

MDPCP at a Glance

Program Year 2 Snapshot – 2020

The Maryland Primary Care Program (MDPCP) is now in its second program year and recruiting for the 2021 Performance Year. The MDPCP is a voluntary program open to all qualifying Maryland primary care providers that provides funding and support for the delivery of advanced primary care throughout the state. The MDPCP supports the overall health care transformation process and allows primary care providers to play an increased role in prevention, management of chronic disease, and preventing unnecessary hospital utilization.

476 Practices Officially Participating as of Jan 1, 2020:

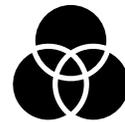

~346,000 Fee-For-Service Medicare Beneficiaries

All Maryland Counties & Jurisdictions Represented

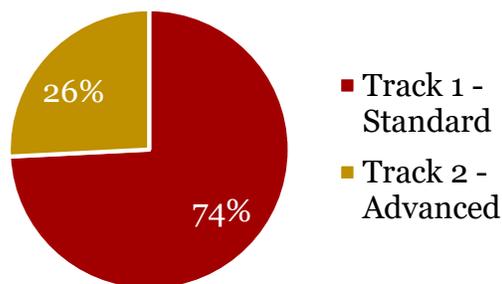

1,879 Primary Care Practitioners

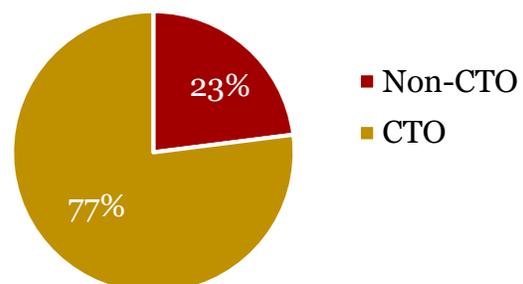

Multi-payer: Medicare & CareFirst

Program Options: Practices may be enrolled in one of two tracks of the program, a standard Track 1 and an advanced Track 2, with differing care requirements and payment options. Additionally, practices can optionally partner with a Care Transformation Organization (CTO), an organization that performs an array of care coordination services in partnership with the practice.

Practice Tracks

Practices Partnered with a CTO

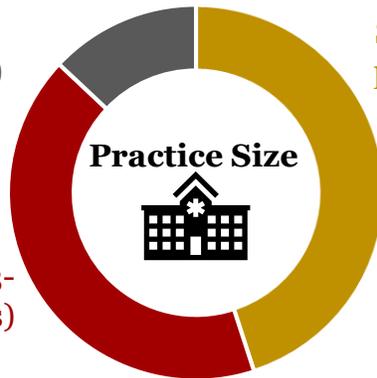

Diverse practices serving a broad Maryland population

Large (8+ providers)
13%

Small (1-2 providers)
45%
