

Change impacting pharmacy staff access of PDMP data!

CRISP and DHMH (Maryland Department of Health and Mental Hygiene) are pursuing several enhancements to Maryland's Prescription Drug Monitoring Program (PDMP) as use of the program continues to grow dramatically. One of the major exciting enhancements is a new and improved PDMP User Interface called 'PDMP Search'. This Interface will replace the Clinical Query Portal to access PDMP data in the next couple of months. PDMP Search is currently being rolled out incrementally to users who have access to only PDMP data at present in the Query Portal - this includes most Maryland pharmacists and pharmacist delegates!

In preparation of the new release, we want to ensure a seamless transition by confirming that all pharmacists are able to access the new website for PDMP as some organizations lock down new websites in the workplace.

The link to the web address for accessing PDMP Search is
: <https://ulp.crisphealth.org/> ‘

We appreciate your support of the PDMP by making sure that the link above is available at all pharmacy locations prior to April 10th, 2017.

We have also emailed this new URL to each registered PDMP-only user, including your pharmacists, but know that website access may be controlled at the administrator or corporate level.

For any questions about this change, please contact the CRISP support team at [1.877.952.7477](tel:18779527477) or support@crisphealth.org.
