¹ Participants may report changes to the system, e.g., birth of a child, increases in income due to a new job, at any time during the year. This figure reflects the total number of participants who needed to renew their coverage by 10/31/23. Additional participants may have had their coverage extended due to reporting of a change. Disenrollment rates also reflect participants appropriately disenrolled from coverage due to reporting a change because they are no longer eligible for Medicaid coverage.

² Maryland has paused procedural terminations of Medicaid participants for the month of October in accordance with recently released [CMS guidance](#). Approximately 40,555 procedural terminations would have closed for MAGI. Non-MAGI procedural terminations for October 2023 month will be reported in December 2023.

³ Pending review cases may differ here than in other publicly released data sets due to differences in measure specifications from CMS and timing of data generation.
