

Health Care Provider referrals to Monoclonal Antibody Infusions

- Monoclonal antibodies (mAbs) directly neutralize the COVID-19 virus and are intended to prevent the progression of disease
- mAbs are likely to be most beneficial if given to patients early in symptom progression
- Product delivered via single IV infusion administration
- Early evidence suggest promise of mAb products in **outpatient** settings to **reduce hospitalization**

Process to refer your patients

1. Review patient eligibility criteria

for patients with mild-moderate symptoms.

Full criteria listed by FDA:

- Bamlanivimab and Etesevimab
- Casirivimab and Imdevimab

2. Perform a COVID-19 PCR or Point-of-Care Rapid Antigen Test

(POC Antigen Tests can be supplied by MDH: complete this [form](#) if interested).

3. Refer your positive patients to a partnering infusion site* **ASAP**

to start treatment within 10 days of onset of symptoms.

Option 1 (Preferred)

OR

Option 2

Send eReferral via the CRISP Unified Landing Page
([Starter guide](#): pp. 1-7, 25-35)

Complete referral form ([link](#) at top) and submit directly to infusion site

Adult Eligibility Criteria

At least 1 of the following:

1. Age \geq 65 years;
2. Age \geq 55 years AND have any of the following:
 - Cardiovascular disease
 - Hypertension
 - COPD/other chronic respiratory disease
3. Diabetes;
4. Immunosuppressive disease;
5. Receiving immunosuppressive treatment;
6. BMI \geq 35; OR
7. Chronic kidney disease
