

# Show your love. **GET the SPRAY.**

Everyone wants a safe home. Much like having a fire extinguisher or using a seat belt protects us from an accident we don't think is likely to happen, having naloxone in the home protects your family and loved ones too. It's easy-to-use. **And can make a big difference.**

- No prescription is needed.
- Many insurance plans (copays vary) and Maryland Medicaid cover the cost of naloxone.
- Free naloxone can be found at an Overdose Response Program
