Map of Participating Practices

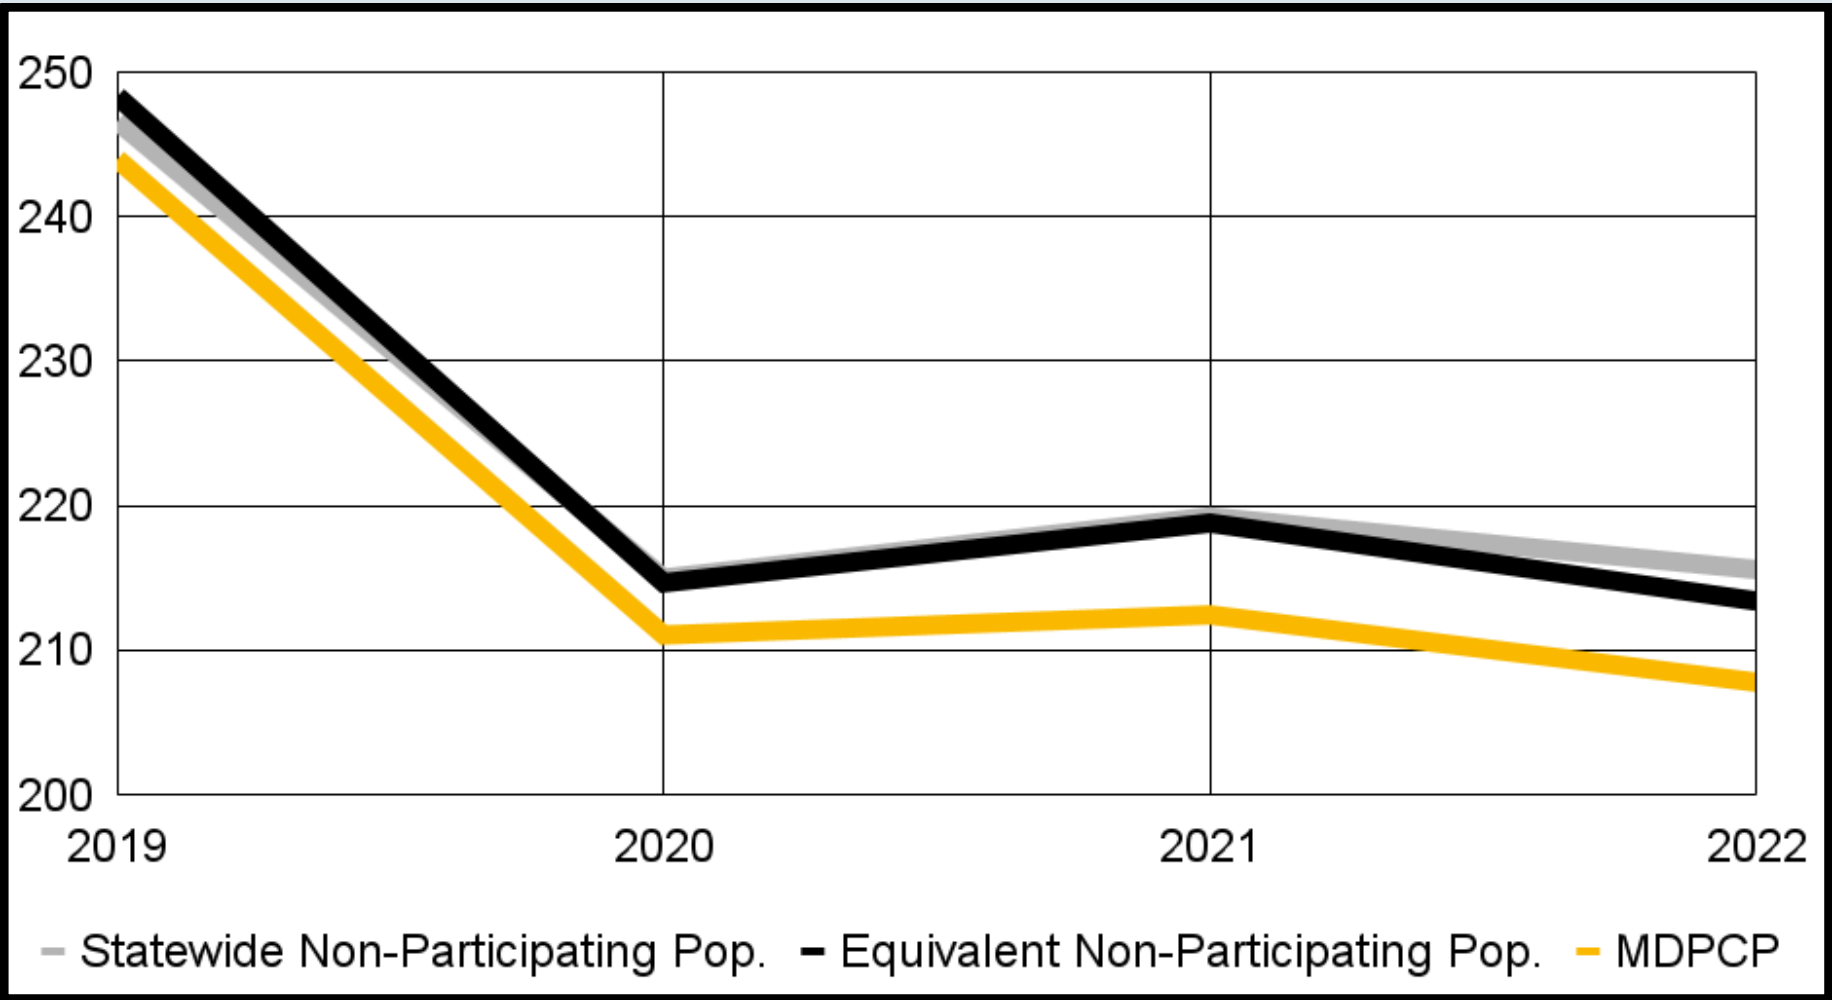

Program Performance

Utilization Trends

Inpatient Admissions (IP) per 1,000 Beneficiaries (HCC risk-adjusted)

IP visits per K decreased 2.2% from last year.

Emergency Department (ED) Visits per 1,000 Beneficiaries (HCC risk-adjusted)

ED visits per K decreased 1.25% from last year.

*Risk-adjustment is based on the average HCC score of attributed beneficiaries.

HCC: Hierarchical Condition Category

Utilization and Cost Trends

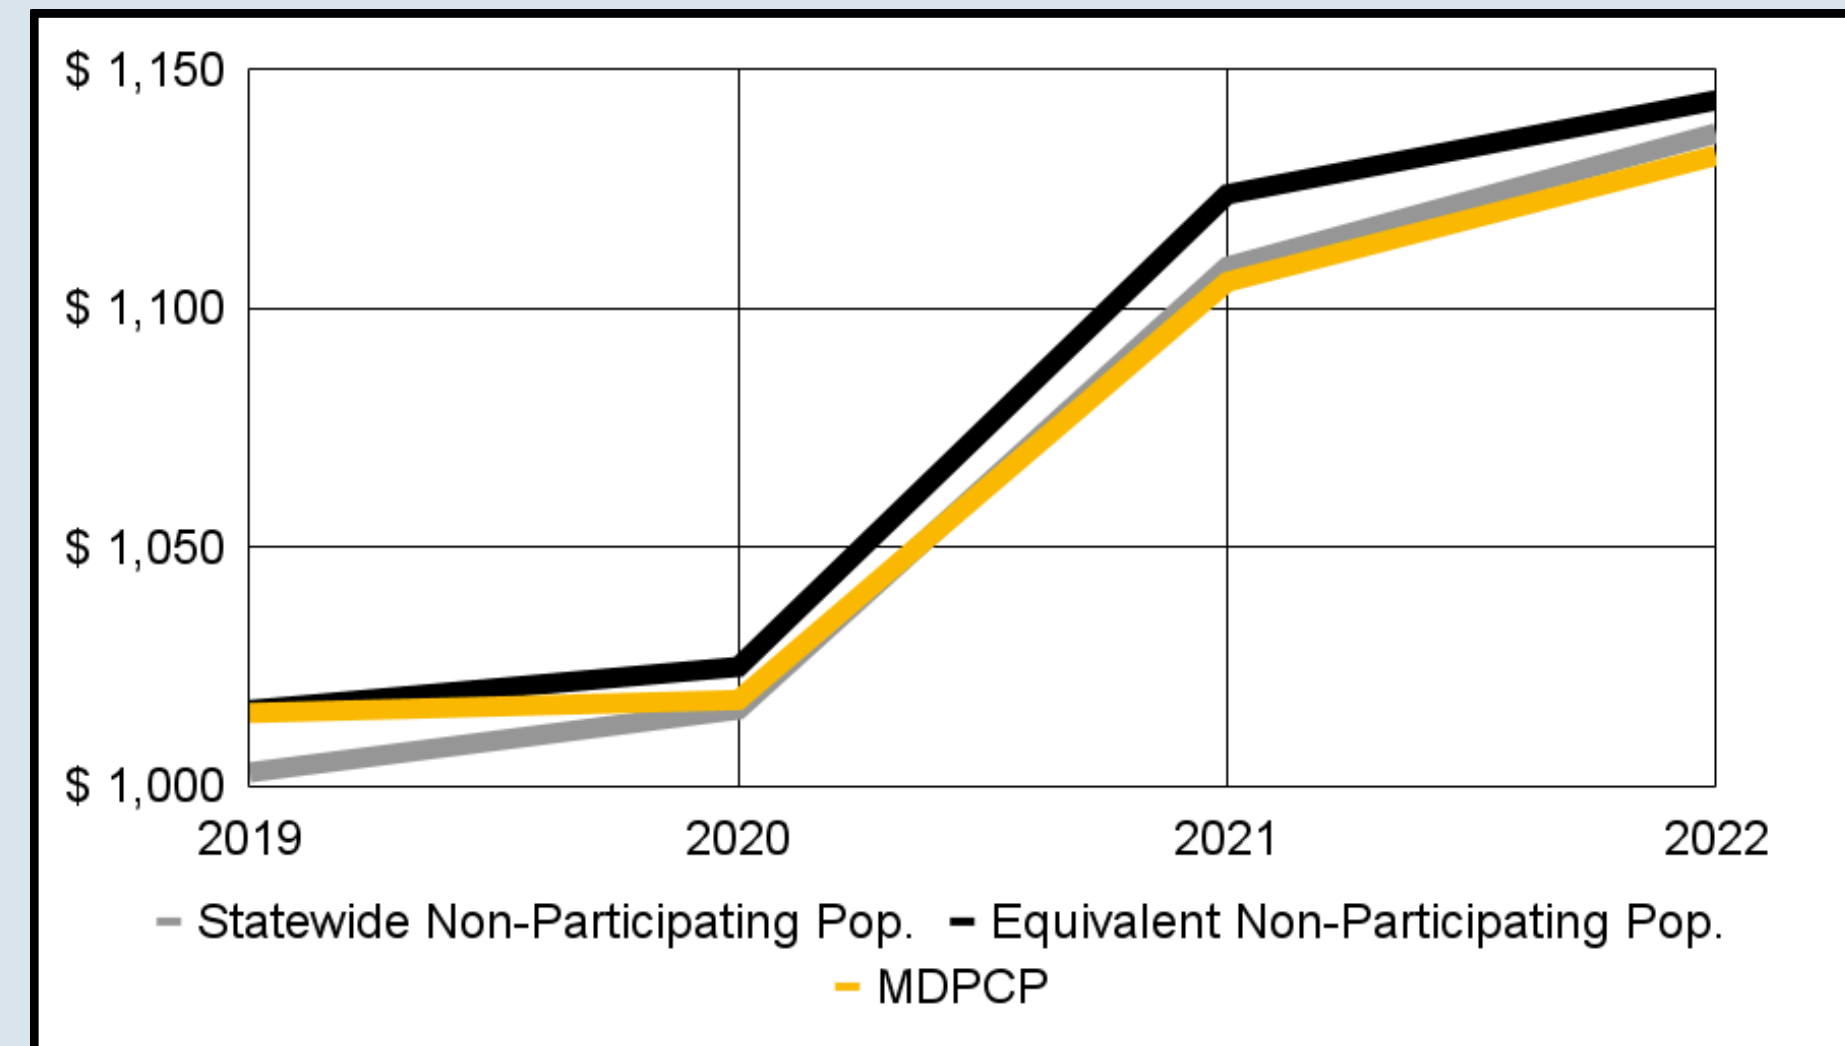

PQI-Like Events per 1,000 Beneficiaries (HCC risk-adjusted)

PQI-like events decreased 1.9% from last year.

Per Beneficiary Per Month (PBPM) Payments (HCC risk-adjusted)

In 2022, average PMPM payments for MDPCP practices increased 2.39%.

*Risk-adjustment is based on the average HCC score of attributed beneficiaries.

PQI: Prevention Quality Indicators

Performance Compared to Benchmarks: Clinical Quality

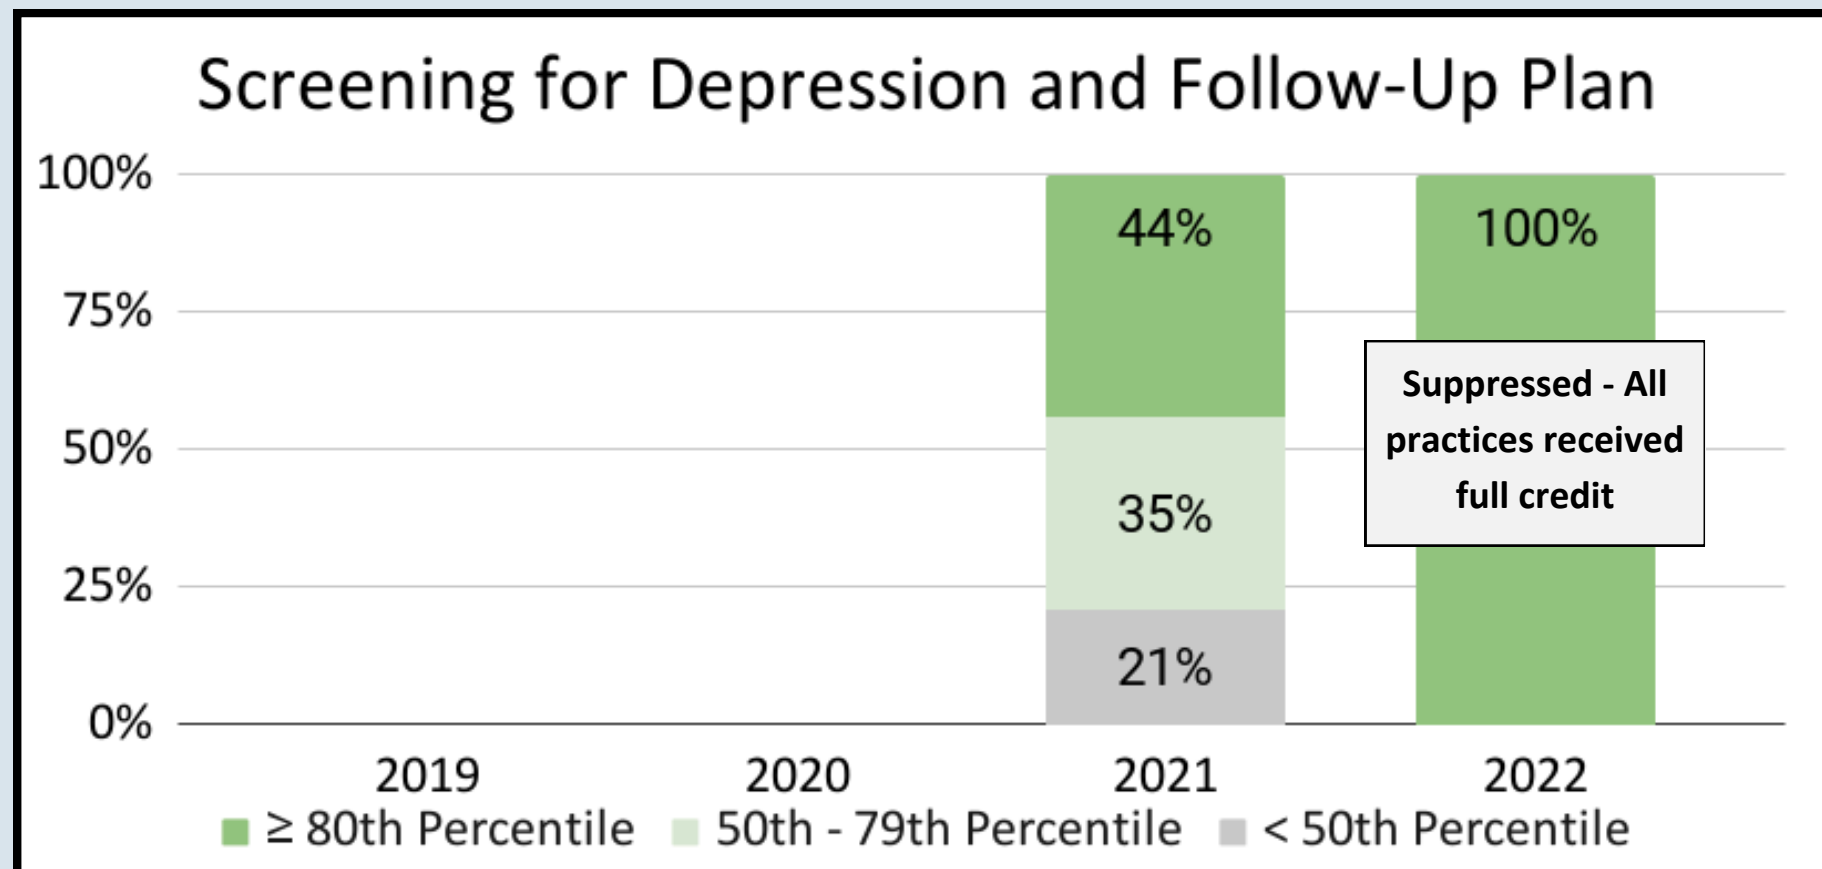

MDPCP Practices' Performance Against the National Benchmark in Controlling High Blood Pressure (CMS165)

*Controlling High Blood Pressure (CMS165) was suppressed for PY2022. MDPCP Practices received full credit for this eCQM in 2022.

MDPCP Practices' Performance Against the National Benchmark in HbA1c Control (CMS122)

Performance Compared to Benchmarks: Clinical Quality

MDPCP Practices' Performance Against the National Benchmark, Screening for Depression and Follow-Up Plan (CMS2)

MDPCP Practices' Performance Against the National Benchmark, BMI Screening and Follow-up Plan (CMS69)

*Screening for Depression (CMS2) was suppressed for PY2022. MDPCP Practices received full credit for this eCQM in 2022.

Performance Compared to Benchmarks: Utilization

**MDPCP Practices' Performance Against the Maryland
Benchmark, Emergency Department Utilization
(EDU)**

**MDPCP Practices' Performance Against the Maryland
Benchmark, Inpatient Utilization (AHU)**

Measure Performance Impact on PBIP

Percentage of PBIP Earned

Percentage of Performance-Based Incentive Payment (PBIP) Earned by MDPCP Practices, 2019-2022

Percentage of PBIP Earned, 2022

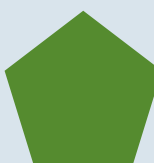

Percentage of PBIP Earned by Group, 2022

*In 2022, raw scores improved in most categories. However, actual PBIP retention decreased from the prior year due to changes in benchmarks and scoring methodology.

Practice Data Tools - Aligned with Maryland's State-wide Integrated Health Improvement Strategy (SIHIS) Goals

These tools contribute to advancing state population health goals and support primary care practices in providing better care and the advancement of primary care services.

Smart Alerts

Prediabetes Smart Alert: Alerts providers about patient A1C lab results that put them at risk for becoming diabetic.

Non-fatal Overdose Smart Alert: Identifies patients that have experienced a **non-fatal overdose** and were treated by EMS or Emergency Department.

Model Development

Pre-DC Model™: Predicts Severe Diabetes Complications. The purpose of developing this model is to identify patients who may be at risk for serious and potentially fatal conditions. This model helps practices reduce **diabetes** incidence within the state of Maryland while increasing capacity and beneficiary participation in the Diabetes Prevention Program.

MDPCP Data Tools: 2022 Reports Development and Enhancements

New Pharmacy Reports

Enhance medication reconciliation and comprehensive management efforts within primary care practices.

High Risk Medications - Top 100 Prescribers

- Identifies the top 100 prescribers who prescribed potentially high-risk medications for older adults.

Medication Synchronization Opportunity Summary

- Identifies patients whose prescriptions are not synchronized.

New Event Prediction Tools

Round out the Prediction Tools suite and provide care management opportunities.

Pre-DC (Severe Diabetes Complications)

- Estimates individual's risk of inpatient admissions or ED visits, facilitating active management of Type-2 Diabetes.

Pre-HE (Hospice Eligibility and Advanced Care Planning)

- Designed to support proactive advanced care planning discussions by estimating risk of death within 6 months.

New Performance Measurement Tool

Developed to identify CTO and Practice-level cost.

Total Per Capita Cost (TPCC) Report

- Provides perspective on practice cost performance in line with TPCC performance measure.

Report Enhancements

Develop more actionable reports to increase report use.

Health Equity by Demographics Report

- Identifies health disparities among patient population through disparity index and chronic conditions.

Beneficiary Details Report

- Focused report of high-risk patients which includes HEART payment flag, pharmacy data, and prediction tool scores.

MDPCP Reports Usage Spotlight: Care Management, Comprehensiveness and Coordination of Care Reports

Most CTOs and Practices prioritized improvement of Care Management using a patient-centric, data-driven, and team-based approach. This graph reflects the increased use of Care Management, Comprehensiveness and Coordination of Care reports in 2022 to support these ongoing initiatives.

Rollout of the Equity-Focused HEART Payment

In 2022, MDPCP rolled out the Health Equity Advancement Resource and Transformation (HEART) payment, providing additional support to MDPCP participants serving socioeconomically disadvantaged populations in order to promote the State's and CMS' goal to improve health equity.

Example HEART Payment Uses

Chronic Disease
Care Kits

Housing
Support

Community
Health Workers

Food
Assistance

HEART Payment Funding Framework

HEART provides an additional \$110 PBPM for attributed beneficiaries who are in:

One of the two
highest HCC risk
tiers:
4th HCC risk tier
(75th - 89th
percentile)
Or complex risk
tier (90th - 99th
percentile)

High Medical
Complexity
(HCC)

High Area
Deprivation
Index (ADI)

Highest ADI
quintile
(based on MDPCP
beneficiary
population)

Rolled out \$29 Million in HEART Payments to practices and CTOs

HEART Payment Resources Provided by the PMO/CMMI

Practice Coaches

2022 HEALTH EQUITY PARTNER INITIATIVES

Maryland Health Equity and Digital Quality Measures Project

MDPCP partnered with CRISP and Medisolv to allow tracking of eCQMs and quality performance with an equity focus. This initiative enables practices and CTOs to visualize and respond to disparities in clinical quality. **34 practices signed on in 2022!**

Social Risk Factors Technical Assistance

MDPCP worked with Medstar Health Research Institute to support practices and CTOs in addressing patients' social risk, providing 1:1 support to practices/CTOs. As part of this work, we created the [Guidance for Social Needs Screening & Demographics Data Collection Toolkit](#).

Improving Directory of Social Support Resources

MDPCP worked with Maryland 211 to **add 506 resource records** and improve the quality of information in the 211 online resource directory for social resources.

COVID-19 and Public Health Integration

COVID - 19

Support was framed with the [Primary Care Triple Play Strategy](#). In 2022, the PMO:

- Hosted **13 COVID-19 Provider Update webinars**
- Disseminated **62 Primary Care COVID-19 emails**
- Onboarded **38 new primary practices** into the Maryland Primary Care Program, and
- Facilitated the **distribution of 70,800 point-of-care (POC) tests** to primary care practices (this reflects 354 requests).

Mpox and Flu

Because of the partnerships developed during the COVID-19 pandemic response, MDPCP practices were able to participate in the Mpox outbreak, as well as the flu season response efforts. Support included:

- Education through **webinars and routine emails**
- Addition of the **flu vaccine into ImmuTrack**

Spotlight: COVID - 19 Vaccine Booster Campaign

In the spring of 2022, MDPCP hosted a COVID-19 vaccine booster campaign. **Crain Medical, PA** successfully utilized patient portal messages, connections to local faith centers, and other strategies to obtain a **37.09% increase in boosted patients!** Ultimately, the campaign led to 17,809 COVID-19 boosted MDPCP beneficiaries.

**17,809 COVID-19
boosted
beneficiaries**

A Snapshot of the MDPCP Learning System in 2022

Events

- 35 events hosted by the MDPCP Learning System
- 3 new event types, including: roundtables, workshops, & panels
- ~56% attendance rate for all events

Spotlight

The **2022 Advanced Primary Care Leadership Academy** was hosted with MDPCP, CareFirst, MHEI, and MedChi.

There were a total of **150 registrants and 51 attendees** on the day of the event, as estimated by an attendance survey. The keynote speaker was Dr. Doug Jacobs from the Center for Medicare. Key topics included data-driven leadership and a team-based approach to patient-centered care.

Attendees noted several takeaways, including how to apply lessons learned at the practice level.

Resources

- 4 new eCQM Guides were created for 2022 with updated benchmarks, definitions, & resources
- 13 PQI Guides were available to socialize with MDPCP practices (1 comprehensive PQI guide & 12 PQI-specific guides)

Communications

- The *MDPCP Today* newsletter was managed & operated entirely by the PMO (as of 02/2022)
- The PMO debuted an internal **Quality & Learning Strategy** for 2022 to focus internal activities
- 3 core concepts were used to guide the MDPCP Learning System: strategic goal alignment, “all teach, all learn,” and support & sustainability

The Growth of Quality Improvement in 2022

Renewed Focus on Diabetes

- Advent of the *Comprehensive Diabetes Strategy*, featuring new elements, including: alignment with stakeholders, intentional collaboration with State departments, & focused initiatives
- Development of an actionable **Diabetes Toolkit**, including resources on nutrition, exercise, hypoglycemia, support resources, care plan templates, and a care team “who’s who?”

Initiatives

- ADA - Diabetes INSIDE 2.0
- MDPCP - Integrating CHWs in the Primary Care Setting webinar

Championing Health Literacy in Maryland through MDPCP

- Funded by the Barclay-Giel Seed Grant, ensured that educational material in Maryland primary care practices is accessible to all, including those with limited health literacy. **~36% of American adults have low health literacy**, improving health education materials is crucial to advancing community health.
- Primary care practice staff from **12 practices & 3 CTOs** participated in workshops focused on improving written health communication, leading to a marked increase in knowledge gain and motivation to apply learned tools.

COVID-19

- > Presented a digital poster at the NCQA Health Innovation Summit titled, “Maryland Vaccine Primary Care Program: A Successful Public Health-Primary Care State Integration”
- > Successfully onboarded more than **700 adult and pediatric primary care practices to the Primary Care Vaccine Program**
- > Achieved over **500,000 COVID-19 vaccines administered in primary care practices**

Behavioral Health Integration

- > **100% of MDPCP practices** reported implementing a strategy to integrate behavioral health into their practice workflows.
- > As of end of 2022, **350 MDPCP practice sites** have implemented SBIRT, surpassing the **2021 SIHIS goal of 200 MDPCP practices**.

Quality Improvement & Learning

- > Implemented the MDPCP Comprehensive Diabetes Strategy to support improving outcomes for patients diagnosed with diabetes
- > Created a **MDPCP Quality & Learning Strategy**
- > **Hosted 35 learning events** in 2022, including **3 new event types** and a successful **Advanced Primary Care Provider Leadership Academy**

Summary of Accomplishments

MDPCP

Health Information Technology

- > Practice implementation of the Prediabetes and Non-Fatal Overdose Smart Alerts.
- > New Care Management reports released, including: Medication Synchronization Opportunity Summary & High-Risk Medications-Top 100 Prescribers reports.
- > Rolled out new Planned Care for Health Outcomes report to support practices in monitoring costs (TPCC)
- > Modernized the MDPCP Reporting Suite reports

Health Equity

- > **Rolled out HEART payment**, providing support to a disadvantaged population
- > Partnered with Maryland 211 to add **506 resource records to the 211 resource directory**
- > Partnered with MedStar Health Research Institute to **create the [Guidance for Social Needs Screening & Demographics Data Collection](#) toolkit**
- > Partnered with CRISP & Medisolv to sign on **34 practices for the MDPCP Health Equity & Digital Quality Measures Project**
