Evaluation Form

PollEv.com/medicalincs683  **Text MEDICALINCS683 to 22333** once to join

Disclosure

“This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of MedChi, The Maryland State Medical Society and The Maryland Department of Health, and Medicalincs LLC. MedChi is accredited by the ACCME to provide continuing medical education for physicians.

MedChi designates this live educational activity for a maximum of 7 AMA PRA Category 1 Credit™.

Physicians should claim only the credit commensurate with the extent of their participation in the activity.”

Non-physicians receive an attendance certificate which indicates the number of CME credits the activity was awarded. Non-physicians should contact their accrediting or credentialing organization's to make sure they accept CME's (most all do to some extent or another).

MARYLAND DEPARTMENT OF HEALTH

Session 1: Maryland Primary Care Program

Howard M. Haft, MD, MMM, CPE, FACPE

Program Management Office

June 2019

MARYLAND
Department of Health

Presenter

Howard Haft, MD, MMM, CPE, FACPE

Executive Director, Maryland Primary Care Program

Disclosure Announcement

No disclosure related to this presentation

Training Design

- Focused more on Practice Staff
- Working on Training specific to MDPCP Practitioners
- However, depending on the practitioner's role in the practice (e.g. executive officer, quality improvement champion etc.), this training could also be informative

Pre-Survey

Questions:

On a scale of 1-5 how would you rate your knowledge on:

1. The Maryland Primary Care Program framework

Scale Key

- 1 = Fair
- 2 = Building
- 3 = Steady
- 4 = Strong
- 5 = Invincible

Remember the “Why”

- **Provide the best quality health for all Marylanders**
- **Shift from an ever-increasing volume demand to rewards for value-based care**
- **Avoid unnecessary emergency department and hospital visits**
- Show the nation that Maryland can be the leader in healthcare

“Know Your Why”:

Remember the “Why”

“We choose to go to the moon in this decade and do the other things, not because they are easy, but because they are hard, because that goal will serve to organize and measure the best of our energies and skills, because that challenge is one that we are willing to accept, one we are unwilling to postpone, and one which we intend to win.”

- JFK Rice Univ. 1962

Past, Present and Future

US Ranks 39th Healthiest Nation

Per Capita Health Care Spending – US Has No Peer

Relative to the size of its wealth, the U.S. spends a disproportionate amount on health care

Total health expenditures per capita/GDP per capita, U.S. dollars, PPP adjusted, 2016

The US value was obtained from the 2016 National Health Expenditure data.

Source: Kaiser Family Foundation analysis of data from OECD (2017), "OECD Health Data: Health expenditure and financing: Health expenditure indicators", OECD Health Statistics (database). DOI: 10.1787/health-data-en (Accessed on March 19, 2017). • Get the data • PNG

Peterson-Kaiser
Health System Tracker

MARYLAND
Department of Health

US Life Expectancy Lowest in World Among Peers

Present

Disease Burden is Higher in the US than in Comparable Countries

Past

Ratios of Primary Care to Specialists

The U.S. has the highest percentage of specialists among comparable OECD countries

Among [practicing] physicians, 2012

Notes: In cases where 2011 data were unavailable, data from the last available year are shown.

Addressing the Issues: Total Cost of Care Model Contract

GOVERNOR OF MARYLAND
Date: 7/9/18
By: 
Lawrence Joseph Hogan, Jr., Governor

CENTERS FOR MEDICARE & MEDICAID SERVICES
Date: 7/9/18
By: 
Adam Boehler, Director, Center for Medicare and Medicaid Innovation

HEALTH SERVICES COST REVIEW COMMISSION
Date: 7/9/2018
By: 
Nelson Sabatini, Chairman

TCOC Model Agreement Signed on July 9, 2018!

MARYLAND DEPARTMENT OF HEALTH
Date: 7/9/2018
By: 
Robert R. Neall, Secretary of Health

Future

Total Cost of Care Model Components

So- Why Primary Care?

- International Experience
- US Experience
- Stakeholder Input through TCOC Model development
- Single largest provider category
- Low relative healthcare spend (~5%)
- Low cost venue for care
- Best place to invest to avoid unnecessary hospital and ED visits
- Offset to burnout of PCPs

Recent US Experience in Primary Care Policy

Exhibit 2 Quarterly per enrollee fee-for-service spending in the Rhode Island and control-group cohorts, 2007–16

Increasing primary care investment

Source: Baum et al. Health Affairs, February 2019

More Primary Care Increases Life Expectancy

Table 2. Results of Mixed-Effects Regressions Associating Physician Density and County-Level Covariates With Age-Standardized Life Expectancy at Birth in 3142 US Counties, 2005-2015

Variable	Change in Age-Standardized Life Expectancy (95% CI)			
	Model 1 (Total Physician Density)	Model 2 (Primary Care Physician Density)	Model 3 (Specialist Density)	Model 4 (Primary Care Physician and Specialist Density)
Total physicians, per 100 000 population ^a	66.7 (47.5 to 85.8)	–NA	NA	NA
Covariate, per +10 physicians per 100 000 ^b	88.9	NA	NA	NA
Primary care physicians, per 100 000 population	NA	31.8 (17.7 to 45.9)	NA	33.1 (19.0 to 47.3)
Covariate, per +10 physicians per 100 000 ^b	NA	49.7	NA	51.5
Specialty physicians, per 100 000 population	NA	NA	23.3 (9.3 to 37.3)	20.6 (7.5 to 33.6)
Covariate, per +10 physicians per 100 000 ^b	NA	NA	21.7	19.2
Metro area, change to nonmetro area, d	–54.6 (–79.8 to –29.5)	–55.8 (–81.0 to –30.7)	–51.0 (–76.5 to –25.6)	–54.2 (–79.4 to –29.0)

JAMA, Basu, Feb 2019

Requirements: Primary Care Functions

Five advanced primary care functions:

Access and Continuity

Track One

- Empanel patients to care teams
- 24/7 patient access

Track Two (all of the above, plus)

- Alternatives to traditional office visits

Care Management

Track One

- Risk stratify patient population
- Short-and long-term care management
- Follow-up on patient hospitalizations

Track Two (all of the above, plus)

- Care plans & medication management for high risk chronic disease patients

Comprehensiveness and Coordination

Track One

- Coordinate referrals with high volume/cost specialists serving population
- Integrate behavioral health

Track Two (all of the above, plus)

- Facilitate access to community resources and supports for social needs

Beneficiary and Caregiver Engagement

Track One

- Convene Patient Family Advisory Council (PFAC) and integrate recommendations into care, as appropriate

Track Two (all of the above, plus)

- Advance care planning

Planned Care for Health Outcomes

Track One & Two

- Continuously improve performance on key outcomes

2019 Metrics

electronic Clinical Quality Measures (eCQM) include:

- Outcome Measures – Diabetes and Hypertension Control (NQF 0018 & 0059)
- Screening and Initiation of treatment for Substance Abuse (NQF 0004)

Patient Satisfaction

- Consumer Assessment of Healthcare Providers and Systems (CG-CAHPS) – survey of practice patients (NQF 0005)

Utilization

- Emergency department visits and Hospitalizations per 1,000 attributed beneficiaries (HEDIS)

Current metrics as of 2019 – May be updated for 2020

Care Transformation Organization (CTO)

On request – assisting the practice in meeting care transformation requirements

Existing CRISP HIT Services for Practices

Maryland Prescription Drug Monitoring Program

Monitor the prescribing and dispensing of drugs
that contain controlled dangerous substances

Encounter Notification Service (ENS)

Be notified in real time about patient visits to the hospital

Query Portal

Search for your patients' prior hospital and medication records

Direct Secure Messaging

Use secure email instead of fax/phone for referrals and other care coordination

Additional MDPCP HIT through CRISP

- Quality Measures Reporting to CMMI
- Hospital and Emergency Department Utilization Data
- Specialists costs and utilization
- Risk Stratification for Medicare beneficiaries
- Social Determinant Screening and Resource Directory
- Care plan and Care Alert sharing
- Others TBD

MDPCP Learning System

- Practice Coaches- State and CTOs
- Webinars
- Office Hours
- Online Manuals
- Collaborative Communities
- Newsletter
- Connect Site
- 3 Annual Face-to-Face Meetings
- Quarterly Reporting

Practice Coaches

- Care Transformation Requirement Support
- Understanding and using resources
 - Documents and Learning Events
 - Tool navigation and support, including CRISP, MDPCP Portal, and Connect
- Timeline and reporting guidance
- Coordination with other support elements (i.e., CRISP and SBIRT Vendor)

Jekisha
Elliott (Lead Coach)

Kelly Brown

Nicholas Brown

Devadason

Shant'e Gilmore

Derrick Shaw

Kim Gibson

Tammy Liu

TJ Naim

Program Year 1

380 Practices Accepted Statewide

- ~ 220,000 Medicare FFS beneficiaries
- ~ 1,500 Primary Care Providers
- ~ 40% employed by hospitals
- All counties represented
- 21 Care Transformation Organizations (min 6/county)
 - 14 of 21 are hospital-based

Practice Tracks

■ Track 1 ■ Track 2

Practices Partnered with a CTO

■ Non-CTO ■ CTO-Like Groups ■ CTO

380 MDPCP Practices

Past, Present and Future

Post-Survey

Questions:

After this session- on a scale of 1-5 how would you rate your knowledge on:

1. The Maryland Primary Care Program framework

Scale Key

- 1 = Fair
- 2 = Building
- 3 = Steady
- 4 = Strong
- 5 = Invincible

MARYLAND DEPARTMENT OF HEALTH

Session 2

I. Training Sessions Overview

II. Dealing with change in PY1 & following years [Change Management & Quality Improvement]

Session Objectives

Pre-survey

Questions:

On a scale of 1-5 how would you rate your knowledge on:

2. The process of change & where you are in the process
3. Ways to adapt to and manage changes while coordinating patient care
4. Quality improvement process & PDSA

Scale Key

- 1 = Fair
- 2 = Building
- 3 = Steady
- 4 = Strong
- 5 = Invincible

Change Management

“Everyone thinks of changing the world, but no one thinks of changing himself” ~ Leo Tolstoy

CHANGE for the better = IMPROVEMENT

Change **“IMPROVEMENT” Management** is the application of a **structured process** and **set of tools** for leading the **people side** of change **to achieve a desired outcome**

- A **leadership competency** for enabling change within an organization or your practice

“Do as I do ...” leadership approach

- A **strategic capability** designed to increase change capacity and responsiveness

Why Change Management?

... The value in the Total Cost of Care Model

Physician & Practice Staff Engagement

Providers need to be supported through change & transformation to:

- ❑ Reduce admin burden
- ❑ Speed up **adoption rate** and reduce costs
- ❑ Achieve ultimate utilization & proficiency

To increase the probability of the program (MDPCP) & overall practice success, you need to manage

“People-Dependent ROI”

(i.e. People side of Change)

Challenges with Implementing Change

- ☐ No SHARED ownership of the VISION
- ☐ Internal focus instead of seeking external support
- ☐ Success Syndrome
- ☐ Preexisting Biases
- ☐ Treating the symptom
- ☐ No “Sense of Urgency”
- ☐ Imbalanced Participation: *Staff on different stages of change*

Stages of Change – Practice Staff Change Journey

Source: CoEvolve

Breakout Session

POLL: What stage of CHANGE are you in?

- **Anxiety/Happiness**
 - **Fear/Threat**
- **Guilt/Depression**
 - **Disillusionment**
- **Gradual acceptance**
 - **Hostility**
- **Moving Forward**

PollEv.com/medicalincs683

Text **MEDICALINCS683** to **22333** once to join

Change Management Phases

Practice (Organizational) Phases:

1. Prepare for change
2. Manage change
3. Reinforce change

Individual Phases:

1. A-Awareness - *I understand why*
2. D- Decide - *I have decided to*
3. K- Knowledge - *I know how to*
4. A- Ability - *I am able to*
5. R- Reinforce - *I will continue to*

If you don't like something, change it. If you can't change it, change your attitude ~ Maya Angelou

Practice & Individual Change Management Phases Occur simultaneously

1. Preparing for Change

A. Align Key Stakeholders [Create Awareness]:

- **Understand:** the need for a change (the Why)
- **Enlist:** the support of the team to work on a solution (the Who)
- **Envisage:** the opportunities & implications of the solution (the What)

2. Managing Change

B. Engage the Practice Staff [Increase Desire & Knowledge]

- **Motivate:** connect at emotional level around the 'why'
- **Communicate:** the vision

3. Reinforcing Change

C. Act [Ability & Reinforce]

- **Mobilize:** practice staff around 'how' to rollout the solution (the How)
- **Act:** align people (and structure/process) with the new solution (What)
- **Consolidate:** by reinforcing which things are working (Which)

Breakout Discussion

- **How many of you have implemented any change management process in your practice?**
 - Share your experience on your current change management process?
 - What can be done differently?

Quality Improvement

... as a part of Transformational Culture

Quality improvement (QI) is about **designing changes** in both systems and processes that lead to **operational improvements**

An **organizational culture of quality** is one in which **concepts of quality** are ingrained in organizational values, goals, practices/activities, and processes.

A **culture of quality improvement** encourages **ALL** the practice care team/staff to continuously ask:

- *“How are we doing?” and “Can we do it better?”*
- *“Can we do it more efficiently? Or be more effective?”*
- *“Can we do it faster? Or Can we do it in a more timely way?”*

To build a transformational culture of quality, you need to -
Teach it, Define it, Live it, Measure it, and Reward it!

Establishing a Continuous Quality Improvement (CQI) Strategy

To Establish an effective CQI strategy, a practice should ...

- ✓ **Choose and use a formal model** for QI – (PDSA).
- ✓ **Establish and monitor measures** to evaluate improvement efforts and outcomes routinely.
- ✓ Ensure **ALL** staff members understand the **measures for success**.
- ✓ Ensure that **patients, families, providers, and care team members** are involved in QI activities.
- ✓ **Optimize use of an EHR** and health IT.

(Wagner et al., 2012)

Why focus on Quality Improvement?

Maryland Primary Care Program AIM:

... to transform Primary Care delivery by improving the QUALITY of care we provide to Marylanders (and its visitors) – One Primary Care Practice at a time!

Five advanced primary care functions:

PDSA Model

The PDSA Model enables you to **test out changes on a small scale** & build on the learning from these test cycles.

- ✓ Test on a **really small scale**. For example, start with **one patient or one clinician at one afternoon clinic** and increase the numbers as you refine the ideas.
- ✓ Plan multiple cycles to test ideas.

Only implement the idea when you're confident you have considered and tested the possible ways of achieving the change.

PDSA Model & Change Management

Implementing PDSA: Worksheet

TEAM:		Date:	
AIM	Question you want answered with this test:		
Describe your first (or next) test of change	Person responsible	Time Frame	Where?
PLAN			
List the tasks needed to set up this test of change	Person responsible	Due Date	Tools/Technology
DO RUN THE TEST			
STUDY			
<i>Describe what actually happened when you ran the test</i>			
<i>Describe the measured results and how they compared to the prediction(s) and what you learned from the cycle</i>			
ACT			
<i>Describe modifications for the next cycle based on what you learned</i>			

Implementing PDSA: Example - Empanelment

TEAM: Team A [Dr. Lincs & LiLincs, MA] **Date:** March 1, 2019

AIM

Question you want answered with this test: Are all our patients are empaneled to a PCP and Care team?

Describe your first (or next) test of change	Person responsible	Time Frame	Where?
1. Empanel all high-risk patients a) Predicted Outcome: Patients will be assigned to a PCP and a Care Manager b) Patients Involved: Practice high-risk patient population c) Measure of Success: Patient have an assigned PCP and CM in the EMR d) Tracking: Weekly team review of number of patients assigned	Lead: LiLincs, MA Team: Dr. Lincs, IT Support	03/1/2019 to 3/30/2019	Practice EMR/Office

PLAN

List the tasks needed to set up this test of change	Person responsible	Due Date	Tools/Technology
1. Assess & prepare team for change 2. Develop a process or workflow 3. Review workflow with the team and assign roles 4. Begin the test 5. Complete the test 6. Gather the results 7. Study the results 8. Decide on next step (new cycle or implement)	LiLincs, MA LiLincs, MA; Dr. Lincs LiLincs, MA; Dr. Lincs LiLincs, MA LiLincs, MA LiLincs, MA; Dr. Lincs Dr. Lincs	3/8/2019 3/11/2019 3/13/2019 3/26/2019 3/27/2019 3/27/2019 3/28/2019	Change Comm Plan Excel spreadsheet/Word EMR EMR EMR/Excel spreadsheet EMR/Excel spreadsheet

DO

RUN THE TEST Test ran as scheduled 03/08/19 to 3/26/2019

STUDY

Describe what actually happened when you ran the test

The test ran as planned however, we had to work with IT to make the care manager's name appear on the patient's profile.

Describe the measured results and how they compared to the prediction(s) and what you learned from the cycle

Result: 100% of the high-risk patients were empaneled; and this result was as predicted

Lessons Learned (what went well? and what did not go well?):

1. Set time (about 30 - 45 mins) to review charts earlier in the day before patients start coming in for office visits OR after all office visits are completed
2. The MA is over-allocated because she is assigned to all patients and is solely responsible for prepping patients for office visits & post consult activities during the day. We need to secure additional CM support

ACT

Describe modifications for the next cycle based on what you learned

Decision: Move to the next PDSA cycle:

- a. Empanel med-low risk patients to PCP
- b. Seek additional CM support (and assign to patients)

Implementing PDSA: Change Management

PLAN			
List the tasks needed to set up this test of change	Person responsible	Due Date	Tools/Technology
1. Assess & prepare for change			▪ Communications plan ▪ Resistance management plan ▪ Readiness assessment ▪ Coaching plan ▪ Training plan

Preparing for & Implementing Change includes:

1. Sponsor Engagement
2. Targeted Communications
3. Resistance Management
4. Readiness Assessment
5. Coaching
6. Training

You should have a plan in place for these key elements listed above.

Implementing PDSA: Change Management – Communications Plan

Sample Communication Plan to manage Change

Timing	Audience	Message content	Delivery mechanism	Sender	Date and time
A. Initiation & Early stage of change	Practice Staff	- Why the potential change? - What is the risk of not change? - Solicit feedback	- Face-to-Face meeting (≥1x) - Email updates	Practice Leader & Supervisor(s)	Set dates once a Test of change is identified - F2F Meeting(s) - Weekly email updates
B. At Start & During the Test of change	Test Team	Share aim & objectives; timeline & projected impact	- Face-to-Face (F2F) meetings (Weekly for duration of testing) - Individual/team coaching	Test Team Lead	- F2F weekly meetings - Coaching sessions
C. End of Test of change	Test Team Practice Leader & Supervisor(s)	- Discuss results & impact - Decide on next steps	Face-to-Face meeting (1–2x)	Test Team Lead	Set date at end of test F2F meeting(s)
	Practice Staff	Decision made supported with results/findings	Face-to-Face meeting (1x) (and/or conference call)	Practice Leader & Supervisor(s)	Set date at end of test F2F weekly meeting
- Decision A: Continue test of change; then begin steps A – C - Decision B: Continue to Implementation, then begin steps D - F					
D. Before implementation	Practice Staff	- Change Decision - Why the change is needed? - Who will be impacted? - WIIFM? - Readiness assessment - Training plan	- Face-to-Face meetings (2x) - Email updates (weekly) - Individual coaching sessions - Group learning sessions	Practice Leader & Supervisor(s)	Set date for F2F once Implementation date is set (<i>Try to move as much team members to “desire” stage before setting an implementation date</i>) - F2F weekly meetings - Weekly emails - Coaching/training sessions
E. During implementation	Implementation Team	- How are things going? What are the results? - What are the gaps? - Additional training needed? - Reinforcement messages	- Face-to-Face meeting (2x) - Email updates (weekly/biweekly depending on timeframe)	Implementation Team Lead/ Supervisor(s)	Set date for routine meetings - Weekly meetings - Weekly emails
F. Post-implementation	Practice Staff	Results, Reinforcement & next steps	- Face-to-Face meeting (≥1x) - Email updates (biweekly/monthly/quarterly)	Practice Leader & Supervisor(s)	Set date as implementation wraps up - F2F meeting - Periodic updates (emails)

Implementing PDSA: Change Management – Resistance to Change

Causes of Resistance

Organizational/Practice Context

- History with change – successes, failures, flavor of the month
- Practice's values & culture
- Change saturation and change capacity

Personal Context

- Personal and family situation
- Professional career history & plans
- Degree of personal impact of the change

Implementing PDSA: Change Management - Managing Resistance

Managing Resistance

1. Don't spend too much time on those in hostility/disillusioned phase
2. Listen & understand objections
3. Focus on the **“What”** and let go of the “How”
4. Remove barriers
5. Provide simple, clear choices, & consequences
6. Create Hope (for the future)
7. Show the benefits in a real & tangible way
8. Make a personal appeal (works when there's a high degree of trust)
9. Converts the strongest dissenters
10. Demonstrate consequences
11. Provide incentives

Implementing PDSA: Change Management – Readiness Assessment

Goal: Score of 3 or more

Individual Staff Readiness Scores

	A	D	K	A	R	Barrier Point
A	4	2	2	3	3	Desire
B	2	2	2	3	3	Awareness
C	1	1	2	2	3	Awareness
D	3	3	2	2	3	Awareness
E	4	4	4	3	3	Ability
F	4	4	4	3	3	Ability
G	4	4	3	3	3	Knowledge
H	5	5	3	3	3	Knowledge

Average Practice Readiness Scores

- In this example, Awareness and Desire/Decide at above 3, so **KNOWLEDGE** seems to be the barrier point and the next step here is to provide targeted Training for the staff.
 - *In this instance, expecting the team to successfully start testing the change/begin implementation (ACT) will be a less productive decision*

Breakout Discussion

POLL: What Change Phase are you in? *(Individual/Group Analysis)*

- **A-Awareness** - *I understand why [A]*
- **D- Decide** - *I have decided to [B]*
- **K- Knowledge** - *I know how to [C]*
- **A- Ability** - *I am able to [D]*
- **R- Reinforce** - *I will continue to [E]*

PollEv.com/medicalincs683  Text **MEDICALINCS683** to **22333** once to join

Implementing PDSA: Change Management – Coaching & Training

At State Level

- **Established learning system** with series of training on several topics – Webinars, Office hours, Peer-to-Peer learning, In-Person comprehensive training etc.
- For coaching, leverage **State Practice transformation coaches**

At Practice Level

- Identify different staff/care team roles** impacted
- Conduct **needs assessment & gap analysis**; & documents training/coaching requirements
- Identify learning/training sessions** available (also check MDPCP Connect Calendar)
- Provide or refer staff for required training/coaching**
- Leverage CTO practice coaches**

At Individual Level

- **Identify personal areas of improvement** & share with your supervisor
- **Proactively seek learning opportunities**
- **Attend training/coaching sessions**

Implementing PDSA: Workflows

PLAN

List the tasks needed to set up this test of change	Person responsible	Due Date	Tools/Technology
2. Develop process or workflow			Excel Spreadsheet or word/power point

Defining “Workflow” ... the sequence of processes through which a piece of work passes from initiation to completion.

Option A

Option B

Steps	Owner
1 Confirm active patients criteria	PCP
2 Review EMR & update active patient panel	MA/OM
3 Is patient assigned to a PCP? If, NO, assign to PCP	MA/OM
4 Is patient assigned to a CM and/or Care Team? If, NO, assign to CM and/or Care Team	MA/OM
MA: Medical Assistant OM: Office Manager PCP: Primary Care Provider	

Implementing PDSA: Monitoring

PLAN

List the tasks needed to set up this test of change

Person responsible

Due Date

Tools/Technology

6. Gather the results

7. Study the results

Excel Spreadsheet &
EMR

Gather Results – Data Collection

Patient Empanelment				
Patient Name	Patient ID	DOB	Risk Tier	Completion Date
Jane Doe	1-101	2/12/1950	High	3/11/2019
Doe James	1-102	2/13/1950	High	3/11/2019
Jane Doe 1	1-103	2/14/1950	High	3/11/2019
Doe James 1	1-104	2/15/1950	High	3/11/2019

Doe James 7	1-128	3/11/1950	High	3/14/2019
Jane Doe 8	1-129	3/12/1950	High	3/14/2019

Study the Results - Chart (Baseline)

What do we need to know? ...

- How many high-risk patients were empaneled in the 2 weeks? And how many patient are remaining?
- How many were empaneled per day? Was there any variations per day AND why?
- How can we improve the process?

- Based on your observation, what is your decision on next steps?

Breakout Group Competition

Test your understanding
Respond in groups to the questions

PollEv.com/medicalincs683

- **What is the first step for PDSA test?**
 - a) Identify the team
 - b) Identify the team and initiate change management
 - c) Set aims
- **What are the 3 key questions to ask when planning a PDSA test? {List Options}**
 - a) Set aims, study the change, implement change
 - b) Set Aims, Establish measures, Select change initiative(s)
 - c) Set aims, implement change, reinforce change
- **When preparing for change, you should have a plan for the following ... (select the Best answer)? {List Options}**
 - a) Communication, Readiness, Measures
 - b) Communication, Readiness & Resistance
 - c) Communication, Resistance, Readiness, Coaching & Training
- **After completing the readiness assessment and desire/decide is the barrier point, should you start staff training? {Y/N}**
- **To test change, you can have multiple cycles before implementing the change? {Y/N}**

Session Recap

✓ Change Management Principles

- The process of change & where you may be in the process
- Walked through ways to adapt to changes while coordinating patient care

✓ Preparing for & Implementing Change:

- Sponsor Engagement
- Targeted Communications
- Resistance Management
- Readiness Assessment
- Coaching
- Training

✓ Quality Improvement

- Transformational culture
- PDSA Implementation
- How Change management is integrated in PDSA Implementation
- PDSA – Workflows, people, process, technology & tools

Post-survey

Questions:

After this session - on a scale of 1-5 how would you rate your knowledge on:

2. The process of change & where you are in the process
3. Ways to adapt to changes while coordinating patient care
4. Quality improvement process & PDSA

**** Call to Action: What is your readiness level to try applying this knowledge at your practice?**

Scale Key

- 1 = Fair
- 2 = Building
- 3 = Steady
- 4 = Strong
- 5 = Invincible

- 5 = Invincible

Team-Based Care Principles

Principles of Team-Based Health Care

Shared goals: The team—including the patient and, where appropriate, family members or other support persons—works to establish shared goals that reflect patient and family priorities, and can be clearly articulated, understood, and supported by all team members.

Clear roles: There are clear expectations for each team member's functions, responsibilities, and accountabilities, which optimize the team's efficiency and often make it possible for the team to take advantage of division of labor, thereby accomplishing more than the sum of its parts.

Mutual trust: Team members earn each others' trust, creating strong norms of reciprocity and greater opportunities for shared achievement.

Effective communication: The team prioritizes and continuously refines its communication skills. It has consistent channels for candid and complete communication, which are accessed and used by all team members across all settings.

Measurable processes and outcomes: The team agrees on and implements reliable and timely feedback on successes and failures in both the functioning of the team and achievement of the team's goals. These are used to track and improve performance immediately and over time.

*SOURCE: October 2012 IOM Discussion Paper
"Core Principles & Values of Effective Team-Based Health Care"*

Benefits of Team-Based Care

- ❑ Care transformation to team-based care requires **an investment**, both in the time to **develop new functions** and to establish **a new culture**.

However, once the initial investment is complete, the benefits of team-based care ensure its sustainability.

- ❑ **Benefits to Practice Team:**

- ✓ improved provider and care team satisfaction
- ✓ improved team communication, and
- ✓ improved patient safety

- ❑ **Benefits to Patients:**

- ✓ proactive and timely access to appropriate preventive care
- ✓ evidence-based management of chronic conditions, and
- ✓ **improve patients' experience of care**

Patient Experience

According to the Beryl Institute ...

Patient experience (PX) is “the **sum of all interactions**, shaped by an organization’s culture, that influence patient perceptions, across the continuum of care”

Team-Based Care: Staff Mix (with MDPCP)

Source Conceptual blueprint - - AHRQ White Paper

Team-Based Care: Composition

Practice Team

Clinical Care Team

- ✓ Primary Care Provider
- ✓ Medical Assistant
- ✓ Registered Nurse
- ✓ Care Manager
- ✓ Social Worker
- ✓ Behavioral Health Specialist

Support Care Team

- ✓ Administrative Support
- ✓ QI Specialist
- ✓ Data Analyst
- ✓ IT Specialist
- ✓ Transformation Coach

Team-Building

Team building involves various types of activities used to enhance social relations and define roles within teams, often involving collaborative tasks

Team Building Steps:

- ☐ Explore the team – leaders, innovators, faster processors, decisive
- ☐ Identify the Tasks & the requirements
- ☐ Develop a vision (led by team leader)
- ☐ Perform as a team – build agenda

Benefits of Team Building

- Improve productivity
- Increase motivation
- Increased collaboration
- Encourage creativity
- Positive reinforcement
- Improved communication

Team Building starts with you ...

- Know yourself and your goals; and articulate this information clearly and with enthusiasm
- Listen to others and discover what their goals and skills are
- Seek others' feedback, opinions, and collaboration; and Respond to others when asked for feedback, or collaboration

Conflict Resolution

- Conflict natural parts of our lives, as well as the lives of every organization
- **Conflict resolution is a way for two or more parties to find a peaceful solution to a disagreement among them.** The disagreement may be personal, financial, political, or emotional

When a dispute arises, often the **best course of action is negotiation** to resolve the disagreement.

There are **seven steps** to successfully negotiating the resolution of a conflict:

- Understand the conflict
- Communicate with the opposition
- Brainstorm possible resolutions
- Choose the best resolution
- Use a third party mediator
- Explore alternatives

Breakout Discussion

- **Have you initiated team-based care in your practice?**

Pollev.com/medicalincs683  Text **MEDICALINCS683** to **22333** once to join

- **What team building activities will you recommend OR have implemented in your practice?**

Pollev.com/medicalincs683  Text **MEDICALINCS683** to **22333** once to join

Session Recap

- ✓ The principles & benefits of team based care
- ✓ The different team base structures (esp. in MDPCP)
- ✓ Navigating team-based care:
 - *Building Relationships*
 - *Team Communication*
 - *Dealing with Conflict*

Care Transformation Journey with the Patient: Test Patient

Ms. Anexxa, 71-year old Medicare beneficiary

Clinical Profile

- Type II Diabetes
- Long standing Hypertension (Last BP: 140/90 mmHg)
- CHF following a heart attack from 3 years prior
- Dependent on Opioid – which started after pain management for a hip fracture 4 years earlier
- Other Medications: Metformin 500 mg daily; Enalapril 30 mg/day PO qd; Aspirin 81 mg PO qd ; Lovastatin 40 mg PO qd
- Lifestyle modifications: Exercise - 30 mins moderate-intensity aerobic activity – 5d/week, Nutrition therapy (DASH diet)

CLINICAL PROFILE

Social Profile

- Retired widow who lives alone and her son lives 5 hours away & uses public transportation
- High school education; Worked as a kitchen staff in a school cafeteria; On fixed income
- She has no fresh food at home – due to her recent stay for 4 days in the hospital
- Experiences other care transition challenges such as: Off-road options, snapshot treatment, diminished ability and increased responsibility

SOCIAL PROFILE

Personality/Behavior Profile

- She is an extrovert, usually lively, a “people person” and does not like to be alone
- Enjoys attending group meetings when she can (e.g. Diabetes group)
- Does not exercise much and tries to maintain good eating habit
- She engages well with her peers and encourages them through life challenges

PERSONALITY PROFILE

Utilization Profile (last 6m)

- 5 ED visits
- 2 Hospitalizations
- Most recent hospitalization after being treated for uncontrolled CHF & unaware of 2 of the 3 new prescriptions b/c they were electronically sent to the pharmacy

UTILIZATION PROFILE

Cost (Utilization)

- Short term hospital – \$27,000
- ER - \$7,500
- **Total ED & Hosp (last 6m) - \$34,500**

UTILIZATION COST

Care Transformation Journey with the Patient: Test Practice

Healthlincs Primary Care

(Based on an actual MDPCP Practice's Profile)

Practice Type: Independent

Location: Glen Burnie, MD

Practitioners: 4 [1 PCP, 1 NP, 2 PA]

Support Staff: 6 [3 MA, 1 LPN, 1 OM, 1 AOM]

of MDPCP Beneficiaries: ~ 800

of Patients: ~ 8,000

Dr. Lincs (PCP)

Disclosure Statement

No disclosure directly related to this presentation

Phase I Overview:

Before the Office Visit

	A ▪ Prior Telephonic or in-person, non-office contact with patient ▪ Was the encounter with someone on the patient's care team? ▪ Was the encounter documented in close to real-time? ® Empanelment & Continuity (E&C) ® 24/7 Access: for patients to care team <u>AND</u> for providers to EMR (including remote access)
	B ▪ Appointment Scheduling & Reminder calls ▪ Is the patient scheduled to see assigned PCP and/or Care Team? ▪ Any Pre-appointment questionnaire? ® Empanelment & Continuity (E&C)
	C ▪ **Prior visit data reviews (population & individual data/reports) ▪ Is the patient scheduled to see assigned PCP and/or Care Team? ▪ Do you perform routine panel empanelment optimization? – Dead patients, New physician etc. ® Empanelment & Continuity (E&C) ® Data driven care improvement (Data) ® Risk Stratification (RS)
	D ▪ Pre-visit huddle (medical records review) ▪ Frequency – daily or weekly ▪ Agenda – driven by utilization review? disease-specific patient cohort? PCP weekly schedule?

Session Objectives

Understand the following concepts applied during Phase I:

- ✓ Workflow: People, Process & Technology/Tools
- ✓ Interdisciplinary Teams/Care Team Roles
- ✓ Team Huddles
- ✓ EMR tools for empanelment
- ✓ CRISP tools for risk stratification
- ✓ Minimum data sets necessary for hand-offs
- ✓ Proper & secure documentation for each transition of care

Pre-survey

Questions:

On a scale of 1-5 how would you rate your knowledge on:

- 8. Interdisciplinary Teams/Care Team Roles
- 9. Team Huddles
- 10. Minimum data sets necessary for huddles
- 11. Empanelment
- 12. Risk Stratification

Scale Key

- 1 = Fair
- 2 = Building
- 3 = Steady
- 4 = Strong
- 5 = Invincible

The Patient Journey Phase I-Patient Care BEFORE the Visit

Interdisciplinary Team Overview

The Value of Team Based Care

Interdisciplinary Teams (Contd.)

Why are they important?

- ✓ Deliver comprehensive care
- ✓ Increased productivity
- ✓ Improved health outcomes
- ✓ Decreased cost/Increased healthcare savings
- ✓ Increased patient satisfaction
- ✓ Effective collaboration and use of resources
- ✓ Satisfaction among team members
- ✓ Improved patient safety

Care Team Roles

Primary Team

- Primary Care Provider
- Medical Assistant (Care Coordinator)
- Registered Nurse (Support/Practice CM)
- Lead Case Manager (CTO RN)

Extended Team

- Community Health Worker
- Social Worker
- Behavioral Health Specialist
- Health Coach
- Pharmacist
- Diabetic Educator
- Specialist

Breakout Session

POLL: Choose the face that best describes your confidence level with effectively being a part of an interdisciplinary team

and/or

your ability to work effectively with teams to produce the desired patient outcomes.

Pollev.com/medicalincs683

Our Patient: Ms. Anexxa, 71-year old Medicare beneficiary.

Clinical Profile

- Type II Diabetes
- Long standing Hypertension (Last BP: 140/90 mmHg)
- CHF following a heart attack from 3 years prior
- Dependent on Opioid – which started after pain management for a hip fracture 4 years earlier
- Other Medications: Metformin 500 mg daily; Enalapril 30 mg/day PO qd; Aspirin 81 mg PO qd ; Lovastatin 40 mg PO qd
- Lifestyle modifications: Exercise - 30 mins moderate-intensity aerobic activity – 5d/week, Nutrition therapy (DASH diet)

Social Profile

- Retired widow who lives alone and her son lives 5 hours away & uses public transportation
- High school education; Worked as a kitchen staff in a school cafeteria; On fixed income
- She has no fresh food at home – due to her recent stay for 4 days in the hospital
- Experiences other care transition challenges such as: Off-road options, snapshot treatment, diminished ability and increased responsibility

Personality/Behavior Profile

- She is an extrovert, usually lively, a “people person” and does not like to be alone
- Enjoys attending group meetings when she can (e.g. Diabetes group)
- Does not exercise much and tries to maintain good eating habit
- She engages well with her peers and encourages them through life challenges

Utilization Profile (last 6m)

- 5 ED visits
- 2 Hospitalizations
- Most recent hospitalization after being treated for uncontrolled CHF & unaware of 2 of the 3 new prescriptions b/c they were electronically sent to the pharmacy

Cost (Utilization)

- Short term hospital – \$27,000
- ER - \$7,500

Total ED & Hosp (last 6m) - \$34,500

Phase I, Step A: Prior Encounter(s) with Ms. Anexxa

Journey/ Workflow Phase	Process Steps (Clinician/Provider Journey)	Patient's Journey (Ms. Anexxxa)	Owner (People)									Technology (Health IT Capabilities)	Resources
			PCP	RN	MA /LPN	OA	CHW	SW	OM	DA /IT	QI		
Before Office Visit													
	- Prior Telephonic or in-person, non-office contact with patient - Was the encounter with someone on the patient's care team? - Was the encounter documented in close to real-time? ® Empanelment & Continuity (E&C) ® 24/7 Access: for patients to care team AND for providers to EMR (including remote access)	- Before my next appointment, I was able to send & receive messages with my care team on the patient portal - My Care Manager called me last week to check up on me - My CHW helped me with completing a form for better housing		☒	☒	☒	☒	☒		☒		- EMR “Empanelment” flag (for care team) - Patient Portal for secure messaging - Provider 24/7-EMR Access - EMR Documentation (for different encounter types)	Call Scripts (Serves as a QA step and To keep communication consistent) FAQs for addressing patient portal inquiries Practice Criteria/Protocol for Empanelment [considering care team preferences, care team skills, availability etc.]

- The Care Team's encounter with Ms. Anexxa occurs in multiples ways before her next doctor's visit **(24/7 Access)**
- We need to ensure that Ms. Anexxa (and other patients) are empaneled to a care team to promote a more comprehensive encounter – phone, secure messaging etc. **(Empanelment)**

Ms. Anexxa's experience captured here – shows that she is happy to have access to members on her care team and even when they contact her before her office visit.

- Workflow here should capture key things like your practice's process for empanelment, responding to questions on the patient portal etc. **(Quality Improvement)**

Patient Empanelment Process

Know your “Why”

- ✓ Empanelment **promotes continuity of care**
- ✓ Builds trusting patient-provider relationship & **promotes better health outcomes**
- ✓ Increases **provider satisfaction** by effective use of time & effort
- ✓ Improves **patient satisfaction**
- ✓ Facilitates panel-level population management

Patient Empanelment Process – Example 1

Empanelment Steps	Primary Care Practice A
Identify active patients/beneficiaries	Active patients are identified: ▪ 24 m look back period using EMR data
Empanel patients to practitioners and/or care teams	A. Empanelment criteria: ▪ Care team composition: 1 PCP, 1 MA, 1 Front desk staff ▪ <i>Extended (CTO) care team: 1 Data Analyst (OM/DA), 1 Care Manager</i> ▪ Provider : Patient ratio? ▪ PCP – 4000 ▪ MA – 4000 ▪ CTO RN: 2000 ▪ Assigning high-risk patients? PCP? CM? Other? ▪ MD assigned to all patients ▪ Lead CM is assigned all high-risk patients (up to 2000) ▪ Support CM/Front desk staff: support lead CM with episodic care management ▪ Patient's preference also considered B. Empanel Patients: Assigned in EMR (Appears on patient's profile) C. Panel Review – Frequency? Process? ▪ Frequency: Every year ▪ Process: DA helps to identify active patients & patients are reassigned as needed based on empanelment criteria above
Measure & Optimize Continuity	▪ Easy to assess due to care team composition

Patient Empanelment Process: Example 2

Empanelment Steps	Healthlines Primary Care Practice
Identify active patients/beneficiaries	Active patients are identified: 24 m look back period using EMR data
Empanel patients to practitioners and/or care teams	A. Empanelment criteria: - Care team: 1 PCP, 1 NP, 2 PA, 1 RN, 3 MA, 1 LPN - Extended care team: 1 Office Manager/Data Analyst (OM/DA), 1 Office Assistant Manager (front desk) - Provider : Patient ratio? - PCP – 1500 (8000) - NP/PA - 2000 - RN - 2000 - Assigning high-risk patients? PCP? CM? Other? - MD assigned 90% of high-risk patients - More senior/experience PA/NP panel is assigned remaining 10% high-risk patients - Lead CM is assigned all high-risk patients (up to 2000) - Each lead CM is assigned a support MA to manage caseload - Patient's preference also considered B. Empanel Patients: Assigned in EMR (Appears on patient's profile) C. Panel Review – Frequency? Process? - Frequency: Every 6 months (and ad-hoc with staff changes) - Process: DA helps to identify active patients & patients are reassigned as needed based on empanelment criteria above
Measure & Optimize Continuity	- What is the preferred method of measuring continuity? - Provider-Centric Continuity - How often is continuity measured? Semi-annually

**Ms. Anexxa is assigned to a Care Team:
PCP – Dr. Lincs (MD); Lead CM (RN); and 1 Support CM (MA)**

Breakout Discussion

- *How many of us have a similar empanelment process?*
- *Does anyone have a different empanelment process to share?*

Phase I, Step B: Appointment Scheduling & Reminder calls

Journey/ Workflow Phase	Process Steps (Clinician/Provider Journey)	Patient's Journey (Ms. Anexxxa)	Owner (People)										Technology (Health IT Capabilities)	Resources
			PCP	RN	MA /LPN	OA	CHW	SW	OM	DA /IT	QI			
	- Appointment Scheduling & Reminder calls - Is the patient scheduled to see assigned PCP and/or Care Team? - Any Pre-appointment questionnaire? ® Empanelment & Continuity (E&C)	- I received a reasonable number of reminders (phone call & text), which was helpful to remind me about my appt. - I know where to go for my appointment - I feel calm about my upcoming appointment		☒	☒	☒	☒			☒		- EMR Scheduling Application (with real-time updating) - Automated (reminder) calling system - Registry: EHR/Excel based	- Scheduling template – showing color-coded appointment types, open slots, double booking etc. - Automated calling Workflow & Script	

- Ms. Anexxa has is scheduled for a doctor's visit in 2 days with Dr. Lincs. The visit type is "Established patient – Follow up" – as indicated by the **PURPLE CODE** in the EMR scheduling template (*Continuity*)
- Ms. Anexxa received reminder calls from her doctor's office. She also received a text message to confirm that she'll be attending the visit & she confirmed

Ms. Anexxa's experience captured here – shows that she is happy with the number of reminders she got and the details of her appointment.

Phase I, Step C: Prior Visit Data/Report Reviews

Journey/ Workflow Phase	Process Steps (Clinician/Provider Journey)	Patient’s Journey (Ms. Anexxxa)	Owner (People)										Technology (Health IT Capabilities)	Resources
			PCP	RN	MA /LPN	OA	CHW	SW	OM	DA /IT	QI			
	**Prior visit data reviews (population & individual data/reports) - Is the patient scheduled to see assigned PCP and/or Care Team? - Do you perform routine panel empanelment optimization? – Dead patients, New physician etc. Ⓡ Empanelment & Continuity (E&C) Ⓡ Data driven care improvement (Data) Ⓡ Risk Stratification (RS)	My PCP told me about my ED visit/hospitalization and BP trend; it is <u>good to know</u> <u>my progress is monitored</u>	☒	☒	☒					☒	☒	☒	- CRISP Data reporting portal <u>Other</u> payer reporting portal - EMR reporting portal/dashboards	- Care team customized review reports – outlining benchmarks and outcomes - Defined measure criteria – e.g. risk scores, key measures etc.

- Care Team review different patient panel reports. Some reports are reviewed on a daily, weekly, monthly, and quarterly basis. Examples are: Disease-specific or eCQM-specific EMR Dashboard, Care team Panel scheduled for office visits in the coming week, CRISP report, ENS notification/report etc. **(Data Driven Care Improvement)**

Reviewing Ms. Anexxa's utilization and clinical data, will elicit a positive experience from Ms. Anexxa's later on in the process because ... the doctor is able to communicate her progress with her comprehensively and recommend appropriate treatment modalities

- Attribution list and current risk scores are reviewed – Algorithm-Based **(Risk Stratification – Step 1)**

Risk Stratification

Know your “Why”

- ✓ Provides an actionable view into the needs of the patient population
- ✓ **Target resources** to your patients demonstrating the greatest needs
- ✓ Supports your efforts to address **care management needs of high-or rising-risk patients**
- ✓ Supports your efforts to **address preventive care needs of low-risk patients**

Risk Stratification – Algorithm

- Algorithm-based risk stratification is the first step of risk stratification.
- It is based on defined diagnoses, claims, or other electronic data allowing population-level stratification.

- There are a variety of algorithm-based methods available, using utilization, co-morbid conditions, EHR, and claims data.
- **In MDPCP, CRISP data (utilization & cost) provides a great risk stratification framework you can use; and it is updated monthly.**

Risk Stratification – Factors

High Risk

Pre-defined Risk : Top Quartile (HCC, EHR, etc.)

Utilization:

- 3 or more ED visits
- Any admission
- 1 hospitalization related to chronic conditions
- Admission to hospice or palliative care

Clinical:

- 1 unstable BH diagnosis
- 2 or more stable BH diagnosis
- 3 or more active chronic conditions
- Active Cancer
- Clinical metrics out of normal range (A1C >9)

Medium Risk

Pre-defined Risk: 2nd and 3rd Quartile (HCC, EHR, etc.)

Utilization:

- 1 ED visit related to chronic condition
- Any hospitalization

Clinical:

- 1 stable BH diagnosis
- Less than 3 active chronic conditions
- History of Cancer
- Clinical metric moderately out of normal range (A1C < 9)

Low Risk

Pre-defined Risk: Bottom Quartile (HCC, EHR, etc.)

Utilization:

- No ED visits or hospitalizations

Clinical:

- No Chronic medical or BH conditions

Risk Stratification – Clinical Intuition

- Clinical intuition is simply adjusting the risk score based on information not available through the structured fields and data sources the algorithm uses.

- May include:
 - *patients' social needs*
 - *health literacy*
 - *activation*
 - *family or caregiver support*
 - *behavioral or medical need*

Risk Stratifying Ms. Anexxa

QR
CTO/Coach Support

High Risk

Pre-defined Risk : Top Quartile (HCC, EHR, etc.)

Utilization:

- 3 or more ED visits
- Any admission
- 1 hospitalization related to chronic conditions
- Admission to hospice or palliative care

Utilization Profile (last 6m)

- 5 ED visits
- 2 Hospitalizations
- Most recent hospitalization after being treated for uncontrolled CHF & unaware of 2 of the 3 new prescriptions b/c they were electronically sent to the pharmacy

Clinical:

- 1 unstable BH diagnosis
- 2 or more stable BH diagnosis
- 3 or more active chronic conditions
- Active Cancer
- Clinical metrics out of normal range (A1C >9)

Clinical Profile

- Type II Diabetes
- Long standing Hypertension (Last BP: 140/90 mmHg)
- CHF following a heart attack from 3 years prior
- Dependent on Opioid – which started after pain management for a hip fracture 4 years earlier
- Other Medications: Metformin 500 mg daily; Enalapril 30 mg/day PO qd; Aspirin 81 mg PO qd; Lovastatin 40 mg PO qd
- Lifestyle modifications: Exercise - 30 mins moderate-intensity aerobic activity – 5d/week, Nutrition therapy (DASH diet)

Risk Stratifying – PDSA Example

QUESTION: How can we be sure we are capturing the most appropriate patient risk levels?

Test of Change: Create an efficient risk stratification process to capture empaneled patients

Plan: Identify risk stratification criteria & Who will perform the risk stratification

Do: 1) Risk stratify empaneled patients using CRISP data.

- a. low risk- no ER visits/hospitalizations in past 6 months
- b. medium risk- 1-3 ER visits/hospitalizations in past 6 months
- c. high risk- > 3 ER visits/hospitalizations in past 6 months.

2) Use SDOH/Clinical Information/EHR as a secondary sources of identifying risks

Study: 1) How do the two risk stratification sources compare when used alone?

2) The number of empaneled patients without CRISP utilization that stratify as high-risk based on SDOH/EHR/Clinical Information.

3) The number of empaneled patients with CRISP high-risk utilization that have not had a visit within the last 3 months

Act: Use at least two sources to refine the risk stratification process of empaneled patients to ensure the appropriate resources are used to improve patient engagement, outcomes and satisfaction.

Breakout Session

A lot of you have been working on Risk Stratification since the start of the program, what are the lingering challenges you have?

Phase I, Step D: Pre-visit Huddle

Journey/ Workflow Phase	Process Steps (Clinician/Provider Journey)	Patient's Journey (Ms. Anexxxa)	Owner (People)										Technology (Health IT Capabilities)	Resources
			PCP	RN	MA /LPN	OA	CHW	SW	OM	DA /IT	QI			
	- Pre-visit huddle (medical records review) - Frequency – daily or weekly - Agenda – driven by utilization review? disease-specific patient cohort? PCP weekly schedule?	My PCP/Care team seem to be collaborating well to provide me the best care; my PCP <u>did not ask me all of the same questions</u> the MA just asked me a few minutes ago & my CHW asked me last week	☒	☒	☒		☒	☒				- EMR - Macro-enabled Excel reports	Care team huddle template and/or agenda	

- This step builds on the previous step. Care Teams conduct a pre-visit huddle to specifically discuss patient on their panel to review patients' care needs. Some care teams huddle daily or weekly
- The healthlincs team discussed Ms. Anexxa's status 1 day prior to her office visit. Her CM realized amongst other things that we was eligible for an AWW and BH Screening; so the team will send out a message to notify her that these will be done in her office visit tomorrow. *(Data Driven Care Improvement)*

The efforts made here will elicit a positive experience from Ms. Anexxa's later in the process because she will not be asked the same questions multiple times & feels like her care team "knows" her.

The Patient Journey Phase I-Patient Care BEFORE the Visit

Team Huddle Overview

Achieving Population Health
Through Team Based Care

In Between Visit Workflow

bellinhealth

Huddles: Structure

- ✓ An evidenced-based tool
- ✓ Used by the primary care team
- ✓ Should occur daily
- ✓ Should have an agenda
- ✓ Should be less than 10 minutes
- ✓ Should discuss/call-out care needs for visit

Team Huddle: Agenda

Team huddle checklist

Use this modifiable checklist to lead your team through efficient, effective huddles at the beginning of the clinic day or session.

+	
Date:	Start time:
Huddle leader:	
Team members in attendance:	
Check in with the team	
	How is everyone doing?
	Are there any anticipated staffing issues for the day?
	Is anyone on the team out / planning to leave early / have upcoming vacation?
Huddle agenda	
	Review today's schedule
	Identify scheduling opportunities • Same-day appointment capacity • Urgent care visits requested • Recent cancellations • Recent hospital discharge follow-ups
	Determine any special patient needs for clinic day • Patients who are having a procedure done and need special exam room setup • Patients who may require a health educator, social work or behavioral health visit while at the practice • Patients who are returning after diagnostic work or other referral(s)
	Identify patients who need care outside of a scheduled visit
	Determine patient needs and follow up • Patients recently discharged from the hospital who require follow up • Patients who are overdue for chronic or preventive care • Patients who recently missed an appointment and need to be rescheduled
	Share a shout-out and/or patient compliment
	Share important reminders about practice changes, policy implementation or downtimes for the day
	End on a positive, team-oriented note • Thank everyone for being present at the huddle
	Huddle end time:

Team Huddle: Template

Breakout Session

Daily Huddle Scenario

- ☐ We have a list of 10 care team patients to be discussed. We have roughly 1 minute to discuss each patient.
- ☐ Ms. Anexxa is on our list.

What data/information should be shared/called-out about her during our huddle?

Our Patient: Ms. Anexxa, 71-year old Medicare beneficiary.

Clinical Profile

- Type II Diabetes
- Long standing Hypertension (Last BP: 140/90 mmHg)
- CHF following a heart attack from 3 years prior
- Dependent on Opioid – which started after pain management for a hip fracture 4 years earlier
- Other Medications: Metformin 500 mg daily; Enalapril 30 mg/day PO qd; Aspirin 81 mg PO qd ; Lovastatin 40 mg PO qd
- Lifestyle modifications: Exercise - 30 mins moderate-intensity aerobic activity – 5d/week, Nutrition therapy (DASH diet)

Social Profile

- Retired widow who lives alone and her son lives 5 hours away & uses public transportation
- High school education; Worked as a kitchen staff in a school cafeteria; On fixed income
- She has no fresh food at home – due to her recent stay for 4 days in the hospital
- Experiences other care transition challenges such as: Off-road options, snapshot treatment, diminished ability and increased responsibility

Personality/Behavior Profile

- She is an extrovert, usually lively, a “people person” and does not like to be alone
- Enjoys attending group meetings when she can (e.g. Diabetes group)
- Does not exercise much and tries to maintain good eating habit
- She engages well with her peers and encourages them through life challenges

Utilization Profile (last 6m)

- 5 ED visits
- 2 Hospitalizations
- Most recent hospitalization after being treated for uncontrolled CHF & unaware of 2 of the 3 new prescriptions b/c they were electronically sent to the pharmacy

Cost (Utilization)

- Short term hospital – \$27,000
- ER - \$7,500

Total ED & Hosp (last 6m) - \$34,500

Session Recap

- ✓ We discussed care team roles and learned more about how care teams work together
- ✓ We learned about the value of the extended & support teams
- ✓ Used our test patient Ms. Anexxa to have a practical conversation about activities that usually occur before the patient comes in for a doctor's office visit at Healthlincs Primary Care; and reviewed some key requirements on:
 - *Using data to continuously improve care delivery*
 - *Empanelment & Continuity*
 - *Risk Stratification (and Leveraging CRISP data)*
 - *Team huddles*

Post-survey

Questions:

After this session - on a scale of 1-5 how would you rate your knowledge on:

- 8. Interdisciplinary Teams/Care Team Roles
- 9. Team Huddles
- 10. Minimum data sets necessary for huddles
- 11. Empanelment
- 12. Risk Stratification

**** Call to Action: What is your readiness level to try applying this knowledge at your practice?**

Scale Key

- 1 = Fair
- 2 = Building
- 3 = Steady
- 4 = Strong
- 5 = Invincible

Primary Care Transformation Expert

Disclosure Statement

No disclosure directly related to this presentation

Phase II Overview:

During the Office Visit

	A	1. Check in: - Insurance/Copay etc. - Confirm address & contact info - Review of symptoms
	B	2. Rooming Call & Room Patient (Involves prepping room)
	C	3. Pre-Consult
		a. Check Vitals, Review of symptoms, & document health concerns
		b. Medication reconciliation ®
		c. BH Screening ® BHI
		d. AWW
		e. Signal patient is ready
	D	4. Consultation
		a. Examination Review & confirm risk tier ® Risk Stratification
		b. Discuss additional tests - Place/enter order if needed - A1C Test ® eCQM 3m – 6m Kidney profile (eGFR)
		c. Prescriptions (Medication Management) ® - Medical nutrition therapy (MNT) - Physical Activity/Exercise
	E	5. Post-Consult
		a. Patient education
		b. Place med orders
		c. Place non-med orders
		d. Clean room
	F	6. Check out

Session Objectives

Understand the following concepts applied during Phase II:

- ✓ Workflow: People, Process & Technology/Tools
- ✓ Interdisciplinary Teams/Care Team Roles
- ✓ Annual Wellness Visits (AWV) & EMR tools
- ✓ Other screening tools (Risk Assessment, PHQ, GAD 7, SBIRT)
- ✓ Data necessary for warm-hand offs (minimum data sets)
- ✓ Documentation best practices

Pre-survey

Questions:

On a scale of 1-5 how would you rate your knowledge on:

- 13. Interdisciplinary Teams/Care Team Roles
- 14. Annual Wellness Visits (AWV)
- 15. Screening tools
- 16. Data necessary for warm-hand offs (minimum data sets)
- 17. Documentation best practices & EMR tools

Scale Key

- 1 = Fair
- 2 = Building
- 3 = Steady
- 4 = Strong
- 5 = Invincible

Our Patient: Ms. Anexxa, 71-year old Medicare beneficiary.

Clinical Profile

- Type II Diabetes
- Long standing Hypertension (Last BP: 140/90 mmHg)
- CHF following a heart attack from 3 years prior
- Dependent on Opioid – which started after pain management for a hip fracture 4 years earlier
- Other Medications: Metformin 500 mg daily; Enalapril 30 mg/day PO qd; Aspirin 81 mg PO qd ; Lovastatin 40 mg PO qd
- Lifestyle modifications: Exercise - 30 mins moderate-intensity aerobic activity – 5d/week, Nutrition therapy (DASH diet)

Social Profile

- Retired widow who lives alone and her son lives 5 hours away & uses public transportation
- High school education; Worked as a kitchen staff in a school cafeteria; On fixed income
- She has no fresh food at home – due to her recent stay for 4 days in the hospital
- Experiences other care transition challenges such as: Off-road options, snapshot treatment, diminished ability and increased responsibility

Personality/Behavior Profile

Cost (Utilization)

- Short term hospital – \$27,000
- ER - \$7,500

Total ED & Hosp (last 6m) - \$34,500

Phase II, Step A: Check In Ms. Anexxa

Journey/ Workflow Phase	Process Steps (Clinician/Provider Journey)	Patient's Journey (Ms. Anexxa)	Owner (People)										Technology (Health IT Capabilities)	Resources
			PCP	RN	MA /LPN	OA	CHW	SW	OM	DA /IT	QI			
	1. Check in: - Insurance/Copay etc. - Confirm address & contact info - Review of symptoms	- Now that I am at the doctor's office, I feel - <u>comfortable</u> - Not sure why I have to fill out all this information; is anyone really looking at this information? - I wished the front desk staff are <u>not loud</u> when asking me to confirm my personal information			☒	☒						EMR – patient records – confirm insurance, copay, and address; with ability to update patient information	Check-in list	

Check-In

- ☒ Verify insurance
- ☒ Update contact information
- ☒ Accept co-pays
- ☒ Patient Rights, Consent to Treat & Disclosure Forms
- ☒ Update any pre-visit Questionnaire (e.g. AWW Forms)

Ms. Anexxa's experience captured here – shows that she feels comfortable coming for this visit but wishes that she did not need to verify her identification with other patients in the waiting room close enough to hear her reply

Phase II, Step B: Rooming Ms. Anexxa

Journey/ Workflow Phase	Process Steps (Clinician/Provider Journey)	Patient's Journey (Ms. Anexxxa)	Owner (People)									Technology (Health IT Capabilities)	Resources
			PCP	RN	MA /LPN	OA	CHW	SW	OM	DA /IT	QI		
	2. Rooming Call & Room Patient (Involves prepping room)	- I had a <u>short</u> wait time from the time I checked in to the time I was taken to the examination room - This exam room <u>looks clean & neat</u>		☒	☒								

Rooming

- ✓ Room Prepped to receive patient
- ✓ Patient physically ushered to the room
- ✓ Notify PCP that patient is ready to be seen
- ✓ Considerations for patient satisfaction
 - Wait time
 - Cleanliness of exam room

***Ms. Anexxa's experience** captured here – shows that she is happy about having a short wait time. The exam room also looks very clean!*

Phase II, Step C: Pre-Consult with Ms. Anexxa

Journey/ Workflow Phase	Process Steps (Clinician/Provider Journey)	Patient’s Journey (Ms. Anexxxa)	Owner (People)									Technology (Health IT Capabilities)	Resources
			PCP	RN	MA /LPN	OA	CHW	SW	OM	DA /IT	QI		
	3. Pre-Consult												
	a. Check Vitals, Review of symptoms, & document health concerns	- I wonder what my vitals will be today. - I am happy with my vitals today	☒	☒	☒							EMR – document in patient record	
	b. Medication reconciliation ®		☒	☒	☒							EMR – review & update patient’s record	
	c. BH Screening ® BHI		☒	☒	☒			☒				EMR – BH Screening form configured in EMR	BH Screening: PHQ2. PHQ9, GAD 7 (Sample template combining all 3)
	d. AWW		☒	☒	☒							EMR – AWW form configured in EMR	Patient’s last AWW information as a frame of reference
	e. Signal patient is ready	I had a short wait time from the time I was taken to the examination room to the time I saw my doctor			☒	☒							

- Ms. Anexxa vitals are checked and medication reconciliation done by MA (**Medication reconciliation**). Today's results show: **BP 140/90mmHg, Wgt: 196 pds, Hgt: 5ft 5 in**
- As part of her prep, a BH Screening is done since she is due to have one. PHQ2/9 is administered (**BHI**). She is also due for an AWW and the MA will finalize this shortly after the doctor's consult (**AWV**)

Ms. Anexxa's experience captured here – shows that she is happy to know what her vitals are today after being concerned for the past 2 days. She lost 5 pds. since her last visit.

Pre-Consult/Rooming

- ✓ Check Vitals
- ✓ Review of Symptoms (ROS)
- ✓ Patient Health Concerns
- ✓ Care Gaps (eCQMS)/Best Practice

Advisories (BPAs) EMR Alerts

- ✓ Medication Reconciliation
- ✓ Annual Wellness Visit Screen
- ✓ BH Screening

Phase II, Step D: Consult with Ms. Anexxa

Journey/ Workflow Phase	Process Steps (Clinician/Provider Journey)	Patient's Journey (Ms. Anexxa)	Owner (People)										Technology (Health IT Capabilities)	Resources
			PCP	RN	MA /LPN	OA	CHW	SW	OM	DA /IT	QI			
	4. Consultation													
	a. Examination - Discuss vitals (BP, Weight, Glucose etc.) - Review & confirm risk tier Ⓜ Risk Stratification	- My PCP & Care team <u>seem to be collaborating</u> well to provide me the best care; my PCP did not ask me <u>all</u> of the same questions the MA just asked me a few minutes ago & my CHW asked me last week - I wonder what the doctor will say about my vitals (and/or results) today	☒									EMR – Is smart-phrase enabled; auto populates all patients record to patient's entry/page ability to update patient's record	Risk Stratification Tool	
	b. Discuss additional tests - Place/enter order if needed - A1C Test Ⓜ <u>eCQM</u> 3m – 6m Kidney profile (eGFR)	- More tests? I hope I only need to go across the street and do not have to call and get scheduled for a later date. I'll need to plan for that as well - I'm <u>happy</u> these additional tests might help get to the bottom of my problems	☒									EMR – order entry capable		
	c. Prescriptions (Medication Management) Ⓜ - Medical nutrition therapy (MNT) - Physical Activity/Exercise	- I'd like my doctor to call my meds into my regular pharmacy - Maybe the doctor will give me some samples today	☒										EMR – Prescription history & Entry	

- Dr. Lincs can focus more of his time on medication management & discussing Ms. Anexxa's health concerns (**Medication management**). Also in examination and reviews with the patient, Dr. Lincs can apply his Clinical Judgement to adjust Ms. Anexxa's risk level (**Risk stratification**). Additional tests should also be ordered for Ms. Anexxa such as A1C & Kidney Profile (**eCQMs**) and other necessary referrals made

Ms. Anexxa's experience captured here – shows that she is happy with her meds being called in & additional tests will be done to further explore any other issues

Consult

- ✓ Warm-handoff
 - SBAR
- ✓ Review of pre-consult assessments
- ✓ Examination
- ✓ Confirm pre-visit risk stratification tier with **clinical judgment**
- ✓ Discuss additional tests
- ✓ **Care Gaps (eCQMs)/Best Practice Advisories (BPAs) EMR Alerts**
- ✓ Discuss **Medication Management**
- ✓ Address patient health concerns

The Patient Journey Phase II-Patient Care DURING the Visit

Warm-handoff Video

Annual Wellness Visits (AWV)

AWV is a yearly appointment with PCP to review the patient's wellness, and develop a personalized prevention plan; it expands to include emotional and psychological well-being, in addition to the patient's physical well-being.

Beneficiary attribution to a practice is generally determined:

- By **Annual Wellness Visits** and Welcome to Medicare Visits,
- and last by the plurality of eligible primary care visits within the 24-month lookback period.

Two CPT codes used to report AWV services are:

- G0438 initial visit
 - G0439 subsequent visit
- *The services provided during the AWV are different from a typical preventive care visit; & similar to but separate from the one-time Welcome to Medicare preventive visit.*

AWV (Contd.)

Health Care Professionals Who May Furnish and Bill AWV:

- Physician
- Physician assistant (PA)
- Nurse practitioner (NP)
- Clinical nurse specialist (CNS)
- Medical professional (including a health educator, registered dietitian or nutrition professional, or other licensed practitioner) or a team of medical professionals working under the direct supervision of a physician.

Implementing AWVs in Practices:

Step 1 – Establish program plan and identify eligible patients

Step 2 – Perform outreach and engagement

Step 3 – Perform AWV medical encounter & document in EMR

Step 4 – Complete appropriate and effective coding/billing

Learn more: [AWV Implementation Guide](#)

Breakout Discussion

AWV in your practice:

- *Who performs the AWW encounter?*
- *Is this configured in your EMR?*
- *How do you track when AWWs are due?*

Breakout Discussion

– BH Screening

■ Show of hands:

How many of you currently administer the BH Screening?

■ ***POLL: What screening tool do you use?***

Brief health screen
We ask all our adult patients about substance use and mood because these factors can affect your health. Please ask your doctor if you have any questions. Your answers on this form will remain confidential.

Patient name: _____
Date of birth: _____

Alcohol: One drink = 12 oz. beer 5 oz. wine 1.5 oz. liquor (one shot)

MEN: How many times in the past year have you had 5 or more drinks in a day? None ☐ 1 or more ☐

WOMEN: How many times in the past year have you had 4 or more drinks in a day? None ☐ 1 or more ☐

Alcohol screening questionnaire (AUDIT)
Our clinic asks all patients about alcohol use at least once a year. Drinking alcohol can affect your health and some medications you may take. Please help us provide you with the best medical care by answering the questions below.

Patient name: _____
Date of birth: _____

Drugs: Recreational drugs include inhalants (paint thinner, acetone), hallucinogens (LSD, mushrooms), and other drugs.

One drink equals: 12 oz. beer 5 oz. wine 1.5 oz. liquor (one shot)

1. How often do you have a drink containing alcohol?	Never	Monthly or less	2-4 times a month	2-3 times a week	4 or more times a week
2. How many drinks containing alcohol do you have on a typical day when you are drinking?	0-2	3 or 4	5 or 6	7-9	10 or more
3. How often do you have four or more drinks on one occasion?	Never	Less than monthly	Monthly	Weekly	Daily or almost daily

Drug Screening Questionnaire (DAST)
Using drugs can affect your health and some medications you may take. Please help us provide you with the best medical care by answering the questions below.

Patient name: _____
Date of birth: _____

☐ methamphetamines (speed, crystal) ☐ cocaine
☐ cannabis (marijuana, pot) ☐ narcotics (heroin, oxycodone, methadone, etc.)
☐ inhalants (paint thinner, aerosol, glue) ☐ hallucinogens (LSD, mushrooms)
☐ tranquilizers (valium) ☐ other _____

How often have you used these drugs? ☐ Monthly or less ☐ Weekly ☐ Daily or almost daily

1. Have you used drugs other than those required for medical reasons?	No	Yes
2. Do you abuse more than one drug at a time?	No	Yes
3. Are you unable to stop using drugs when you want to?	No	Yes
4. Have you ever had blackouts or flashbacks as a result of drug use?	No	Yes
5. Do you ever feel bad or guilty about your drug use?	No	Yes
6. Does your spouse (or parents) ever complain about your involvement with drugs?	No	Yes
7. Have you neglected your family because of your use of drugs?	No	Yes
8. Have you engaged in illegal activities in order to obtain drugs?	No	Yes
9. Have you ever experienced withdrawal symptoms (felt sick) when you stopped taking drugs?	No	Yes
10. Have you had medical problems as a result of your drug use (e.g. memory loss, hepatitis, convulsions, bleeding)?	No	Yes

0 1

Have you ever injected drugs? ☐ Never ☐ Yes, in the past 90 days ☐ Yes, more than 90 days ago

Have you ever been in treatment for substance abuse? ☐ Never ☐ Currently ☐ In the past

The Patient Journey Phase II - Patient Care DURING the Visit

Behavioral Health Hand-off Video

BH Screening – PDSA Example

QUESTION: How can we ensure universal BH screening of all patients?

Test of Change: Increase the number of Behavioral Health Screenings performed.

Plan: 1) Develop a workplan 2) Train MA staff to perform BH screenings 3) Document screening results in EMR for care team to access

Do: MA performs BH screening and documents

Study: 1) The percentage of empaneled patients who received an annual BH screening
2) The percentage of BH screenings performed that were positive.

Act: Universal BH screenings will be performed by MA staff during patient visits. This will give providers enough information and time to perform a brief intervention and refer to treatment.

Phase III, Step E: Post-Consult with Ms. Anexxa

Journey/ Workflow Phase	Process Steps (Clinician/Provider Journey)	Patient's Journey (Ms. Anexxa)	Owner (People)									Technology (Health IT Capabilities)	Resources
			PCP	RN	MA /LPN	OA	CHW	SW	OM	DA /IT	QI		
	5. Post-Consult												
	a. Patient education	I told the doctor everything on my mind related to my symptoms and situation		☒	☒								
	b. Place med orders	I'd like my meds called into my regular pharmacy	☒	☒	☒							EMR - e-prescription capable	
	c. Place non-med orders	I'm happy someone is helping me coordinate this		☒	☒							EMR – non-med orders entry (and/or list of preferred referral sources)	
	d. Clean room	This exam room looks clean & neat		☒	☒								
	6. Check out	My check out process was seamless			☒	☒							

Post Consult

- ☒ Patient Education
- ☒ Prescriptions
- ☒ Referrals and Consults
- ☒ Lab work
- ☒ Follow-up
- ☒ Prepare room for next patient

Ms. Anexxa's experience captured here – shows that she is happy with being able to discuss all her concerns with Dr. Lincs and having a care coordinator help her with understanding next steps

Check Out

- ☑ Schedule next appointment
- ☑ Scripted
- ☑ Reinforce/confirm patient understanding and knowledge of visit
- ☑ Coordinate referrals
- ☑ Solicit questions
- ☑ Close the communication loop

Session Recap

- ☑ Used our test patient Ms. Anexxa to have a practical conversation about activities that usually occur during the patient's office visit; and reviewed requirements on:
 - *Medication Reconciliation & Medication Management*
 - *eCQMs*
 - *Using data to continuously improve care delivery*
 - *BH Screening*

- ☑ Reviewed performing AWW

- ☑ Care team warm handoffs and Ms. Anexxa's care delivery experience

Post-survey

Questions:

After this session - On a scale of 1-5 how would you rate your knowledge on:

- 13. Interdisciplinary Teams/Care Team Roles
- 14. Annual Wellness Visits (AWV)
- 15. Screening tools
- 16. Data necessary for warm-hand offs (minimum data sets)
- 17. Documentation best practices & EMR tools

**** Call to Action: What is your readiness level to try applying this knowledge at your practice?**

Phase III Overview:

After the Office Visit

A	▪ Longitudinal Care Management F/U ®: ○ Education on Drug-induced hypoglycemia
B	▪ Episodic Care Management F/U Patient outreach & follow up ®
	a. CRISP ENS Report Review (ED visit & Hosp Discharge) b. Outreach & PCP f/u Appointment scheduling c. Medication Reconciliation d. Referral F/U support
C	▪ Social Needs support ®
D	▪ BH Needs support ®
 E	▪ Off-Office hours access ® 24/7 Access: for patients to care team & for providers to EMR
 F	▪ **Post visit data reviews (population & individual data/reports)
G	▪ PFAC ®

Session Objectives

Understand the following concepts applied during Phase III:

- ✓ Workflow: People, Process & Technology/Tools
- ✓ Interdisciplinary Teams/Care Team Roles
- ✓ Longitudinal Care Management (LCM)
- ✓ Care Plan Basics
- ✓ Episodic/Transitional Care Management (ECM/TCM)

Pre-survey

Questions:

On a scale of 1-5 how would you rate your knowledge on:

- 18. Workflow: People, Process & Technology/Tools
- 19. Longitudinal Care Management (LCM)
- 20. Care Plan Basics
- 21. Episodic/Transitional Care Management (ECM/TCM)
- 22. Alternative care visits

Scale Key

- 1 = Fair
- 2 = Building
- 3 = Steady
- 4 = Strong
- 5 = Invincible

Our Patient: Ms. Anexxa, 71-year old Medicare beneficiary.

Clinical Profile

- Type II Diabetes
- Long standing Hypertension (Last BP: 140/90 mmHg)
- CHF following a heart attack from 3 years prior
- Dependent on Opioid – which started after pain management for a hip fracture 4 years earlier
- Other Medications: Metformin 500 mg daily; Enalapril 30 mg/day PO qd; Aspirin 81 mg PO qd ; Lovastatin 40 mg PO qd
- Lifestyle modifications: Exercise - 30 mins moderate-intensity aerobic activity – 5d/week, Nutrition therapy (DASH diet)

Social Profile

- Retired widow who lives alone and her son lives 5 hours away & uses public transportation
- High school education; Worked as a kitchen staff in a school cafeteria; On fixed income
- She has no fresh food at home – due to her recent stay for 4 days in the hospital
- Experiences other care transition challenges such as: Off-road options, snapshot treatment, diminished ability and increased responsibility

Personality/Behavior Profile

- She is an extrovert, usually lively, a “people person” and does not like to be alone
- Enjoys attending group meetings when she can (e.g. Diabetes group)
- Does not exercise much and tries to maintain good eating habit
- She engages well with her peers and encourages them through life challenges

Utilization Profile (last 6m)

- 5 ED visits
- 2 Hospitalizations
- Most recent hospitalization after being treated for uncontrolled CHF & unaware of 2 of the 3 new prescriptions b/c they were electronically sent to the pharmacy

Cost (Utilization)

- Short term hospital – \$27,000
- ER - \$7,500

Total ED & Hosp (last 6m) - \$34,500

Phase III: Longitudinal & Episodic Care Management

Journey/ Workflow Phase	Process Steps (Clinician/Provider Journey)	Patient's Journey (Ms. Anexxxa)	Owner (People)									Technology (Health IT Capabilities)	Resources
			PCP	RN	MA /LPN	OA	CHW	SW	OM	DA /IT	QI		
	- Longitudinal Care Management F/U 📄: - Education on Drug-induced hypoglycemia	My Care Manager calls me every week to see how well I'm doing and educates me on ways to better manage my illness (DM, HTN, etc.)	☒	☒	☒		☒					EMR – CM module with CM Assessment, Care plan & documentation capability	Sample of Care plan & Assessment
	Episodic Care Management F/U Patient outreach & follow up 📄												
	a. CRISP ENS Report Review (ED visit & Hosp Discharge)			☒	☒					☒	☒	- EMR – notifications - Care Alerts	
	b. Outreach & PCP f/u Appointment scheduling	My doctor's office called me to know how I'm doing after my ED visit (or recent hospital discharge)		☒	☒		☒					- EMR Scheduling Application (real-time updating) - Automated (reminder) calling system	
	c. Medication Reconciliation	My Care Manager helped me confirm which medications I should continue taking or stop taking after my recent hospital (or ED) visit		☒								EMR – review & update patient's record	
	d. Referral F/U support	My Care Manager helped me coordinate my referrals for follow up. They helped me with scheduling visits with the specialists		☒	☒							- EMR – capability to export and import patient's data - Capability to view patient's data on other EHR platform	List of preferred specialists
	Social Needs support 📄	- My Community Health Specialist helped me schedule transportation for my upcoming visits. - She also helped me with filling out a housing application for better accommodation			☒		☒					EMR – CM module - with Social determinant Assessment, Intervention plan & documentation capability	Sample of Intervention plan & Assessment
	BH Needs support 📄	I was happy to see my therapist shortly to discuss my symptoms of depression from dealing with my illness						☒				EMR – to review & update patient's record	

Referrals & Consults

Ensure referral management for attributed patients seeking care from high-volume and/or high-cost specialists; as well as ED and Hospitals

- ✓ **Care Manager (Care Coordinator)**
(Longitudinal care management for rising risk/high-risk needs, transition need)
- ✓ **Community Health Worker** (SDOH needs)
- ✓ **Pharmacist**
(medication adherence)
- ✓ **Social Worker**
(psychosocial needs)
- ✓ **BH Specialist**
(mental health needs)
- ✓ **Health Coach/Educator**
(education, self-management needs)
- ✓ **Provider Specialist**
(medical needs)

Phase III: Longitudinal & Episodic Care Management

Ms. Anexxa's Experience

My Care Manager calls me every week to see how well I'm doing and educates me on ways to better manage my illness (DM, HTN, etc.)

My doctor's office called me to know how I'm doing after my ED visit (or recent hospital discharge)

My Care Manager helped me confirm which medications I should continue taking or stop taking after my recent hospital (or ED) visit

My Care Manager helped me coordinate my referrals for follow up. They helped me with scheduling visits with the specialists

LCM vs. ECM

Care Plan Guidelines

QR
CTO/Coach Support

- Use Evidence-based guidelines
- Document Care plan and follow up care in EMR

Ms. Anexxa's Individualized Care Plan Example

Problem: Medication Management and Compliance

Goal #1 (Care Management Goal): Ms. Anexxa will receive medication education and counseling at her next office visit.

Intervention: The practice pharmacist will meet with Ms. Anexxa at next office visit.

Outcome: Ms. Anexxa will need on-going medication follow-up to ensure she is compliant with her medications

Action: Ongoing

Goal #2 (Self-Management Goal): Ms. Anexxa will take her medications as prescribed everyday for a week.

Intervention: Ms. Anexxa will receive an electronic reminder medication pillbox that will send a daily report to Care Team.

Outcome: Ms. Anexxa took all her medication as prescribed for the week.

Action: Goal Complete

Breakout Discussion

*Share Experience with
Care Management & Care
Plan*

Episodic Care Management

Approach

- ✓ Identification:
 - *ED & Hosp Discharge (**CRISP ENS Alerts**)*
 - *New Diagnosis/Crisis/Instability/Practitioner or care team referral/SNF admission or discharge/Life event*
- ✓ Outreach
 - *ED: 1 week post discharge*
 - *Hosp: 2 days post discharge*
- ✓ Medication Reconciliation/Management
- ✓ Coordinate PCP follow-up appointments
 - *Preferably 7-14 days post-discharge*
- ✓ Follow-up/Monitor
- ✓ Transition

Phase III: 24/7 Access & Data Reviews

Journey/ Workflow Phase	Process Steps (Clinician/Provider Journey)	Patient's Journey (Ms. Anexxa)	Owner (People)									Technology (Health IT Capabilities)	Resources
			PCP	RN	MA /LPN	OA	CHW	SW	OM	DA /IT	QI		
	Off-Office hours access ® 24/7 Access: for patients to care team & for providers to EMR	I was able to speak with a provider after office hours when I needed to last week – that saved me a visit to the ED	☒	☒	☒							EMR – review & update patient's record (Remote access)	On-call Plan & EMR Access (Limited/Full)
	4. **Post visit data reviews (population & individual data/reports)		☒	☒	☒		☒			☒	☒	EMR Reports (CM/CHW) Excel Reports (CM/CHW) CRISP Reports	Sample EMR Report
	5. PFAC ®	I was happy to be part of my doctor's office PFAC and give feedback on how my care is delivered		☒	☒		☒						Sample PFAC Structure/Meeting Agenda

24/7 Access

✓ Patients to connect to Care Team
&

✓ Care Team to connect to EMR

QR
CTO/Coach Support

- ✓ Same-day, Next-day access
- ✓ Telephone advice on clinical issues
 - ✓ After-Hours Service
- ✓ Direct Messaging through Patient Portal
 - ✓ Secure/encrypted email
 - ✓ On-Call Scheduling
 - ✓ Remote Access to EMR

I was able to speak with a provider last week after office hours when I needed to – that saved me a visit to the ED

24/7 Access & Alternative Care Visits

Know your “Why”

- ✓ Provider 24/7 EHR Access, streamlines communication between care team members and patients ... & saves costs
- ✓ Reduces patient wait times
- ✓ Effectively meet patients' needs & Increases patient satisfaction
- ✓ Potentially reduces ED visits, IP admission & associated costs
- ✓ Can improve preventive & chronic care with focus on self-management

Alternative Care Visits

Alternative care refers to care delivered outside of traditional office visits with clinicians.

Examples:

- ☐ telemedicine/video-based consults
- ☐ telephone visits/e-visits
- ☐ group visits
- ☐ visits in alternative locations
- ☐ telehealth: self-management education programs
- ☐ home visits

QR
CTO/Coach Support

A SAMPLE GROUP VISIT DAY

- 10-15 individual visits
 - Earlier in the day
 - Business as usual
- Group visit
 - 4:30-6:00 pm
 - 10-16 patients
 - Vitals taken
 - Visit forms given to patient
 - 30 minute lecture
 - 60 minute interactive Q&A
 - Face-to-face encounter
 - Targeted physical exam
 - Check-out
 - Staff follow-up

Use of Alternative care: To focus on **preventive care and self-management** to help patients maintain and improve their health

Group Visit – PDSA Example

QUESTION: How can improve access to medical care visits for diabetic patients using group visits?

Test of Change: *Establish diabetic group visits*

Plan: 1) Identify practice staff/team 2) Identify space/capacity 3) Provider/staff training on group facilitation 4) Choose appropriate group structure/appropriate patients 5) Develop structure & content of the session 6) Draft group visit invitation

Do: Invite patients & Conduct Group visit (See next slide)

Study: 1) Number of patients who attended
2) Variation between planned vs. actual timeframe for group visit
3) Any key issues noted with the group-visit format

Act: Make adjustments to the group-visit format and conduct another test of change cycle

Group Visit – PDSA Example

Do: Conduct Group visit (1.5 – 2 hrs.)

- ✓ Prior to the group visit, nursing staff typically spend about two hours of preparation time, reviewing and documenting medical records as well as completing forms for diagnostic tests and lab work.
- ✓ Group visits generally begin with a brief check-in and greeting period. During this time, the administrative staff registers patients, collects co-payments, etc.
- ✓ General discussion of the diabetes, focusing on common problems among attendees (approximately 30 minutes). Patients are seated in a circle or semicircle to promote interaction and are encouraged but not required to share their personal information and experiences.
- ✓ Following the discussion, the group takes a break, often with refreshments
- ✓ During the break, a nurse or medical assistant completes vital signs and the physician confers with each patient individually – yet still in the group setting – about specific health problems. (This could take 25 to 35 minutes for a group of 8 to 10.)
- ✓ Followed by a question-and-answer period (approximately 15 minutes).
- ✓ Finally, if needed, physicians conduct private one-on-one visits, usually with just two to three patients (30 to 45 minutes).
- ✓ Physicians may spend about an hour after the group visit to document findings

Breakout Discussion

1. POLL: Where are you with implementing a process for LCM & ECM?

- *Developing a process*
- *Implementing a process*

PolleEv.com/medicalincls683  Text **MEDICALINCS683** to **22333** once to join

2. Of those who are already implementing a process what challenges do you have?

Share experience with alternative visit types in your practices

Using Data to Plan Care

Know your “Why”

- ✓ Using data available through CRISP and your EHR **is critical** to developing the workflows and analytics needed to guide changes that will reduce patient care utilization and improve quality & patient experience
- ✓ Tracking eCQMs has helped practices more **efficiently organize care and resources** around condition-specific needs

Using Data to Plan Care

Quality | Utilization | Patient experience | eCQMs

- ☑ Identify the crucial measures and data
- ☑ Develop processes to regularly collect data
 - CRISP: CMS claims data – include data on:
 - i. *Attributed beneficiaries*
 - ii. *Costs and IP & ED utilization*
 - iii. *Practice trends*
 - Your Internal practice or system data: Practice & Panel level data
 - i. *Interim eCQMs measures*
 - ii. *Assess continuity and Care coordination*
 - iii. *PFAC information*
- ☑ Establish an internal process to regularly review measures & performance as a team

Using Data to Plan Care for your Patient Population

Achieving Population Health
Through Team Based Care

**Care Team Meeting
Focused on Population Health**

bellinhealth

Breakout Discussion

Respond in groups to the questions

PollEv.com/medicalincs683

- *What did they begin the meeting with?*
 - *Roll Call*
 - *Voice of the patient*
 - *Quality Measures*
- *Was the extended care team involved? [Y/N]*
- *What type of alternative visit was discussed?*
 - *Telehealth*
 - *Inpatient Visits*
 - *Home Visits*
- *Was Advanced Care Planning discussed in the video? [Y/N]*
- *What is the best evidence-based tool to introduce a new care team member to a patient?*
 - *Handoff*
 - *Huddle*
 - *Consultation*

Session Recap

- ✓ Used our test patient Ms. Anexxa to have a practical conversation about activities that usually occur after the patient's office visit; and reviewed requirements on:
 - *Longitudinal Care Management*
 - *Care Plans*
 - *Referral Management*
 - *Episodic Care Management*
 - *Follow up to ED & Hospital discharge*
 - *Using data to continuously improve care delivery (esp. CRISP ENS)*
 - *Alternative care visits*
 - *Using data to plan for care for your patient population*

- ✓ Ms. Anexxa's experience with her care management services

LCM vs. ECM

Post-survey

Questions:

After this session, on a scale of 1-5 how would you rate your knowledge on:

- 18. Workflow: People, Process & Technology/Tools
- 19. Longitudinal Care Management (LCM)
- 20. Care Plan Basics
- 21. Episodic/Transitional Care Management (ECM/TCM)
- 22. Alternative care visits

**** Call to Action: What is your readiness level to try applying this knowledge at your practice?**

Scale Key

- 1 = Fair
- 2 = Building
- 3 = Steady
- 4 = Strong
- 5 = Invincible

Using CRISP Service & Leveraging Claims Reports

HIE Services for MDPCP Participants

Summer 2019

7160 Columbia Gateway Drive, Suite 100
Columbia, MD 21046
877.952.7477 | info@crisphealth.org
www.crisphealth.org

Questions:

On a scale of 1-5 how would you rate your knowledge on:

23. Using CRISP services and leveraging claims reports

Scale Key

- 1 = Fair
- 2 = Building
- 3 = Steady
- 4 = Strong
- 5 = Invincible

Disclosure Announcement

No disclosure related to this presentation

Agenda

1. Brief Overview of CRISP services and role for MDPCP
2. Care alerts and panel management
3. eCQM reporting
4. Using reports to identify target areas
5. Upcoming releases and discussion

CRISP

Services Overview

About CRISP

Regional Health Information Exchange (HIE) serving Maryland, West Virginia, and the District of Columbia.

Vision: To advance health and wellness by deploying health information technology solutions adopted through cooperation and collaboration

Guiding Principles

1. Begin with a manageable scope and remain incremental.
2. Create opportunities to cooperate even while participating healthcare organizations still compete in other ways.
3. Affirm that competition and market-mechanisms spur innovation and improvement.
4. Promote and enable consumers' control over their own health information.
5. Use best practices and standards.
6. Serve our region's entire healthcare community.

CRISP Core Services

1. POINT OF CARE: Clinical Query Portal & In-context Information

- Search for your patients' prior hospital records (e.g., labs, radiology reports, etc.)
- Monitor the prescribing and dispensing of PDMP drugs
- Determine other members of your patient's care team
- Be alerted to important conditions or treatment information

2. CARE COORDINATION: Encounter Notification Service (ENS)

- Be notified when your patient is hospitalized in any regional hospital
- Receive special notification about ED visits that are potential readmissions
- Know when your MCO member is in the ED

3. POPULATION HEALTH: CRISP Reporting Services (CRS)

- Use Case Mix data and Medicare claims data to:
 - Identify patients who could benefit from services
 - Measure performance of initiatives for QI and program reporting
 - Coordinate with peers on behalf of patients who see multiple providers

4. PUBLIC HEALTH SUPPORT:

- Deploying services in partnership with Maryland Department of Health
- Pursuing projects with the District of Columbia Department of Health Care Finance
- Supporting West Virginia priorities through the WVHIN

5. PROGRAM ADMINISTRATION:

- Making policy discussions more transparent and informed
- Supporting Care Redesign Programs

CRISP Support for MDPCP

CRISP has committed to support MDPCP in the following three ways:

1. CRISP will enable certain HIE tools which participating practices must use to facilitate better care coordination.
2. CRISP will provide claims-based reports to each participating practice for tracking progress and providing interventions.
3. CRISP will aggregate the quality measure submissions from participating practices to submit to CMS.

Point of Care: Unified Landing Page & Snapshot

All CRISP applications in a single, secure site with one username and password

- Snapshot: View of critical patient data including care alerts, care teams, and prior visits with customizable widgets
- PDMP (authorized users only per State mandate)
- Health Records: Labs, radiology, images, and other clinical documents

The screenshot displays the CRISP Patient Snapshot interface. At the top, the CRISP logo and navigation links (HOME, PDMP, QUERY PORTAL WIDGET, QUERY PORTAL, PATIENT SNAPSHOT, PROMPT, PANEL MANAGEMENT APPLICATION) are visible. The user is logged in as CRAIG BEHN. The main header shows the patient's name, GILBERT GRAPE, and his demographic information: Gender: Male, D.O.B.: 01-01-1984. The interface is divided into several sections:

- Patient Demographics:** Displays patient information including name, address, gender, date of birth, and contact details.
- Clinical Documents:** A table listing clinical documents with columns for Date, Description, and Source. The table shows several entries for "Summary of Care" from Meritus, dated from 09/04/2018 to 08/20/2018.
- Care Alerts:** A section for displaying care alerts, with columns for Date, Source, and Description.
- Encounters From ADT:** A section showing patient encounters. It includes a legend for Emergency (red triangle), Inpatient (orange square), and Outpatient (blue circle). A calendar view shows encounters in August 2018. Below the calendar, a table lists encounters with columns for Event Source Name, Event Type, and Date. The table shows two encounters: "Meritus Medical Center" for "Outpatient Registration" on 08/20/2018, and "Test - Solarwinds" for "Outpatient Appointment check-in" on 08/15/2018.

Care Coordination: ENS ProMPT

- Real-time or batch alerts to appropriate providers based on treatment and care management relationships
- User interface within CRISP secure portal or messages delivered into Direct or EHRs

The screenshot displays the ENS ProMPT interface, which is used for the proactive management of patient transitions. The interface is divided into several sections:

- Header:** Includes the ENS logo, "Encounter Notification Service", and the PROMPT logo, "Proactive Management of Patient Transitions". A search bar is present with the text "Filter by Name or MRN".
- Filters:** A dropdown menu shows "CHF Program", and there is an "Add Filters" button.
- Patient List:** A list of patients is shown, each with a name, ID, and status icons. The patients listed are:
 - DEBORAH REILLY (018687697)
 - IRENE KEMP (948752605)
 - JODIE LUTZ (423091650)
 - MARTY QUINN (406996551)
 - DARRICK ALVAREZ (321311855)
- Patient Detail View (MARTY QUINN):** This section provides detailed information for the selected patient:
 - Phone:** 003-331-7142
 - DOB:** 1/28/68
 - Address:** 904 South White Fabien Boulevard
 - City/State:** Glendale, WV
 - Race:** White
 - Ethnicity:** Not Hispanic or Latino
 - PCP:** Xavier Newman
 - NPI:** 1939129716
 - ACO:** CHF Program
- Most Recent Event:** A summary of the latest event:
 - Event Date:** 7/20/16 1:22 PM
 - Event Type:** IP Discharge
 - Event Location:** Toronto General Hospital
 - Practice Location:** Chevy Chase
 - Hospital Service:** Diagnosis
 - Patient Diagnosis:** NIB19 LT LEG PAIN/FOOTBALL
 - Discharge Disposition:** Discharged/transferred to an intermediate care facility ICF
 - Discharge to Location:** Hospital
 - Patient Complaint:** PAP5 Stomach Pain
 - Admit Source:** Transfer from a hospital
- Status Log:** A section for tracking patient status changes.
- Event History:** A table showing a list of events with columns for date, time, diagnosis, complaint, location, and event type.

Date	Time	Diagnosis	Complaint	Location	Event Type
5/29/16	9:50 PM	DUB348LOW B/P	BAPHEAD INJ	Toronto Western Hospital	ER Discharge
5/20/16	5:01 AM	BEG19170LOW B/P	TAH2793Stomach Pain	Shouldice Hospital	ER Registration

CRISP

Care Alerts

Point of Care: Care Alerts

- Care Alert: a short description of critical information for patient care generated by CRISP participants.
- Viewable in the ULP and in CRISP embedded Apps

“Mr. Stevens has CHF exacerbations that typically and rapidly respond to 40 mg IV furosemide in the ED with close follow up the next day in the office. Call/text Dr. FIRST at 111-333-4444 if you are considering admission.”

“This patient has a MOLST. Please note: DNR, DNI, no feeding tube, no antibiotics.”

“Mrs. Franklin’s pain medications are managed entirely by Dr. Dolor. Securely text him prior to prescribing any controlled substances.”

How to write a Care Alert

- **Identify high needs patients** for whom you want to relay critical information to other providers
- Decide on a **workflow** for authorship and hygiene
 - Can be a group of folks, or anyone treating the patient
 - Decide how you will update/remove care alerts (workgroup, quarterly review, etc.)
- Decide on a general **format**
- **Inform CRISP** when you are ready to send alerts

CRISP has guidance available: White Paper and 5x7 card for quick reference, created in partnership with the Maryland Patient Safety Center

<https://www.crisphealth.org/wp-content/uploads/2016/03/Care-Alerts-White-Paper-MPSC-final.pdf>

CRISP is also happy to provide in person training/guidance on care alert implementation

How to submit Care Alerts to CRISP

- Several options:
 - Send on your existing patient panel by adding a “Care Alert” column
 - Send a separate panel of only care alerts to CRISP
 - If integrated with CRISP, identify an area of your progress notes, or choose a note type or template within your EMR to write care alerts, and work with CRISP + your EMR to configure data feeds to send those note types

Once you determine how you want to submit care alerts, please contact your CRISP representative so that we can allot the necessary resources to implement

Panel Management

- In addition to care alerts, it is vital to share as much information about your patients as possible
- By adding PCP, Care Manager (+phone or email), Care Program, and Insurance columns to your patient panel, you gain the following benefits:
 - These fields will be sent back to you in **ENS notifications**, allowing for more robust filtering and tracking (i.e. Do patients attributed to a specific care manager tend to have higher utilization rates?)
 - Fields will be available in the Care Team widget of the Patient Snapshot application so that other providers can easily see and obtain contact information, facilitating more **effective communication**

How to implement panel changes

- Add columns corresponding to the fields you wish to add, and populate for the appropriate patients
- If integrated, work with your EMR and CRISP to identify how these fields can be incorporated into the data messages that CRISP receives

Once you have made these changes, inform your CRISP representative, so that we can confirm accurate processing of any new configurations

CRISP

eCQM Reporting

eCQM Reporting

- Participants will extract quality measures from their EHRs either in QRDA III format or a list of numerators, denominators, and exclusions
- Log into CALIPR through CRISP to either upload QRDA III or manually enter values
- CRISP will submit a single file on behalf of Maryland to CMS at the close of the reporting period

CALIPR | CQM Aligned Population Reporting

What do you want to do?

[Import Data](#) [Enter Data](#) [Calculate CQMs](#) [View Calculations](#)

About CALIPR v2.06
CALIPR is designed to calculate electronic clinical quality measures (eCQMs) at a provider, practice, payment arrangement, and community level to support incentive and value-based payment programs.

About CRISP
CRISP is a regional health information exchange (HIE) serving Maryland and the District of Columbia. We are a non-profit organization advised by a wide range of stakeholders who are responsible for healthcare throughout the region. CRISP has been formally designated as Maryland's statewide health information exchange by the Maryland Health Care Commission.

- ☐ CMS117v7 Childhood Immunization Status
- ☒ **CMS122v7 Diabetes: Hemoglobin A1c (HbA1c) Poor Control...**
- ☐ CMS124v7 Cervical Cancer Screening
- ☐ CMS125v7 Breast Cancer Screening
- ☐ CMS127v7 Pneumococcal Vaccination Status for Older Adults

Enter Data for this Measure:

CMS122v7 - Diabetes: Hemoglobin A1c (HbA1c) Poor Control (>9%)

Guidance
Patient is numerator compliant if most recent HbA1c level >9%, the most recent HbA1c result is missing, or if there are no HbA1c tests performed and results documented during the measurement period. If the HbA1c test result is in the medical record, the test can be used to determine numerator compliance. Only patients with a diagnosis of Type 1 or Type 2 diabetes should be included in the denominator of this measure; patients with a diagnosis of secondary diabetes due to another condition should not be included.

CRISP

Using Reports to Identify High-Cost Providers

Population Health: CRISP Reporting Services

- Dashboards from administrative data to support high-needs patient identification, care coordination, and progress reporting
- Primary data sets are hospital casemix and Medicare claims and claim line feed (CCLF)
- Different levels of patient data available for hospitals based on HSCRC payment requirements and Total Cost of Care Model participation
- There are over **600 active users** viewing **85 reports** over **2,000 times per month**

MDPCP Reports

Reports include:

- Population Summary (Summary Dashboard)
- Base vs Current Year Comparison
- Demographics
- PMPM Trend
- Diagnosis Report (by CCS Category)
- Inpatient / ER Utilization
- Professional Services (BETOS / POS)

Key Metrics

- Distribution by Beneficiaries by Demographic Categories
- PMPM Spending
- Count of Inpatient Admissions / ER Visits
- Inpatient Admissions / ER Visits per 1,000
- Readmission Rate

Drill-through capability to access beneficiary lists and claims

MDPCP Report General Features

- View data for one or more CTO / Practice at a time
- Customize reports by Risk Tier, State Comparison, and Date filters
- View or download User Guide
- Export to PDF or Excel
- Access patient and claim-level details for export

The screenshot displays the MDPCP Reports User Guide interface. At the top, there are navigation links: "MDPCP Reports User Guide", "User Info", and "Log Out". Below these, a banner reads "Connecting Providers with Technology to Improve Patient Care". The main section contains filters for "CTO:" (with a dropdown menu), "Practice:" (with a dropdown menu), and an "Apply" button. Below the filters, there are fields for "Tier" (set to "(All)"), "State - Comparison" (set to "State - MDPCP"), "Service Start Month" (set to "12/1/2015"), and "Service End Month" (set to "10/1/2018"). A red text note states "Time period presented includes lag." At the bottom right, there are "Print" and "Excel" buttons.

Population Summary

PMPM Trend

PMPM Trend

Practice: **Pratt & Whitney - Comprehensive Primary Care - Birmingham**
CTO: **11000079 - One Health Quality CTR**

Claims available through 11/30/2018.

CCLF data after 8/31/2018 is considered incomplete due to lag.

Tier: **(All)** Service Start Date: **12/1/2015** Service End Date: **8/1/2018**

PMPM by Claim Type

PMPM by Part A/B

CRISP

New Features

Upcoming Releases

- Health Records application (right): new view of labs, radiology reports/images, and documents; replacing Mirth Results
- Migrating PROMPT into ULP to eliminate separate logins
- Enhancing ENS to allow for smarter alerting
- Report development for additional views and drill downs

The screenshot displays the CRISP Health Records application for a patient named Grape, Gilbert. The interface includes a navigation bar with links to HOME, PATIENT CARE SNAPSHOT, QUERY PORTAL, CALIPR, PROMPT, HEALTH RECORDS (active), and PDMP. The patient's name and ID are shown at the top. Below the navigation bar, there are tabs for Laboratory, Radiology, and Transcriptions. The main content area is divided into two sections: a list of lab results on the left and a detailed view of a specific lab result on the right.

MD, MPH, MBA, MSPM, CCMP

Chief Executive Officer, Medicalincs
Primary Care Transformation Expert

Disclosure Statement

No disclosure directly related to this presentation

Session Objectives

- ☑ Understand what patient self- management looks like
- ☑ Know available and relevant tools to assist patients with self-management & maintaining a resource registry
- ☑ Know tools for patient engagement and assessment such as PAM
- ☑ Understand Advanced Care Planning

Pre-survey

Questions:

On a scale of 1-5 how would you rate your knowledge on:

- 24. Self-management
- 25. Tools to assist with self-management
- 26. Patient engagement & assessment tools
- 27. Advanced Care Planning

Scale Key

- 1 = Fair
- 2 = Building
- 3 = Steady
- 4 = Strong
- 5 = Invincible

Our Patient: Ms. Anexxa, 71-year old Medicare beneficiary.

Clinical Profile

- Type II Diabetes
- Long standing Hypertension (Last BP: 140/90 mmHg)
- CHF following a heart attack from 3 years prior
- Dependent on Opioid – which started after pain management for a hip fracture 4 years earlier
- Other Medications: Metformin 500 mg daily; Enalapril 30 mg/day PO qd; Aspirin 81 mg PO qd ; Lovastatin 40 mg PO qd
- Lifestyle modifications: Exercise - 30 mins moderate-intensity aerobic activity – 5d/week, Nutrition therapy (DASH diet)

Social Profile

- Retired widow who lives alone and her son lives 5 hours away & uses public transportation
- High school education; Worked as a kitchen staff in a school cafeteria; On fixed income
- She has no fresh food at home – due to her recent stay for 4 days in the hospital
- Experiences other care transition challenges such as: Off-road options, snapshot treatment, diminished ability and increased responsibility

Personality/Behavior Profile

- She is an extrovert, usually lively, a “people person” and does not like to be alone
- Enjoys attending group meetings when she can (e.g. Diabetes group)
- Does not exercise much and tries to maintain good eating habit
- She engages well with her peers and encourages them through life challenges

Utilization Profile (last 6m)

- 5 ED visits
- 2 Hospitalizations
- Most recent hospitalization after being treated for uncontrolled CHF & unaware of 2 of the 3 new prescriptions b/c they were electronically sent to the pharmacy

Cost (Utilization)

- Short term hospital – \$27,000
- ER - \$7,500

Total ED & Hosp (last 6m) - \$34,500

Self- Management Support (SMS)

SMS is a key **role of the Care Manager** is to provide self-management support & follow up on the patient's care management

- ❖ Self-management support (SMS) gives your patients with chronic conditions tools to manage their health on a day-to-day basis and take an active role in their health care.
- ❖ SMS goes beyond supplying patients with information. It develops patient confidence by **allowing patients to collaborate with the care team to set goals**, regularly assess progress, provide problem-solving support, and make plans to live a healthier life.

QR
CTO/Coach Support

Self- Management Support (SMS)

Approach

- A. Incorporate evidence-based approaches to promote collaborative self-management into usual care using techniques, such as:
 - ☐ *Goal-setting with structured follow-up*
 - ☐ *Teach-Back*
 - ☐ *Action planning, and*
 - ☐ *Motivational interviewing*

- B. Use tools to assist patients in assessing their need for and receptivity to SMS (e.g., the **Patient Activation Measure (PAM)**, How's MyHealth)

PAM

The Patient Activation Measure (PAM) assesses an individual's knowledge, skill, and confidence for managing one's health and healthcare ... Each activation level reveals insight into an array of health-related characteristics, including attitudes, motivators, behaviors, and outcomes.

QR
CTO/Coach Support

PAM® ACTIVATION LEVELS

Level 1	Level 2	Level 3	Level 4
DISENGAGED AND OVERWHELMED	BECOMING AWARE BUT STILL STRUGGLING	TAKING ACTION AND GAINING CONTROL	MAINTAINING BEHAVIORS AND PUSHING FURTHER
<i>"My doctor is in charge of my health."</i>	<i>"I could be doing more for my health."</i>	<i>"I'm part of my health care team."</i>	<i>"I'm my own health advocate."</i>
Individuals are passive and lack confidence. Knowledge is low, goal-orientation is weak, and adherence is poor.	Individuals have some knowledge, but large gaps remain. They believe health is largely out of their control, but can set simple goals.	Individuals have the key facts and are building self-management skills. They strive for best practice behaviors, and are goal-oriented.	Individuals have adopted new behaviors, but may struggle in times of stress or change. Maintaining a healthy lifestyle is a key focus.
<u>Healthcare utilization:</u> Very high ED/ER use, very high risk of Ambulatory Care Sensitive (ACS) utilization, very high risk of readmission, very low use of preventive care and screens.	<u>Healthcare utilization:</u> High ED/ER use, high risk of ACS utilization, high risk of readmission, low use of preventive care and screens.	<u>Healthcare utilization:</u> Low ED/ER use, low risk of ACS utilization, low risk of readmission, good use of preventive care and screens.	<u>Healthcare utilization:</u> Very low ED/ER use, very low risk of ACS utilization, very low risk of readmission, very good use of preventive care and screens.

©2019 INSIGNIA HEALTH. PATIENT ACTIVATION MEASURE® (PAM®) SURVEY LEVELS. ALL RIGHTS RESERVED.

Self- Management Support (SMS)

Approach (Contd.)

- C. Use **group visits** for common chronic conditions (e.g., diabetes)
- D. Provide **condition-specific and chronic disease SMS programs or coaching**, or link patients to those programs in the community
- E. Provide **self-management materials at an appropriate literacy level** and in an appropriate language
- F. **Use a shared agenda for the visit** and provide health coaching between visits

- QR**
CTO/Coach Support

Breakout Discussion

***Share your experiences with
implementing self management
support ...***

***How have you used a tool like PAM
to improve patient engagement &
care?***

Advanced Care Planning

Know your “Why”

- ✓ Primary care teams are the ideal personnel to address patient goals & preferences at the end of life as they have built trusting relationships with patients over time
- ✓ Early conversations with patients about serious illnesses can decrease health care utilization and improve the quality of care, and lead to fewer interventions that conflict with the patients’ goals

Advance Care Planning (ACP)

- ☐ Only 30% of Marylanders have Advance Directives
- ☐ Financial Costs and Emotional Costs high when not done
- ☐ **Identify high risk populations** but adopt universal approach
- ☐ Documents:
 - *Advance Directives*
 - *Durable Power of Attorney*
 - *Living Will*
 - *MOLST - Maryland Order of Life Sustaining Treatment*
- ☐ At the patient's discretion, the initial AWP may also include advance care planning services
- ☐ ACP conversations are especially valuable for frail and medically complex patients.
- ☐ **Documentation of ACP conversations** is also important

ACP Billing

- ❑ Can be a billable event with AWP or Separate Encounter
- ❑ **99497 Advance care planning** including the explanation and discussion of advance directives such as standard forms (with completion of such forms, when performed), by the physician or other qualified health care professional; **first 30 minutes**, face-to-face with the patient, family member(s), and/or surrogate
- ❑ **99498 Advance care planning** including the explanation and discussion of advance directives such as standard forms (with completion of such forms, when performed), by the physician or other qualified health care professional; **each additional 30 minutes** (List separately in addition to code for primary procedure)

Session Recap

- ☑ Used our test patient Ms. Anexxa to have a practical conversation about:
 - ☐ self-management (*and resources*)
 - ☐ advance care planning (*and resources*)

- ☑ Ms. Anexxa's experience with her care management services

- ☑ Reviewed billing for Advanced Care Planning

Post-survey

Questions:

On a scale of 1-5 how would you rate your knowledge on:

- 24. Self-management
- 25. Tools to assist with self-management
- 26. Patient engagement & assessment tools
- 27. Advanced Care Planning

**** Call to Action: What is your readiness level to try applying this knowledge at your practice?**

Scale Key

- 1 = Fair
- 2 = Building
- 3 = Steady
- 4 = Strong
- 5 = Invincible

Social Determinants/Needs - Screening & Resource Registry

Sonia Almonte, BPA

Medicalincs LLC

June 2019

MARYLAND
Department of Health

Presenter

Sonia Almonte, BPA

Care Coordination (Community Health) Expert

Disclosure Announcement

No disclosure related to this presentation

Session Objectives

Pre-survey

Questions:

On a scale of 1-5 how would you rate your knowledge on:

28. Defining social determinants of health & how they may affect a patient's health

29. Tools that healthcare workers can use to help patients & their families access needed resources

30. Helping patients talk to their doctors & preparing them for medical visits

Scale Key

- 1 = Fair
- 2 = Building
- 3 = Steady
- 4 = Strong
- 5 = Invincible

Defining Social Determinants of Health (SDOH)

- ✓ The World Health Organization (WHO) defines SDOH as:
“The conditions in which people are born, grow, live, work and age.”
- ✓ WHO further states that **“these circumstances are shaped by the distribution of money, power, and resources at global, national and local levels.”**

“The Why”: Impact of SDOH

Source: Institute for Clinical Systems Improvement, Going Beyond Clinical Walls: Solving Complex Problems (October 2014)

Adapted from The Bridgespan Group

Social Determinants of Health - Examples

- ✓ Early childhood experiences and development
- ✓ Social support and community inclusivity
- ✓ Crime rates and exposure to violent behavior
- ✓ Availability of transportation
- ✓ Neighborhood conditions and physical environment
- ✓ Access to safe drinking water, clean air, and toxin-free environments
- ✓ Recreational and leisure opportunities

Source: <https://catalyst.nejm.org/social-determinants-of-health/>

Overall Rankings in Health Outcomes

245

Our Patient: Ms. Anexxa, 71-year old Medicare beneficiary

Clinical Profile

- Type II Diabetes
- Long standing Hypertension (Last BP: 140/90 mmHg)
- CHF following a heart attack from 3 years prior
- Dependent on Opioid – which started after pain management for a hip fracture 4 years earlier
- Other Medications: Metformin 500 mg daily; Enalapril 30 mg/day PO qd; Aspirin 81 mg PO qd; Lovastatin 40 mg PO qd
- Lifestyle modifications: Exercise - 30 mins moderate-intensity aerobic activity – 5d/week, Nutrition therapy (DASH diet)

Social Profile

- Retired widow who lives alone and her son lives 5 hours away & uses public transportation
- High school education; Worked as a kitchen staff in a school cafeteria; On fixed income
- She has no fresh food at home – due to her recent stay for 4 days in the hospital
- Experiences other care transition challenges such as: Off-road options, snapshot treatment, diminished ability and increased responsibility

Personality/Behavior Profile

- She is an extrovert, usually lively, a “people person” and does not like to be alone
- Enjoys attending group meetings when she can (e.g. Diabetes group)
- Does not exercise much and tries to maintain good eating habit
- She engages well with her peers and encourages them through life challenges

Utilization Profile (last 6m)

- 5 ED visits
- 2 Hospitalizations
- Most recent hospitalization after being treated for uncontrolled CHF & unaware of 2 of the 3 new prescriptions b/c they were electronically sent to the pharmacy

Cost (Utilization)

- Short term hospital – \$27,000
- ER - \$7,500

Total ED & Hosp (last 6m) - \$34,500

Breakout Discussion

- *What skills and abilities does Ms. Anexxa possess?*
- *Which social needs are of high priority to address first?*
- *What might go unaddressed because of Ms. Anexxa's social needs?*

MDPCP Requirements: Social Needs

✓ Practices should:

- **Complete an assessment** of their attributed beneficiaries' health-related social needs
- **Conduct an inventory of resources** and supports in the community to meet those needs.

✓ Practices to **utilize the health-related social needs screening tool**

Five advanced primary care functions:

Our Patient: **Ms. Anexxa**

Workflow for Social Needs Support

Sample Community Health Support Workflow

CHW Home Visit is Prioritized ...

- At PCP or CM Request
- For patients that practice is unable to reach
- For patient safety Issues
- For patients that need in-person assistance completing applications/paperwork
- For patients without face-to-face contact in 3 months

Examples of Screening Tools

✓ CMS Accountable Health Communities' [Health-Related Social Needs Screening Tool\(innovation.cms.gov\)](https://innovation.cms.gov)

- *AHC-HRSN can be self-administered*

✓ American Academy of Family Physicians tool

- *The [short-form\(bit.ly\)](https://bit.ly) includes 11 questions*

✓ [PRAPARE Toolkit, Chapter 9:](#)

- *The National Association of Community Health Centers' [Protocol for Responding to and Assessing Patients' Assets, Risks, and Experiences tool\(www.nachc.org\)](https://www.nachc.org)*
- *(PRAPARE) includes 15 core questions and 5 supplemental questions*

Examples of Screening Tools (Contd.)

✓ IMPaCT™ Community Health Worker Outpatient Care Manual

OUTPATIENT MEET THE PATIENT INTERVIEW

PATIENT ID _____

AFTER THE APPOINTMENT

How did it go with your doctor? Let's go find a nice quiet room where we can talk for a while about how I can help you reach the health goal you set with your doctor.

PATIENT SUMMARY

Here are some of the things I can help you with, and also some things I want you to know I can't do. *(Hand the patient the IMPaCT Info Sheet)*

In order for me to get to know you better, can I ask you a few questions?

17. Tell me about your health:

18. Can you show me the health goal that you and your doctor set together today?

19. So in six months you want to (long-term goal)?

20. Why is this goal important to you?

21. How do you think you will feel six months from now when you have accomplished that goal? Who will be proud of you? What will have changed? *(Visualize the finish line with patient.)*

I want you to know that I am going to be on your side, as a coach and a buddy, over the next 6 months and help you get to this finish line. It will get tough sometimes, but I'm going to help you maintain your commitment to this. Let's write your goal in this calendar that I want to give you. You can have this calendar and stick it on your fridge, so that you can keep this goal in your mind.

PAGE 3/6

Tools & Inventory of Resources

✓ Some directories that lists where beneficiaries can get social needs support (by zip-code) include:

- [United Way 211](#)
- [Aunt Bertha](#)
- Your E.H.R.
- Your Local Health Department
- [Maryland Access Point \(MAP\)](#)

✓ Use these resources to **develop an inventory of resources** for your patient population based on the practice's coverage area (in addition to other resources)

Breakout Discussion

- *What services or resources are available in your primary care practice to address social needs?*

Establishing Home Visits

- A. Set aims: Establish what the home visits will be for:** Example CHW home visits for high-risk patients
- B. Establish measures:**
- *Number of home visits attempted/completed per patient*
 - *Number of needs assessments completed*
 - *Number of social needs identified*
 - *Number of social needs interventions initiated & addressed*
- C. Establish a protocol for home visit** (including staff safety)
- D. Establish protocol for addressing social needs:** Transportation, Isolation, and Food insecurity etc.
- E. Capture Reporting:**
- For example:
- **Home visits attempts:** 1 successful home visit per patient (by 2nd attempt)
 - **Needs identified & Intervention:** Transportation, Isolation, discussing concerns with PCP

Preparing Ms. Anexxa for The Doctor's Visit

✓ **According to the national institute of aging - the average time a doctor waits before interrupting a patient is 18 secs !!**

Source: NIH National Institute on Aging

As a patient, it is important you are able to **obtain, communicate, process, and understand** basic health information.

PREPARATION LIST

- ✓ List and Prioritize Your Concerns
- ✓ Take Information with You
- ✓ Consider Bringing a Family Member or Friend
- ✓ Be Sure You Can See and Hear As Well As Possible
- ✓ Plan to Update the Doctor
- ✓ Request an Interpreter if You Know You'll Need One

Be prepared for your visit:

- ✓ Make a list of concerns in order of their importance to you.
- ✓ Write down all your medications, vitamins, and supplements.
- ✓ Note all health and life changes since your last visit.

MARYLAND DEPARTMENT OF HEALTH

Session 10

Patient & Family Advisory Council (PFAC) PFAC Framework

Angelica Ortman, MHA, MBA, PhD-c

Medicalincs LLC

June 2019

MARYLAND
Department of Health

Presenter

Angelica Ortman, MHA, MBA, PhD-c

Executive Consultant (Population Health Expert)
Medicalincs LLC

Disclosure Announcement

No disclosure directly related to this presentation

Session Objectives

- ✓ Understand what PFAC is
- ✓ Understand how PFAC captures patient/caregiver feedback to improve care delivery

Pre-survey

Questions:

On a scale of 1-5 how would you rate your knowledge on:

- 31. PFAC Framework
- 32. The importance of PFAC
- 33. Incorporating PFAC data to improve the patient experience

Scale Key

- 1 = Fair
- 2 = Building
- 3 = Steady
- 4 = Strong
- 5 = Invincible

What is PFAC?

“Bringing together key stakeholders (patient, patient family members, & practice staff) on a regular basis to incorporate patient perspective and experience into the delivery of care”

- *Advancing Primary Care in the MDPCP: A Guide for Practices and CTOs (dated 5/19/19)*

[This Photo](#) by Unknown Author is licensed under [CC BY-SA](#)

Why is PFAC important?

Implementation of a PFAC allows the practice to:

- Obtain feedback on the experience from the patient and family perspective
- Build relationships with the patients and family members
- Gain insights on the strengths and areas where improvement may be needed within your practice

MDPCP requirement: PFAC

✓ Practices will be required to:

- **Convene** Patient Family Advisory Council (PFAC) and integrate **recommendations into care, as appropriate**

Resource: Advancing Primary Care in the MDPCP: A Guide for Practices and CTOs (dated 5/19/19)

PFAC framework

Resource: Advancing Primary Care in the MDPCP: A Guide for Practices and CTOs (dated 5/19/19)

PFAC framework

- ☐ Establish the scope of the PFAC
- ☐ Recruitment of the participants
 - Ensuring demographic characteristics are considered (Ability, ethnicity, race, cultural, socioeconomic status, gender, age, etc.)

Our Patient: Ms. Anexxa, 71-year old Medicare beneficiary

Clinical Profile

- Type II Diabetes
- Long standing Hypertension (Last BP: 140/90 mmHg)
- CHF following a heart attack from 3 years prior
- Dependent on Opioid – which started after pain management for a hip fracture 4 years earlier
- Other Medications: Metformin 500 mg daily; Enalapril 30 mg/day PO qd; Aspirin 81 mg PO qd ; Lovastatin 40 mg PO qd
- Lifestyle modifications: Exercise - 30 mins moderate-intensity aerobic activity – 5d/week, Nutrition therapy (DASH diet)

Social Profile

- Retired widow who lives alone and her son lives 5 hours away & uses public transportation
- High school education; Worked as a kitchen staff in a school cafeteria; On fixed income
- She has no fresh food at home – due to her recent stay for 4 days in the hospital
- Experiences other care transition challenges such as: Off-road options, snapshot treatment, diminished ability and increased responsibility

Personality/Behavior Profile

- She is an extrovert, usually lively, a “people person” and does not like to be alone
- Enjoys attending group meetings when she can (e.g. Diabetes group)
- Does not exercise much and tries to maintain good eating habit
- She engages well with her peers and encourages them through life challenges

Utilization Profile (last 6m)

- 5 ED visits
- 2 Hospitalizations
- Most recent hospitalization after being treated for uncontrolled CHF & unaware of 2 of the 3 new prescriptions b/c they were electronically sent to the pharmacy

Cost (Utilization)

- Short term hospital – \$27,000
- ER - \$7,500

Total ED & Hosp (last 6m) - \$34,500

Reflecting on Ms. Anexxa's Personality Profile

- Ms. Anexxa is a good candidate for Healthlincs Primary Care Practice's PFAC
- Possesses the following qualities and skills:
 - Shares information about her experience so that others can learn from it
 - Sees beyond her own personal experience
 - Shows concerns for more than one issue
 - Collaborates and listens with others
 - Wants to make a difference

PFAC framework

**Ensure patients
are meaningfully
involved in the
design of care**

☐ Make effective use of the PFAC meeting

☐ Examples of PFAC topics include:

- Patient safety and experience
- Patient/family education and communication
- Marketing (Outreach calls and letters to get them into care)
- Physical design of the practice office

PFAC framework

Communicate to patients & their caregivers about the changes implemented by the practice.

- ☐ Communicate the changes the practice has implemented to improve the patient experience
- ☐ Obtain suggestions from PFAC members on how to communicate

PFAC framework

**Regularly review
patient data with
you PFAC &
assess how
changes are
improving**

- ☐ Review data to inform areas to improve the patient experience
- ☐ Measure and assess the improvements to the changes implemented

Breakout Discussion

What are some characteristics that make a PFAC successful?

Has your practice implemented improvements based on PFAC suggestions? If so, please share.

Session Recap

- ✓ Discussed the PFAC framework and requirement for the MDPCP program
- ✓ Shared qualities of a good patient candidate to recruit
- ✓ Provided examples of how PFAC data can improve the patient experience

Post-survey

Questions:

After this session - on a scale of 1-5 how would you rate your knowledge on:

31. PFAC Framework

32. The importance of PFAC

33. Incorporating PFAC data to improve the patient experience

**** Call to Action: What is your readiness level to try applying this knowledge at your practice?**

Scale Key

- 1 = Fair
- 2 = Building
- 3 = Steady
- 4 = Strong
- 5 = Invincible

MARYLAND DEPARTMENT OF HEALTH

Session Objectives

Pre-survey

Questions:

On a scale of 1-5 how would you rate your knowledge on:

34. Interview techniques: Communication & patient engagement techniques (Open ended techniques)

Scale Key

- 1 = Fair
- 2 = Building
- 3 = Steady
- 4 = Strong
- 5 = Invincible

Breakout Session

I've learned that people will forget what you said, people will forget what you did, but people will never forget how you made them feel
~ Maya Angelou

- **What was your most memorable patient experience?**
- **What was your worst patient experience?**
- **What do you think made both experience different?**

Why is Communication with patients & family members important?

Resource: <http://minorityhealth.hhs.gov>

Communication with patients and family members

Providing Education

- Providing information and guidelines to create awareness of the health condition

Persuasion

- Sharing the advantages or enthusiasm of a treatment plan

Scare Tactics

- Emphasizing the risk
- Scare patient to take action

Motivational Interviewing

- Focused, goal directed
- Patient centered

Motivational Interviewing: Techniques

Breakout Session

Motivational Interviewing Example (6:19-10:55)

Overview of Ms. Anexxa's Patient Experience

- *I wished the front desk staff are not loud when asking me to confirm my personal information.*
- *My PCP & Care team seem to be collaborating well to provide me the best care; my PCP did not ask me all of the same questions the MA just asked me a few minutes ago & my CHW asked me last week.*
- *I told the doctor everything on my mind related to my symptoms and situation*
- *I was happy to be part of my doctor's office PFAC and give feedback on how my care is delivered*

Session Recap

- ✓ Reviewed communication and patient engagement techniques focusing on motivational interviewing
- ✓ Discussed our patient Ms. Anexxa and her patient experience through out the journey
 - Every interaction with the patient will contribute to the patient experience

Post-survey

Questions:

After this session - on a scale of 1-5 how would you rate your knowledge on:

34. Interview techniques: Communication & patient engagement techniques (Open ended techniques)

**** Call to Action: What is your readiness level to try applying this knowledge at your practice?**

Scale Key

- 1 = Fair
