Notes

- Discussion about sending the draft EMF Exposure Guidance document to industry stakeholders (e.g. manufacturers of wireless devices) for comment before distributing. Would likely delay distribution, and feedback from industry may not have specific feedback on a very general policy topic. Document was presented and discussed at a public meeting of CEHPAC, which has a history with this topic.
- Veronika Carella – Email with comments was sent to CEHPAC. Veronika asked for an update on workgroups established at last meeting. MD CEHC performed an audit of compliance with existing State Laws on IPM and Green Cleaning to document and support the requests of MSDE outlined in the CEHPAC Letters, which was presented at the Board of Education monthly meeting.
- MDH and MSDE are working with indoor air quality experts to address ventilation in schools.
- A quorum was not present, so the meeting was adjourned.
