

PATIENT AGREEMENT FORM

Time My Meds[®] Medication Synchronization Program

Here's how it works:

Once you are enrolled, we can choose a fill date that all your medications can be filled on. If they don not synchronize perfectly at the start, we can fill your perscriptions for enough tablets to last until the designated date. Or we can choose a date that works best for you.

What to expect:

- All your medications will be filled for you at the same time and available to be picked up on the selected date.
- If your prescriptions expire or run out of refills, we will contact your doctor before it is time to refill your medications.
- You will receive automated phone calls once a month to check in with the pharmacy if there are any changes in your medications. You will also receive an automated call when your prescriptions are ready to be picked up. (Make sure we have the correct contact phone number)
- We will contact your doctor(s) to notify them of your enrollment. This program helps your doctor by reducing the amount of refill requests their office receives from our pharmacy.

Benefits:

- No more remembering to refill your medications, calling in refills, or worrying about running out of pills.
- No more guess work of when your medications can be filled.
- Ability to pick up all your medications in one day.
- Your pharmacist can review your medication lists with you and answer any questions you may have at your pick up dates, almost like an appointment.
- Having all your medicines available all the time increases the chances you won't miss any doses. Medications work best if you don't miss any scheduled doses.
- Reduces the chances we run out of your medications.

I have read this entire document and understand the information that has been presented to me.

I authorize you to inform my physician(s) that I am enrolled in this program.
