**Department of Health:** Maryland
Social distancing

Reducing human contact (as measured by cell phone mobility data) can drive down infections so that mask use, testing, isol...
Daily Deaths

Daily deaths is the best indicator of the progression of the pandemic, although there is generally a 17-21 day lag between infection and deaths.

Vaccine Development Update
Covid Vaccine Updates

170+ vaccines are being tested in animals and lab experiments.

15 vaccines are being tested in a small number of healthy, young people to assess safety and correct dose.

3 vaccines are broadened to a larger group of people, including people at higher risk of illness.

7 vaccines are being tested in thousands of people to check their effectiveness and safety.

0 vaccines have been determined to provide benefits that outweigh known and potential risks.

Addressing Vaccine Hesitancy

About half of Americans say they would get a coronavirus vaccine

A new AP-NORC poll finds that roughly half of Americans say they would get vaccinated for COVID-19, but many are uncertain or would refuse to do so. African Americans, Hispanics, young adults and Republicans are less likely than others to say they would get vaccinated.

If a vaccine against the coronavirus becomes available, do you plan to get vaccinated?

<table>
<thead>
<tr>
<th>Overall</th>
<th>Yes</th>
<th>No</th>
<th>Not sure</th>
</tr>
</thead>
<tbody>
<tr>
<td>All adults</td>
<td>49%</td>
<td>20%</td>
<td>31%</td>
</tr>
</tbody>
</table>

"If poorly designed and executed, a Covid-19 vaccination campaign in the U.S. could undermine the increasingly tenuous belief in vaccines and the public health authorities that recommend them — especially among people most at risk of Covid-19 impacts."

Covid Vaccine Updates

❖ Vaccine Cost-Sharing

Covid-19 Vaccines Won’t Come With Copays, U.S. Health Official Says

U.S. government plans to pick up the cost of vaccines, and is working with private health insurers so people won’t pay out of pocket to receive shots

*From Paul Mango, HHS deputy chief of staff for policy, 8/13*

❖ Vaccine Effectiveness

- According to Dr. Fauci, the chances of getting a highly-effective vaccine (where 98% or more gain immunity) are small
- FDA will approve a COVID-19 vaccine if it is safe and **at least 50% effective**
- Public health measures such as testing and contact tracing will likely remain important

Testing Update
Testing Marylanders in Primary Care

- Testing in offices serves patients and normalizes the process
- Testing or referring patients for testing is key to keep the State safe
- Testing in office or sending patients for a test at another site is effective screening
- Specimen collection continues to evolve from nasopharyngeal sampling to the current simplified nasal sampling
- Testing will continue to evolve with Point of Care tests and rapid “Viral Protein” methods
- Antibody tests may become important as they become validated and understood in terms of clinical implications

CRISP compiles the data in this report from HL7 laboratory transactions provided to Maryland Department of Health through the National Electronic Disease Surveillance System (NEDSS). The State of Maryland requires all laboratories to submit all COVID-19 positive and negative test results for any Maryland resident.

CRISP refreshes the data daily overnight. Report totals may differ from Maryland Department of Health figures. The figures may include some non-Maryland residents. This information is intended to assist Maryland health care providers and public health leaders in understanding the progression and direction of COVID-19 testing. The data are unverified and not publicly available. Any indicator of a pending test period is an approximation by CRISP based on review of the NEDSS data.
Point of Care Testing

❖ Any healthcare provider or healthcare facility, subject to the following terms and conditions, may perform COVID-19 point of care (POC) test analysis pursuant to Executive Order 20-03-23-02 (initiating a process for authorization of laboratories in Maryland to develop and perform COVID-19 testing).

❖ **Note**: This order supersedes, for the duration of the State of Emergency and Catastrophic Health Emergency, any and all other directives from the Maryland Office of Health Care Quality (OHCQ) on the subject of POC testing. OHCQ is directed to prioritize the review and issuance of the necessary permits to effect POC testing.
Reporting through CRISP

❖ All POC test results shall be submitted via HL7-formatted ELRs or another approved electronic format (i.e. a formatted CSV file). If the facility reporting the POC test results cannot do so via either of those methods, the facility shall report the results through the following portal: https://ulp.crisphealth.org/.
Reporting through CRISP

Payments and Costs

❖ **Availability:** All healthcare providers, facilities, and entities that offer community COVID-19 testing shall make that testing available to any person presenting at the testing site without regard to that person’s ability to pay, type of health insurance, or participation in any particular provider network.

❖ **Costs:** Laboratories processing COVID-19 tests for Maryland residents must accept reimbursement from the patient’s insurance - private, Medicare, Medicaid or other payers. If a patient is uninsured, providers and laboratories should use this process for reimbursement:

❖ **MDH shall make available appropriate financial support to those providing testing to mitigate outbreak situations or as directed by MDH or local health departments.**
Contact Tracing Update
Contact Tracing Overview

❖ Providers should make sure their patients’ phone numbers are updated in the electronic medical record before ordering a test.

❖ Providers should advise tested patients to monitor their telephones closely for 72 hours after specimen collection, as they will receive a contact tracing call from MD COVID (240-466-4488) if positive.

❖ MDH Contact Tracing Information for Healthcare Providers

CDC Updates
CDC - Release from Isolation

❖ **Duration of isolation and precautions**

- For most persons with COVID-19 illness, isolation and precautions can generally be discontinued 10 days after symptom onset and resolution of fever for at least 24 hours, without the use of fever-reducing medications, and with improvement of other symptoms.
  - A limited number of persons with severe illness may produce replication-competent virus beyond 10 days that may warrant extending duration of isolation and precautions for up to 20 days after symptom onset; consider consultation with infection control experts.
- For persons who never develop symptoms, isolation and other precautions can be discontinued 10 days after the date of their first positive RT-PCR test for SARS-CoV-2 RNA.

❖ **Role of PCR testing**

- For persons who are severely immunocompromised, a test-based strategy could be considered in consultation with infectious diseases experts.
- For all others, a test-based strategy is no longer recommended except to discontinue isolation or precautions earlier than would occur under the strategy outlined in Part 1, above.

❖ **Role of PCR testing after discontinuation of isolation or precautions**

- For persons previously diagnosed with symptomatic COVID-19 who remain asymptomatic after recovery, retesting is not recommended within 3 months after the date of symptom onset for the initial COVID-19 infection. In addition, quarantine is not recommended in the event of close contact with an infected person.
- For persons who develop new symptoms consistent with COVID-19 during the 3 months after the date of initial symptom onset, if an alternative etiology cannot be identified by a provider, then the person may warrant retesting; consultation with infectious disease or infection control experts is recommended. Isolation may be considered during this evaluation based on consultation with an infection control expert, especially in the event symptoms develop within 14 days after close contact with an infected person.
- For persons who never developed symptoms, the date of first positive RT-PCR test for SARS-CoV-2 RNA should be used in place of the date of symptom onset.

❖ **Role of serologic testing**

- Serologic testing should not be used to establish the presence or absence of SARS-CoV-2 infection or reinfection.
MDH Secretary Orders
Clinical studies

- Clinical Studies List.pdf
- Hopkins CSSC-001 Study ENGLISH.pdf
- Hopkins CSSC-001 Study SPANISH.pdf

Out-of-state travel

- In the Secretary of Health’s Order dated July 29, 2020, the Maryland Department of Health strongly recommends that all Marylanders refrain from non-essential travel outside of Maryland, and that any Marylander who travels to a state with a COVID-19 test positivity rate above 10% should be tested and self-quarantine at home until the test result is received. The District of Columbia and the Commonwealth of Virginia are exempt from this recommendation.
Facemasks - Required

- Retail Establishments
- Public Transportation
- Food Service Facilities
- Alcohol Manufacturer/Sales - Outdoor Dining
- Personal Services (Salons, Tanning, Tattoos, Massage Parlors)
- Indoor & Outdoor Sport Activities (when feasible)
- Youth Camps (when feasible)
- Swimming Pools (when possible)
Provider Relief Fund

Welcome to the Provider Relief Fund Application and Attestation Portal

This portal allows providers to apply for and attest to relief fund payments made for healthcare-related expenses or lost revenue attributable to COVID-19.

The application deadline for Phase 2 General Distribution funding is August 28, 2020

Source: https://www.hhs.gov/coronavirus/cares-act-provider-relief-fund/for-providers/index.html#key-facts-providers
Covid Tip Line

❖ The Maryland Emergency Management Agency, Maryland Department of Health and Maryland Department of State Police are today announcing Maryland’s toll-free COVID Prevention Line.

1-833-979-2266
prevent.covid@maryland.gov

❖ This is a statewide toll-free number and an email address which can be used 24-hours-a-day to report situations of concern where prevention guidelines are being ignored and the potential for the spread of COVID-19 is high. Callers/emailers may remain anonymous or they can provide their name and phone number in the event additional information is needed from officials.
Compliance is a Complaint-Driven Process

❖ Complaints from customers
❖ Complaints from employees
❖ Complaints from other sources
❖ Health department on-site education
❖ Health department order of immediate compliance
❖ Health department order for closure
❖ Enforcement by local and state police
❖ Contact 301-609-6733 or 301-609-6751 for complaints
Gating Benchmark Metrics

Focus on gating benchmarks for continued safe rollout of expanding reopening efforts, and as we transition from “Stay at Home” to voluntary “Safer at Home”

“Stop Signs”

• An unexpected increase in hospitalizations or a sustained increase in cases requiring intensive care; and sustained increase in cases over a period of five or more days
• Increase in number of daily COVID deaths
• Indications that Marylanders are disregarding physical distancing guidelines
• Significant outbreaks of community transmission (not clusters or outbreaks in particular nursing homes or vulnerable communities) where contact tracing cannot establish the route of the spread
HHS Telemedicine Training - Register

HHS Telemedicine Hack
A 10-week learning community to accelerate telemedicine implementation for ambulatory providers

Wednesdays, July 22—Sept 23, 2020
12:00-1:00pm ET

Click here to register

Although telemedicine use has grown exponentially during the COVID-19 pandemic, many ambulatory providers still lack the knowledge and skills needed to implement video-based telemedicine into their practices. To support wide adoption of telemedicine, the U.S. Department of Health and Human Services (HHS), Assistant Secretary for Preparedness and Response is partnering with the ECHO Institute at the University of New Mexico and the Public Health Foundation's TRAIN Learning Network to deliver a 10-week, virtual peer-to-peer learning community called Telemedicine Hack.

Key components of Telemedicine Hack include:
- Five teleECHO sessions on key topics (e.g., workflows, documentation, reimbursement) highlighting best practices and case studies from the field
- Five virtual “office hour” discussion panels with case presenters, government agencies, topical experts, and stakeholder associations responding to your questions
- Inter-session peer-to-peer learning facilitated via virtual discussion boards and ad hoc interest groups
- CME/CEU credits are available for attending, at no cost to participants

For more information, contact c15ECHO@salud.unm.edu

There is no cost to join the Telemedicine Hack initiative. All ambulatory providers (e.g., primary care, surgical, rural/urban, dental, mental health, solo practitioners) are invited to participate.
Five things you can do as Primary Care providers

1. **Identify all your high-risk patients**—use the COVID Vulnerability Index (CVI) in CRISP, your EHR, and your intuition

2. **Reach out to every patient on those lists**

3. **Provide vulnerable patients with expanded care** through telemedicine and special accommodations if they need face-to-face care

4. **Offer testing for all patients, every visit**

5. **Stay current, stay safe**—stay current by keeping up-to-date with CDC guidelines and case rates in your area. For up-to-date information, visit CDC, MDH, and MDPCP sites. Stay safe by taking all necessary infection control precautions when seeing patients
CME Accreditation and Designation

❖ This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of MedChi, The Maryland State Medical Society, and The Maryland Department of Health. MedChi is accredited by the ACCME to provide continuing medical education for physicians.

❖ MedChi designates this live webinar educational activity for a maximum of 1 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity. Contact Frank Berry at fberry@medchi.org
Presenters and Planners: Howard Haft, MD, has reported no relevant financial relationships to disclose.

MedChi CME Reviewers: The reviewers from the MedChi Committee On Scientific Activities (COSA) for this activity have reported no relevant financial relationships to disclose.

Please complete an evaluation at: COVID-19 Update Evaluation

Keep Talking...

Continuing to Cope with the Losses and Grief of the Pandemic

Alexander E. Chan, Ph.D., LMFT
Mental and Behavioral Health Specialist
That Discomfort You’re Feeling Is Grief

by Scott Bearinato

March 23, 2020

Jump started the public awareness of what we are experiencing

With accurate diagnosis comes effective treatment
Stages of Grief

We no longer view these stages as linear

The feelings will come and go as grief is gradually resolved

Ambiguous loss - cancellations, loss of routine, no goodbyes

1. Denial
2. Anger
3. Bargaining
4. Depression
5. Acceptance
6. Meaning**
First-Aid

- Mindful breathing
- Exercise
- Nutrition
- Social connection
Ask yourself: How will I emerge from this crisis?

You may need to think out loud with a trusted friend, partner, or therapist on this task.
Cheryl Brown • 2nd
Political Director at Save The Bay
1mo • 🟢

When planning something important (like a vacation or a special event), I often think about the story I want to be able to tell about it afterwards. This article is useful in starting to think about what stories we can tell about ourselves after this big unplanned trip we are all on.

Alexander Chan
Extension Specialist and Licensed Marriage and Family Therapist
2mo • 🟢

Here's a quick article I wrote meant to stimulate the conversation on mental health during the pandemic #mentalhealth #selfcare #griefandloss
Support others, but don’t let them make meaning for you.

Friends and family need you to recognize their process just as much as you need them to give credit to yours.
Welcome all emotions daily.

On any given day, allow yourself to laugh, cry, and everything in between.
These tasks are ongoing

Just as the COVID situation evolves, so does your work in adapting to it emotionally.

Get on my calendar for a meeting at: https://alexchan.youcanbook.me
Thank you!

ANY QUESTIONS?
Appendix

Resources and Links
Scheduling In-Office Appointments

❖ Patient calls in for an appointment
  ➢ Reception screens patient on the phone using the pre-visit screening template
  ➢ Schedule in-office visits for different groups: At-risk and vulnerable patients on certain days, healthier patients on other days
  ➢ Schedule telehealth and non-office-based care for other patients including follow-ups and patients uncomfortable with office visits

❖ Check In
  ➢ Practice remote check in and limited front-desk contact
  ➢ Consider using a triage zone outside of office or main area;
  ➢ Or use a barrier at the front desk
  ➢ Design your office to accommodate patients who come in specifically for COVID testing and triage, separate from patients who arrive for non-COVID related and elective procedures
    • Ensure patients and staff do not cross between COVID and non-COVID areas
    • Set aside a specific area for patients who come in for testing to wait and be triaged
Scheduling In-Office Appointments

- Checking out
  - Practice remote check out, limit front desk exposure;
  - Or use a barrier at the front desk

- If patient is paying co-pays, etc., set up credit card reader outside of the barrier
Governor Hogan Directive – Elective & Non-Urgent Medical Procedures may resume May 7, 2020

These measures must be in effect:

1. Licensed healthcare providers will use their judgment to determine what appointments and procedures are appropriate

2. Facilities and providers must have at least one week’s supply of personal protective equipment (PPE) for themselves, staff, and as appropriate, for patients
   i. PPE requests to any State or local health or emergency management agency will be denied for elective and non-urgent medical procedures
   ii. The healthcare facility or healthcare provider must be able to procure all necessary PPE for its desired services via standard supply chains
   iii. For hospitals with COVID-19 patients, MDH will determine a daily PPE per patient use rate for PPE requests

3. Social distancing must be maintained in all waiting areas

4. All healthcare workers, patients, and others must be screened for COVID-19 symptoms upon arrival for shift or visit. Staff must stay home if they are showing COVID-19 symptoms.

5. All healthcare facilities and healthcare providers must implement enhanced workplace infection control measures > CDC guidelines: https://www.cdc.gov/coronavirus/2019-ncov/hcp/infection-control.html
   i. All healthcare providers and staff shall wear appropriate face coverings, to include cloth face coverings, surgical face masks or N-95 masks, respirators, and/or face shields
   ii. Patients should wear a face covering whenever possible

6. Any healthcare facility or provider unable to provide PPE for themselves, staff, and patients where appropriate must immediately restrict operations to urgent and non-elective procedures and appointments

❖ National and International PPE Supplier List
❖ PPE request forms and local contacts
Increasing Maryland’s supply of PPE – one of the 4 building blocks on the Road to Recovery

Maryland has launched the Maryland Manufacturing Network Supplier Portal, an online platform that helps connect Maryland suppliers with buyers in need of critical resources

Large daily deliveries come into the state’s warehouses

For additional business resources during COVID-19, visit businessexpress.maryland.gov/coronavirus
Help your patients get health coverage

Maryland Health Connection, the state’s health insurance marketplace, has a Coronavirus Emergency Special Enrollment Period until June 15 for uninsured Marylanders. All plans on Maryland Health Connection cover testing and treatment of COVID-19.

❖ How to enroll

➢ Enroll online at MarylandHealthConnection.gov
➢ Call 1-855-642-8572. Deaf and hard of hearing use Relay service. Help is available in 200 languages.
➢ Download the free “Enroll MHC” mobile app to enroll on a phone/tablet.
➢ Navigators throughout the state can answer questions and enroll consumers by phone.
Considerations when Reusing N95 Respirators (CDC)

- There is no way of determining the maximum possible number of safe reuses for an N95 respirator as a generic number to be applied in all cases.
- Safe N95 reuse is affected by a number of variables that impact respirator function and contamination over time.
- Manufacturers of N95 respirators may have specific guidance regarding reuse of their product.
- CDC guidelines advise to discard N95 respirators before they become a significant risk for contact transmission or their functionality is reduced
  - Administrative controls (e.g. staff training, reminders, and posters)
    - Minimize unnecessary contact with the respirator surface
    - Strict adherence to hand hygiene practices
    - Proper PPE donning and doffing technique, including physical inspection and performing a user seal check
  - Engineering controls (e.g. use of barriers to prevent droplet spray contamination)

Source
CDC Guidelines - N95 Respirators and Infection Control

- Clean hands with soap and water or an alcohol-based hand sanitizer before and after touching or adjusting the respirator (if necessary for comfort or to maintain fit).
- Avoid touching the inside of the respirator. If inadvertent contact is made with the inside of the respirator, discard the respirator and perform hand hygiene as described above.
- Use a pair of clean (non-sterile) gloves when donning a used N95 respirator and performing a user seal check. Discard gloves after the N95 respirator is donned and any adjustments are made to ensure the respirator is sitting comfortably on your face with a good seal.
- Follow the manufacturer’s user instructions, including conducting a user seal check.
- Discard any respirator that is obviously damaged or becomes hard to breathe through.
- Pack or store respirators between uses so that they do not become damaged or deformed.
CDC Guidelines - Reusing N95 Respirators

- N95 respirator must only be used by a single wearer (Label N95 respirator on the straps with person’s name)

- Consider use of a cleanable face shield (preferred) over an N95 respirator and/or other steps (e.g., masking patients, use of engineering controls), when feasible to reduce surface contamination of the respirator.

- Hang used respirators in a designated storage area or keep them in a clean, breathable container such as a paper bag between uses.
  - To minimize potential cross-contamination, store respirators so that they do not touch each other and the person using the respirator is clearly identified (including date).
  - Storage containers should be disposed of or cleaned regularly.

- Follow the employer’s maximum number of donnings (or up to five if the manufacturer does not provide a recommendation) and recommended inspection procedures.
CDC Guidelines - When to Discard N95 Respirators

- Discard N95 respirators following use during aerosol generating procedures
- Discard N95 respirators contaminated with blood, respiratory or nasal secretions, or other bodily fluids from patients
- Discard N95 respirators following close contact with any patient co-infected with an infectious disease requiring contact precautions
COVID-19 Testing Site Information

❖ Patients require a provider order for referral to testing sites
❖ Providers contact your local hospital or use the link below
❖ Sites are subject to host location restrictions and availability
❖ MD is also piloting drive-thru testing at several Vehicle Emissions Inspections Program (VEIP) locations – FAQs available here.
❖ Current list of testing sites, please click here
CDC Guidelines for COVID Patient Management

❖ Healthy people can be monitored, self-isolated at home
❖ People at higher risk should contact healthcare providers early, even if illness is mild
❖ Older adults and people with severe underlying chronic medical conditions are at higher risk, need closer contact
❖ Emergency Department and Hospitals only when needed - not for screening or low risk/minimal disease

❖ Guidelines are important and powerful tools, but remember providers’ clinical experience and judgment are key to care
Billing for End-of-Life Planning

❖ Billable event with AWV or Separate Encounter

❖ 99497 - Advance care planning including the explanation and discussion of advance directives such as standard forms (with completion of such forms, when performed), by the physician or other qualified healthcare professional; first 30 minutes, face-to-face with the patient, family member(s), and/or surrogate

❖ 99498 - Advance care planning including the explanation and discussion of advance directives such as standard forms (with completion of such forms, when performed), by the physician or other qualified healthcare professional; each additional 30 minutes (List separately in addition to code for primary procedure)
Support for Patients at Home

❖ Food
  ➢ Meals on Wheels

❖ Caregivers
  ➢ Visiting nurses and caregivers

❖ Emotional support
  ➢ Support from family
  ➢ Phone calls and videochat to fight loneliness
  ➢ MD Department of Aging Senior Call Check Program
Caregiver Services Corps (CSC)

❖ **OPEN for primary care providers STATEWIDE throughout Maryland’s reopening!**

❖ The CSC call center (800-337-8958), staffed with specialists 7 days a week, matches volunteers for urgent and temporary assistance to people over 65 years old in their homes to help with:
  ➢ Self-administration of medications
  ➢ Ambulation and transferring
  ➢ Bathing and completing personal hygiene routines
  ➢ Meal preparation and grocery or prepared meals delivery
  ➢ Teaching how to use video technologies to connect with loved ones and/or healthcare providers for telemedicine

❖ Healthcare providers should alert their patients they are being referred

❖ Seniors, their families and friends may call 211 to seek help and referrals to the elderly in need
Hospital Surge Preparedness

MedChi/CareFirst/Backline Grant

CareFirst BlueCross BlueShield (CareFirst) and the Maryland State Medical Society (MedChi) launched a grant program that will equip additional Maryland physicians with the technology they need to provide needed virtual care during the COVID-19 pandemic and beyond.

Eligibility Requirements

- The medical practice and medical license are in Maryland
- The medical practice is a private, independent group of five or fewer physicians
- The practice enrolls in Backline after March 1, 2020 as the result of the COVID-19 crisis
- MedChi has confirmed the practice’s enrollment with DrFirst
- Enrollment in Backline occurs before December 31, 2020

Application Steps

- Can be completed in less than 5 minutes
- Complete the application linked here
- Email completed application to amullin@medchi.org
- For questions, email or call Andrea Mullin at amullin@medchi.org or 800-492-1056 x3340

Grant Amount

$300 per eligible physician
Federal Emergency Funds for Small Business

❖ **Disaster Loan Assistance** (from Small Business Administration)
  ➢ Low-interest financial disaster loans for working capital in small businesses suffering substantial economic injury due to COVID-19
  ➢ FAQs

❖ **CARES Act** (pending federal legislation)
  ➢ Sets up a $350 billion loan program for small businesses
  ➢ Small businesses can apply for low-interest loans that cover up to 2.5 months of expenses
  ➢ Maximum loan amount is $10 million
  ➢ Loans can cover payroll, rent, utilities, or existing debt obligations
  ➢ Interest rates cannot exceed 4%
  ➢ If employer continues to pay workers through June, the amount of the loans that went toward eligible costs would be forgiven
  ➢ Loans will be available through the **Small Business Administration** and Treasury-approved banks, credit unions, and some nonbank lenders
State Emergency Funds for Small Business

❖ **COVID-19 Layoff Aversion Fund** (from Maryland Governor Larry Hogan and Maryland Dept. of Labor)
  ➢ Designed to support businesses undergoing economic stresses due to the pandemic by minimizing the duration of unemployment resulting from layoffs
  ➢ Award of up to $50,000 per applicant
  ➢ Will be quick deployable benefit and customizable to specific business needs

❖ View the One-Pager
❖ **COVID-19 Layoff Aversion Fund Policy**
❖ **COVID-19 Layoff Aversion Fund Application** (Excel)
❖ Submit your completed application to: LaborCOVID19.layoffaversion@maryland.gov.
Food Resources

❖ Nutrition: Inform patients that children can receive three free meals/day at sites listed on:

- Maryland Summer Meals
- Montgomery County
- Prince Georges County
- Charles County
- Frederick County
- Howard County
- Anne Arundel County
- St. Mary's County
- Harford County
- Calvert County

❖ Free meals available from 42 rec centers in Baltimore

- Call 311 for locations and to schedule pickup time
Resources for Specific Groups

❖ Community- and Faith-Based Organizations

❖ Mass Gatherings and Large Community Events

❖ Non-Pharmaceutical Interventions for Specific Groups
