Program Management Office

Mission and Vision

Vision
The Maryland Program Management Office seeks to shape the future of healthcare—we envision a health care system that is sustainable, efficient, and coordinated. We see a dynamic system that is built on the foundation of comprehensive primary care, purposefully working to reduce costs and improve health outcomes for all.

Mission
We strive to enhance coordination and facilitate comprehensive care to all Marylanders through the implementation of our innovative primary care program. We are here to do everything we can (support, facilitate, strengthen, enable, lead, and unlock the full capabilities) to help practices successfully deliver comprehensive primary care.
Program Management Office (PMO)

Value and Commitment to the Maryland Primary Care Program (MDPCP)

The PMO brings invaluable resources and expertise to the MDPCP in the form of Education, Technical Assistance, HIT Tools, Operation, Policy, and Communication/Outreach.

**Leadership**

*Purpose*
- Guides the MDPCP towards its goals
- Provides expertise in strategy and support

*How*
- Works directly with practices to stimulate engagement and identify champions
- Implements program components

**Education**

*Purpose*
- Trains practice staff and providers in advanced primary care

*How*
- Develops and conducts Behavioral Health Integration webinar series
- Posts helpful materials for participants, prospects, and the public State website
- Provides educational materials on complex program issues
  - Payments
  - Quality reporting
  - QPP scenarios
  - Integrating behavioral health

**Technical Assistance**

*Purpose*
- Supports the MDPCP participants in meeting program requirements

*How*
- Provides practice coaches to all MDPCP participants – On-the-ground resources for all practices and CTOs
- Offers free SBIRT contractor assistance to practices
- Offers free EMR Optimization contractor assistance
- Provides technical assistance to enhance the sustainability of practices
- Helps resolve participant concerns before sending to CMS
- Provides hands-on application assistance
HIT Tools

**Purpose**
- Gives providers powerful support at the point of care

**How**
- Ensures advanced and innovative Health Information technology tools and apps are tested, validated, and documented
- Creates and maintains comprehensive and engaging powerful claims data dashboard reports hosted on the State HIE platform CRISP to focus practices on costs and utilization for their beneficiaries

Operation

**Purpose**
- Develops and implements ideas to improve health outcomes

**How**
- Manages the CTO Arrangement and CTO Pairings process
- Provides efficient and effective communication

Policy

**Purpose**
- Advocates for policies to support providers and reduce the cost of care

**How**
- Serves as a policy development and review partner to CMS
- Is a State advocate for Maryland specific legislation and policies for our Providers
- Works to reduce the overall cost of healthcare, while still maintaining or improving quality & health outcomes
- Enhances financial sustainability of primary care practices

Communication & Outreach

**Purpose**
- Fosters connections with community and those involved

**How**
- Recruits practices and CTOs to join through extensive education and outreach events
- Conducts on-site meetings with practice and CTO leadership to encourage participation
