

Interested in providing COVID-19 therapeutics?

If you can test, evaluate, prescribe, and dispense COVID-19 oral antivirals in the same building or center, you may be eligible to stock a therapeutics supply for your practice or become a COVID Test to Treat Site.

You must have adequate staff and clinical facilities to evaluate priority patients in your community or practice within 24 hours, prescribe treatment, and report daily on therapeutics utilization.

Review the [onboarding packet](#) to understand the responsibilities of dispensing sites. Fill out the form in the document to indicate your interest so we can work with you to ensure you have a therapeutics supply.
