

## Appendix B: Benefits Mapping Standard 5

The tables in *Appendix B1* represent the benefits analyzed in MDH’s parity report. Each benefit has been analyzed and classified both by type of service as well as by delivery system. MDH adopted the following definitions for each benefits classification:

- Inpatient: Any non-emergency service that involves the individual staying overnight at a facility. This includes inpatient overnight MH and SUD treatment and crisis stabilization services occurring in a facility. This classification includes all covered services or items provided to a beneficiary when a physician has written an order for admission to a facility.
- Outpatient: Services (primary care or specialist) that are provided to a beneficiary in a setting that does not require a physician’s order for admission and do not meet the definition of emergency care.<sup>1</sup>
- Prescription Drugs: Covered medications, drugs and associated supplies requiring a prescription, and services delivered by a pharmacist who works in a free-standing pharmacy.
  - For the purposes of the benefits mapping, Prescription Drugs are not included and are addressed in *Appendix F: Prescription Drugs Subject to NQTLs, by Delivery System*.
- Emergency: All covered services or items delivered in an emergency department (ED) setting or to stabilize an emergency/crisis, other than in an inpatient setting.

Services are also broken out by benefit package according to the covered population. The benefit packages are as follows:

- Medicaid Children (C)
- Medicaid Adults (A)
- Pregnant Women (PW)

Services are also administered by different delivery systems; these services are color coded as follows:

- **Red** – Fee for service (FFS) or Long Term Services and Supports (LTSS) benefit
- **Navy** - Dental FFS benefit<sup>2</sup>
- **Green** - MCO
- **Bright Blue** – ASO

---

<sup>1</sup> The URAC ParityManager™ tool separates between Outpatient - Office services and Outpatient - Other services. For the purposes of this report, those two categories have been merged to create a single Outpatient classification.

<sup>2</sup> Please note that for the purposes of the parity analysis, the children’s dental package was analyzed rather an adult MCO dental plan (which is a value-added benefit). Former foster care enrollees, up at age 26, have access to dental benefits identical to those covered for children.
