

Health Care Provider referrals to Monoclonal Antibody Infusions

- Monoclonal antibodies (mAbs) directly neutralize the COVID-19 virus and are intended to prevent the progression of disease
- mAbs are likely to be most beneficial if given to patients early in symptom progression
- Product delivered via single IV infusion administration
- Early evidence suggest promise of mAb products in **outpatient** settings to **reduce hospitalization**

Process to refer your patients

1. Review patient eligibility criteria

for patients with mild-moderate symptoms.

Full criteria listed by FDA:

- *Bamlanivimab and Etesevimab*
- *Casirivimab and Imdevimab*

2. Perform a COVID-19 PCR or Point-of-Care Rapid Antigen Test

*(POC Antigen Tests can be supplied by MDH:
complete this [form](#) if interested).*

3. Refer your positive patients to a partnering infusion site* ASAP

to start treatment within 10 days of onset of symptoms.

Option 1 (Preferred)

OR

Option 2

Send eReferral via the CRISP
Unified Landing Page
([Starter guide](#): pp. 1-7, 25-35)

Complete referral form
([link](#) at top) and submit
directly to infusion site

* (Infusion sites listed on next page)

Health Care Provider referrals to Monoclonal Antibody Infusions
