\* Data sources: Maryland's NEDSS, and PRISM databases. Data is current as of November 8, 2018. These are active databases and counts may vary slightly over time, as well as differ slightly from counts published by the Centers for Disease Control and Prevention (CDC). HIV/AIDS data are not included here but available at <http://phpa.dhmm.maryland.gov/OIDEOR/CHSE/Pages/statistics.aspx>.

The case status classifications (confirmed, probable or suspect) included in these totals are specific to the condition, and depend in part on the CDC case definitions for surveillance, where those exist (see <http://www.cdc.gov/nndss/>). There may be additional "suspect" cases for the following conditions: Anaplasmosis, Babesiosis, Creutzfeldt-Jakob disease, Dengue fever, Ehrlichiosis, Legionellosis, Lyme disease, Malaria, Mumps, Salmonellosis, Shiga toxin producing E. coli, Shigellosis, Spotted Fever rickettsiosis, Trichinellosis, Invasive Streptococcal pneumoniae, and Yersiniosis.
