

## Opioid Operational Command Center (OCCC)

Colleagues,

We've received this information from Maryland State Police and are sharing for your situational awareness.

Bogus oxycodone tablets containing fentanyl (blue or white in color) have been found in Queen Anne's, Cecil, and Anne Arundel counties. See attached photo.

Should any suspicious tablets be found, we ask that you contact your local law enforcement agency.

We thank you for your time and attention to this matter. Your engagement and partnership in this process is greatly appreciated as we all continue working together to drive a safer future for all Marylanders.

Best regards,  
OCCC Planning Section Chief
