### MEDICARE CERTIFICATION

Be advised that an on-site Medicare inspection cannot be made until the CMS-855 has been reviewed and approved by Centers for Medicare and Medicaid Services (CMS).
CMS has identified initial ASCs as a low priority for State Agencies. ASCs have a deemed status option. To obtain Medicare certification more quickly, you may consider contacting an Accreditation Organization.

New providers must be in operation and providing services to patients when surveyed for Medicare certification. This means that at the time of survey, the ASC must have opened its doors to admissions, be furnishing all services necessary to meet the provider definition, and be demonstrating the operational capability of all facets of its operations. To be considered “fully operational,” initial applicants must be servicing a sufficient number of patients so that compliance with all requirements can be determined. If possible, the OHCQ will conduct the survey within 90 calendar days of the date the provider notified the OHCQ of full operation.
