside  
7 pandemics, it doesn't really work so well when your  
8 fee-based and people stop paying fees, and you weren't charging  
9 enough in fees even to begin with. That's why it's not just  
10 about COVID. Even if you didn't have COVID you would have a  
11 problem because you weren't raising enough money.

12           Number five, lets talk about the Board, right? I  
13 mentioned that you're doing really well. You are a nursing  
14 policy, and that's your main mission, but there's still a board  
15 and a staff. And this board is not really functioning the way  
16 most boards do. And Mike and I chatted about this offline, and  
17 it's not really in the Nurse Practice Act necessarily. You  
18 know, you really don't have a mechanism that's clear and clean  
19 as to what oversight you're really supposed to be providing,  
20 right? Normally, outside of here boards provide, you know,  
21 fiscal oversight, resources oversight, and provide a broad

1 strategic direction and hire and monitor the executive director.  
2 So, that piece is being done, but the other three, it's pretty  
3 thin because most of your time is spent on these policy issues.  
4 So, this is not so much a criticism, it's just the whole way its  
5 structured really needs to be taken a look at, right? So, it  
6 would help for the staff to have a board that's more engaged.  
7 And maybe that looks like just forming an operations committee,  
8 you know, where members here who have governance experience.  
9 Not everybody - most of the Board - everybody on the Board is a  
10 subject matter of expert in nursing, right, because again,  
11 that's your main mission. But for those of you who have dual  
12 experience, either serving on boards, answering to a board at  
13 that level, that might be helpful to carve out those individuals  
14 for an operations committee to give the staff the greater  
15 integration there, right? So, that's something to think about.

16           Number six, a communication initiative is  
17 desperately needed. The Board isn't communicating. This story  
18 that I've just told is compelling, right? This incredible  
19 mission, it's so important, right, getting the, you know,  
20 dangerous or incompetent nurses out of practice, making sure  
21 programs are current, and training the best and the brightest.

1 It's a huge important mission. That story should be told. You  
2 know, people don't know it. If people don't know it that's not  
3 their fault for not knowing, right? That's your fault. You  
4 forgot telling the story, so that has to be addressed. And it  
5 just isn't one element, right? The website tells a terrible  
6 story, right? Some of the staff here answering the phones are  
7 not particularly serviced oriented. Now, Karen's done a lot to  
8 change that, and it takes years to change it. The depth of the  
9 culture problem here, and this was echoed by multiple people,  
10 where about up to half, certainly not less than 40 percent of  
11 the staff was really toxic. People had been hired here that  
12 should not have ever been hired because the HR mechanism was  
13 broken, right? Once people get in it's very hard to get people  
14 out. So, it does take, literally, years to change a culture,  
15 and that's across any state agency, that's not just here. So,  
16 Karen is, you know, almost four years into that effort, and  
17 that's why I say that we're at this critical moment. Because  
18 wonderful people have been brought in, but it's taken that long  
19 just to clear out some bad actors and then to recruit some  
20 wonderful people. Wonderful people don't stay if they're  
21 surrounded by toxic people, so that's where the really tricky

1 part is, right? And it's Karen's leadership, people have joined  
2 here because they like her vision, right, and the vision that  
3 Rhonda brings, right, which is alignment with Karen's. People  
4 want to be a part of that but they're only going to say so long  
5 unless they see that things are moving in the right direction.  
6 So, this is a very critical point, the website.

7           The lack of a call center, right? Part of the  
8 reason that we have 10,000 emails in a box is that staff don't  
9 have time to answer emails or to answer the phone. Any time  
10 they do, they have to stop working, right? So, that's a chronic  
11 problem, right? A call center with a well-trained core team to  
12 triage all those calls so the operation staff can actually do  
13 their jobs, you know, the work that needs to be done is  
14 critical.

15           Iman talked about the reduction in the number of  
16 PINs, right? There's fewer PIN positions here than there was in  
17 2011 despite there being dramatically more work going on in  
18 every department. So, there's a complete disconnect, right?  
19 And again, that story is not being effectively communicated up  
20 the chain.

21           Improperly classified roles, this isn't just the

1 lack of positions, right? We have people - vacancies we need to  
2 feel, and then we have bad actors that need to be removed. The  
3 way people are in positions, they are just improperly  
4 classified, so they're getting low even though they deserve to  
5 be paid more, and then we have a retention issue because good  
6 people will leave. You can go to the Board of Physicians where  
7 they have a totally different classification system because they  
8 leverage their political chops to get some things done. That  
9 needs to be done here, right?

10           Number eight, update the strategic goals. This  
11 really tells the story, right? The strategic goals haven't been  
12 updated since 2014. Who provides strategic leadership? The  
13 Board? The executive director? What have they been doing?  
14 They've been trying to keep the place open for that long in  
15 terms of just meeting fundamental service standards. That's  
16 what they've been busy doing. So, part of this fixing these HR  
17 problems will allow your leaders to actually lead once they  
18 don't have to be putting out fires 24/7. And then COVID came in  
19 the midst of this which was, you know, certainly disruptive.  
20 But again, this goes way beyond just the past year. Let's get  
21 back. And goals can get people excited. Karen has a wonderful

1 vision that she's been sharing. Her senior leaders get it, but  
2 that needs to be communicated out to the whole staff. They need  
3 to see these goals, the public needs to see them, right?

4           Then in number nine, this issue of the 40,000  
5 non-renewals. So, this kind of gets to the heart of the JCR  
6 question: How has COVID impacted the Board of Nursing? It  
7 speaks to the severity of the nursing shortage and COVID, right?  
8 The number of people who just left the profession, yeah, some  
9 places had nursing shortages but a lot of elected folks, right,  
10 things closed up. ASCs weren't doing elective positions, people  
11 just left the profession, but we don't really know why. But why  
12 is it 40,000? So, we have to figure that out. But it exposes  
13 the vulnerability of the budget model and that's a real problem  
14 when you're  
15 fee-based. A vast number of individuals will decline to pay,  
16 the solvency of the Boards in jeopardy.

17           And ten, this is a long-term goal but it has to be  
18 at least on the radar. The Nurse Practice Act itself is a cause  
19 of considerable gridlock that we've seen over this last ten  
20 years, right? It's not MBON's fault, it's not MDH's fault, it's  
21 not the Board's fault. The Act itself has serious deficiencies.

1 I am sure it worked great in 1904, you know, and maybe it was  
2 great through the '60s. It is failing you dramatically at this  
3 point. One of the examples, I think, Mike pointed out is  
4 Section 1.203, "The Secretary of Health has no authority over  
5 plans, proposals, and projects of the Board. He has no  
6 authority to transfer staff." It's certainly clear who isn't in  
7 charge, right? That part is not in doubt. The part is, who is  
8 in charge then? Who is really driving the ship here? And that  
9 ambiguity is causing chaos and it's going to continue unless  
10 this is remedied. That's going to take a bill. That's going to  
11 take your advocates to come together. It's a great time to do  
12 it though, because it exposes this weakness and it relates to a  
13 lot of other things. Now is a great time. This is just one of  
14 the problems that you have. What a better time to form a task  
15 force with Mike, Gary, Karen, senators who are sympathetic and  
16 are in the know and many whom are aware of these longs. They  
17 were even tired of phone calls from constituents so they have a  
18 reason. The timing could be perfect to really do something that  
19 is kind of bold and daring here, like taking a stab at some  
20 serious revisions of the Nurse Practice Act as it relates to  
21 where this Board fits in because you need a mechanism, too. And

1 it's unclear on how you're really supposed to relate to the  
2 Board staff, the office that's doing the work, that prepares  
3 everything for you to adjudicate.

4           So anyway, there are ten recommendations. You guys  
5 can read those on your own time, but I wanted to just go through  
6 the ten findings. Yeah, there's levels of seriousness here. I  
7 started with most serious and kind of worked our way done.  
8 It's an exciting time to be here. I would love to be a part of  
9 what Karen's building long-term. Obviously, I was candid with  
10 you, and again, not to beat you up, but because it deserves a  
11 candid discussion. For all the problems that are here, there's  
12 a tremendously positive vision that's been presented. There's  
13 great work that's being done. It's so close, but yet it's a  
14 sensitive time, right? It can go either way. So, there's more  
15 in here in the report. You can leaf through it.

16           There's a new board chart, and I will just jump back  
17 to this. In green, it's in green because this is our greenhouse  
18 for leaders, right? This is your manager, right? These are  
19 your department heads, right? Again, everybody's so busy  
20 putting out fires, leaders aren't being grown in the staff  
21 offices. Accountability, which deals the most with the Board,

1 right, has, like, one person, one subject matter expert in every  
2 division with no bench. No one is being developed and that is  
3 what's so scary. When I talk about, 'Why are you so close to  
4 the edge?' Because people give up and key people leave, you  
5 could actually see collapse of entire divisions at the Board.  
6 So, that's why I say that it could go either way. It could be  
7 the greatest time. It could be back to a golden era with Donna  
8 Dorsey, or we could roll right back down the hill and be even in  
9 worse shape than we've been before Karen arrived. That's how  
10 serious it is. So, we've got to start by developing leaders.  
11 Again, if we go with this, this element, have Karen get exterior  
12 facing. She's going this way, and Rhonda is mostly one way  
13 going down, right, dealing with the organization day-to-day, and  
14 then we're growing leaders down here so that it's not a crisis  
15 every time somebody leaves, which is just what we have right  
16 now.

17 MS. EVANS: Mark, can you go over as far as Key  
18 Recommendations, Number 5, the HR piece. I think it's Number 5.

19 MR. O'NEILL: Which page, Karen?

20 MS. EVANS: Page 5.

21 MR. O'NEILL: Page 5, okay. Which one?

1 MS. EVANS: Number 5 on Page 5.

2 MR. O'NEILL: Okay. So, the Board has a number of  
3 great reports. This is something that was striking to me. I am  
4 glad you pointed this out. Great reports are not a problem for  
5 the Board, right? Identifying what the issues are, not a  
6 problem. That's not a -

7 MS. EVANS: Hold on for one second, Mark, please.  
8 Karen passed it out. She didn't give you all one? Hold on.  
9 Hold on for one second.

10 MR. O'NEILL: That's fine. I would be happy to take  
11 any questions in the interim.

12 MS. HARROD-OWUAMANA: So, what was the great parts  
13 about the Board that really stuck out?

14 MR. O'NEILL: The positive culture among the  
15 leaders. The key leaders that are here now will include Karen,  
16 Rhonda, Dr. Green, an incredible resource here and fortunate to  
17 have, basically the dean on the staff here, but again, she's  
18 only be here as long as this stays together; Dr. Forbes-Scott in  
19 Education; Dr. Ava Williams running Licensure; Millicent, the  
20 new Director of Operations is very strong. There's some real  
21 superstars here.

1 MS. HARROD-OWUAMANA: So, I'm going to the other  
2 part of the spectrum. What was some of the complaints from the  
3 employees?

4 MR. O'NEILL: Again, I focused on leadership here.  
5 So, I interviewed down to the manager and department head level.  
6 I did not get into, kind of, line staff. That's kind of a  
7 separate issue. Again, I think as you correct a lot of the  
8 problems up here there's going to be a swing effect down the  
9 other side.

10 MS. HARROD-OWUAMANA: Do you have any projection on  
11 how - should it be done in phases, or?

12 MR. O'NEILL: Yes, from the top. Fix and get these  
13 holes filled, right? So, we got to get Rhonda Scott replaced as  
14 the head of the Enforcement Division, right? So, that is  
15 urgent. Because if we really want to implement this org chart,  
16 which I think is absolutely critical. That can't be done, she  
17 can't run the organization day-to-day if she's running a line  
18 division. That's unfair, it's unworkable, it's too much work  
19 for anybody. Burn out is real, and you will burn out your  
20 bright lights if things continue to operate that way. These key  
21 fills will have a huge downstream impact because your leaders

1 are going to be able to mean and they are going to be able to  
2 manage people. People management has been very poor here  
3 because "I don't have time to do a lot of performance  
4 evaluations." "I don't have time to kind of mold you as a  
5 leader because 300 emails just came in, so our meeting for today  
6 is cancelled because the phone is ringing." This is going on  
7 all over, and then people leave again downstream.  
8 So, we start to fix that up there.

9 MS. HARROD-OWUAMANA: I heard you talk about a call  
10 center. What would be the ideal type of call center or  
11 suggestion of a call center that would work in this type of  
12 operation?

13 MR. O'NEILL: You don't need, like, a massive phone  
14 bank, but we do need some key people who are knowledgeable in  
15 these various areas and have a good sense of what's going on.  
16 Again, a lot of the questions are the same that people are  
17 asking. So, get some key people trained up so that the phone  
18 isn't ringing at the desk of the person actually doing what they  
19 want to get done. Like, "Why aren't you getting my licensed  
20 renewed right now?" "Well, actually I was working on it right  
21 now but I had to stop, you know, to take these five phone

1 calls." So, then I'm further back. And now there's another  
2 five people calling, right? That's the idea behind it, I think,  
3 is that we get a small group to triage those calls. There's no  
4 triage being done. They are going to a voice mailbox, and  
5 they're getting angry.

6 MS. EVANS: And also, the timing of vendors is  
7 another question. Since the beginning of June, I've been asking  
8 for more trunks for phones because we don't have enough phone  
9 lines right now to serve the customers we currently have. So,  
10 what happens is not only do the external customers have problems  
11 calling in, we have problems calling out and calling each other  
12 in-house because we don't have enough trunks. So, since June,  
13 I've put in a request to Verizon. It is now August, the end of  
14 August. And we have another company, NEC, who can't move  
15 forward. Their part is done. They can't move forward with the  
16 phones until Verizon does its part.

17 MR. O'NEILL: But is multi-factorial. Even if we  
18 get the phones, even if we have the best phones in the world, we  
19 don't have people to answer them.

20 MS. EVANS: Correct.

21 MR. O'NEILL: It doesn't matter. The Board staff

1 have been dealing with an intractable, like 25 percent vacancy  
2 rate. It just never seems to get below 25 percent. Now, what  
3 enterprise is going to be effective if I take a quarter of the  
4 workforce away consistently? I am consistently going to ask you  
5 to do more work with 25 percent. And even if you had all that  
6 staff, that's likely inadequate, right? And it doesn't account  
7 for people still taking vacation, they still get sick.

8 MS. ROBIN HILL: How are you going to pay this 25  
9 percent when we're already in the red?

10 MR. O'NEILL: That's right. Yeah, it's a train  
11 wreck now. You have multiple problems, which is why I've  
12 suggested MDH, that certainly on the HR front, it's so  
13 horrendous at this point. The State systems are built for the  
14 normal functioning of business, right? I'm here to fill routine  
15 vacancies, you know? Joe retired, we need to find a new person.  
16 It's not meant for 25 percent of an agency gone, right? And  
17 then there's a hiring freeze. So, they approved, like, two  
18 positions last month for all boards and commissions to fill  
19 vacancies. So, there's - it's going to require a very senior -  
20 there has to be a commitment at the top with Secretary Brinkley  
21 and Secretary Schrader to say this is a priority for us, we're

1 forming a joint task force with the people who are empowered to  
2 pull the trigger to do these hiring actions, because that's how  
3 bad it is. I normally wouldn't recommend that, but this is a  
4 special case. You are never going to get out of it. We were  
5 doing the normal and we can't seem to get above 25 percent  
6 vacancies, and that's at best. At times it's gone even higher.

7 MR. HICKS: Dr. Raymond?

8 MR. RAYMOND: Mark, thank you for this very  
9 detailed, illuminating, and validating report for Board  
10 recommendations. It's very much appreciated. I have a couple of  
11 questions, and an observation about the org chart. So, one of  
12 the observations I had about the Board and something that I  
13 think is missing in it. Maybe some of it you saw as well and  
14 just chose not to put in the report, is the lack of the ability  
15 to utilize analytics at the leadership level because we don't  
16 really have a good handle on statistical analysis with the Board  
17 when we are looking in terms of data streams. I don't see that  
18 capability in this Board structure or any type of reporting  
19 mechanism to help Karen or the senior leaders in this org  
20 structure and use data analytics to help drive decision making  
21 or even strategic direction.

1           So, that's one thing that I would recommend from the  
2 Board's perspective in thinking about and moving forward and  
3 looking at how this can be restructured.

4           MR. O'NEILL: Let me just respond to that. You see  
5 there's two shaded little blocks here. These are kind of the  
6 aspirational departments, departments that don't currently exist  
7 but probably should, right? One is the call center and the  
8 other is Compliance. I think you could change the name, but the  
9 Compliance Division ideally would be the ones that are working  
10 on all these great reports that have been written, and give you  
11 the data feeding that back. Who's that mechanism? It can't all  
12 just be the executive director because she can't be the only  
13 line here. But this group, you know, Iman does that a little  
14 bit on the Legislative side. She's out there working in that  
15 realm. But in terms of the data, the vision that Karen and  
16 Rhonda and I discussed with this Compliance Office - again, it's  
17 not a dozen people, but a couple of key analysts, someone with a  
18 good command of the data and the IT system. So, it's perfectly  
19 positioned under Operations because it's going to touch on all  
20 three functional divisions. But your point is well taken, that  
21 is a need.

1           MR. RAYMOND: That relates to the second question I  
2 have, which is, given the weight and gravity of the fiscal  
3 impact to the Board's organizations and constituents. I'm  
4 curious as to why your recommendation or why we're looking at  
5 this with the fiscal component reporting up to a director of  
6 operations and putting that on equal footing with the rest of  
7 that level of leadership rather than pulling the fiscal  
8 responsibility out like you would see in other organizations and  
9 having something similar to a chief financial officer reporting  
10 directly to the executive director.

11           MR. O'NEILL: That's a very good point. This is  
12 kind of based along the lines of what is here now, but that's an  
13 interesting thought. It's basically creating a CFO role that's  
14 just focused on the financials, generating revenue, and  
15 spending.

16           MR. RAYMOND: Because in my mind I think you could  
17 pull the fiscal and the compliance data analytics out, and then  
18 that removes bias from the other departments and creates the  
19 separate governance component that Karen could have a direct  
20 oversight over.

21           MR. O'NEILL: I think that's a strong recommendation

1 that would make a lot of sense. Again, we got to get a PIN for  
2 that role, but I think long term - this chart is also a little  
3 bit aspirational, too.

4 MS. EVANS: I think it's something we can add.

5 MR. O'NEILL: Absolutely.

6 MS. EVANS: Because that's what we're striving for.

7 MR. O'NEILL: That's the kind of communication, this  
8 healthy dialogue with the Board, sees some things and says, 'You  
9 know, have you thought about this.' 'Have you thought about  
10 that?' That kind of a culture of communication on the ops, I  
11 know you do it on policy which is why things work so well, I  
12 think, on the nursing policy realm, but that's kind of fluid  
13 engagement that I think would really help Karen and Rhonda going  
14 forward, right?

15 MS. DILLON: Does your company or the companies  
16 stick around to see this carry out? Do you make suggestions and  
17 then after six months you're like, "Good luck."?

18 MR. O'NEILL: No. This is a long term -- one of the  
19 things that shocked me when I came here and started digging,  
20 because I was finding really well written great reports going  
21 back to 2010, the Sunset Evaluation. And then I found another

1 one from an independent, third party, Management Advisors  
2 International, the MAGI report that they did in 2013. There's  
3 multiple reports that are available, none of which relate -  
4 there's no evidence of any of them being implemented. Your  
5 point is well taken, that's where the stumbling block has been.  
6 It's not been the Board's inability of recognizing that it has a  
7 problem. No, there's been recognition of these problems, right?  
8 No one's denying it. Again, Karen was amazingly transparent.  
9 Her staff, I didn't hear, 'Hey, I don't know why you're here,  
10 things are great.' I didn't hear that from anybody, right?  
11 They were validating what was in these previous reports with  
12 this implementation piece. That was another part of the  
13 suggestion for the Compliance Division is, who is actually going  
14 to implement these suggestions? It can't be the Ops staff that  
15 already, you know, can't answer the emails or the phone. And  
16 that has been the expectation, is they write a great report and  
17 drop it off with a harried staff, and yeah, 'Let us know how it  
18 turns out.' It's crazy. So, they either need to hire - do a  
19 contract just to bring in consultants who will do nothing but  
20 implement the last ten years of reports, build some of those  
21 things are missing, like a finance department, and things that

1 need to be kind of put on a different level or identify some  
2 other individual, create a position for that person. That would  
3 be another to do it if you don't want to hire a consulting  
4 agency. They would have to stay on the ground for at least  
5 three months, probably closer to six, to really make sure that  
6 this is implemented. It's going to take some time, but, yeah.  
7 If they don't do that then this is just the next fancy binder to  
8 place on the shelf, you know.

9 MS. DILLON: This may be a question for everybody,  
10 how do we get - I mean, it's been years, how do we get help? I  
11 mean, I know you have to contact these offices and these persons  
12 that seem intangible. But this is concerning, how do we make it  
13 happen? Whose door do we knock on? What letter do we write?  
14 This is concerning.

15 MS. HAYWARD: Who of significance sees this next?  
16 Where does it go? How does it get there?

17 MS. DILLON: I know the Governor's Office is busy.

18 MS. EVANS: Senator Eckhardt is very concerned,  
19 which is why she asked for the workload study to be completed.  
20 She is willing to assist in whatever manner in getting the other  
21 legislators onboard so that the Board of Nursing can succeed.

1 I'm sure nursing organizations, MNA and others, can provide  
2 support, but we also need support from downtown. We need  
3 support from Secretary Schrader on the Department of Health's  
4 side, and we need assistance from Secretary Brinkley from the  
5 DBM side.

6 MR. O'NEILL: Part of the tricky part is that you  
7 don't want to lose your independence, right?

8 MS. EVANS: Correct.

9 MR. O'NEILL: You are independent in nursing policy,  
10 right? You don't MDH overriding decisions that you're making  
11 regarding the nursing practice in Maryland, but you also don't  
12 want so much independence. And this is, I think, part of the  
13 problem is that when MDH says you have these operational issues  
14 over here, you know, 'You're an independent board.' And it says  
15 in the Act, Secretary has no authority over plans, projects,  
16 'So, why are you coming to me for help?' You know, and that's  
17 not a dig on him, that's the way the law is written. Do you see  
18 what I mean? So, you have two entities.

19 MS. EVANS: So, part of that would be writing  
20 regulation, or really statute at this point similar to what the  
21 Board of Physicians has as far as financial, as far as setting

1 their own classifications, setting up training for their staff  
2 biannually, having retreats, that's also critical in order to  
3 groom our individuals. The Practice Act is a problem.

4 MS. DILLON: I'm just referring to them, the very  
5 important basic things done, like the staffing, the 25 percent,  
6 you know, the vacancies.

7 MS. EVANS: Well, part of the problem is as all of  
8 you know is that my executive assistant left in April of 2021.  
9 My new executive assistant will be coming in September. It's  
10 taken all that time, including me calling down to DBM, calling  
11 HR. I can't tell you what I went through just to get a new  
12 executive assistant. Do you know how many - I can't tell you  
13 how many emails that I have right now that I'm not used to  
14 having, on top of COVID, and this is not just for my position.  
15 The fiscal manager, Tyera left almost a year ago, and we're  
16 still looking for that person. We're finally get interviews.  
17 The length of time it takes for us to put in a request to  
18 recruit, as Mark stated, they only approved two people for all  
19 of the boards, all 23 of us, each month which increases the  
20 delay. Then we have to wait till it's posted, which may take  
21 two weeks after they made the decision to give the PIN. After

1 that then it's posted depending on the position, anywhere from  
2 two to four weeks. After that they need to look at the  
3 qualifications of everyone, that's a three-week process. And  
4 then we get the names, and by that time a lot of people who we  
5 would like to interview have already found a job. And then a  
6 lot of those individuals, for instance for the nurse consulting  
7 role, they gave us someone who was - their education was Kiddie  
8 Care Academy, that's it, not a nurse. Kiddie Care Academy  
9 because that person had education. No, no, no, especially when  
10 the qualifications we put in, preferably Ph.D., has to have an  
11 MSN.

12 So, that's the struggle. And then once you do that,  
13 if you want to give them something above a certain salary - what  
14 is it, an 8 or a 9? Then we have to write why this person is  
15 more qualified to everybody on the list, which could be anywhere  
16 from three people to thirty, why this person is more qualified,  
17 and did we exhaust the list for that.

18 MS. O'NEILL: That would be a lot to do if you just  
19 had one vacancy let alone this many. You can't, because who's  
20 writing that up, if they expect someone to write it, who?

21 MS. EVANS: So, that is usually Rhonda and myself

1 who has to write it.

2 MR. HICKS: I think, also, over the last couple of  
3 months, I guess it's been a couple of months now, with our  
4 weekly calls with MDH in terms of looking at this big number of  
5 folks, you know, 40,000. I think at one point we were at 78,000  
6 that had not been renewed. You know, that was one of the  
7 focuses that we were looking at, but also looking at how the  
8 issues that MDH is hearing, you know, the calls at the  
9 Secretary's Office, the Governor's Office is getting. You know,  
10 so we kind of were massaging out a couple of different things.  
11 So, I think MDH, at least, and the Secretary, at least, started  
12 to see a little bit of a light through the tunnel, not the big  
13 light through the tunnel but a little bit in terms of the  
14 staffing concerns which help bring in this number of folks to  
15 get the emails down, to get the phone calls down. And we were  
16 able to provide them with data to show, 'Look, since you've  
17 brought all these people in to help us, look how these numbers  
18 have dropped,' which kind of supports Mark's report of the need  
19 for all of these vacancies to be filled and these PINs need to  
20 be reissued, or whatever.

21 So, I think they have just on the tip of their

1 tongues a little bit of the flavor of what is coming their way  
2 in terms of this report. We still have a long way to go. The  
3 Secretary is aware, I think, of these issues. And so, you know,  
4 we will keep moving forward as much as we can in terms of trying  
5 to get the needs filled. But it's going to take, obviously,  
6 Mark's report, and I want to thank Mark for all of his work over  
7 the last couple of weeks. It's really been a benefit of having  
8 him here to open up Pandora's box again. Because we've had  
9 Pandora's box opened before and closed, and now it's back open.  
10 So, to Mark's point, it will be very interesting to see whether  
11 we close the box again, or how that box looks moving down the  
12 road.

13 MR. O'NEILL: Yeah, the report will go to the  
14 Secretary. It's great that he is interested. The fact that he  
15 did send twenty nurses and myself here indicates a greater than  
16 average interest in what's happening.

17 MR. HICKS: And he, I believe, is really - I think  
18 he's eager to see this report. You know, it's not just going to  
19 be another packet that comes across his desk. But I think from  
20 the standpoint of calls to the Governor's Office, the pressure  
21 is being put on the Secretary from the Governor's Office. I

1 think he really wants to eat this report and digest it very well  
2 and come up with the resolutions that we need to make the Board  
3 successful.

4 So, I think we're in a different place. I hope  
5 we're in a different place than we have been perhaps previously  
6 because the Secretary is there, you know, kind of waiting.

7 MS. RAYMOND: There is a term that we should rest  
8 on, which is, you never waste a good crisis.

9 MR. HICKS: Right.

10 MR. RAYMOND: We are in the middle of a pretty  
11 significant crisis coming, you know, still independent. I think  
12 that this pandemic has highlighted the need to have a  
13 high-functioning, well-oiled, and well-funded licensing board.  
14 In the past when this has come up, we have not had a similar  
15 crisis to help fuel the fire. I think Mark's point is well  
16 taken, we're in a different place now for this report to be  
17 illuminated onto those decision makers that can help us out, so  
18 we should take advantage of that.

19 MR. HICKS: Yeah, and I think the other good thing  
20 that Mark had put in his report is, you know, really about the  
21 fact that we are different than all the other boards. We do a

1 lot more than the other boards do.

2 MR. O'NEILL: Which is not generally understood.

3 MR. HICKS: Right. And so, you can't compare us to  
4 the Board of Podiatry. We are nowhere in that lane. And so,  
5 sometimes we've heard that from the Governor's Office or the  
6 Secretary's Office, 'Well, the Board of X, how can they do this  
7 but you guys can't?' 'Why are you so much in the red, but the  
8 Board of Podiatrists seem to be doing well?' So, you know,  
9 there's a big difference there.

10 MR. O'NEILL: Right. It is really written for a  
11 legislator, as this is not written for an expert. There needs  
12 to be more expertise. There needs to be bean counters and  
13 analytical individuals to come in and they can dive in different  
14 parts of this report. I didn't go into every element, there's  
15 more details in the ladder pages that do a little bit of a  
16 deeper dive into some of the issues, but all these deserve.  
17 Again, if you request a Sunset Review, which is your right under  
18 the Maryland Act. They typically come out every ten years.  
19 There hasn't been one since 2010. The State sends internal  
20 experts and consultants to go in and analyze and do more  
21 analyses. This at least elucidates the larger themes, you know,

1 of what's going on.

2 So, it was absolutely my pleasure. Karen knows how  
3 to reach me if you have any follow-ups or, you know, kind of,  
4 'Oh, by the way,' or if you have questions that come up. I'm  
5 happy to take those and answer them at any time.

6 MS. HAYWARD: One observation I wanted to make is,  
7 that you seemed like, with this report, that you had a lot of  
8 compassion for our constituents and a fairness in the report. I  
9 think being able to show some good with the bad may make it more  
10 palatable as well. I think you were the right person.

11 MR. HICKS: Any other questions or comments?

12 (No questions posed)

13 MR. HICKS: All right. Thank you very much, Mark,  
14 for all your work.

15 MR. O'NEILL: Thank you.

16 MR. HICKS: All right, we will move down to the  
17 Direct Entry Midwives. Monica?

18 MS. MENTZER: Yes, I have two items to report. We  
19 will start with 8A.1. This is the continuing education approval  
20 for renewal of an electrologist license for Mary Ellen E.  
21 Ebersole, LE. Her license number is E01074.

1           Pursuant to the duties and powers in the Annotated  
2 Code of Maryland, Health Occupations Article Title 8, Subtitle  
3 8-6(b), Electrologist; Sections  
4 8-6(b)06 and 8-6(b)-14(d)1 to 4 and (e) and (f), the  
5 Electrologist Practice Committee has reviewed the completed  
6 renewal application and supporting documentation for Mary Ellen  
7 Ebersole, LE, E01074. And at their meeting on August 11th, the  
8 Committee recommends to the Board that the Board accept the  
9 renewal education with continuing education units of at least 20  
10 CEUs for the renewal of Mary Ellen Ebersole, E01074 as meeting  
11 requirements in the Code of Maryland Regulations, Title 10,  
12 Subtitle 53, Chapter 4, Continuing Education, specifically COMAR  
13 10.53.04.01 through COMAR 10.53.04.04.

14           MR. HICKS: Motion to approve the committee's  
15 recommendation to accept the renewal application and CEUs for  
16 renewal for Mary Ellen Ebersole?

17           MS. ROBIN HILL: So moved, Dr. Robin Hill.

18           MR. HICKS: Dr. Robin Hill.

19           MS. HAYWARD: Second, Hayward.

20           MR. HICKS: Hayward. All in favor?

21           ALL: Aye.

1 MR. HICKS: Opposed?

2 (No oppositions)

3 MR. HICKS: Motion carries.

4 MS. MENTZER: Moving on to A2. The renewal  
5 application of Colette E. Higgins, LE, License Number E01460.

6 Pursuant to the duties and powers in the Annotated  
7 Code of Maryland and Title 8, Subtitle 8-6(b), Electrologist,  
8 Section 8-6(b)06; 8-6(b)-14(d)1 to 4(e) and (f), the  
9 Electrologist Practice Committee, at their meeting on August 11,  
10 2021 has reviewed that the requirement for at least twenty CEUs  
11 for Colette Higgins meets the requirements in the Code of  
12 Maryland Regulations, specifically COMAR 10.53.04.01 through  
13 COMAR 53.04.04.

14 MR. HICKS: All right. Motion to accept the  
15 committee's recommendation to accept the renewal application and  
16 CEUs for renewal for Colette Higgins?

17 MS. DILLON: So moved, Dillon.

18 MR. HICKS: Dillon.

19 MS. ROBIN HILL: Second, Dr. Robin Hill.

20 MR. HICKS: Dr. Robin Hill. All in favor?

21 ALL: Aye.

1 MR. HICKS: Opposed?

2 (No oppositions)

3 MR. HICKS: Motion carries.

4 MS. MENTZER: Moving on to A3. Khloud A Houri,  
5 license electrologist, License Number E01462. Pursuant to the  
6 duties and powers in the Annotated Code of Maryland, Health  
7 Occupations Article Title 8, Subtitle 8-6(b), Electrologist;  
8 Section 8-6(b)06 and  
9 8-6(b)14(d) 1 to 4(e) and (f), the Electrology Practice  
10 Committee, at their meeting on August 11th has reviewed the  
11 supporting documentation meeting the requirements of at least  
12 twenty CEUs for the renewal of Khloud, and it's spelled,  
13 K-H-L-O-U-D; A. Houri; H-O-U-R-I, licensed electrologist,  
14 License Number E01462 as meeting all of the requirements in the  
15 COMAR, specifically 10.53.04.01 through COMAR 10.53.04.04.

16 MR. HICKS: Motion to accept the committee's  
17 recommendation to accept the renewal application and CEUs for  
18 renewal on Khloud Houri?

19 MS. ROBIN HILL: So moved, Dr. Robin Hill.

20 MR. HICKS: Dr. Robin Hill.

21 MS. DILLON: Second, Dillon.

1 MR. HICKS: Dillon. All in favor?

2 ALL: Aye.

3 MR. HICKS: Opposed?

4 (No oppositions)

5 MR. HICKS: Motion carries.

6 MS. MENTZER: A4 is Rosemarie Miller. Pursuant to

7 duties and powers in the Annotated Code of Maryland, Health

8 Occupations Article, Title 8, Subtitle 8-6(b), Electrologist,

9 Section 8-6(b)06 and 8-6(b)14(d)1 to 4(e) and (f), the

10 Electrology Practice Committee, at their committee meeting on

11 August 11, 2021, has reviewed the supporting documentation for

12 Rosemarie Miller, LE, and requests to the Board to accept the

13 renewal application and documentation of CEUs as required in

14 COMAR 10.53.04.01 through 10.53.04.04.

15 MR. HICKS: All right. Motion to accept the

16 committee's recommendation to accept the renewal application and

17 CEUs for renewal for Rosemarie Miller?

18 MS. ROBIN HILL: So moved, Dr. Robin Hill.

19 MR. HICKS: Dr. Robin Hill.

20 MS. DILLON: Second, Dillon.

21 MR. HICKS: Dillon. All in favor?

1           ALL:    Aye.

2           MR. HICKS:  Opposed?

3                               (No oppositions)

4           MR. HICKS:  Motion carries.

5           MS. MENTZER:  And then one more, 8-A5, Ruthann L.

6           (Fran) O'Malley, licensed electrologist, E01270.  Pursuant to

7           duties and powers in the Annotated Code of Maryland, Health

8           Occupations Article, Title 8, Subtitle 8-6(b), Section 8-6(b)06,

9           and 8-6(b)-14(d)1 to 4, and (e) and (f), the Electrologist

10          Practice Committee recommends to the Board that they reviewed

11          the requirements as meeting at least twenty CEUs for the renewal

12          of Ruthann L. (Fran) O'Malley, licensed electrologist,

13          specifically meeting COMAR 10.53.04.01 through 10.53.04.04.

14          MR. HICKS:  Motion to accept the committee's

15          recommendation to accept the renewal application and CEUs for

16          renewal of Ruthann O'Malley.

17          MS. GIBBONS-BAKER:  So moved, Gibbons-Baker.

18          MR. HICKS:  Gibbons-Baker.

19          MS. STEELE:  Second, Steele.

20          MR. HICKS:  Steele.  All in favor?

21          ALL:  Aye.

1 MR. HICKS: Opposed?

2 (No oppositions)

3 MR. HICKS: Motion carries.

4 MS. MENTZER: And then for the direct entry  
5 midwives, I do have an FYI for the Board. I did receive a  
6 letter from one of the delegates, Delegate Kelly, and they  
7 requested that the direct entry midwives come together. And  
8 they've had meetings on July 23rd, August 6th, and August 20th  
9 to discuss with stakeholders, who were invited to the meetings.  
10 Some of the questions that Dr. Kelly specifically wanted  
11 addressed in relation to House Bill 1032 of the 2021 Legislative  
12 Session that did not pass that they possibly be reintroduced in  
13 the 2022 Legislative Session. So, the committee has met three  
14 additional times to look at the specific areas that are to be  
15 included in their report with recommendations to the Board next  
16 month. And then that report after the Board reviews it would go  
17 on to the Maryland General Assembly.

18 MR. HICKS: Okay.

19 MS. MENTZER: But we do, because we had these extra  
20 meetings, we do have an extra applicant that was reviewed. So,  
21 9B.1 is Morgan A. Hughes. The application has been reviewed at

1 the August 20, 2021 by the Direct Entry Midwife Advisory  
2 Committee for initial licensure to practice direct entry  
3 midwifery in Maryland for Morgan A. Hughes, and finds that the  
4 applicant meets the minimum regulatory requirements in COMAR,  
5 Title 10, Subtitle 64, Chapter 01, specifically Regulations  
6 10.64.01.15 and 10.64.01.16 for initial licensure as a direct  
7 entry midwife in Maryland.

8 MR. HICKS: Motion to accept the recommendation to  
9 approve Morgan Hughes to practice as a direct entry midwife?

10 MS. GIBBONS-BAKER: So moved, Gibbons-Baker.

11 MR. HICKS: Gibbons-Baker.

12 MS. STEELE: Second, Steele.

13 MR. HICKS: Steele. All in favor?

14 ALL: Aye.

15 MR. HICKS: Opposed?

16 (No oppositions)

17 MR. HICKS: Motion carries. Thank you, Monica.

18 MS. MENTZER: Thank you.

19 MR. HICKS: There are no Quarterly Reports, so we  
20 will move down to 10, Other.

21 Barbara Jacobs, are you online?

1 MS. JACOBS: Yes, I am here.

2 MR. HICKS: I give you the floor.

3 MS. JACOBS: I am the chief officer at Anne Arundel  
4 Medical Center, and want you all to know how much we appreciate  
5 the work that you all are doing. I am confident that you could  
6 rally supporting the chief concern I have. What my request is,  
7 as we have all been talking, and as you know many of the  
8 hospitals around here are trying to staff and manage the volumes  
9 of vacancies we have. One of the things that we are doing is  
10 everyone is taking increasing numbers of new graduates to try to  
11 fill the vacancies, and we are seeing increases in those new  
12 graduates in failing their boards. What we found very helpful  
13 during the Governor's Emergency Order, we were allowed to use  
14 them as patient care technicians, which allowed them to continue  
15 to get experience at the bedside while they waited to take their  
16 boards. Now with the end of the order we will not be allowed to  
17 let them to do that. So, we're asking if there is any way that  
18 there could be a consideration that a student - a young person  
19 who graduates would be allowed to continue to practice as a  
20 nursing assistant, even if you want to put a timeframe on it.  
21 You will find for CNA certifications it takes too long. If you

1 have to put a time limit on that like six months or whatever,  
2 but it would greatly help the hospitals. So, we are asking for  
3 that stipulation. There were many other CNOs who supported, but  
4 we just could not - I definitely wanted to go to the meeting  
5 because I wanted to make sure you got this message across. But  
6 we just wanted to know if you would be supportive of this  
7 because we are trying to manage through this difficult time.

8 MR. HICKS: So, thank you, Ms. Jacobs, for your  
9 delivery there. The challenge that we have, or the issue that  
10 we have is that during the Governor's Executive Order we were  
11 able to do things outside of what the Practice Act defines,  
12 right?

13 MS. JACOBS: Right.

14 MR. HICKS: And so, we were able to use, like this  
15 particular scenario, those that were unsuccessful with their  
16 boards, we were able utilize for long-term CNAs or whatever role  
17 or capacity a hospital saw fit. However, unfortunately, because  
18 the Governor's Order has expired that requires us to go back  
19 into what the regulations and what the COMAR states. So, we  
20 have to follow those rules that are outlined by the regulation.  
21 So, with that being said, that means that those that were

1 unsuccessful with the boards, which is really the issue that  
2 they were unsuccessful with the boards, are not able to be  
3 extended to CNAs if they don't currently hold a certification as  
4 a CNA. So, we as a Board, unfortunately, we cannot change that  
5 regulation because that is statute. And so, we have to follow  
6 what the regulations currently have in them.

7 MS. JACOBS: How do we change the COMAR regs?  
8 Because that's what I'm saying, we need to get COMAR regs  
9 changed.

10 MR. HICKS: Right. So, that would require a whole  
11 legislative piece that we would have to propose new legislation,  
12 new COMAR regulations, and go through that process. So, we  
13 would have to rewrite the COMAR regs compared to what they are  
14 currently, which would then need to go through the legislative  
15 process for voting and approval and adoption.

16 MS. JACOBS: Well, it certainly is something that  
17 we've been dealing with critically in the hospitals. If there  
18 is some way that you can help us regarding this because we are  
19 just hurting ourselves right now. I just want to pass that  
20 along that we have to not let the Board fall to pieces.

21 MS. HICKS: Yeah, so, I guess, you know, my

1 recommendation to you would be if this is something that your  
2 group, which is probably your CNO groups in the state, if there  
3 is some type of organization that gets all of you together. If  
4 you realize that this is a problem that needs to be addressed,  
5 then perhaps we can kind of go offline and get with your group  
6 to talk about what that legislative process looks like to change  
7 the regs. But unfortunately, we're not able to offer an  
8 extension or change in regulation or COMAR because we do have to  
9 follow the regulations.

10 MS. JACOBS: I know the Monal group would write  
11 something for us to take up there and deliver.

12 MR. HICKS: The Monal group would be the ideal, if  
13 they realize that this is a problem that needs to be addressed.  
14 But just know that it does take time, this is not something  
15 that, you know, would occur rapidly. It may not ever occur in  
16 one Legislative Session if, you know, it's not voted on or  
17 whatever. So, just know that it won't happen overnight.

18 Mr. Neustadt?

19 MR. NEUSTADT: The previous edict that just expired,  
20 was that a legislative edict or was that from the Governor's  
21 Office because of COVID.

1           MR. CONTI: It was a Governor's Executive Order.  
2 Under his emergency powers, his statutory emergency powers, he  
3 was able to issue executive orders that permitted various state  
4 agencies to waive certain provisions of their statute or  
5 regulations in order to achieve an increase in the workforce.  
6 So, now that those have expired each of those state agencies has  
7 to revert back to all of the statutes.

8           MR. NEUSTADT: I understand that. Can an edict be  
9 given again? Can an emergency thing - I mean, COVID is rising,  
10 the hospitals are short of people, can that be - you know, the  
11 reason an edict was done before was because they didn't have  
12 time to go through the legislative process. There are people  
13 dying, and why can't this be, you know, attempted again?

14          MR. HICKS: It really is the Governor's call, you  
15 know?

16          MR. NEUSTADT: Yeah.

17          MR. HICKS: I mean, he's monitoring that and, you  
18 know, it will be up to him to say whether he feels the state is  
19 in such a dire need to have another executive order issued.  
20 But, you know, it's in his hands.

21          MR. NEUSTADT: But who goes to the governor to

1 request this? How does that take place?

2 MR. HICKS: So, I think he has folks under him that  
3 are monitoring these healthcare crises that we're seeing within  
4 the state. They report up to him and then he makes that  
5 ultimate decision. I'm sure that any constituent or any citizen  
6 in the state could actually, perhaps, write to him or call him.  
7 I don't know how much weight that has in terms of - because when  
8 he makes those orders it has significant impact. So, they are  
9 just not something that they flip the switch and say, 'Yep,  
10 we're going to create an executive order now.'

11 MR. NEUSTADT: I understand that.

12 MR. HICKS: And I think it's one of those things  
13 that when the order is made it has to be pretty relevant, right?  
14 It has to be pretty intense to make those things happen, so.

15 MR. RAYMOND: Ms. Jacobs, this is Dr. Raymond.  
16 Besides Monal, I would also recommend Maryland Hospital  
17 Association as the other entity to seek out efficacy.

18 MS. JACOBS: Okay. This is just one small piece,  
19 perhaps the Governor does not realize the crisis that hospitals  
20 are in. You know, this is just a tiny, tiny piece. These are  
21 just simple things.

1           MR. RAYMOND: For lasting change in COMAR related  
2 and to the students in extending the amount of time that we have  
3 for the students to continue to serve in the capacity of a CNA  
4 post-graduation having not passed NCLEX the first time, you  
5 know, there will have to be some sort of a time limit on it.  
6 But to extend the time limit we have to have legislative change  
7 which has to have efficacy, and I think MHA and Monal are those  
8 two organizations that would be a strong voice to initiate that  
9 change.

10           MS. JACOBS: Thank you.

11           MR. HICKS: Ms. Jacobs, just before you leave, I do  
12 want to offer you one suggestion or proposal, I guess, is that  
13 if there's a group of you for when you meet with your Monal  
14 group or your MHA group or whoever, if you have a committee  
15 source that works on this, that all of you identified as a major  
16 problem, you are welcome to look at what the existing standards  
17 are or what the Nurse Practice Act is and you can come forward  
18 to the Board with a proposal of the changes that you would like  
19 to see, and the Board could take that under consideration and  
20 advocate for you.

21           MS. JACOBS: Are you talking about the COMAR?

1           MR. HICKS: Yes, and I will give you COMAR, that  
2 would be COMAR -

3           MS. JACOBS: I've got the COMAR and what it says.  
4 It would be exactly, and then after that it would be changing  
5 that one line.

6           MR. HICKS: I just want to make sure that you know  
7 that that is an opportunity that you have is to come before the  
8 Board with a recommendation.

9           MS. JACOBS: So, we would come with the Monals, or  
10 whatever it is, and you would recommend that line be changed and  
11 then they would vote for that to change?

12          MR. HICKS: Well, let me just give you the COMAR  
13 just to make sure you have it. It's 10.27.01.03(c).

14          MS. JACOBS: Yes.

15          MR. HICKS: And then you're going to look at,  
16 particularly, you have 1, 2, 3, and 4 to make sure, you know, if  
17 there's any changes that need to be made then that's where you  
18 make those changes.

19          MS. JACOBS: And then bring it to you all and then  
20 that goes to legislators for the change?

21          MR. HICKS: Right. So, if your group, if that Monal

1 group gets together and says, 'Okay, these are the things that  
2 we believe need to be changed in that 10.27.01.03(c), you know,  
3 out of those four listings, you know, change whatever you think  
4 needs to be changed. Someone from your group, whether that's  
5 you as the representative or a couple of you from the Monal  
6 group as representative will contact us to come before the  
7 Board. Then you would propose what those changes are, and then  
8 the Board would consider those. If the Board feels that we can  
9 advocate for that then we will, you know, move forward with  
10 helping with change in regulation or COMAR. So, you know, we  
11 would start down that road.

12 MS. JACOBS: Okay. I'm sure we could do that.

13 MR. HICKS: All right. Thank you, Ms. Jacobs.

14 MS. JACOBS: Thank you.

15 MR. HICKS: We are going to go back to the Annual  
16 Report because we had some clarification that we needed to make  
17 on the Annual Report. So, Karen?

18 MS. EVANS: Yes, a couple of things. If we can go  
19 back to Page 25 where we spoke about the numbers for the  
20 registered nurses. So, that does include all advanced practice  
21 nurses except those - if you look on Page 26 that has the AC

1 numbers. The AC numbers are those individuals who have compact.  
2 So, they have their RN license in another state, but they want  
3 to be an APRN here in Maryland using their compact. So, that's  
4 a separate number. So, all those individuals are not included  
5 in that original RN number that we spoke about earlier. Is that  
6 clear with everyone?

7 ALL: Yes.

8 MS. EVANS: All right. The other question  
9 concerning med techs is that what is on here is correct. They;  
10 assisted living, school health, DDA, and juvenile services  
11 numbers are included in the med tech numbers. The rest of the  
12 med techs don't have a specialty. Okay? For the nursing  
13 assistants, for the GNAs, CMA, home health, dialysis tech, and  
14 school health those numbers are included in the CNA, and  
15 everyone else is  
16 non-specific. Okay?

17 Now, what is not included in the CNA numbers are the  
18 last three, which are the 90-day letters. They're not included  
19 because they are only for 90-day letters, and then at the end  
20 they will be included in the CNA numbers once those individuals'  
21 background check has been completed. Is that a better

1 explanation for everyone?

2 MS. GIBBONS-BAKER: Yes, and I would ask with the  
3 reports a little asterisk at the bottom could clarify that with  
4 each number.

5 MS. EVANS: Yes, we will ask Iman to include that,  
6 yes.

7 MS. GIBBONS-BAKER: Excellent.

8 MS. EVANS: So, when the merge is over for the  
9 website, we will update the med site to reflect that as well  
10 with your recommendation. Okay? I know we won't be able to get  
11 it done by tomorrow. So, in three weeks we will make sure that  
12 it goes up on the website.

13 MR. HICKS: All right. Are there any questions  
14 about the Annual Report?

15 (No questions posed)

16 MR. HICKS: All right. So, given the changes we  
17 will make on the Annual Report that Karen just identified, is  
18 there a motion to accept the Annual Report?

19 MS. HARROD-OWUAMANA: Motion to accept,  
20 Harrod-Owuamana.

21 MR. HICKS: Harrod-Owuamana.

1 MS. DILLON: Second, Dillon.

2 MR. HICKS: Dillon. All in favor?

3 ALL: Aye.

4 MR. HICKS: Opposed?

5 (No oppositions)

6 MR. HICKS: Motion carries. And then finally, I  
7 will open it up to the general audience if anyone wants to  
8 address the Board.

9 (No discussions posed)

10 MR. HICKS: All right, hearing none. In a moment I  
11 am going to ask if there is a motion to close the Open Session,  
12 but first I am going to walk us through the written statement  
13 that is required by the Open Meetings Act to ensure that all  
14 board members agree with its contents.

15 As documented in the written statement, the  
16 statutory authority to close this Open Session and meet in  
17 Closed Session is General Provision 3-305(b)13, which gives the  
18 Board the authority to close an Open Session, to comply with the  
19 specific statutory requirements that prevents public disclosures  
20 about a particular matter or proceeding. The topic to be  
21 discussed during the Closed Session is applications for

1 licensure and/or certification. The reason for discussing this  
2 topic in Closed Session is to discuss confidential matters that  
3 are prohibited from public disclosures by the Annotated Code of  
4 Maryland, Health Occupations Article, Sections 8-303(f),  
5 8-320(a), and 1-401, and General Provisions Article, Section  
6 4-333. In addition, the Board may also perform Quasi Judicial  
7 and administrative functions involving disciplinary matters  
8 during the Closed Session.

9 Is there a motion to close this Open Session  
10 pursuant to the statutory authority and the reasons cited in  
11 the written statement, or any discussions thereof?

12 MS. STEELE: So moved, Steele.

13 MR. HICKS: Steele.

14 MS. GIBBONS-BAKER: Second.

15 MR. HICKS: Gibbons-Baker.

16 MR. HICKS: All in favor?

17 ALL: Aye.

18 MR. HICKS: Any opposed?

19 (No oppositions)

20

21

1           MR. HICKS: Thanks everyone.

2           (Whereupon, at 12:05 p.m. the Open Session was  
3 concluded.)

CERTIFICATE OF NOTARY

I, EDWARD BULLOCK, a Notary Public of the State of Maryland, do hereby certify that the proceedings were recorded via audio by me and that this transcript is a true record of the proceedings. I am not responsible for inaudible portions of the proceedings.

I further certify I am not of counsel to any of the parties, nor an employee of counsel, nor related to any of the parties, nor in any way interested in the outcome of this action as witness my hand and notarial seal this 25th day of August, 2021.

\_\_\_\_\_  
Edward Bullock, Notary Public  
in and for the State of Maryland

My commission expires: May, 13, 2023

**Script for Closing Open Session**  
August 2021

In a moment, I am going to ask if there is a motion to close the open session, but first I am going to walk us through the written statement that is required by the Open Meetings Act to ensure that all Board members agree with its contents.

As documented in the written statement, the statutory authority to close this open session and meet in closed session is General Provisions § **3-305(b)(13)**, which gives the Board the authority to close an open session to comply with a specific statutory requirement that prevents public disclosure about a particular matter or proceeding. The topic to be discussed during closed session is applications for licensure and/or certification. The reason for discussing this topic in closed session is to discuss confidential matters that are prohibited from public disclosure by the Annotated Code of Maryland, Health Occupations Article, sections 8-303(f), 8-320(a), and 1-401 *et seq.*, and General Provisions Article section 4-333. In addition, the Board may also perform quasi-judicial and administrative functions involving disciplinary matters during the closed session.

Is there a motion to close this open session pursuant to the statutory authority and reasons cited in the written statement or any discussion thereof?

# MARYLAND BOARD OF NURSING

## Presiding Officer's Written Statement for Closing a Meeting under the Open Meetings Act (General Provisions Article § 3-305)

1. **Recorded vote to close the meeting:** Date: 8/25/2021 Time: 12:05 pm  
Location: 4140 Patterson Avenue, Baltimore, MD; Conference Call Line  
Motion to close meeting made by: Steele Seconded by Gibbons - Baker  
Members in favor: Nvestadt, Gibbons-Baker, Dillon, Raymond, Hicks, Steele, Owoumana, Hayward,  
Opposed: None Abstaining: None R. Hill,  
Absent: Vickers, J. Hill Cassidy,  
Polk,  
Turner
2. **Statutory authority to close session.** This meeting will be closed under General Provisions § 3-305(b) only:

(1) \_\_\_ "To discuss the appointment, employment, assignment, promotion, discipline, demotion, compensation, removal, resignation, or performance evaluation of appointees, employees, or officials over whom this public body has jurisdiction; any other personnel matter that affects one or more specific individuals"; (2) \_\_\_ "To protect the privacy or reputation of individuals concerning a matter not related to public business"; (3) \_\_\_ "To consider the acquisition of real property for a public purpose and matters directly related thereto"; (4) \_\_\_ "To consider a matter that concerns the proposal for a business or industrial organization to locate, expand, or remain in the State"; (5) \_\_\_ "To consider the investment of public funds"; (6) \_\_\_ "To consider the marketing of public securities"; (7) \_\_\_ "To consult with counsel to obtain legal advice"; (8) \_\_\_ "To consult with staff, consultants, or other individuals about pending or potential litigation"; (9) \_\_\_ "To conduct collective bargaining negotiations or consider matters that relate to the negotiations"; (10) \_\_\_ "To discuss public security, if the public body determines that public discussion would constitute a risk to the public or to public security, including: (i) the deployment of fire and police services and staff; and (ii) the development and implementation of emergency plans"; (11) \_\_\_ "To prepare, administer, or grade a scholastic, licensing, or qualifying examination"; (12) \_\_\_ "To conduct or discuss an investigative proceeding on actual or possible criminal conduct"; (13) X "To comply with a specific constitutional, statutory, or judicially imposed requirement that prevents public disclosures about a particular proceeding or matter"; (14) \_\_\_ "Before a contract is awarded or bids are opened, to discuss a matter directly related to a negotiating strategy or the contents of a bid or proposal, if public discussion or disclosure would adversely impact the ability of the public body to participate in the competitive bidding or proposal process." (15) \_\_\_ "To discuss cybersecurity, if the public body determines that public discussion would constitute a risk to: (i) security assessments or deployments relating to information resources technology; (ii) network security information . . . or (iii) deployments or implementation of security personnel, critical infrastructure, or security devices."

3. For each provision checked above, disclosure of the topic to be discussed and the Maryland Board of Nursing's reason for discussing that topic in closed session.

Citation	Topic	Reason for closed-session discussion of topic
§ 3-305(b) ( 13 )	Applicants for Licensure/Certification	To discuss confidential information that is prohibited from public disclosure pursuant to Md. Code Ann., Health Occ. §§ 8-303(f), 8-320(a), and 1-401 <i>et seq.</i> , and Gen. Prov. § 4-333.
§ 3-305(b) ( )		
§ 3-305(b) ( )		

**NOTE: During the Closed Session, the Maryland Board of Nursing may also perform quasi-judicial and administrative functions involving disciplinary matters.**

4. This statement is made or adopted by , Presiding Officer, Maryland Board of Nursing.
