Overview

Maryland's Health Care Quality Account was established in 2000 by the General Assembly and mirrors the account established by federal regulation to be used to improve the quality of care in nursing homes. The State and federal accounts are funded through civil money penalties assessed to nursing homes for violations of standards. The State fund account represents penalties assessed by the Office of Health Care Quality (OHCQ) when a deficiency exists or there is an ongoing pattern of deficiencies in a nursing home. The federal fund account represents penalties assessed by the Centers of Medicare and Medicaid Services (CMS). During the 2007 General Assembly Session, a Health Care Quality Account was established for assisted living programs.

All of these accounts are non-lapsing, special funds to be used for training, grant awards, demonstration projects, or other purposes designed to improve the quality of care in Maryland's nursing homes and assisted living programs.

OHCQ's Vision

The Office of Health Care Quality's vision is to achieve excellence in the quality of services provided by the health care and community service delivery system through the regulatory process.
Grants Awards Process

Applications for grants from the Health Care Quality Accounts are accepted in May, and are awarded on a fiscal year basis. Grant amounts vary and depend upon the number of successful applications received and availability of funds.

Note: Nursing home account awards must clearly benefit nursing home residents; assisted living account awards must clearly benefit residents of assisted living programs.

The application must include, and is evaluated on, the following criteria:

- Background information concerning the person(s) or organization requesting the grant.
- Description of the scope of the project and explanation of how the grant would improve the quality of care of nursing home or assisted living program residents. Programs must clearly identify whether applying for funding from the nursing home account or assisted living account.
- Description of measures that will be used to quantitatively analyze the impact of the project.
- Timeline and dates by which each phase of the project will be completed and the projected completion date for the entire project.
- Project cost, including specific breakdown of expenses.
- Quarterly reporting to OHCQ on the status of the project and the date by which a final report will be submitted.

At the end of the project, a final report is submitted to the OHCQ outlining the project’s accomplishments and findings. Project findings may be shared with trade associations, advocates, and other stakeholders.

OHCQ’s Mission

The Office of Health Care Quality’s mission is to protect the health and safety of Maryland’s citizens and to ensure that there is public confidence in the health care and community service delivery systems through regulatory enforcement, and educational activities.

Fund Balance and Collections

As of the end of Fiscal Year 2012 the nursing home State fund balance was $426,163.71; the Federal Fund balance was $185,892.21. There were no collections added to the federal CMP account in fiscal year 2011; $185,227.41 was collected for the State fund. For the Assisted Living account, the end fund balance was $45,213.
