Pharmacists and Pharmacy Technicians Requested to Participate in a Survey on Working Conditions and Medication Errors

Dear Maryland Licensed Pharmacist and Registered Pharmacy Technician:

The Board of Pharmacy is researching pharmacist and pharmacy technician working conditions and how they may be related to the occurrence of medication errors in pharmacy practice. Medication errors are generally recognized as having an impact on morbidity and mortality, thus effecting patient safety.

Although there has been some research nationwide on this issue, the Board is surveying its pharmacist licensees and pharmacy technician registrants to determine, firsthand, the nature of pharmacy working conditions in Maryland. Your participation is of vital importance for the Board to obtain an accurate picture of working conditions in Maryland.

The survey is compiled on “Survey Monkey” and is anonymous. No personal information, contact information, IP address, or other identifying information will be collected. It should take less than 10 minutes to complete.

If you have not already participated in the survey, please go to the link below to assist the Board in this valuable project.

Thank you,
