

Maryland Medicaid Pharmacy Program

Dose Optimization Limitations for Mental Health Medications

Only the doses noted with limits on the table below are subject to the dose optimization criteria. Those doses of the products, that do not have any quantity limitations, are also listed below. These limits are based on the manufacturers' recommended dosing found in the product labeling. A patient is limited to the following quantities for the specific time-period noted.

Exceptions to these limits, for clinical reasons, if in the best interest of the patient, can be obtained. A prior authorization form for obtaining quantities in excess of those listed can be found at [http://www.mdrxprograms.com/docs/medicaid/MD_Quantity_Limit\(34141-Activated,Traditional\).pdf](http://www.mdrxprograms.com/docs/medicaid/MD_Quantity_Limit(34141-Activated,Traditional).pdf) or by calling (800) 932-3918.

Drug	Strength	Doses per day	Quantity limitations per month supply
Abilify [®]	2mg	4 tablets	136 tablets
Abilify [®]	5mg, 10mg, 15mg	1 tablet	34 tablets
