PDMP: Mandatory Use for Pharmacists

Pharmacists must query and assess the PDMP data when they suspect any CDS prescription is being filled for something other than treatment of an existing medical diagnosis, essentially a restatement of the corresponding responsibility under federal regulations.

Effective adoption of PDMP as a clinical decision support tool both under the use mandate, and as recommended by the Centers for Disease Control and Prevention (CDC), the President's Opioid Commission on Combating Drug. Addiction and the Opioid Crisis, and the Maryland Heroin and Opioid Emergency Task Force relies on Integrating

PDMP data access into the realities of a put in place to assist providers are:

- 1. Use of Delegates, who can access the PDMP on behalf of a prescriber or pharmacist and provide that PDMP data report to the provider for a prescribing or dispensing decision
- 2. Integrating PDMP access into an EHR, which is available in many hospital system settings across the state

The full text of the use mandate can be found in Health General-Article §21-2A-04.2. For additional information.
