Total	29,734	2,092,538				
% Families with Children	71.0	57.5				

Calvert County, Maryland

These county profiles were developed for Maryland and its local jurisdictions. The profiles give a picture of Maryland, focusing on social, demographic, and environmental factors that are thought to be important determinants of health. When looking at the data, some things to consider are the direction of change, the speed of change, and the size of the measure.

Calvert County

Major Health Indicators (2008)^a

	Calvert County	Maryland
Overall Health		
Life Expectancy at Birth	77.9	78.1
% With Activity Limitations	20.4	20.5
% With Fair or Poor Health	14.2	12.5
% Experiencing Unhealthy Days	27.5	22.2
All Cause Mortality **	838.9	780.8
Maternal/Child Health		
Infant Mortality Rate *	6.3	6.5
% Low Birth Weight (Singleton)	3.9	4.9
% Low Birth Weight (All)	6.0	6.7
% Very Low Birth Weight (Singleton)	NA	1.0
% Very Low Birth Weight (All)	NA	1.3
% Pre-Term Births	7.3	9.5
Teen Birth Rate *	14.7	25.9
% Mothers Smoking During Pregnancy	10.8	6.2
% Mothers with Late or No Prenatal Care	2.4	4.2
Communicable Disease		
Tuberculosis Incidence **	1.1	4.9
Chlamydia Rate **	252.0	437.9
Gonorrhea Rate **	49.7	118.3
Rate of HIV/AIDS Cases **	6.8	46.6
Number of HIV Deaths	1	431
Number of Septicemia Deaths	6	988

^a 2008 Data was used whenever available. Please refer to metadata for additional information.

* Rate per 1,000 Births

** Rate per 100,000 Residents

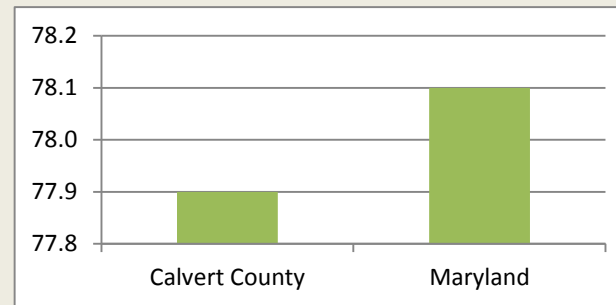

Fig. 1 Life Expectancy at Birth

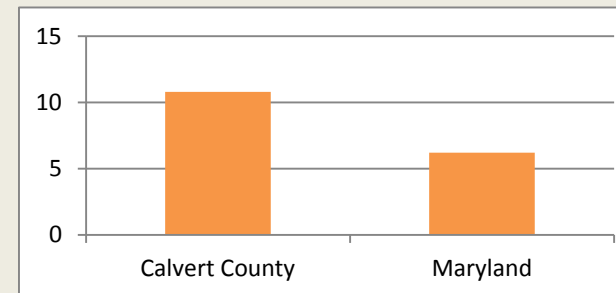

Fig. 2 Percent of Mothers Smoking During their Pregnancies

These are some of the most basic measures of health across the state. Many of these are also included in

[Maryland's State Health Improvement Process \(SHIP\)](#)

Calvert County

Health Outcomes/Risk Factors (2008)^a

	Calvert County	Maryland
Mental Health		
Number of Suicide Deaths	10	493
% with Anxiety Disorders	16.2	12.6
Substance Abuse		
Number of Alcohol-Induced Deaths	3	407
% Binge Drinkers	16.6	13.8
Environmental Health		
% Children Tested for Presence of Blood Lead	11.2	22.4
% Children With Lead Poisoning	0.0	0.7
Health Insurance		
% Without Health Insurance (Adults)	8.7	NA
% Without Health Insurance (Children)	3.2	NA
Unmet Medical Need		
% in Last Year that Could Not Afford to See a Doctor	11.2	10.4
Oral Health		
% That did not see a Dentist in the Last Year	26.2	28.6

Fig. 3: Percent of children tested for elevated blood lead levels

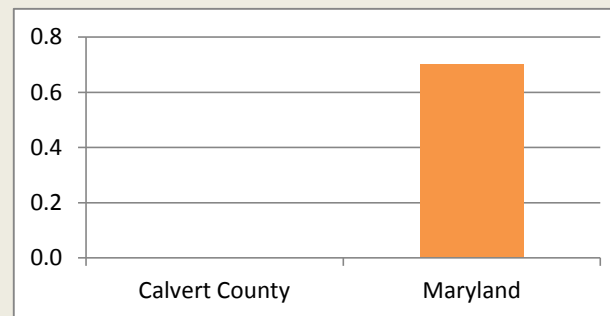

Fig. 4: Percent of tested children with elevated blood lead levels

These represent some important determinants of health, including mental health, substance abuse, and access to health services. Many of these are part of the [State Health Improvement Process \(SHIP\)](#)

Calvert County

Risk Factors (2008)^a

	Calvert County	Maryland
Unhealthy Weight		
% Overweight (Adults)	35.2	36.7
% Obese (Adults)	30.9	26.7
% Overweight (School-Age)	18.6	17.7
% Obese (School-Age)	20.6	22.3
Smokers		
% Adults that Smoke	20	14.9
% Middle Schoolers that Smoke	6.1	5.2
% High Schoolers that Smoke	7.9	7.0
Injury and Violence		
Number of Homicide Deaths	5	528
Number of Aggravated Assaults	336	20,571
Rate of Motor Vehicle Injury Hospitalizations **	80.0	109.8
Number of Motor Vehicle Deaths	12	643
Injury-Related ER Visits **	10,685	9,135
Injury-Related Hospitalizations **	869	1,068
Injury-Related Deaths **	50.7	63.0
Physical Inactivity and Built Environment		
% Adults Not Meeting CDC Recommendation for Activity	59.1	64.4
% With No Physical Activity	21.8	24.0
Access to Recreational Facilities **	14	12
% With Access to Healthy Foods	58.0	62.0

^a 2008 Data was used whenever available. Please refer to metadata for additional information.

** Rate per 100,000 Residents

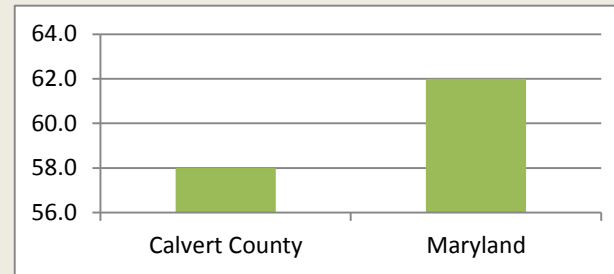

Fig. 5: Percent of population with access to healthy foods

Fig. 6: Percent of children and adults that are obese

The indicators on this page might be thought of as related in some ways to the built environment. While other factors such as personal behaviors must also be considered, there are relationships between the built environment and some important health outcomes.

Calvert County

Health Outcomes (2008)^a

	Calvert County	Maryland
Built Environment, cont.		
<i>Percent Who Get to Work By:</i>		
Single Occupancy Vehicle	78.1	73.2
Active Transport (Walking, Biking)	0.8	2.8
Public Transportation	2.7	8.7
Chronic Disease		
Number of Colorectal Cancer Deaths	14	964
Number of Breast Cancer Deaths	10	840
Number of Heart Disease Deaths	169	11,217
Number of Stroke Deaths	21	2,250
% with Diabetes	9.6	8.7
Diabetes Deaths **	NA	22.4
% Children with Asthma	12.8	14.3
Number of Childhood Asthma Hospitalizations	30	1,318
% Adults with Asthma	20.2	14.3
Number of Adult Asthma Hospitalizations	71	3,746
Cancer Screening		
% Adult Women that have Received a Mammogram	66.4	64.2
% Testing for Colorectal Cancer in Past 2 Years	21.4	25.0

^a 2008 Data was used whenever available. Please refer to metadata for additional information.

* Rate per 1,000 Births

** Rate per 100,000 Residents

Fig. 7: Percent with Diabetes

Fig. 8: Percent of children with asthma

Prevention and reduction of chronic diseases requires a combination of approaches, including improvements in screening, changes in personal behaviors, and changes in environmental conditions.

Physical and Environmental Determinants (2008)^a

	Calvert County	Maryland
Immunizations		
Average % of Kindergarten Students Immunized	99.9	99.3
% Adults Receiving Flu Shots	35.4	38.5
% Adults Receiving Pneumonia Shots	16.6	24.7
Environmental Exposure		
Ozone Days	10	16
Particulate Matter Days	0	4
Water Quality- Arsenic †	11.6	NA
Water Quality- Nitrates ‡	NA	NA
Water Quality- Trihalomethane †	NA	NA
Water Quality- Haloacetic Acids †	NA	NA

^a 2008 Data was used whenever available. Please refer to metadata for additional information.

† Parts per Billion

‡ Parts per Million

Funding for this county indicators project was made possible by cooperative agreement award 5U38EH000194-05 from the Centers for Disease Control and Prevention to the Maryland Department of Health and Mental Hygiene. The computed indicators and interpretation of the various measures do not necessarily reflect the official policies of the CDC or the Department of Health and Human Services, nor does any reference to trade names, commercial practices, or organizations imply endorsement by the U.S. Government.

Some connections between the environment and health are well known, such as that between asthma and air pollution. However, air pollution has also been shown to affect overall death rates. Data and information collected by public health agencies is being used by researchers to increase our understanding of these complicated relationships and design cost-effective prevention strategies.
