Primary Care and Vaccine Equity
Soldiers in the final battle against the coronavirus
As we begin the second year of the war

Source: The Baltimore Sun
**Daily COVID-19 Report**

Data reported as of 3/16/2021 for data through 3/15/2021

- **394,716** cases cumulative
- **8,336,837** tests cumulative
- **14.3** 7-day avg. case rate
- **6,722** total hospital adult census
- **7,896** deaths cumulative

- **658** cases reported yesterday
- **12,200** tests reported yesterday
- **3.96%** 7-day avg. positivity
- **75** change in total hospital census
- **23** deaths reported yesterday

### 7-Day Avg. Percent Positivity and Total Testing Volume
*S since 3/1/20*

- Positivity: 20%, 15%, 10%, 5%
- Volume: 20K, 40K, 60K

### Daily New Cases
*by Specimen Collection Date*

### Daily Deaths
*Confirmed and Probable*

---

Case rate calculated as total confirmed cases per 100,000 population using the 2019 Maryland Population estimates from the Maryland Department of Planning, March 2020.
Now is the time for Primary Care to play a critical role in the battle against Covid-19

- Primary Care in Phase 1 A, B, C - now
  - Focus on seniors and minority populations

- Primary Care in Phase 2 - expected April 2021
  - Focus on underlying conditions
  - Primary care best positioned to know who qualifies

- Primary Care in Phase 3 - expected May 2021
  - The no wrong door phase
Power of Primary Care

❖ Broad distribution across the state
❖ Serves the vast majority of Marylanders every day
❖ Most patients prefer to go to their primary care for vaccines
❖ Trusted source of information for those who are hesitant
❖ Ability to identify and outreach to most vulnerable - avoiding the confusing registration systems
❖ Trained and ready workforce and offices
Primary Care takes center stage in Vaccine Administration

- Pilot begins this week - 17 practices
- Pilot expansion in following weeks depending on results and vaccine availability
- Focus on improving equitable vaccination
- Leveraging existing relationships
- Filling the gaps in current vaccine administration
- Expanded and key role in Phase 2
MDPCP Covid Vaccine Pilot: Purpose

1. Nationally and in Maryland there has been little emphasis on engaging primary care in the Covid vaccine campaign
2. Serve as proof of concept for successful Covid vaccination at primary care practices
3. Achieve more equitable vaccine distribution through targeted outreach to African American and Hispanic populations
4. Focus on 65+ in advance of Phase 2 start up
5. Focus on underlying conditions in Phase 2
Refrigeration

Acceptable storage unit(s)
- Refrigerator (Stand Alone and/or Pharmaceutical grade)
- Freezer (Stand Alone and/or Pharmaceutical grade)
- Combination household unit (refrigerator and freezer in one unit with one compressor) using refrigerator or freezer compartment only for vaccines

Unacceptable storage unit(s)
- Dorm style refrigerator
- Mini refrigerator
- Small under the counter refrigerator with a freezer/refrigerator combination
Vaccine Toolkit

❖ Workflows
❖ Access
❖ Immunet registration
❖ Vaccine Storage and handling
❖ Billing and coding

Toolkit link here!
Lack of equity during Covid-19

- Testing - less
- Cases - more
- Hospitalization - more
- Deaths - higher rates
- Monoclonal antibody therapy - less
- Vaccination - lower rates - *this is where primary care will make a big difference*
Vaccine Distribution by Race/Ethnicity

- African-American (NH)
  - % of Maryland Population
  - % of Cases
  - % of Deaths
  - % of Full Vaccinations
- White (NH)
  - % of Maryland Population
  - % of Cases
  - % of Deaths
  - % of Full Vaccinations
- Hispanic
  - % of Maryland Population
  - % of Cases
  - % of Deaths
  - % of Full Vaccinations
Priority Groups

1A Healthcare workers
   Residents and staff of nursing homes
   First responders, public safety, corrections

1B Assisted living, other congregate settings
    Adults age 75 and older
    Education and continuity of government

1C Adults age 65-74
    Essential workers in lab services, agriculture, manufacturing, postal service, etc

2 Adults 16-64 at increased risk of severe COVID-19 illness due to comorbidities
    Essential workers in critical utilities, transportation, food service, etc

3 General population

Vaccine prioritization may be subject to change.

Source: Maryland Department of Health, Office of Governor Larry Hogan, WBALTV, WBALTV
Three Vaccines

❖ Moderna
  ➢ First to be used for primary care
  ➢ Two doses
  ➢ Standard freezer / refrigeration
  ➢ 100 dose boxes

❖ Pfizer
  ➢ 2 doses
  ➢ More stringent storage requirements
  ➢ 1000+ dose boxes

❖ Johnson and Johnson
  ➢ One dose
  ➢ Standard storage requirements
  ➢ 50 dose boxes
## Next Potential Vaccines

<table>
<thead>
<tr>
<th>Vaccine Type</th>
<th>AstraZeneca</th>
<th>Novavax</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Viral Vector</strong></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
| **Schedule** | • Two dose regimen  
• 4 weeks apart | • Two dose regimen  
• 3 weeks apart |
| **Efficacy** | • 62% to 90%, depending on dosage | • 89.3%, UK trial |
| **Storage** | • Stable in refrigerator for at least 6 months | • Stable in refrigerator |

Current Vaccine Providers
No wrong door approach

❖ Local Health Departments
❖ Hospitals
❖ National Pharmacy Chains
❖ Local Pharmacies
❖ FQHCs
❖ State Mass vax sites

❖ Primary care pilot - week of 15 March
❖ Primary care expansion – as soon as end of March

Current State Mass Vax Sites
➢ Baltimore Convention Center
➢ M/T Stadium
➢ Six Flags
➢ Regency stadium
➢ Wicomico Civic Center: opens tomorrow 3/18
➢ Hagerstown Premium outlets: opens 3/25
CRISP Vaccine Tracker Tool

❖ Powerful tool unique to Maryland providers
❖ Visibility on patients vaccine status
❖ Ability to sort by age, race, ethnicity, medical conditions to facilitate process and equitable outreach
❖ Crisp Reporting Services (CRS) tool
❖ Uses Medicare attribution
❖ Adds ENS panel at your request to expand reach

➢ Reach out to support@crisphealth.org to add your ENS panel
CRISP Vaccine Tracking Tool

- Vaccination data updated daily from ImmuNet (IIS)
- User editable status to track outreach efforts
CRISP Vaccine Tracking Tool

Summary Reports

❖ Compare your Practice to MD Statewide population or relevant Peer Groups
❖ Compare by demographic fields
❖ Track a practice’s patient vaccination status over time
MDPCP Only - Vaccination Summary

Medicare Fee-For-Service Attributed Beneficiaries Only

Not Vaccinated | 1 Dose Received | Vaccinated

Vaccination Summary

Count of Patients on Panel

| Count of Patients on Panel | 178,116 (45.67%) | 96,574 (24.76%) | 115,358 (29.58%) |

Updated 3/15
COVID-19 Vaccination Support Center
Patients have options beyond primary care

❖ Maryland Departments of Health and Aging collaboration
❖ Designed to assist those without internet access to support Covid vaccination appointments
   ➢ Available to all Marylanders who are eligible for a vaccine
❖ Open seven days a week, 7am-10pm
❖ Also targeting outgoing calls to segmented groups of seniors

1-855-MDGOVAX
(1-855-634-6829)
ImmuNet onboarding is a multistep process

1. **Enrolling** in ImmuNet
   a. Most have completed this step

2. Assuring your system can **exchange information** (EHR or CSV file)
   a. Bi-directional capacity preferred

3. ImmuNet **registration as Covid vaccinator**
   a. You will receive a PIN and an approval email

➢ This is a slow process to start now - each site may be contacted by ImmuNet staff to confirm details

➢ Working toward greater efficiency
Increase in Vaccine Payments

- Medicare reimbursement for Covid vaccine administration has increased as of 3/15:

<table>
<thead>
<tr>
<th></th>
<th>Single Dose</th>
<th>Two Dose Regimen</th>
</tr>
</thead>
<tbody>
<tr>
<td>$40</td>
<td>$80 ($40 for each dose)</td>
<td></td>
</tr>
</tbody>

- [Overview of other payers](#)
CDC Public Health Recommendations for Fully Vaccinated People

❖ Fully vaccinated = 2 weeks after last dose
❖ Fully vaccinated people can
  ➢ Visit with other fully vaccinated people indoors without wearing masks or physical distancing
  ➢ Visit with unvaccinated people from a single household who are at low risk for severe COVID-19 disease indoors without wearing masks or physical distancing
  ➢ Refrain from quarantine and testing following a known exposure if asymptomatic

Source: CDC
CDC Public Health Recommendations for Fully Vaccinated People

❖ Fully vaccinated should continue to
  ➢ Take precautions in public like wearing a well-fitted mask and physical distancing
  ➢ Wear masks, practice physical distancing, and adhere to other prevention measures when visiting with unvaccinated people who are at increased risk for severe COVID-19 disease or who have an unvaccinated household member who is at increased risk for severe COVID-19 disease
  ➢ Wear masks, maintain physical distance, and practice other prevention measures when visiting with unvaccinated people from multiple households
  ➢ Avoid medium- and large-sized in-person gatherings
  ➢ Get tested if experiencing COVID-19 symptoms

Source: CDC
Effect of Vaccines Globally

How Vaccinations Are Slowing the Spread
Change in new daily Covid-19 cases per million residents over the past month

Source: New York Times
Please do not forget

❖ Testing
  ➢ Point of Care Testing in office - interested practices should fill out this Google Form as soon as possible

❖ Monoclonal antibody therapy for ambulatory patients
  ➢ CRISP online referral system

❖ Virus variants - reporting
What you have done and what is left to be done

1. You have identified all your high risk patients
2. You have provided vulnerable patients with expanded care
3. You have offered testing for all patients, as much as every visit – POC for those eligible for mAb therapy
4. You have stayed current and stayed safe
5. Now is the time to be a vaccinator - address vaccine hesitancy with patients, register as a Covid vaccinator in ImmuNet and plan for administration

Now is the time for Primary Care to demonstrate the enormous value you bring to the health and well being of all Marylanders
How do we know when it is over?

❖ Now is the time for you to make this a reality

❖ It is over when
  ➢ Cases rates are at or near zero
  ➢ Hospitalizations are at or near zero
  ➢ Deaths are at or near zero

❖ Until then- facial coverings, social distancing, hand hygiene, avoid crowds- with increasing exceptions among vaccinated persons

“Everything will be okay in the end. If it's not okay, it's not the end.”

— John Lennon
General Vaccine Resources

❖ **CDC Covid-19 Vaccination Communication Toolkit** - ready made materials, how to build vaccine confidence, social media messages
❖ **New York Times Vaccine Tracker** - information on every Covid vaccine in development
❖ **New York Times Vaccine Distribution Tracker** – information on the distribution of Covid vaccines in the United States
❖ **MDH Covidlink Vaccine Page** - information on vaccine priority groups in Maryland
❖ **CDC Vaccine Storage and Handling Toolkit**
❖ **Project ECHO Webinar** - webinar on vaccines and Long Term Care Facilities, relevant for primary care
❖ CDC **Moderna vaccine storage**
Monoclonal Antibody Therapy for Covid-19: Scientific Basis and Ongoing Studies

An in depth, scientific discussion of the current and future use of monoclonal antibody therapy, the impact of viral variants, and the interactions of mAb therapy and vaccines followed by a Q&A.

TUESDAY, MARCH 23
5:00 PM - 6:00 PM

PRESENTERS:

Dr. Gentry Wilkerson
University of Maryland

Dr. Shivakumar Narayanan
University of Maryland

Dr. Zishan Siddiqui
John’s Hopkins University, BCCFH

Dr. Joel Chua
University of Maryland

Organized by:

MARYLAND
Department of Health

Registration Link
CME Accreditation and Designation

❖ This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of MedChi, The Maryland State Medical Society, and The Maryland Department of Health. MedChi is accredited by the ACCME to provide continuing medical education for physicians.

❖ MedChi designates this live webinar educational activity for a maximum of 1 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity. Contact Frank Berry at fberry@medchi.org
CME Disclosures and Evaluation

❖ Presenters and Planners: Howard Haft, MD, has reported no relevant financial relationships to disclose.

❖ MedChi CME Reviewers: The reviewers from the MedChi Committee On Scientific Activities (COSA) for this activity have reported no relevant financial relationships to disclose.

❖ Attendees can receive CME credit by completing this evaluation after each webinar. MedChi will then be in contact with the certificate.
Announcements

❖ Learn from:
  ➢ Our FAQs page (last updated November 2020)
  ➢ MDH FAQs

❖ Wednesday Covid-19 Updates
  ➢ Wednesday, 3/24/21 (5-6:30pm)
  ➢ Wednesday, 3/31/21 (5-6:30pm)

❖ State and Regional Approaches to Equitable COVID-19 Vaccination Efforts – webinar from the Network for Regional Healthcare Improvement and the Duke-Margolis Health Policy Center
  ➢ Thursday, 3/25/2021 (3-4pm)

❖ Guest Speaker
  ➢ Today – Stephanie Slowly MSW, LCSW-C, The Role of Racial Trauma and Microaggression in Health Disparities for Primary Care
  ➢ Next week - Dr. Gregory Branch, Health Officer for Baltimore County
The Role of Racial Trauma and Microaggression in Health Disparities for Primary Care

Stephanie Slowly, MSW, LCSW-C

March 17, 2021
Today’s Objective

1. Review of Key Term
2. Overview of Trauma: Provider Risk
3. Microaggressions in Action
4. Impact of Microaggressions in Healthcare
5. How to Respond to Microaggressions
6. How to Heal from Microaggressions
7. Doing Our Part — Call to Action
8. Next Steps and Takeaways
Key Terms

- **Bias**: Is defined as a prejudice in favor of or against one thing, person or group compared with another usually in a way that’s considered to be unfair. (individual, group or institution)

- **Implicit (Unconscious) Bias**: Attitudes towards people or associate stereotypes with them without our conscious knowledge.

- **Micro aggressions**: a statement, action, or incident regarded as an instance of indirect, subtle, or unintentional discrimination against members of a marginalized group such as a racial or ethnic minority.

- **Micro-assaults**: are explicit racial or derogatory actions that are intended to hurt.

- **Race**: a social construct that refers to belonging to a group of people who shared a common ancestry from a particular region of the globe. Common ancestry is accompanied by superficial secondary physical characteristics such as skin color, facial features, and hair texture.

- **Racism**: prejudicial treatment based on racial or ethnic group and the societal institutions or structures that perpetuate this unfair treatment. Racism can be expressed on interpersonal, structural/institutional, or internalized levels.
Overview of Trauma: Provider Risk

**Trauma** care professionals are at high risk of burnout, PTSD and other mental health conditions

- Provider stress is a serious issue. How can providers learn how to take better care of themselves?
- Trauma providers experience "**normalized stress**" — becoming so accustomed to being stressed that it becomes the norm
- Providers experience lots of **stressors**: life-threatening situations, critically ill patients, high mortality rates, administrative demands, personal life
  - They need to be equipped with strategies to deal with these stressors
- **Compassion fatigue**: focused so much on needs of others that you neglect your own needs
  - Feeling emotionally exhausted, depressed or anxious is common
  - May experience depersonalization, feeling of becoming disconnected
  - Often providers' responses to this is "**I get it, but I don't have time**"
  - Providers feel that they do not have time to take care of themselves
- Providers often reluctant to acknowledge feelings of depression, compassion fatigue or burnout because they feel they are "**not living up to expectations**"

Office of minority health data
Racial Microaggressions in Everyday Life

Impact of Micro-Aggression in Healthcare

- A study from the University of Washington’s Surgical Outcomes Research Center found six common microaggressions reported in healthcare settings: mistaken identity, mistaken relationships, fixed forms, entitled examiner, pervasive stereotypes and intersectionality.

- Of the 150 American Indian patients surveyed by the University of Minnesota, over 36 percent reported experiencing microaggressions in health clinics.

- A study from the University of Colorado Boulder finds that “clinicians’ implicit bias may jeopardize their clinical relationships with black patients, which could have negative effects on other care processes. As such, clinician bias may contribute to health disparities.”

- “I’m risking my own personal health, and then to be vilified just because of what I look like,” said Li, 28, wary that one of her patients, too, could harbor such prejudices. (Washington Post Article)

- In 2015, researchers from the University of Tennessee “found that microaggressions can trigger intrusive memories of traumatic racially related incidents. This supports that for some, microaggressions are experienced as traumatic events, which is of serious concern. Many of the same principles used to care for survivors of abusive trauma might be adapted to explore and intervene on effects of racial microaggressions, referred to as trauma-informed care.
How to respond to Microaggression

Seek support.

“One of the most important ways to manage our mental health in the face of racism is to make sure that we have supportive people to help us in processing our experiences,” says Dr. Bradford. “This can be in the form of colleagues, a therapist, or family and friends. It’s important to have a space where you can give voice to what’s happening to you.”

Don’t internalize racism.

It can be tempting to want to change something about yourself or your behavior in order to be more accepted, but “it’s important to stay grounded in the fact that you are not the issue, racism is the issue,” adds Dr. Bradford.

Know when it’s time to leave a situation.

Certain situations can and will be challenging, like in the workplace, but it’s important to understand when you need to distance yourself from a toxic situation. “Remaining in a situation where you’re experiencing repeated acts of racism and discrimination can be incredibly taxing and harmful,” says Dr. Bradford. “It’s important to recognize when you’ve hit your limit and need to prioritize yourself.”
How to Heal Microaggression

Can one ever heal from racial microaggression?

3 Truths that one must adopt:

1. Your Experience Are Real
2. Your Feelings Are Valid
3. You Deserve To Heal

You have the right to prioritize YOUR mental health, safety and well-being.
How to Heal Microaggression

• **Engage in self-care**: This looks different for everyone, but it can include meditation, prayer, healthy eating, and physical exercise.

• **Limit news consumption**: Of course, it’s important to keep up with current events. However, repetitive coverage of violence against people from the BIPOC community can be traumatizing. Be sure to take a break when you need one.

• **Cultivate an excellent support system**: Surround yourself with people who will listen to and validate your experiences.

• **Create art**: Expressing yourself through art can be cathartic.

• **Recognize and verbalize your feelings**: Just getting your emotions off of your chest can make a big difference in how you feel. Whether you confide in a good friend or a therapist, be sure to get it all out.

• **Make a list of things to avoid**: If certain people, places, or situations make you feel unsafe, put them on a list. Do whatever you can to avoid anything on the list.

• **Engage in activism**: If and when you are able, engage in activism that you feel comfortable with. Doing so can help you connect with the community and work toward anti-racist goals.
Operation Courage:

- A collaborative partnership focused providing crisis supports to essential workers who remain on the frontline during this time of COVID response.
- We are working with the Psych Associates of Maryland to provide crisis support to anyone who is in need and referral to greater clinical supports if necessary.
### What can we all do to improve Behavior Health Equity?

<table>
<thead>
<tr>
<th>Examine</th>
<th>Take some time to examine the beliefs you grew up with and ask yourself: Do those beliefs and values still resonate with me? Use this time for self-reflection and assess whether they still ring true for you now, as an adult.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Acknowledge</td>
<td>While important to take stock of your own emotions, it’s also our responsibility to acknowledge how others feel by validating the fact that their feelings matter. As you go about your day, practice being more mindful about how what you say and do might affect those around you.</td>
</tr>
<tr>
<td>Lead</td>
<td>Lead with Equity when beginning strategic planning, data analysis, program design or collaborative partnerships identify recipients who are in the greatest need — develop with them in mind.</td>
</tr>
<tr>
<td>Build</td>
<td>Build a culture of awareness of how personal beliefs, values, and attitudes associated are directly tied to one's cultural background and will influence the delivery of behavioral health services.</td>
</tr>
</tbody>
</table>
### Summary: What can we all do to improve Health Disparities?

<table>
<thead>
<tr>
<th>Action</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Embrace</strong></td>
<td>Put yourself in other people’s shoes. Ask yourself how you would feel if you were in their situation. By exploring another person’s perspective, you can glean insight into your behaviors. Just as your experience and feelings are true for you, their experience and feelings are true for them.</td>
</tr>
<tr>
<td><strong>Resist</strong></td>
<td>If you’ve been called out for doing or saying something hurtful, resist getting defensive. Instead, embrace curiosity and ask questions that can help you understand a person’s point of view.</td>
</tr>
<tr>
<td><strong>Diminish</strong></td>
<td>Combat/diminish stigma associated with BH disorders that can also prevent individuals from seeking treatment</td>
</tr>
<tr>
<td><strong>Normalize</strong></td>
<td>We have to normalize the language of mental health and encourage others to seek supports.</td>
</tr>
</tbody>
</table>

Multiple COVID-19 variants are circulating globally

<table>
<thead>
<tr>
<th>B.1.1.7</th>
<th>B.1.351</th>
<th>P.1</th>
</tr>
</thead>
</table>
| - Variant name is a reference to its lineage  
- Appears to have originated in the UK with an unusually large number of mutations  
- Was first detected in 9/2020  
- Spreads more quickly and easily than other variants  
- Some evidence it causes more severe illness or increased risk of death  
- Highly prevalent in London and southeast England  
- Doubling every 10 days in the United States  
- Vaccines appear to work well against it | - Variant name is a reference to its lineage Has emerged in South Africa, is independent of B.1.1.7  
- Originally detected in 8/2020  
- Shares some mutations with B.1.1.7  
- Clinical trials of vaccines show they offer less protection against this variant than other variants  
- The FDA is preparing a plan to update vaccines if B.1.351 surges in the United States | - Variant name is a reference to its lineage  
- Emerged in Brazil  
- Was identified in four travelers from Brazil, who were tested during routine screening at Haneda airport outside Tokyo, Japan  
- Contains a set of additional mutations that may affect its ability to be recognized by antibodies  
- Is a close relative of B.1.351  
- May be able to overcome the immunity developed after infection by other variants |

Source: CDC, New York Times, Office of the Governor of Larry Hogan
As part of these MDH surveillance efforts, MDH requests that clinicians report, via an online portal, COVID-19 cases among any of the following groups:

- **Individuals who first test positive for COVID-19 after receiving COVID-19 vaccination** (either one or two doses)
- **Severely immunocompromised individuals with prolonged COVID-19 infection**
- **Individuals suspected of reinfection** – specifically, **symptomatic** individuals who test PCR positive for SARS-CoV-2 more than 90 days after an initial infection from which they clinically recovered
- **Individuals with recent international travel** (travel in the 14 days prior to symptom onset)
- **Any other individuals for whom you have clinical suspicion of infection with a possible variant** (e.g., unusual clinical manifestation, etc.)
Covid-19 mAb Treatment Criteria

❖ Patient Criteria

- Have BMI >= 35
- Have chronic kidney disease
- Have diabetes
- Are currently receiving immunosuppressive treatment
- Are >= 65 years old
- Are >=55 years old and have
  - ✔ Cardiovascular disease, or
  - ✔ Hypertension, or
  - ✔ Chronic obstructive pulmonary disease/other chronic respiratory disease
- Are 12 – 17 years old AND have
  - ✔ BMI >=85th percentile for their age and gender based on CDC growth charts, or
  - ✔ Sickle cell disease, or
  - ✔ Congenital or acquired heart disease, or
  - ✔ Neurodevelopmental disorders, or
  - ✔ A medical-related technological dependence, or
  - ✔ Asthma

Scheduling In-Office Appointments

❖ Patient calls in for an appointment
  ➢ Reception screens patient on the phone using the pre-visit screening template
  ➢ Schedule in-office visits for different groups: At-risk and vulnerable patients on certain days, healthier patients on other days
  ➢ Schedule telehealth and non-office-based care for other patients including follow-ups and patients uncomfortable with office visits

❖ Check In
  ➢ Practice remote check in and limited front-desk contact
  ➢ Consider using a triage zone outside of office or main area;
  ➢ Or use a barrier at the front desk
  ➢ Design your office to accommodate patients who come in specifically for Covid testing and triage, separate from patients who arrive for non-Covid related and elective procedures
    ✔ Ensure patients and staff do not cross between Covid and non-Covid areas
    ✔ Set aside a specific area for patients who come in for testing to wait and be triaged
Scheduling In-Office Appointments

❖ Checking out
  ➢ Practice remote check out, limit front desk exposure;
  ➢ Or use a barrier at the front desk

❖ If patient is paying co-pays, etc., set up credit card reader outside of the barrier

❖ Other workflow resources
  ➢ Care management workflows
  ➢ BMJ telemedicine workflow graphics
  ➢ CDC flowchart to identify and assess 2019 novel Coronavirus
  ➢ CDC telephone evaluation flow chart for flu
  ➢ CDC guidance for potential Covid-19 exposure associated with international or domestic travel
CDC Guidelines for Covid Patient Management

❖ Healthy people can be monitored, self-isolated at home
❖ People at higher risk should contact healthcare providers early, even if illness is mild
❖ Older adults and people with severe underlying chronic medical conditions are at higher risk, need closer contact
❖ Emergency Department and Hospitals only when needed - not for screening or low risk/minimal disease

❖ Guidelines are important and powerful tools, but remember providers’ clinical experience and judgment are key to care
Personal Protective Equipment (PPE) Sources and Requests

❖ Practices should initially request PPE through their usual vendors
❖ Practices should make their PPE requests through their local health departments
❖ Maryland PPE Manufacturers List – next slide
❖ National and international PPE supplier list
❖ PPE request form
Personal Protective Equipment (PPE) Sources and Requests

❖ Increasing Maryland’s supply of PPE – one of the 4 building blocks on the Road to Recovery
