## Cost Savings and COVID-19 Statistics

Reporting Period: January 2019 – December 27th, 2021

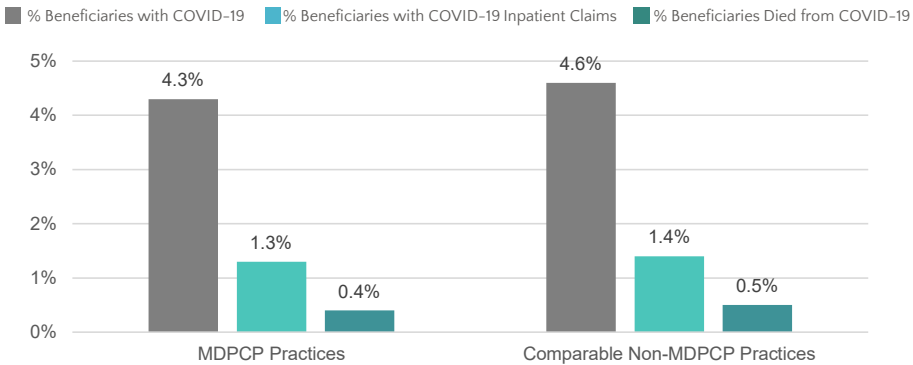

Medicare Average PMPM Cost for MDPCP, Comparable Non-MDPCP, and All Practices Statewide <sup>(a) (e)</sup>

HSCRC Difference-of-Differences In Costs (Cost Savings in Millions) <sup>(b) (f)</sup>

Percent of Medicare FFS COVID-19 Cases, Inpatient Claims, and Death Rates for MDPCP for Comparable Non-MDPCP <sup>(c)</sup>

Status of 2021 MDPCP Practices' Participation in the Primary Care Vaccination Program <sup>(g)</sup>

(a) Comparable Non-MDPCP practices represent primary care practices that do not participate in the MDPCP program but serve patients that are demographically comparable to those served by MDPCP practices.

(b) These data represent cost savings calculated by HSCRC (after care management fees) that can be attributed directly to MDPCP.

(c) The difference in rates are statistically significant at the 5% level. More information can be found here: <https://www.milbank.org/publications/improving-covid-19-outcomes-for-medicare-beneficiaries-a-public-health-supported-advanced-primary-care-paradigm/>

(d) Telehealth is the use of digital information and communication technologies, such as computers and mobile devices, to access health care services remotely and to manage health care.

(e) Data are through July 2021.

(f) Cumulative savings reflect the effects of compounding.

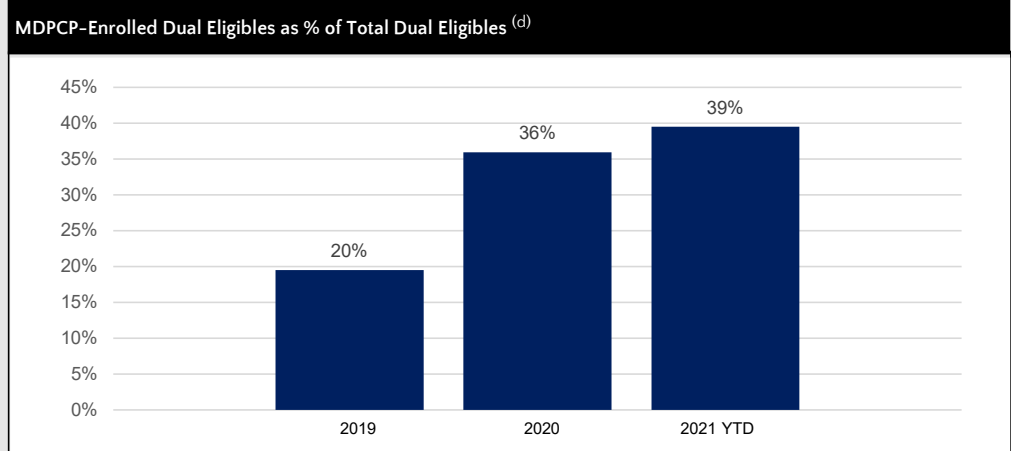

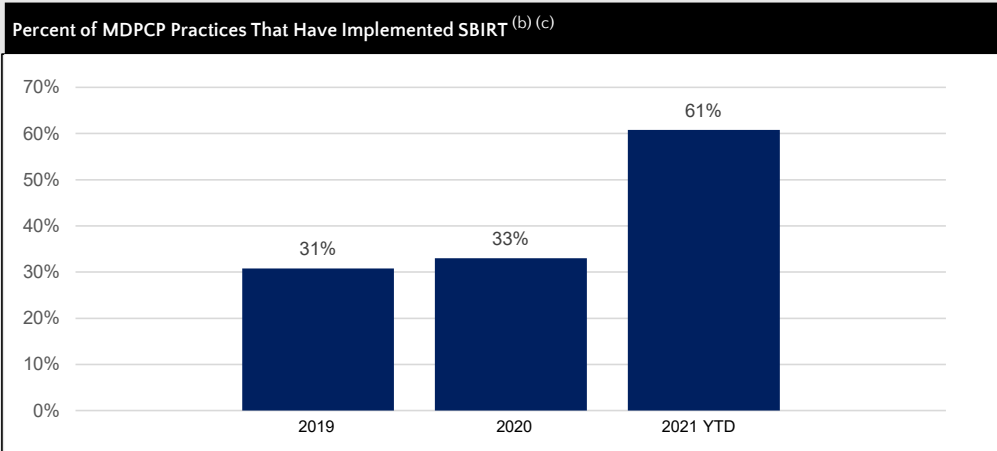

(g) Data last updated December 3, 2021.
