RE: 2023 Joint Chairmen’s Report (p. 129-130) - Report on Home- and Community-Based Options (Community Options) Waiver Care Plan Backlog - September 2023

Pursuant to the requirements of the 2023 Joint Chairmen’s Report (p. 129-130), the Department of Health (Department) submits this report on the Community Options waiver care plan backlog. Specifically, the report addresses the impacts of this backlog on waiver applicants, participants and home and community-based services (HCBS) providers, such as delays in accessing HCBS and increased risk of hospitalization. The committees required the Department to submit monthly reports beginning July 1, 2023, on the progress in addressing the outstanding plan of service backlog. The report discusses current efforts underway and recommendations to address the backlog, including the feasibility of allowing medical adult day care centers (MDCs) and other HCBS nurses to temporarily review and make determinations on plans. In addition, the report details the following information by county:

- the average number of days to approve a plan;
- the total number of pending plans at the beginning of each month;
- the number of new plans received in the prior month; and
- the number of plans approved by the end of the prior month.

Background

The Department’s Medicaid Office of Long Term Services and Supports (OLTSS) operates and/or oversees several HCBS programs. Of importance for this Joint Chairmen's Report (JCR) is the Home and Community-Based Options Waiver (HCBOW or “Community Options Waiver”), Community First Choice (CFC), Community Personal Assistance Services (CPAS), and Increased Community Services (ICS). The four (4) aforementioned programs are impacted by the plan of service (POS) backlog reported during the 2023 legislative session.

Plan of Service Metrics

As requested by the committee, the average number of days to approve a plan, total number of pending plans at the beginning of each month, and the number of plans that received a decision within 30 days (one (1) month) are reported below for January 2023 through July 2023. The

metrics report below are inclusive of initial, provisional, revised, and annual POS for applicants and participants in the HCBOW, CFC, CPAS, and ICS programs.

Month/Year	Average # of days to approve a plan	Total # of pending plans at the beginning of the month	# of plans receiving a decision in less than 30 days
January 2023	122	12,567	445
February 2023	144	12,886	347
March 2023	187	12,914	390
April 2023	137	13,394	265
May 2023	149	13,868	339
June 2023	148	14,347	257
July 2023	130	14,730	204

OLTSS continues to actively recruit for vacant positions via several social media platforms (e.g., LinkedIn, Handshake) and various stakeholder networks. There are 30 staff vacancies, in various stages of the recruitment process, within the three (3) divisions in OLTSS that support the Community Options Waiver, CFC, CPAS, ICS programs. Of those 30 vacant positions, 23 are contractual positions which are typically more difficult to hire. The remaining seven (7) vacancies are merit positions. OLTSS has selected candidates to fill two (2) contractual Medical Care Program Specialist II positions as of August 25, 2023. The Office of Human Resources (OHR) will complete the onboarding process and send the official offer letter with the hire date to the candidates. The addition of the two aforementioned MCPS IIs will reduce the vacant positions to 28; 21 contractual positions and seven (7) merit positions.

The RFP to solicit a temporary contractor to review and render determinations on the backlogged POS is anticipated to post to eMaryland MarketPlace in September/October 2023 with vendor selection occurring in early winter 2023.

The Department's Utilization Control Agent (UCA) contract was awarded to Maryland's incumbent, Telligen, on June 8, 2023 with an expected implementation date of January 1, 2024. At the present time, the Department is meeting with the UCA to review business requirements for the requisite tasks that it will perform under the new contract. The UCA is expected to assume responsibility for rendering determinations on POS beginning January 1, 2024.

OLTSS continues its efforts to enhance the data management system to allow auto-approval (i.e., no manual review required) of annual plans meeting specified criteria. The auto-approval of annual plans is expected to be implemented in the Department's data management system in spring 2024.

Additionally, OLTSS and the Eligibility Determination Division (EDD) continue to collaborate

on the development of a report that will analyze pending POS and the age of an HCBOW application in order to prioritize plans for those individuals whose application is nearing the end of its six-month life cycle. This report was received on August 14, 2023. Analysis is currently being conducted to determine how to best filter and use the data to prioritize the POS staff's caseload.
