[1] Participants may report changes to the system, e.g., birth of a child, increases in income due to a new job, at any time during the year. Additional participants may have had their coverage extended due to reporting of a change. Disenrollment rates also reflect participants appropriately disenrolled from coverage due to reporting a change because they are no longer eligible for Medicaid coverage.

[2] Maryland resumed procedural terminations of Medicaid participants in November in accordance with CMS guidance. For MAGI populations, procedural terminations that were scheduled for the months of August and September were processed in November 2023. Procedural terminations that were scheduled for October were processed in December. For non-MAGI populations, procedural terminations resumed in December.

[3] Pending review cases may differ here than in other publicly released data sets due to differences in measure specifications from CMS and timing of data generation.
