* Data sources: Maryland's NEDSS and STD*MIS databases. Data is current as of September 21, 2014. These are active databases and counts may vary slightly over time, as well as differ slightly from counts published by the Centers for Disease Control and Prevention (CDC). HIV/AIDS data are not included here but available at http://phpa.dhmh.maryland.gov/OIDEOR/CHSE/SitePages/statistics.aspx.

**Due to very small numbers the county rate for Congenital Syphilis is calculated only for the combined counties (excluding Baltimore City). The total county rate is 11.1 per 100,000 live births.

The case status classifications (confirmed, probable or suspect) included in these totals are specific to the condition, and depend in part on the CDC case definitions for surveillance, where those exist (see http://wwwn.cdc.gov/nndss/). There may be additional "suspect" cases for the following conditions: Anaplasmosis, Babesiosis, Campylobacteriosis, Creutzfeldt-Jakob disease, Dengue fever, Ehrlichiosis, Lyme disease, Mumps, Shiga toxin producing E. coli, and Spotted Fever rickettsiosis.

All rates (with the exception of Congenital Syphilis) are calculated with population estimates provided by the Maryland Department of Planning, February 20, 2014.
