

**OFFICE OF THE CHIEF MEDICAL EXAMINER
STATE OF MARYLAND
FORENSIC PATHOLOGY FELLOWSHIP
Opening for 2018-2019**

The Office of the Chief Medical Examiner (OCME) of Maryland is currently seeking a qualified individual for its ACGME-accredited forensic pathology fellowship training program for 2018-2019. Established in 1939, the agency is considered "one of the model State Medicolegal Investigative Systems." Under the supervision of 15 Board-certified forensic pathologists, the fellow will perform post-mortem examinations to determine the cause and manner of death in a wide variety of cases involving both urban and rural settings. The OCME investigates sudden unexpected deaths, approximately 14,000 per year, in 23 counties and conducts approximately 5,000 autopsies. A comprehensive curriculum includes daily morning and afternoon rounds, regularly scheduled didactic lectures, journal club, scene investigations, rotations within the in-house toxicology lab, formal rotations with the Maryland State Police Crime Lab, forensic anthropology, and forensic neuropathology. Courtroom testimony is strongly encouraged, first by shadowing an attending physician, followed by the fellow's own testimony later in the year. The office is within walking distance to the University of Maryland Medical Center and School of Medicine and is easily accessible to The Johns Hopkins University Hospital. The salary is \$65,964. As a state employee, the fellow receives benefits such as health insurance, vacation, and sick time. Fellows are provided private office space along with time and funding to attend at least one national meeting. For more information, contact Nikki Mourtzinis, D.O. (fellowship director) or visit <https://health.maryland.gov/ocme> to download the application.

Requirements: Successful completion of an accredited pathology residency training program in either Anatomic Pathology or combined Anatomic/Clinical Pathology.
