

# The BESURE study

2019 Update

Danielle German, PhD, MPH on behalf of the  
BESURE team

# Overview

- National HIV Behavioral Surveillance and BESURE
- Baltimore Data Overview
- HIV “Cascade” Indicators, All Waves
- IDU5 Data Update
- Upcoming HET5 Cycle

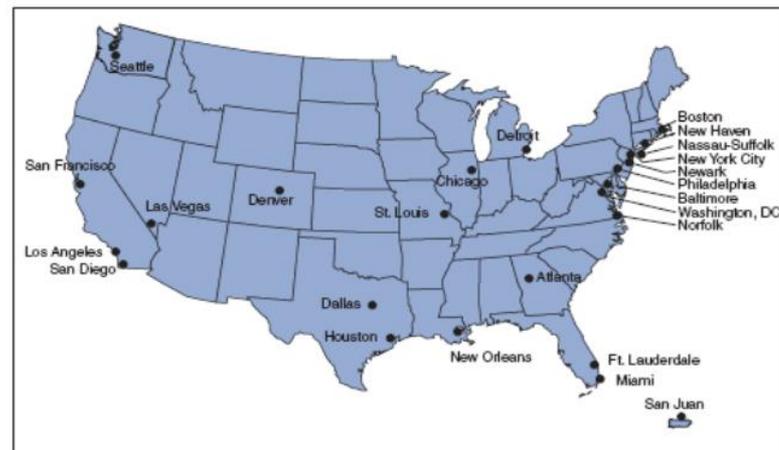

# NHBS & BESURE

# National HIV Behavioral Surveillance (NHBS)

- Implemented in up to 25 metropolitan areas (varied over time)
- Major divisions of metropolitan areas with greatest numbers of AIDS cases in the U.S.

FIGURE 1. Participating metropolitan statistical areas in the National Human Immunodeficiency Virus Behavioral Surveillance System — United States

MMWR – Surveillance Summaries - July 7, 2006 / 55(SS06);1-16

# Baltimore HIV Behavioral Surveillance

The

BEhavioral

SUrveillance

REsearch

Study

Collaborative project of CDC, MDH, and JHSPH

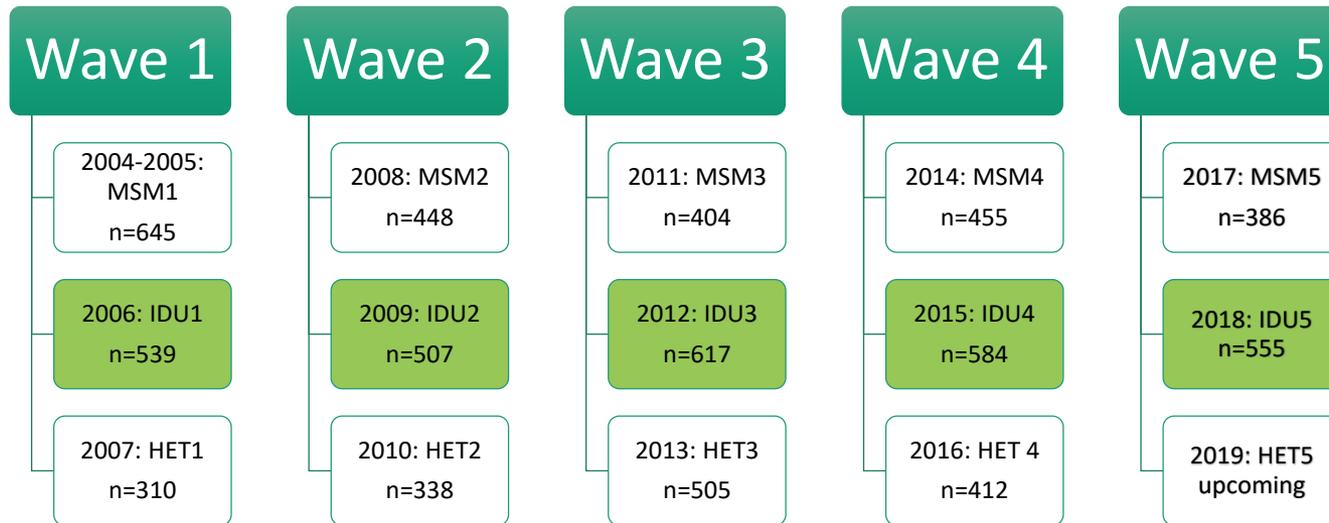

# Objectives

- To assess prevalence of and trends in:
  - HIV risk behaviors
  - HIV testing behaviors
  - Exposure to and use of prevention and care services among persons at high risk for infection or transmission
  - HIV prevalence
- ... and annual survey on social issues, health, and well-being in Baltimore

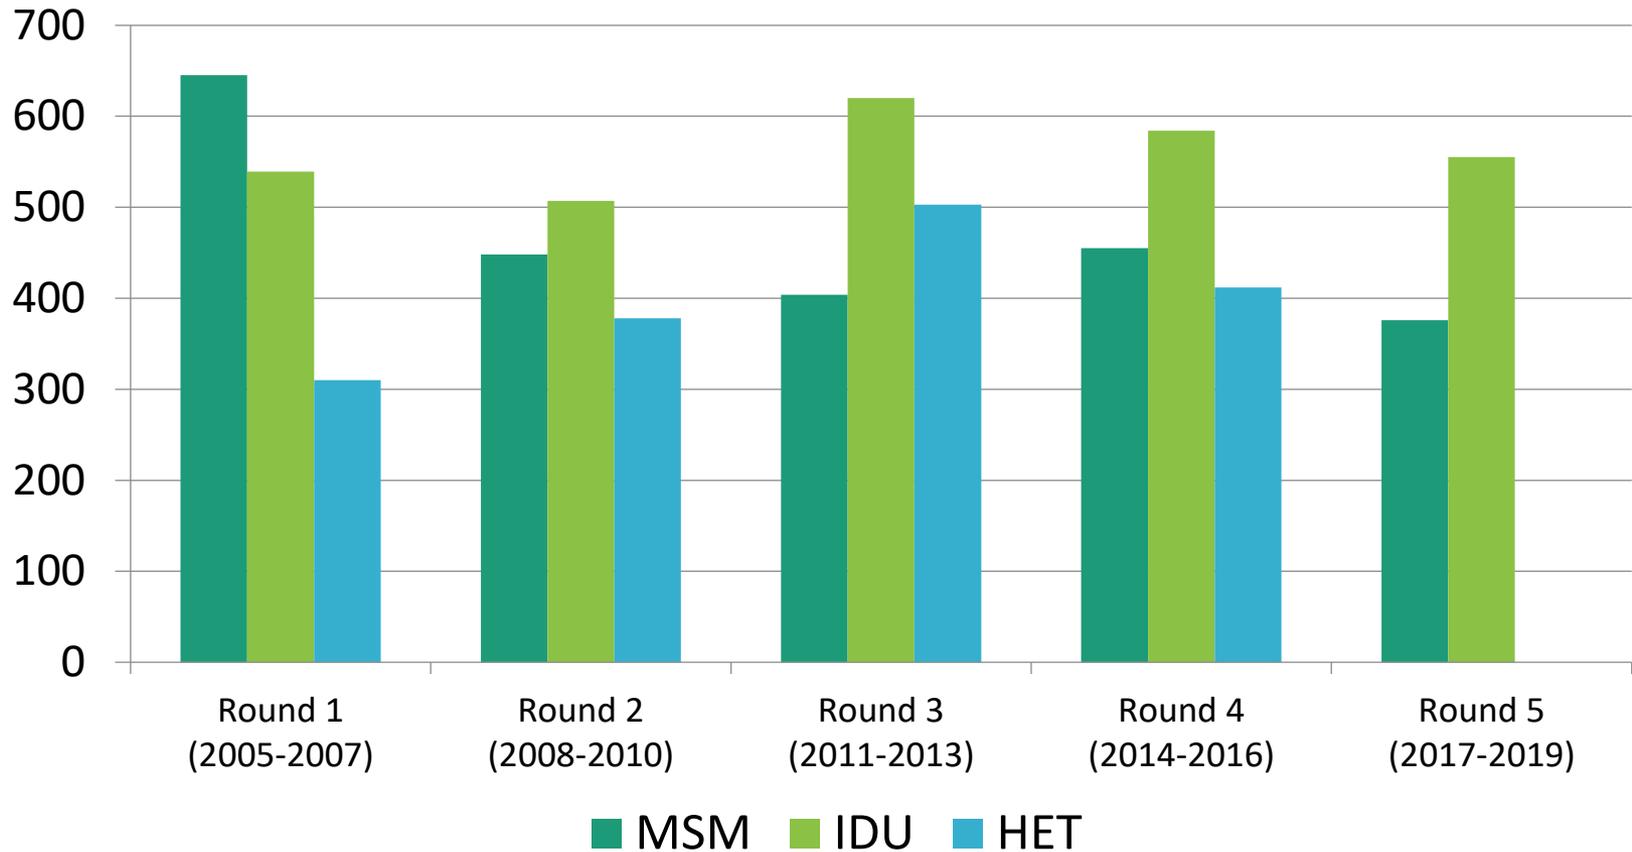

# BESURE to date

# Recruitment methods

Survey wave	Population	Recruitment
2004-2005 2008 2011 2014 2017	MSM	Venue-based time location sampling
2006 2009 2012 2015 2018	IDU/PWID	Respondent driven sampling
2007	HET	Venue based time location sampling
2010 2013 2016 2019	HET	Respondent driven sampling

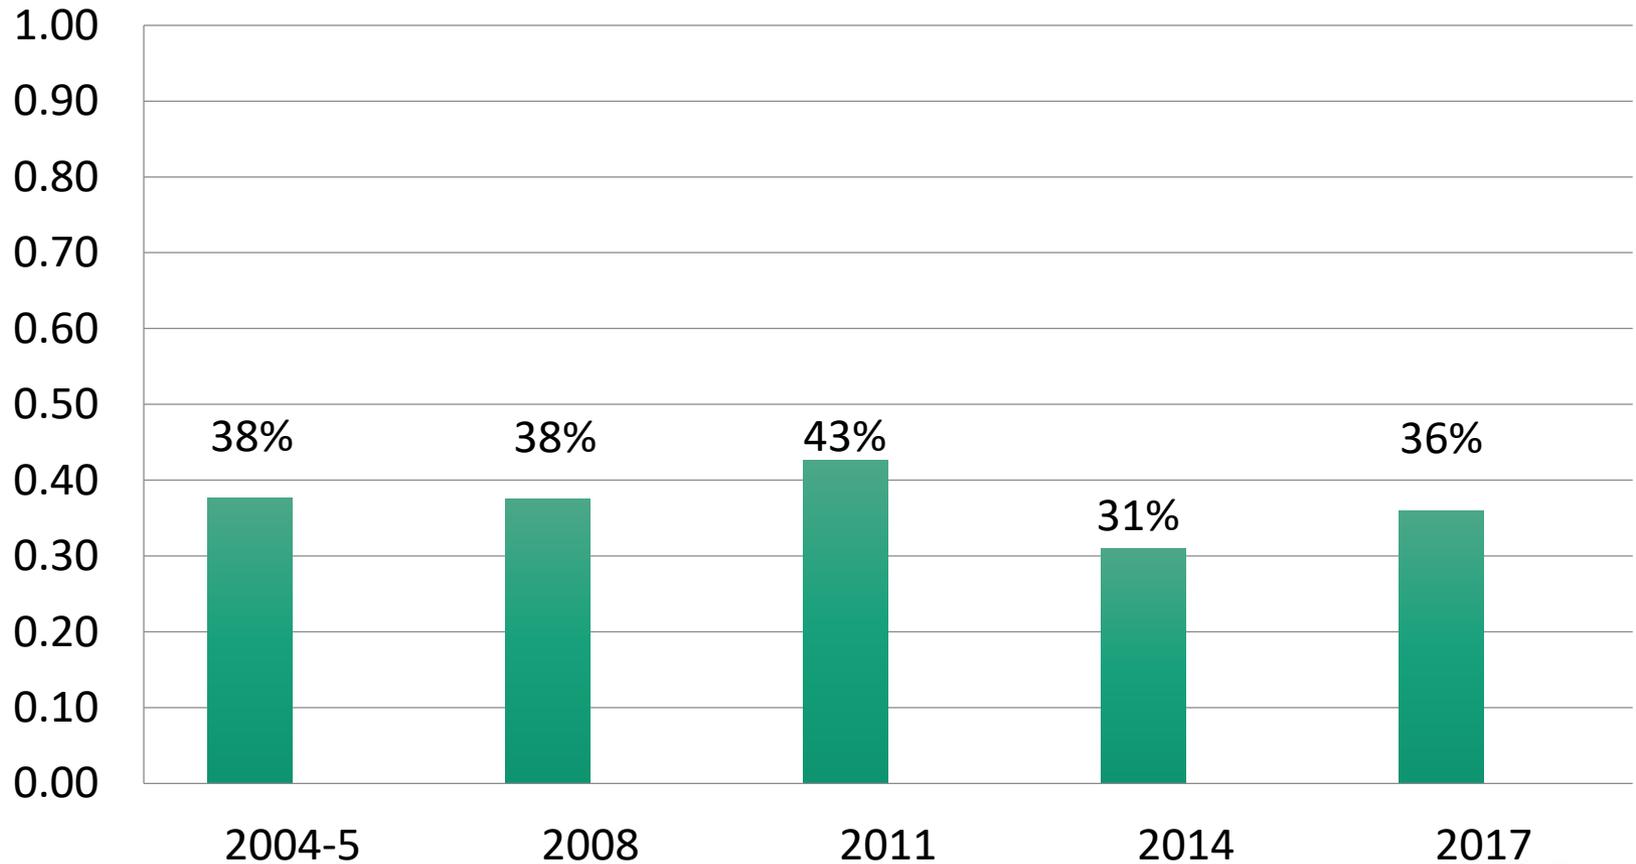

# Sample size

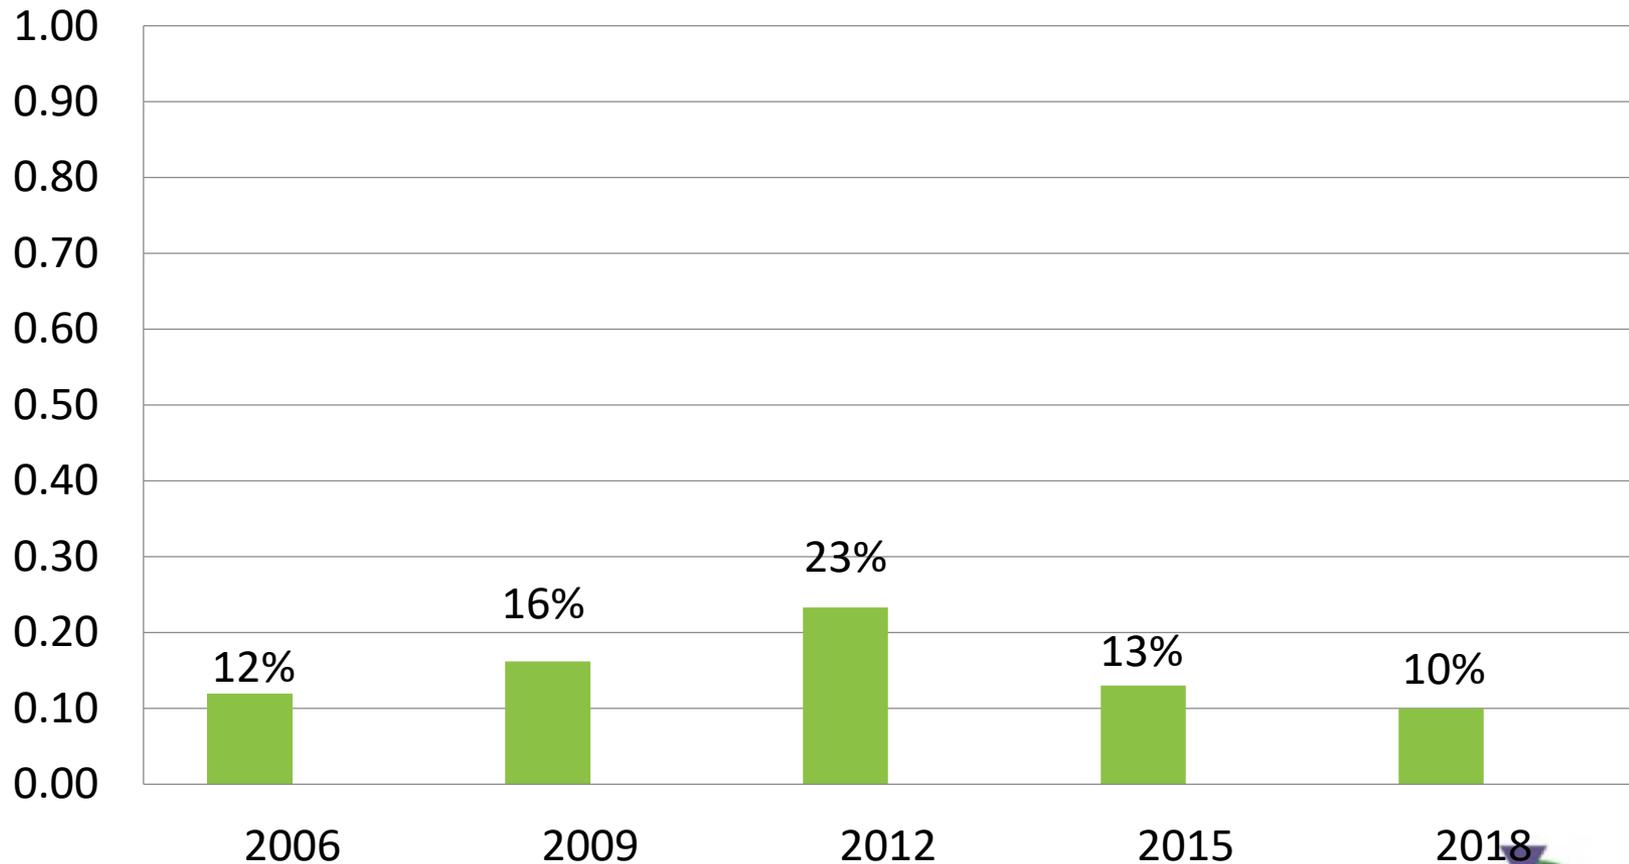

# HIV Prevalence 2004- 2018: MSM, IDU(PWID), HET

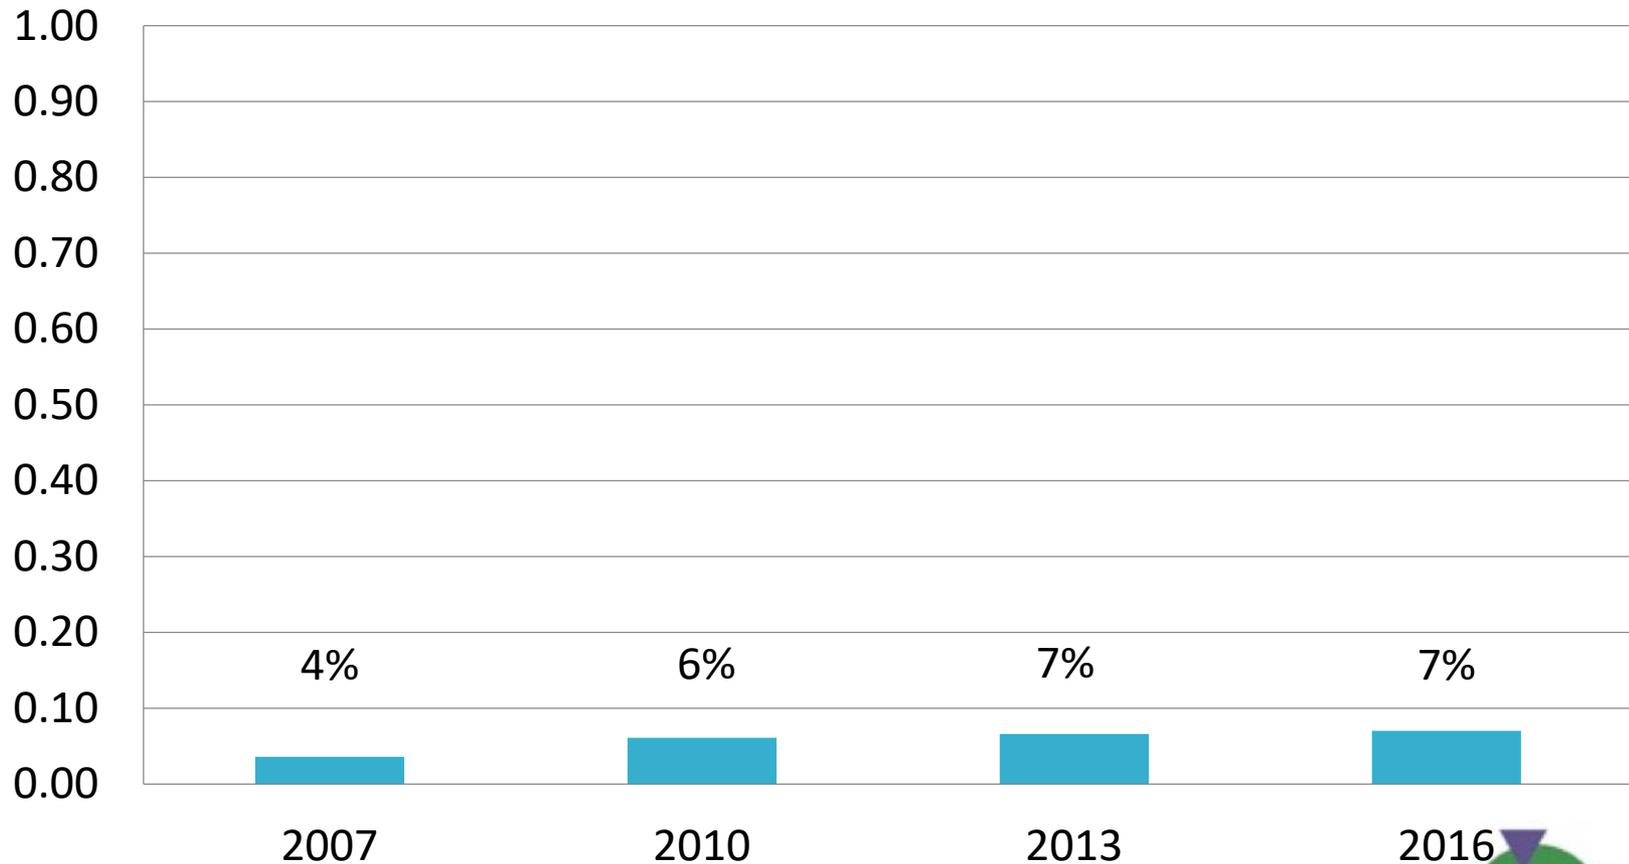

# HIV prevalence: BESURE MSM waves 2004-2017

# HIV prevalence: BESURE IDU/PWID waves 2006-2018

# HIV prevalence: BESURE HET waves 2004-2016

# HIV 'Cascade' Indicators

# HIV 'cascade' indicators

## HIV testing behavior

- Ever tested for HIV
- Tested in the past 2 years
- Tested in the past year

## HIV diagnosis

- Positive test result
- Previously aware
- Newly diagnosed

## HIV care (among self-report)

- Ever provider
- Past year
- Taking ARV

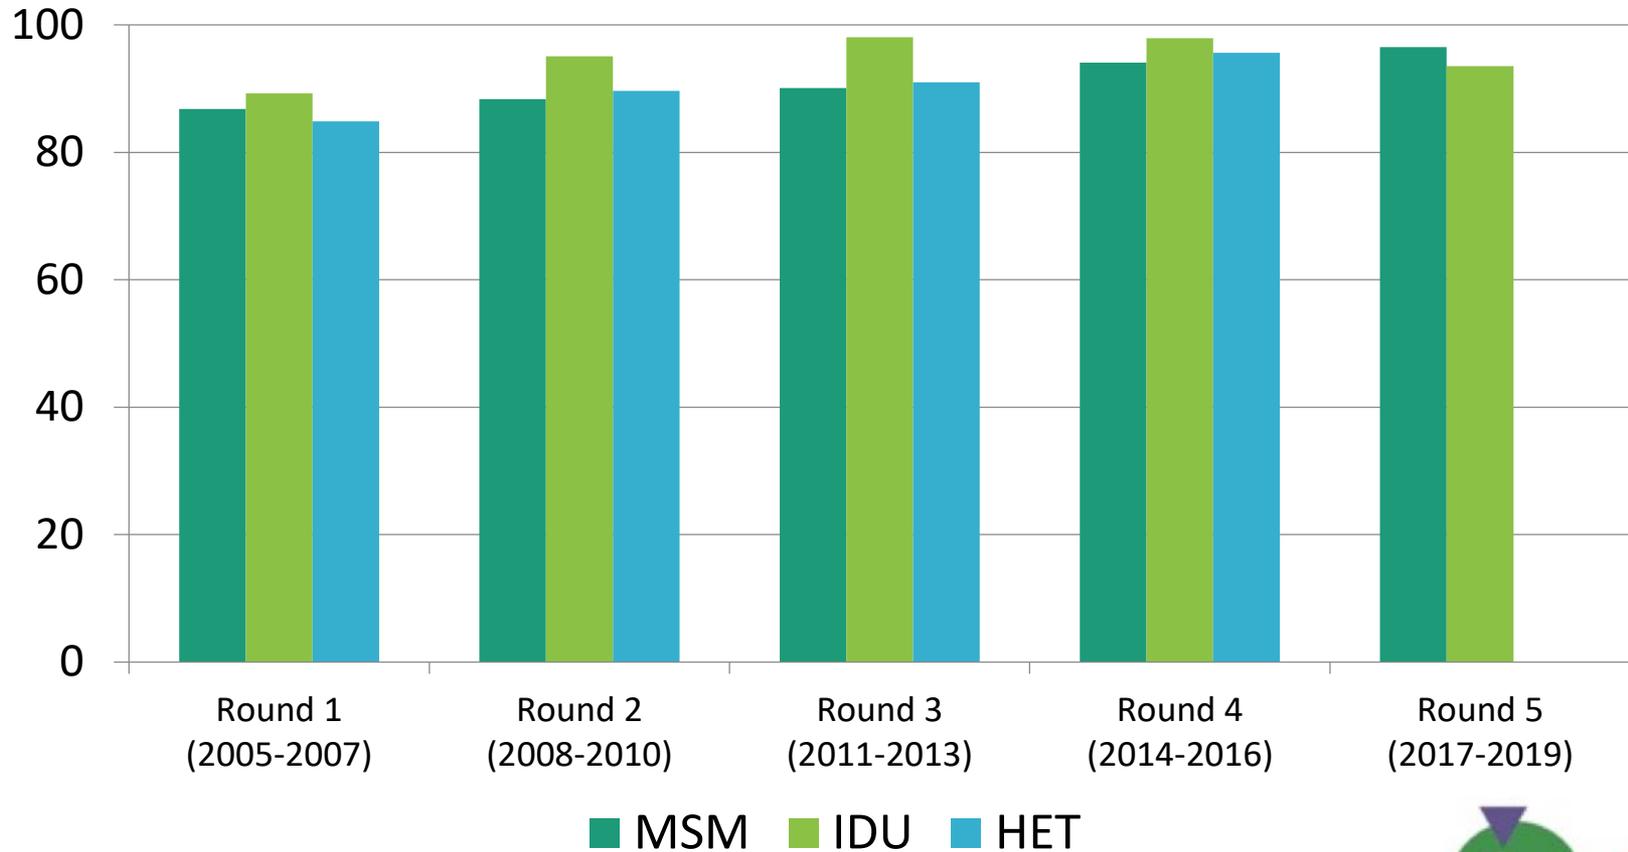

## Virally suppressed (self-report)

- Self-reported viral suppression

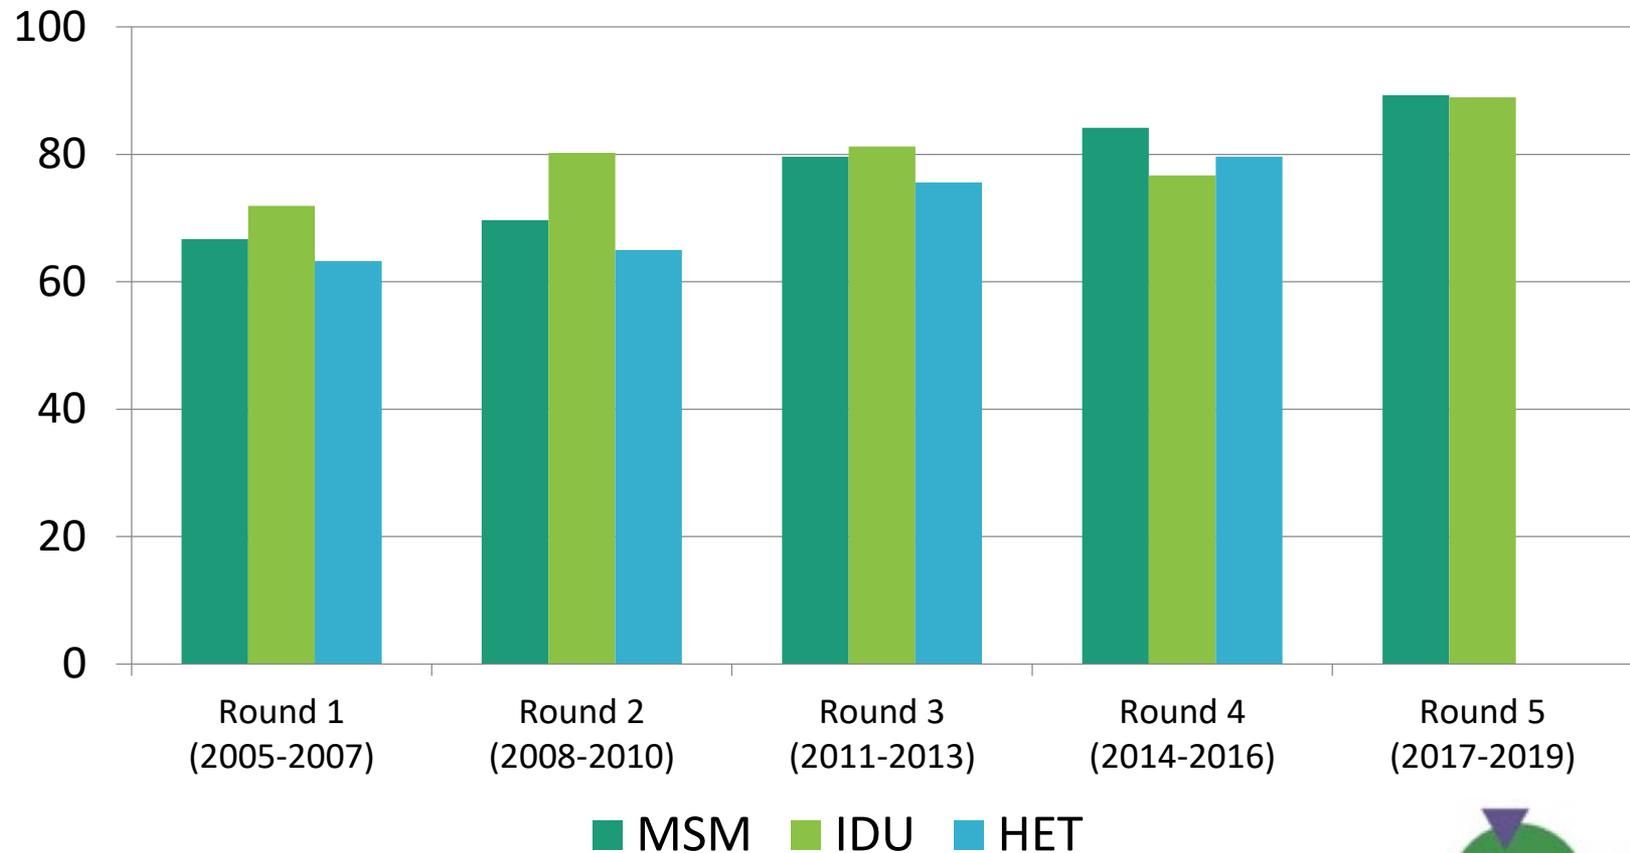

# Ever tested for HIV

*among all study participants*

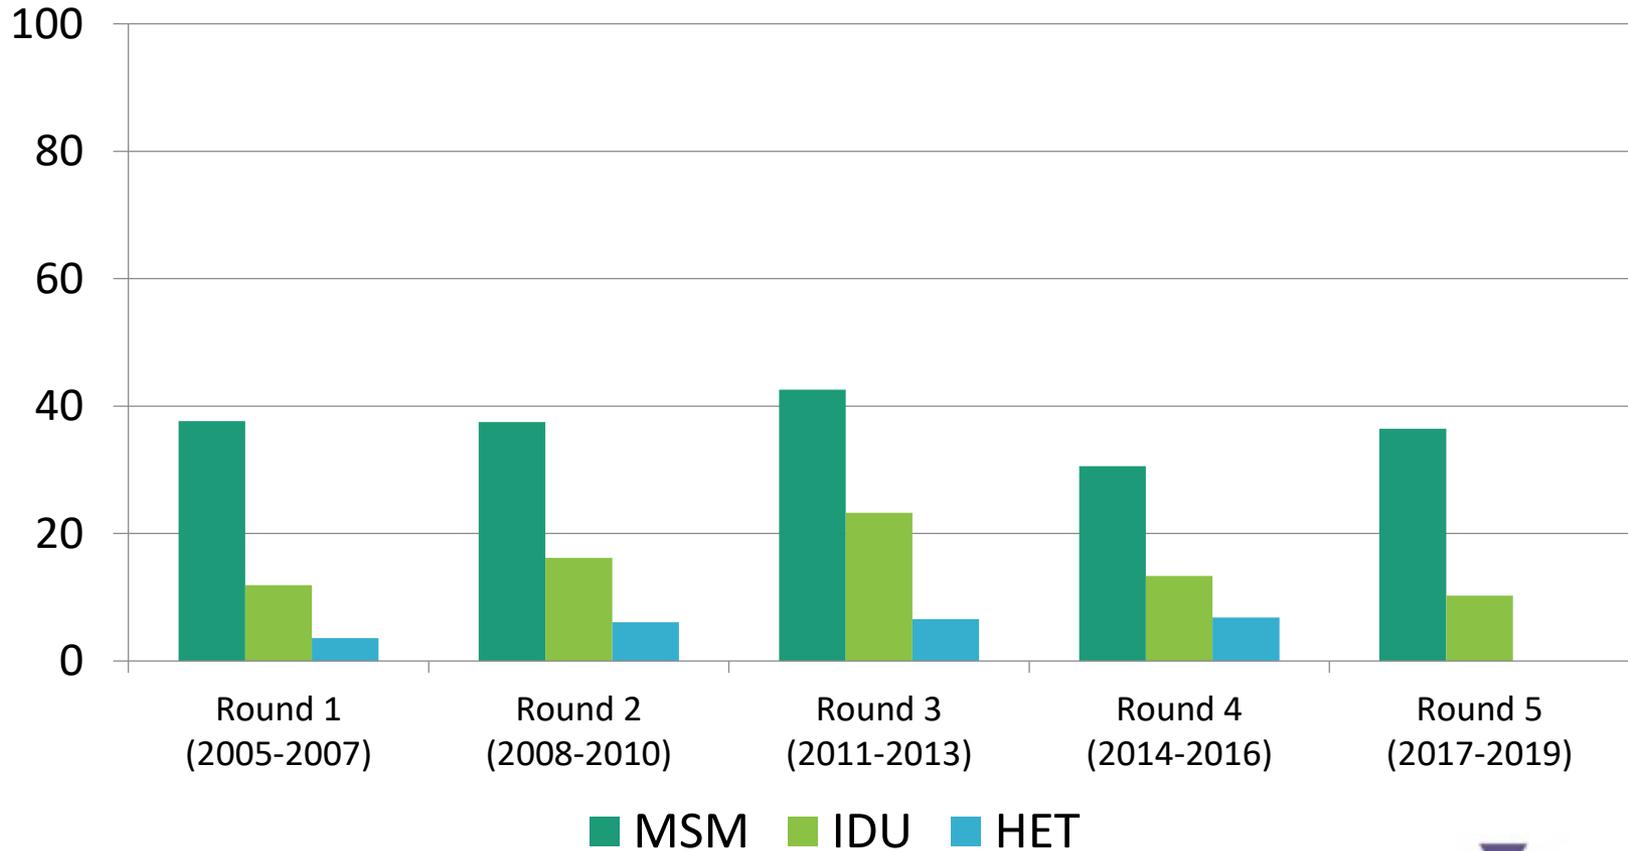

# Tested in the past two years

*among self-reported HIV-negative participants*

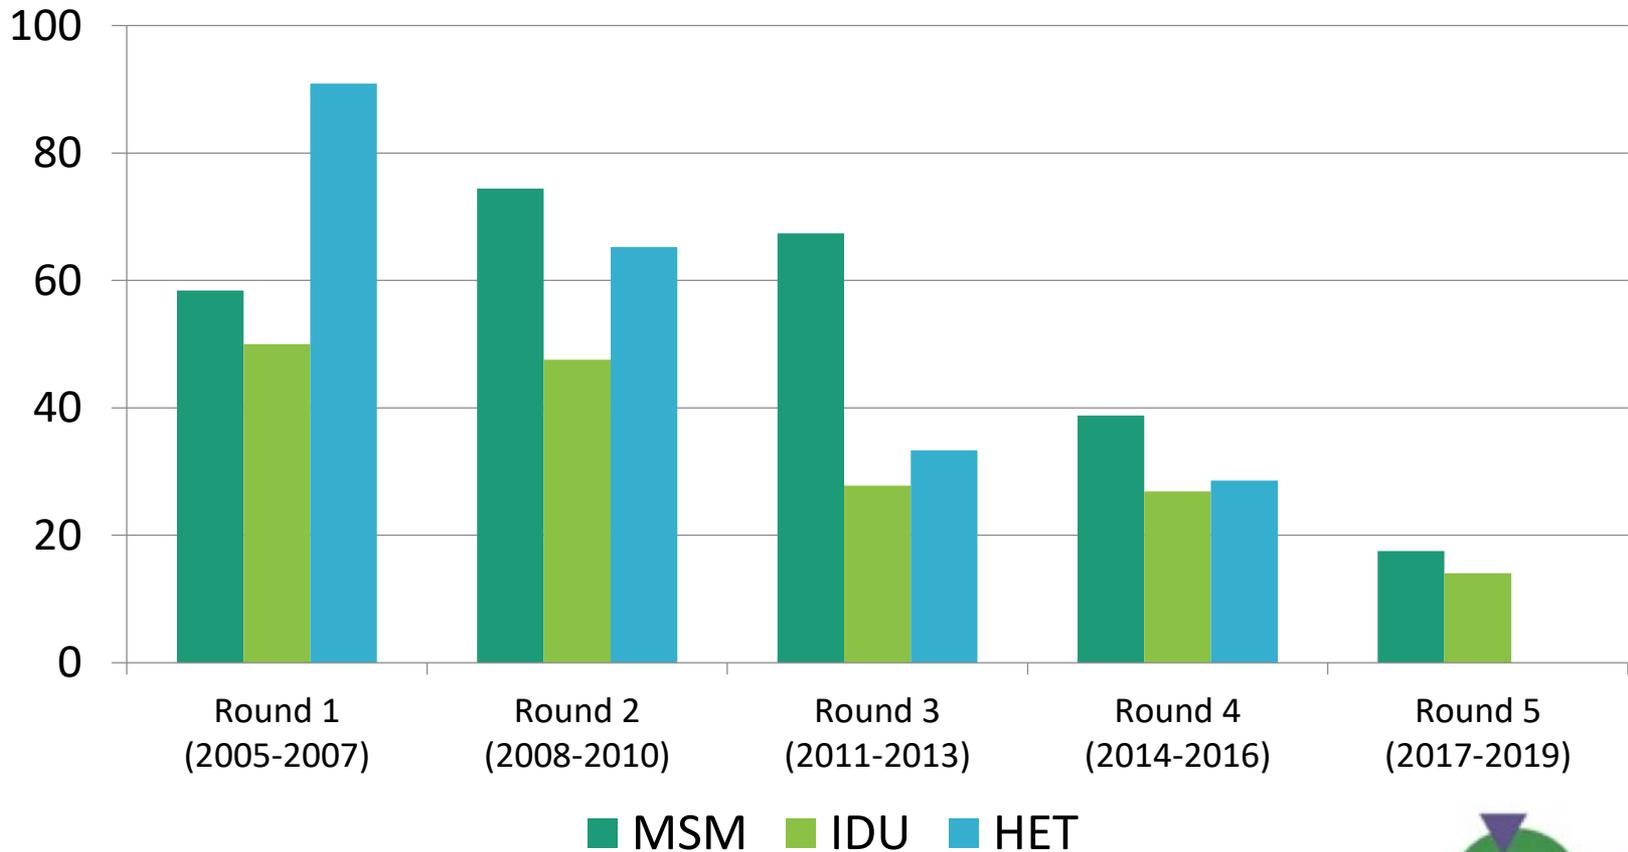

# HIV positive test result

among all participants

# Newly diagnosed

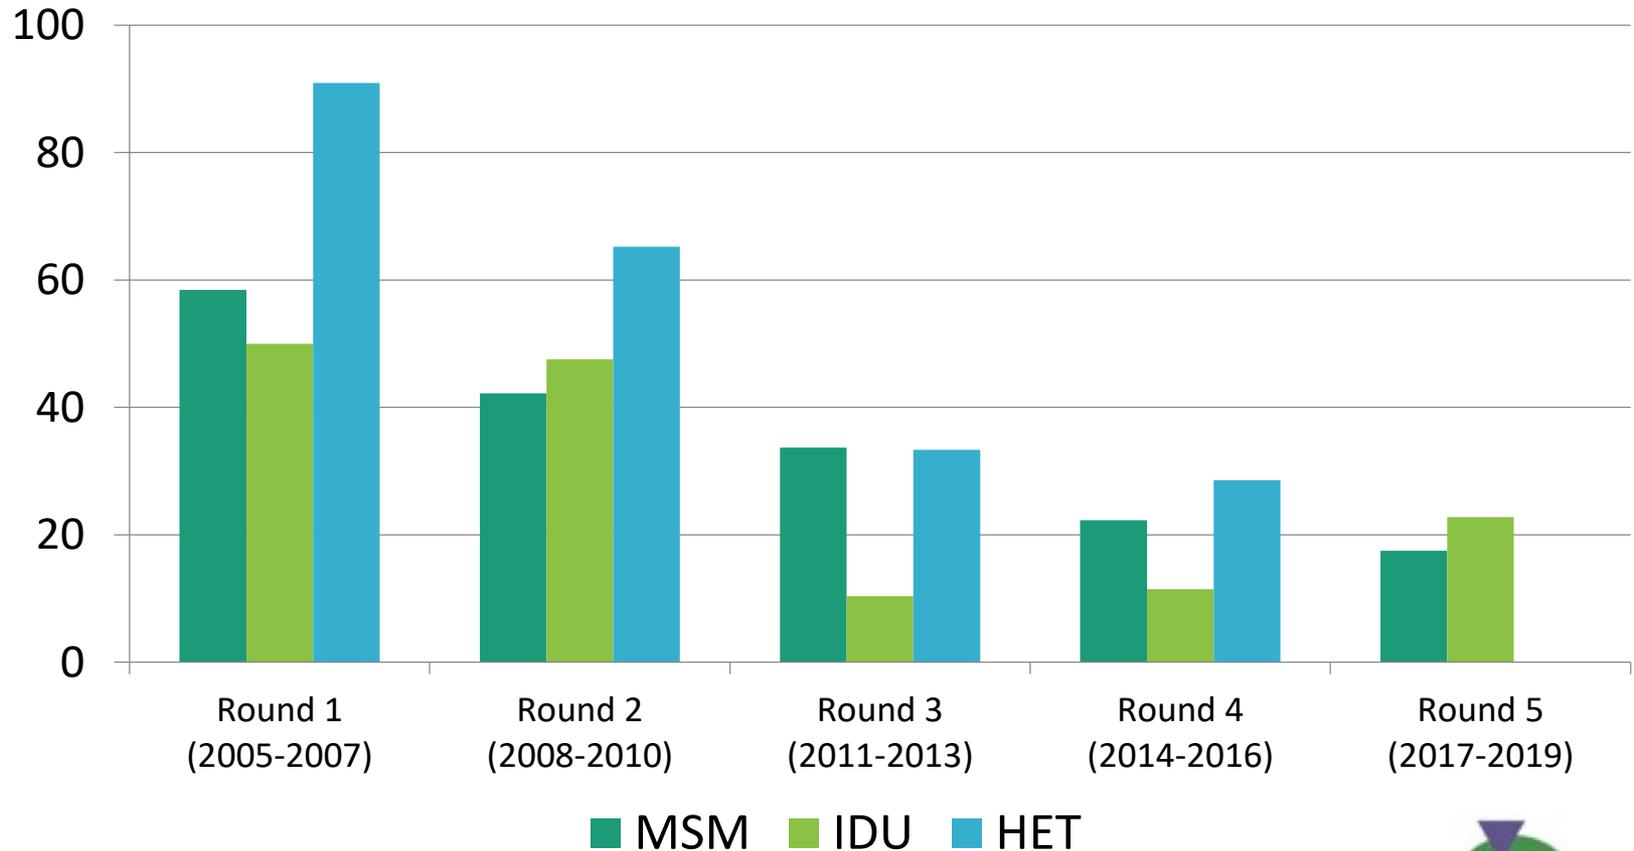

among participants who tested positive

# Newly diagnosed

among participants who tested positive

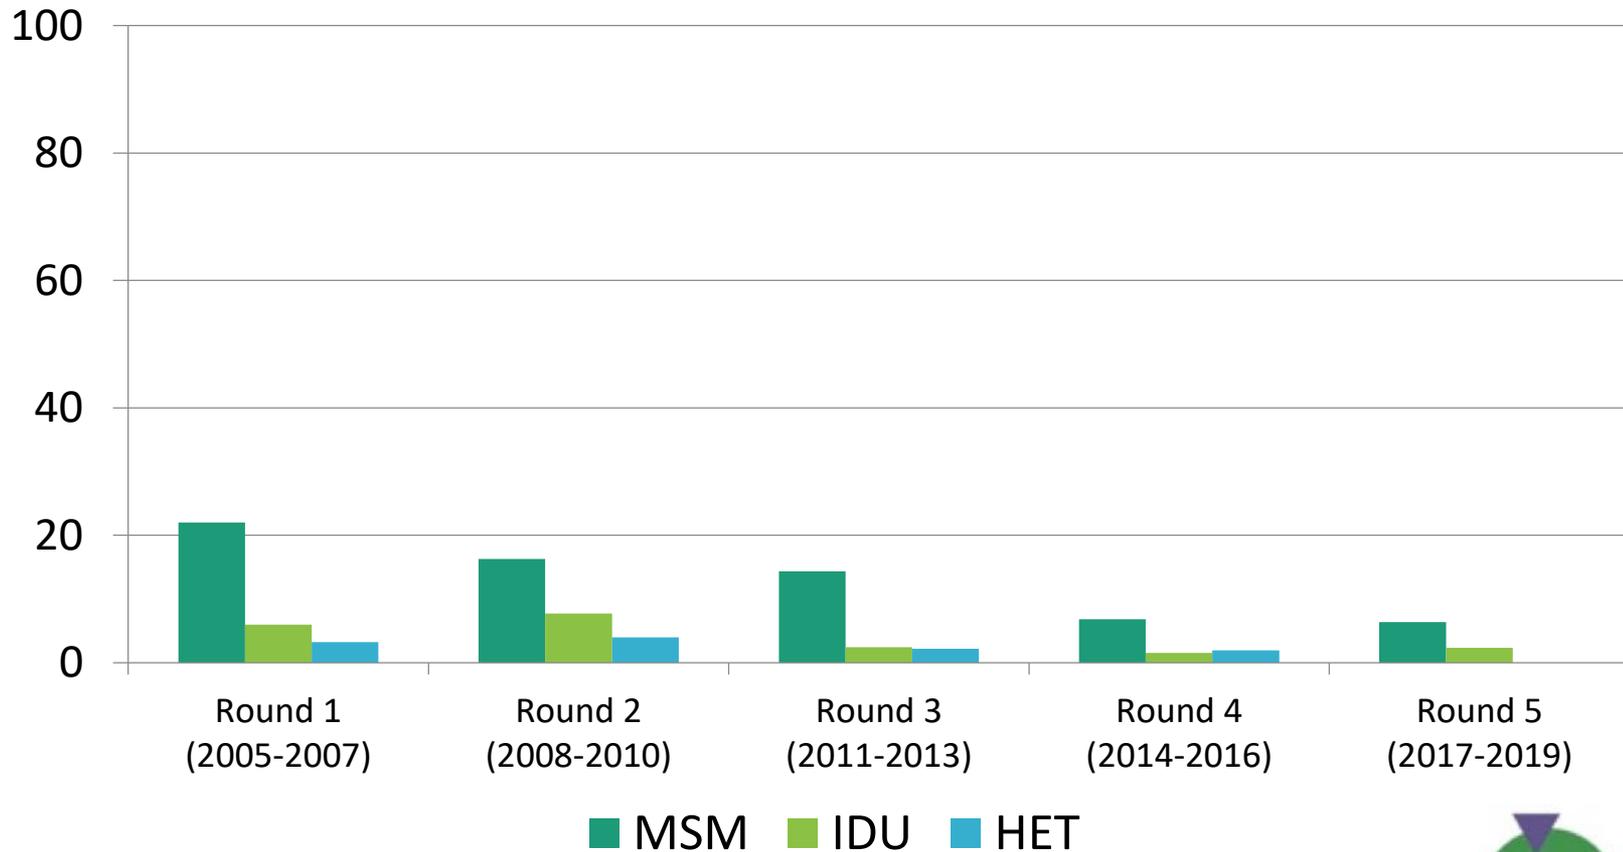

MSM2-4, IDU3-4 are ART-adjusted

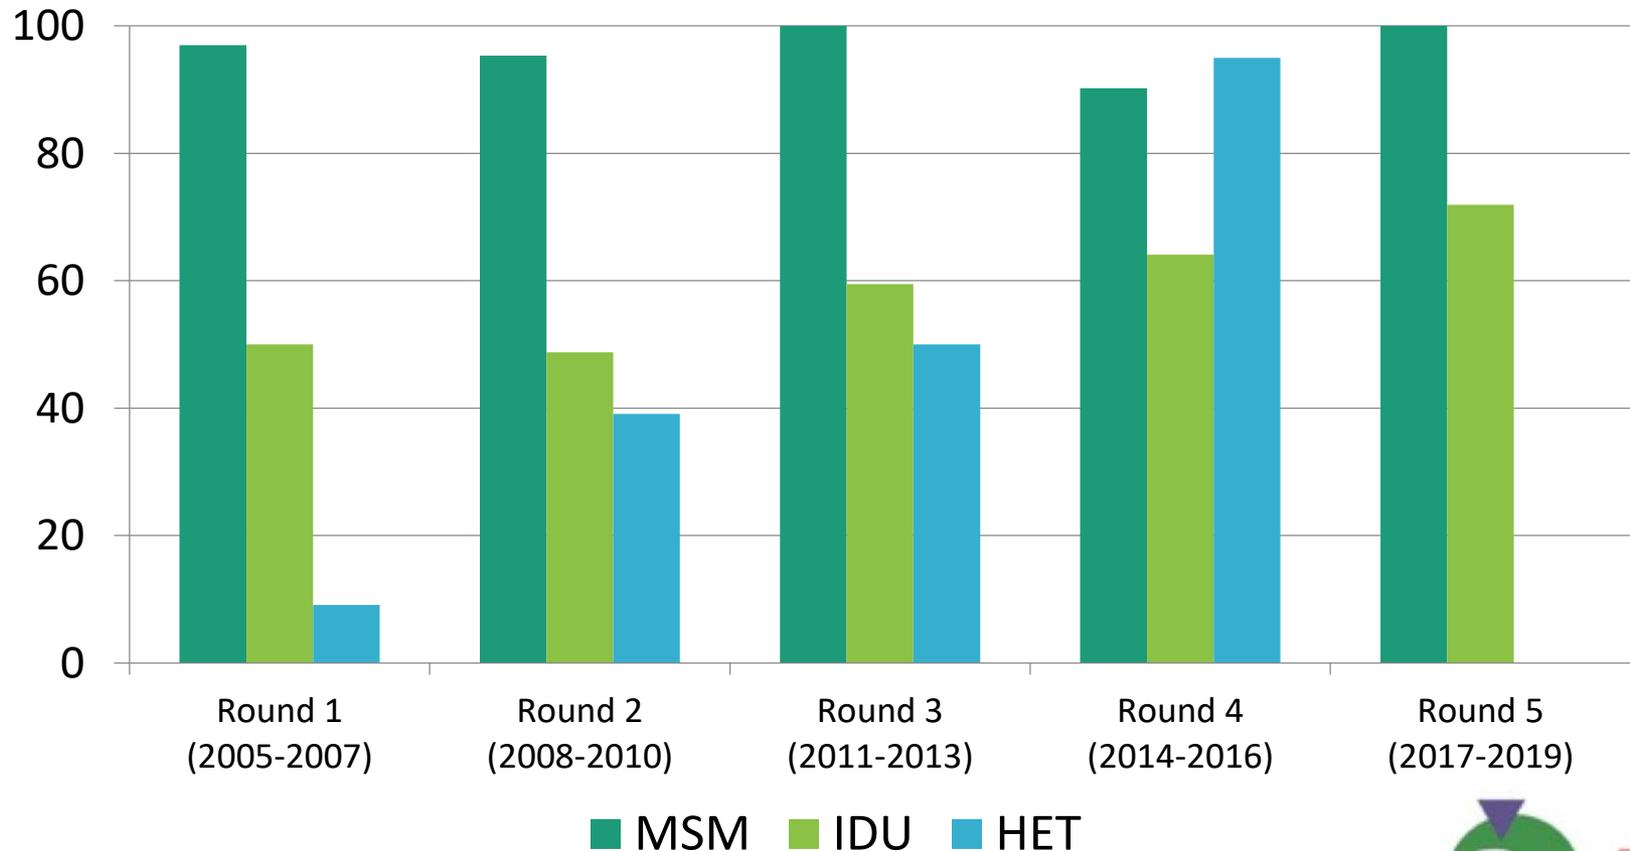

# Newly diagnosed

among all participants

MSM2-4, IDU3-4 are ART-adjusted

# Ever seen an HIV care provider among participants who reported an HIV diagnosis

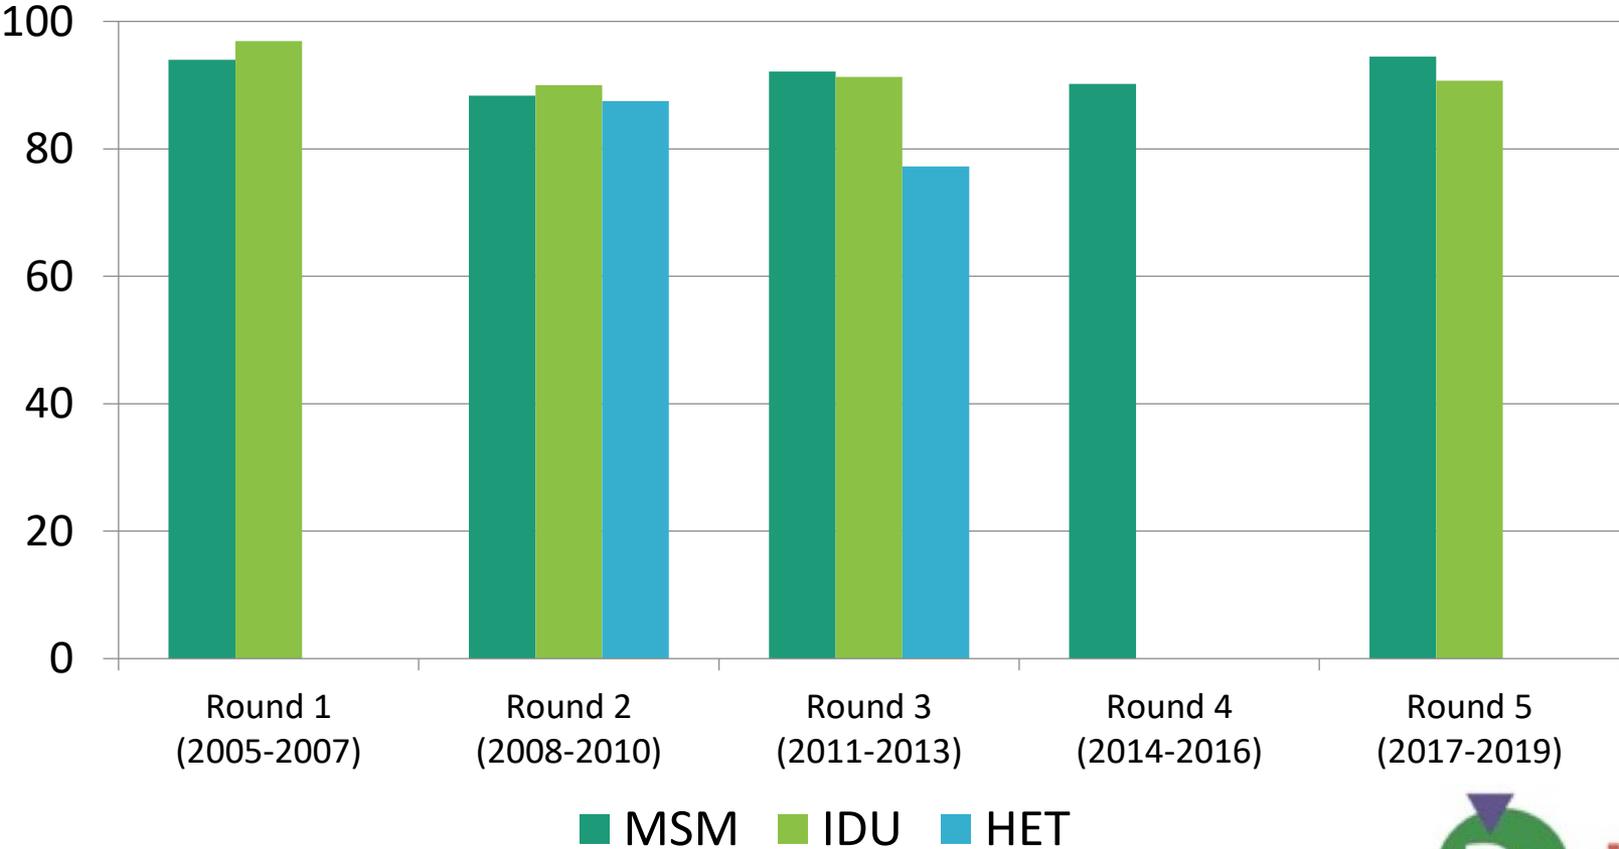

Note: small overall n,  
especially in HET cycles

# Seen an HIV care provider in the past year

among participants who have seen provider

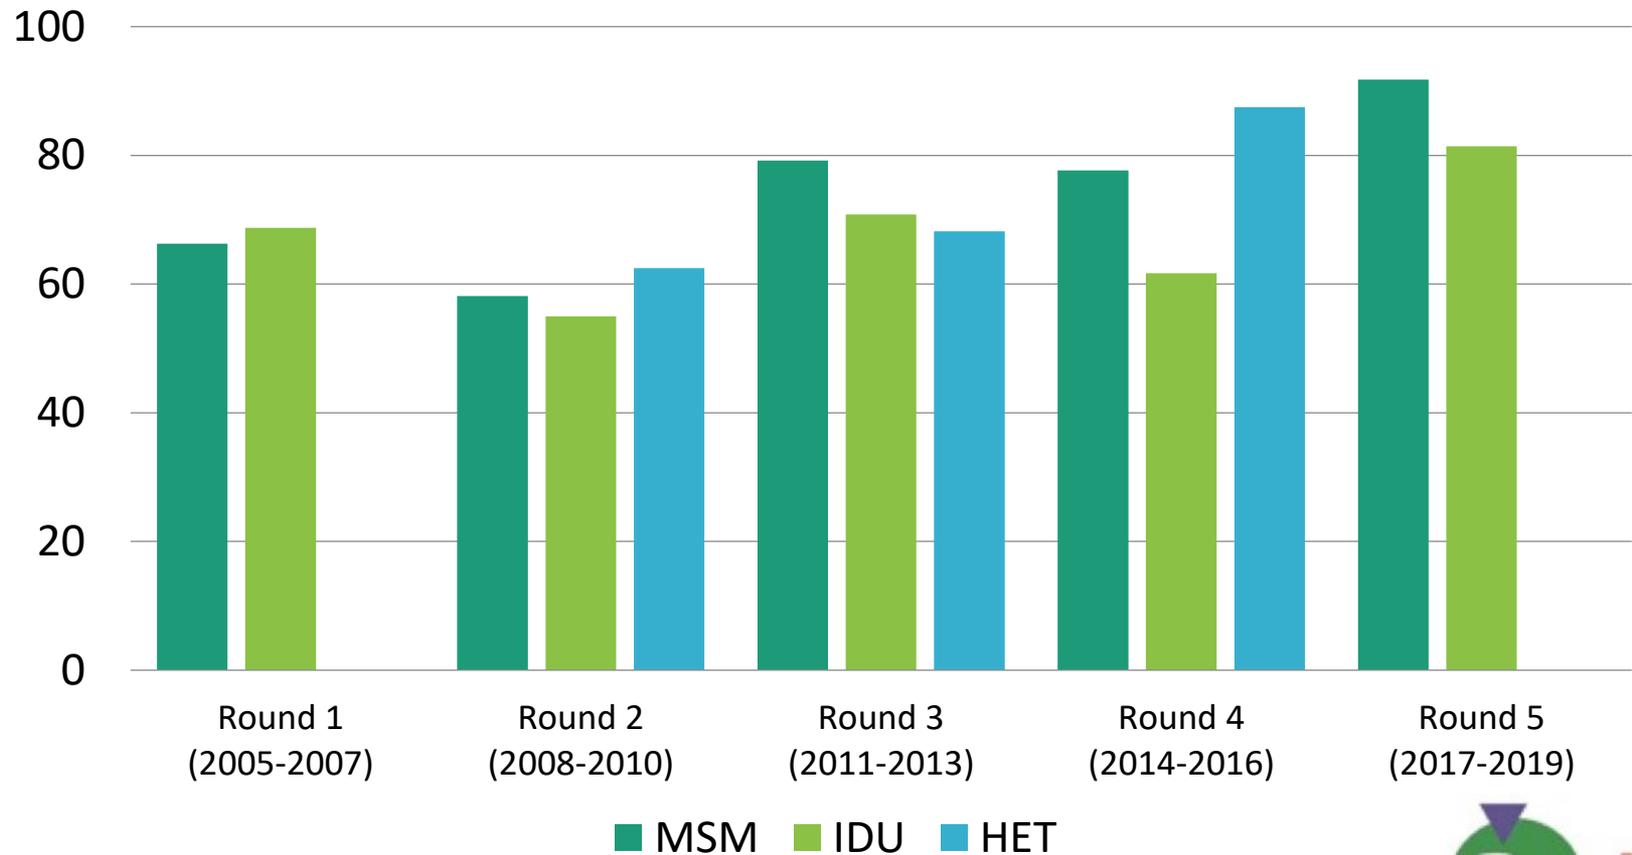

Dates are missing for IDU4 & HET4.

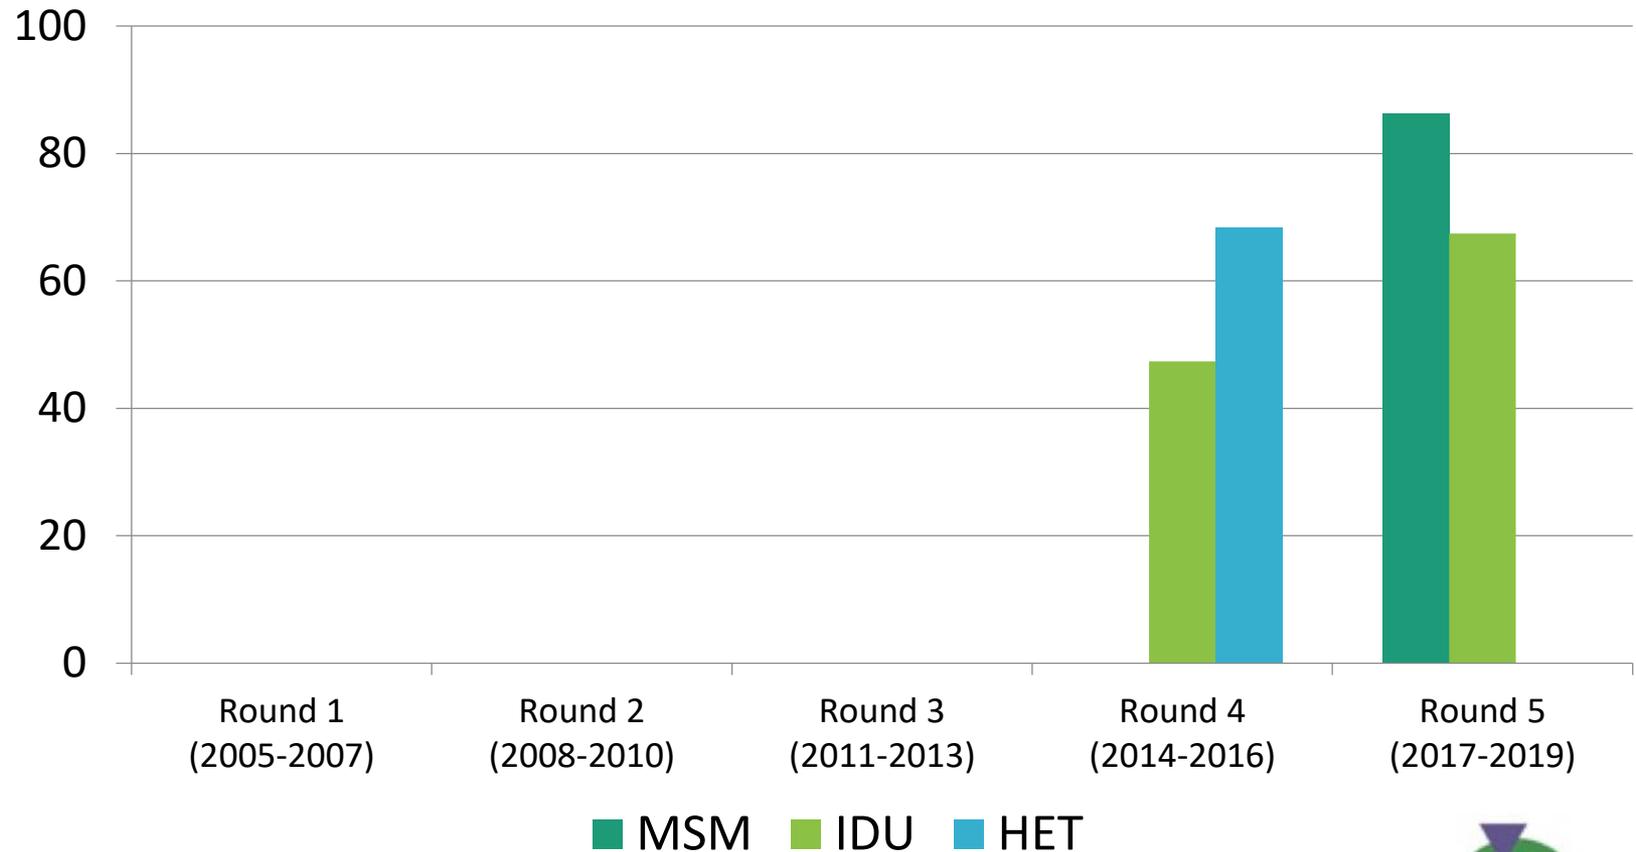

# Taking antiretroviral medications

among participants who reported an HIV diagnosis

# Viral suppression (undetectable\*)

among participants who reported an HIV diagnosis

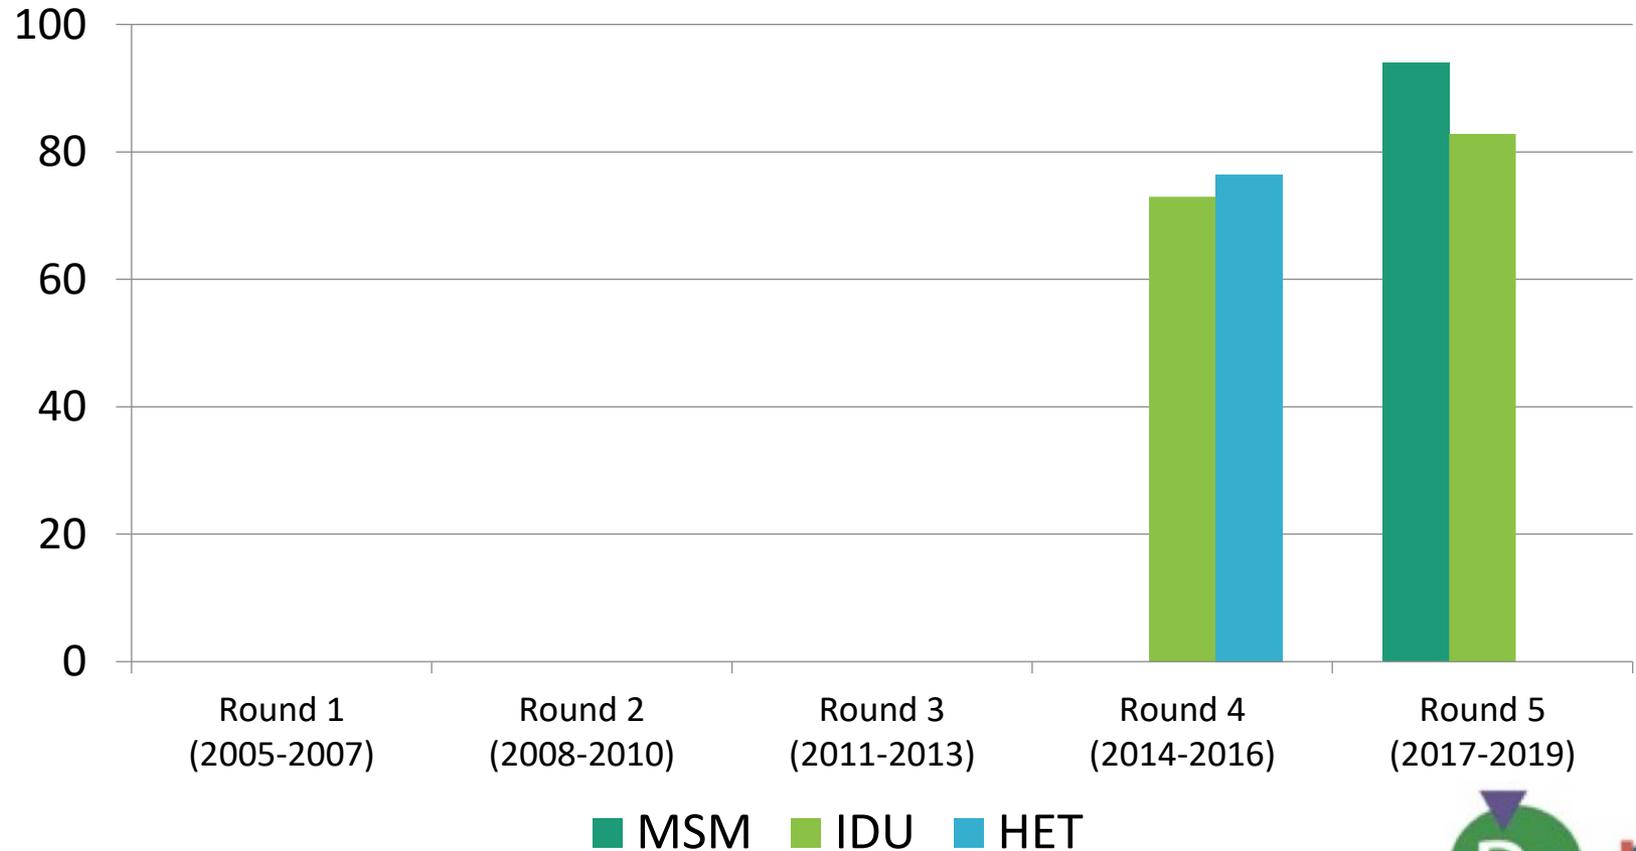

\* self-reported

# Viral suppression (undetectable\*)

among participants who reported taking antiretroviral medications

\* self-reported

# BESURE IDU5 Data Update

Socio-demographics and socio-behavioral indicators

HIV prevalence by race/ethnicity, age, geography

HIV drug-related risk behaviors

STI & HCV testing and prevalence

Selected local data

# Socio-demographics and key indicators, BESURE PWID 2009-2018

Characteristic		IDU2 (n=507)	IDU3 (n=620)	IDU4 (n=576)	IDU5 (n=555)
Race/ Ethnicity	White, not Hispanic	16%	7%	19%	40%
	Black, not Hispanic	80%	89%	77%	54%
	Hispanic	1%	1%	1%	1%
	Other	4%	4%	3%	4%
Age	18-24	1%	1%	1%	2%
	25-34	12%	3%	8%	21%
	35-44	23%	82%	18%	16%
	45+	64%	67%	73%	61%
Sex	Male	72%	67%	72%	70%
	Female	27%	33%	28%	29%
	Transgender	1%	1%	1%	1%
Sexual identity	Other	8%	13%	14%	11%
	Heterosexual or Straight	92%	87%	86%	89%

# Socio-demographics and key indicators, BESURE IDU 2009-2018

Characteristic		IDU2 (n=507)	IDU3 (n=620)	IDU4 (n=576)	IDU5 (n=555)
County of Residence	Baltimore City	96%	97%	94%	86%
	Baltimore County	3%	2%	5%	13%
	Other County in MSA	1%	1%	1%	1%
Education	High school/GED or less	83%	84%	81%	76%
	College or some college	17%	16%	19%	24%
Employment	Unemployed	46%	41%	53%	61%
	Full or Part-time	12%	7%	8%	12%
Median annual household income	(mid-point)	\$5,000-\$9,999	\$5,000-\$9,999	\$5,000-\$9,999	\$5,000-\$9,999

# Socio-demographics and key indicators, BESURE PWID 2008-2017

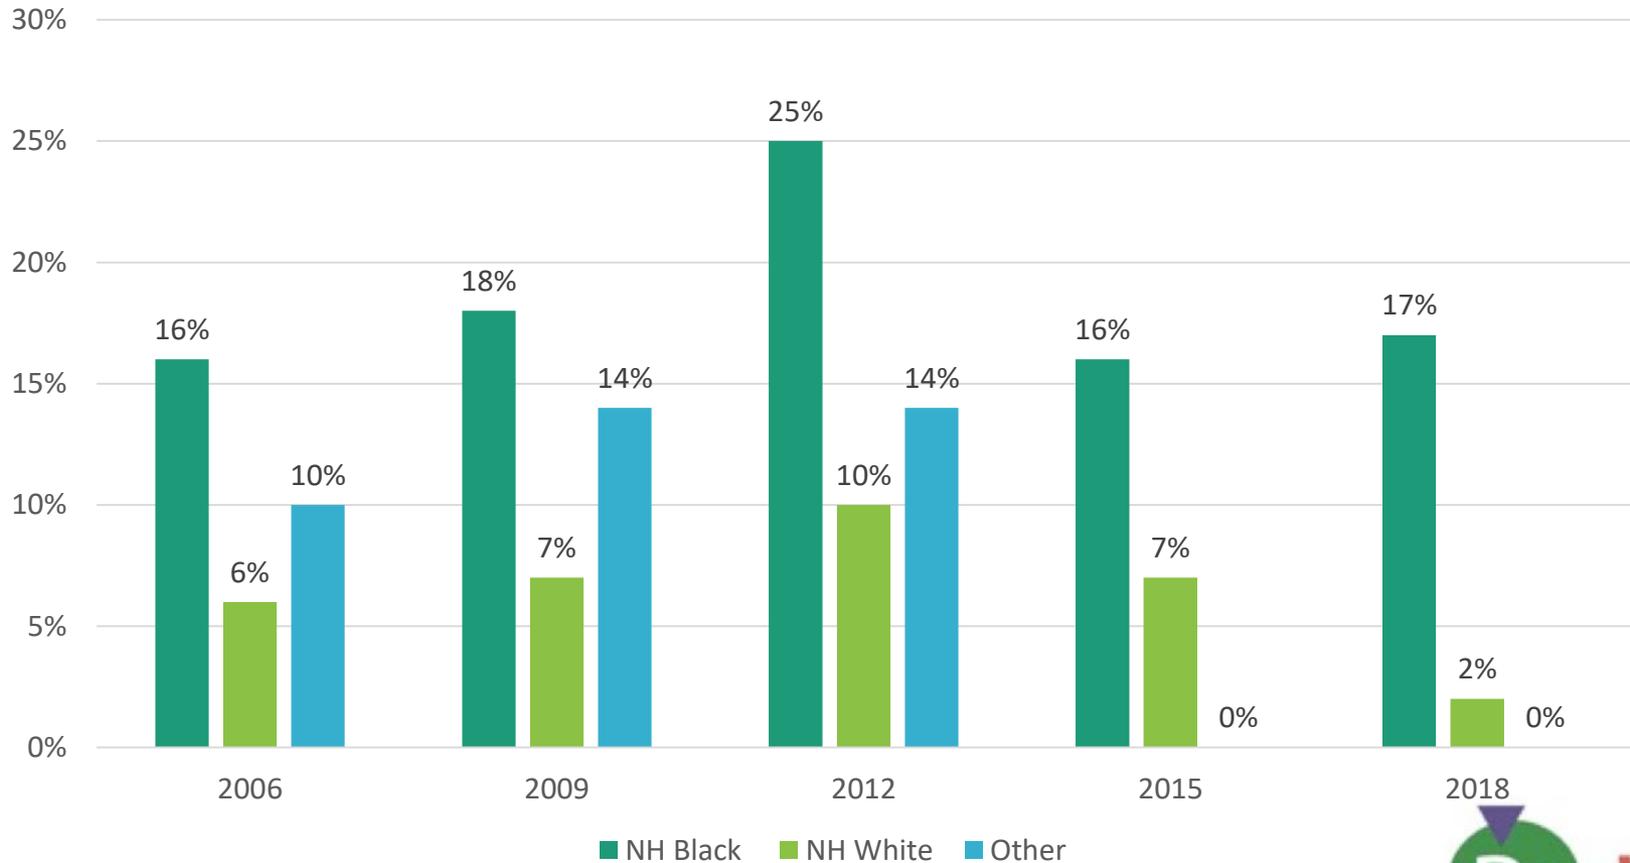

Characteristic		IDU2 (n=507)	IDU3 (n=620)	IDU4 (n=576)	IDU5 (n=555)
Health Insurance	Insured	59%	85%	86%	92%
Homelessness	Past year	54%	32%	43%	60%
	Current	31%	14%	26%	35%
Incarcerated*	Past year	44%	23%	21%	22%
Received money or goods in exchange for sex**	Past year	NA	NA	28%	19%

\* In IDU2, the definition of homelessness included “temporarily staying with friends or relatives.”

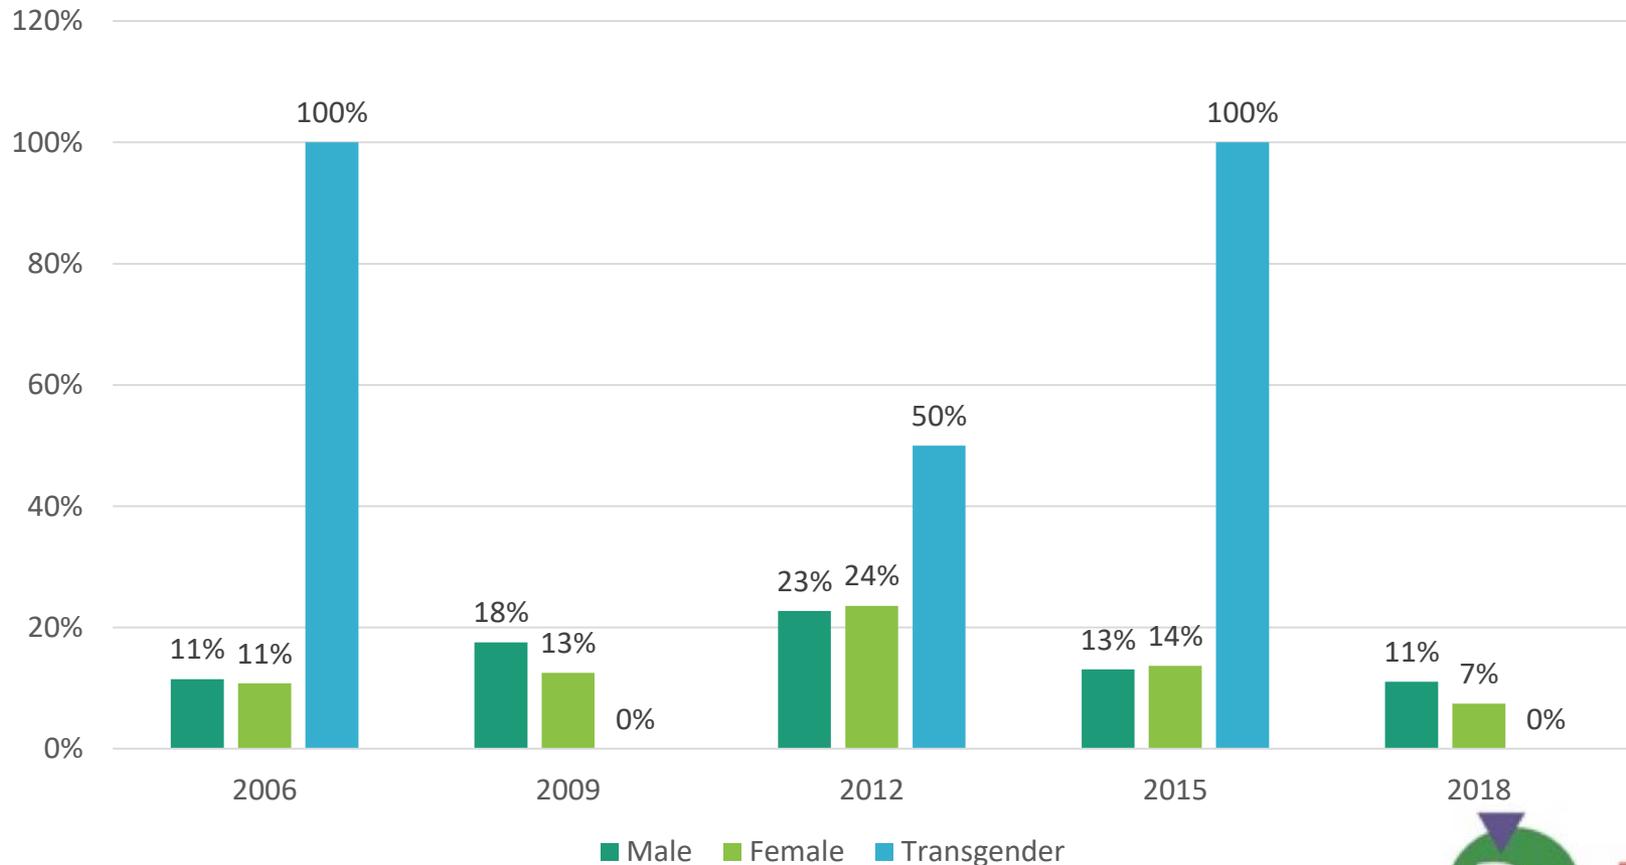

\*\* Transactional sex asked differently in different years: In IDU5 direct item in local survey while in IDU4 constructed from NHBS core survey items.

# HIV prevalence by race/ethnicity: PWID 2006-2018

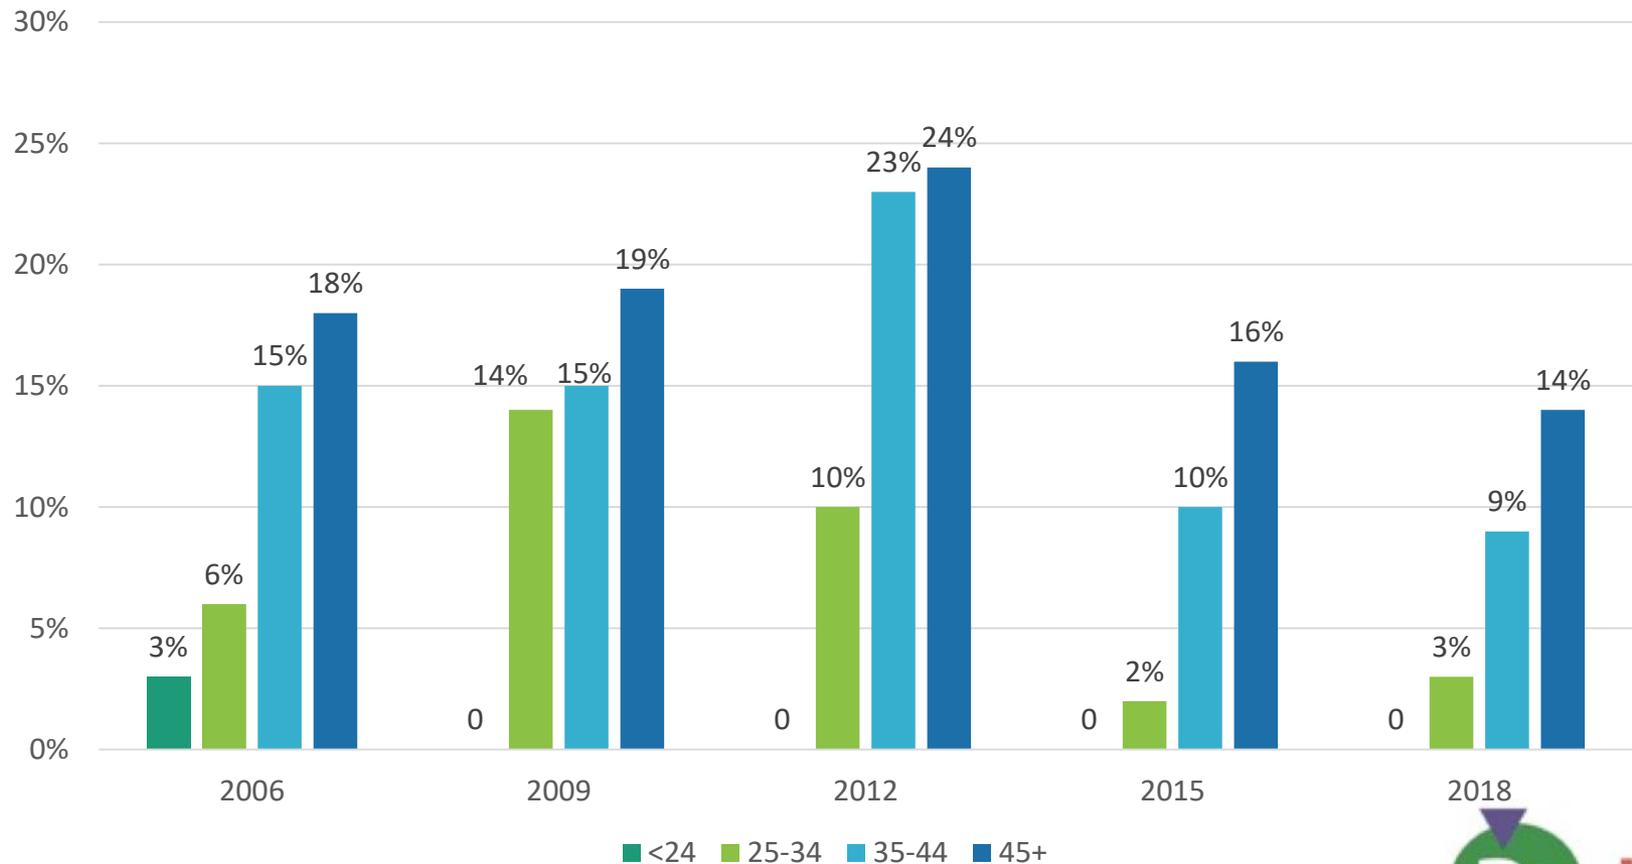

# HIV prevalence by gender: PWID 2006-2018

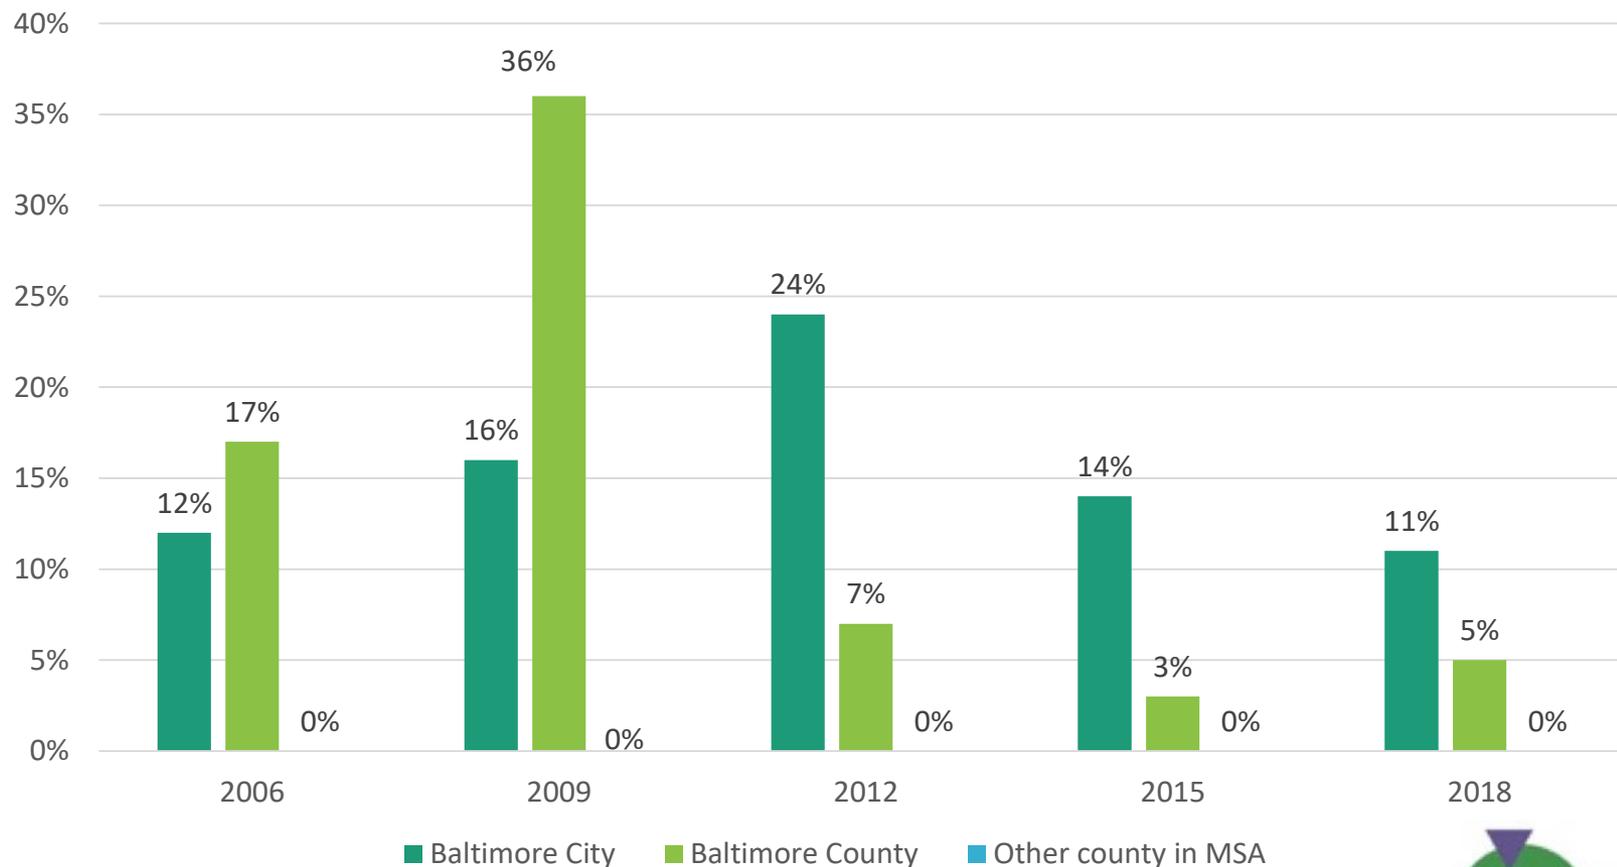

The numbers of transgender participants has been low (n<5).

# HIV prevalence by age: PWID 2006-2018

# HIV prevalence by county: PWID 2006-2018

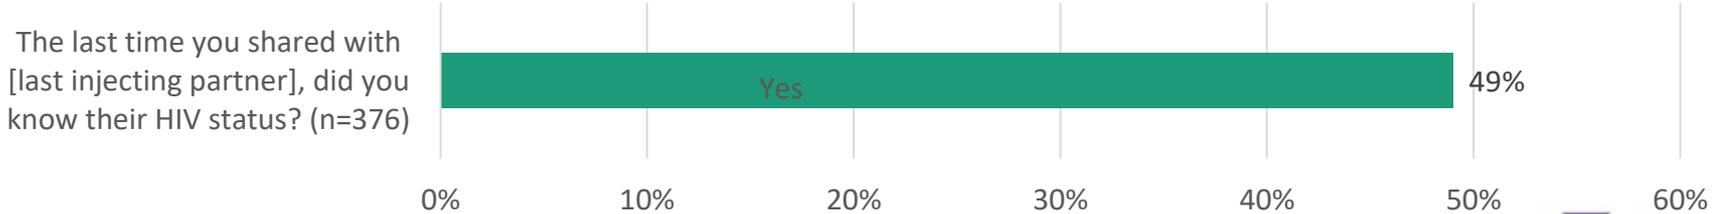

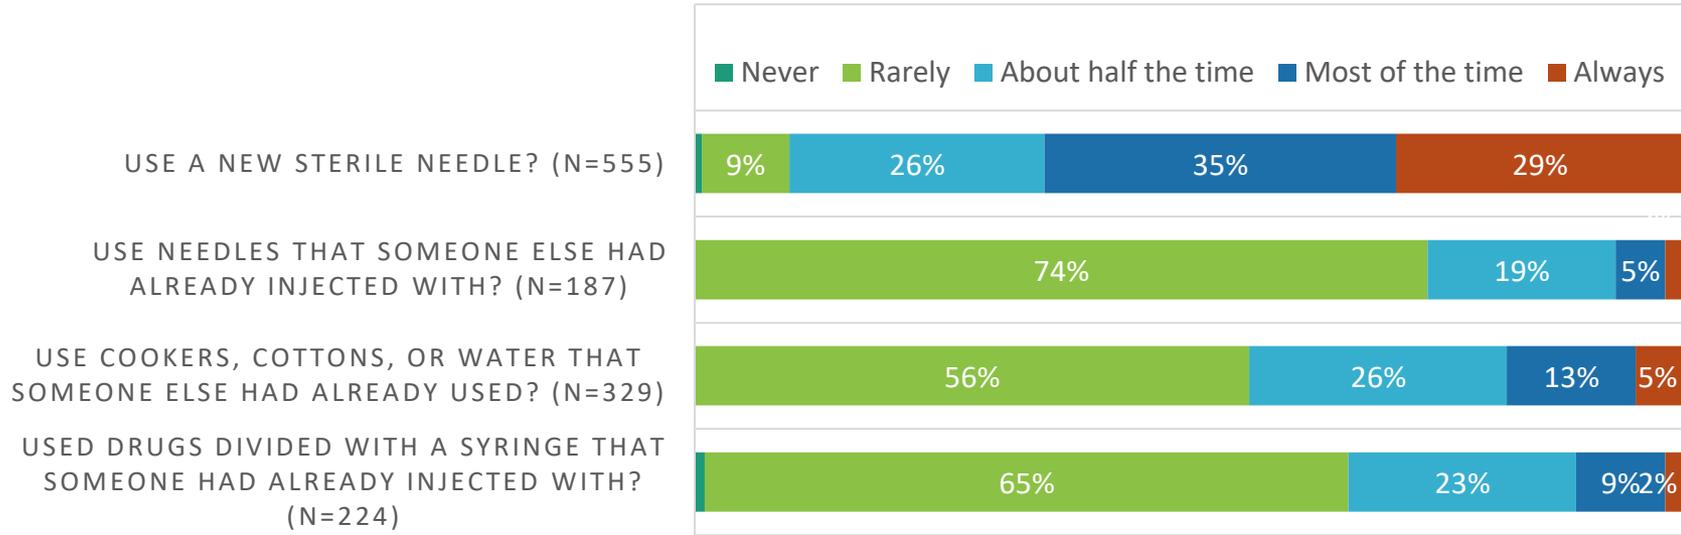

Very small proportion of participants outside of Baltimore City, especially prior to 2018

# HIV drug related risk behaviors: PWID 2018

*In the past 12 months, how often did you...*

35.4%  
59.4%  
40.4%

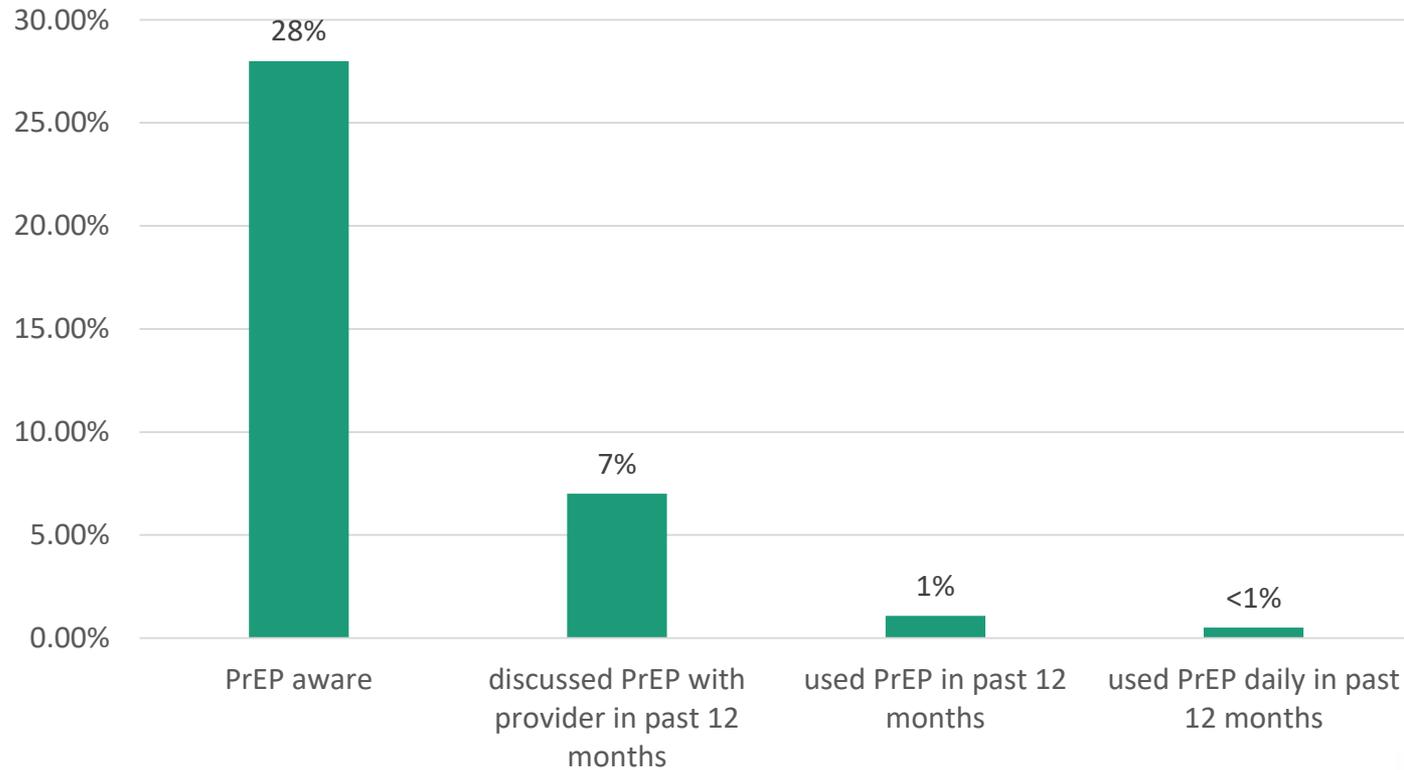

Among 67.7% who reported “sharing” any injection equipment in past year

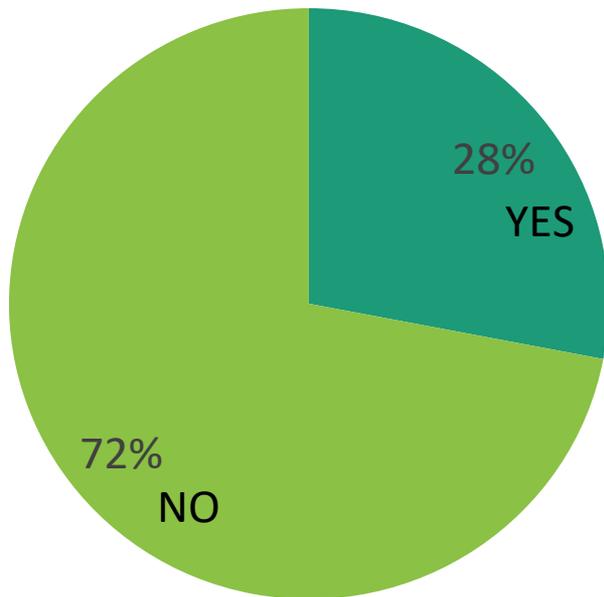

# PrEP: PWID 2018

among those who reported being HIV negative (n=512)

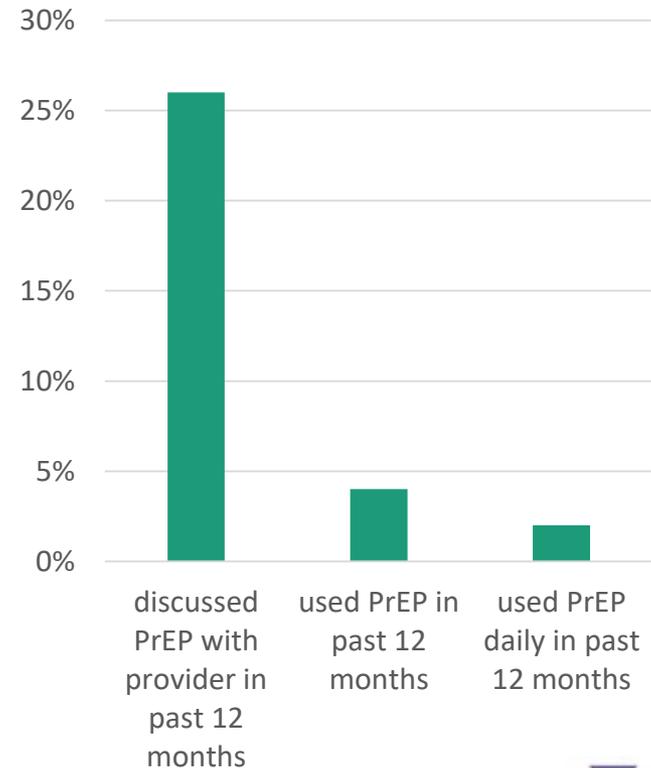

# PrEP: PWID 2018

among those who reported being HIV negative (n=512)

PrEP aware

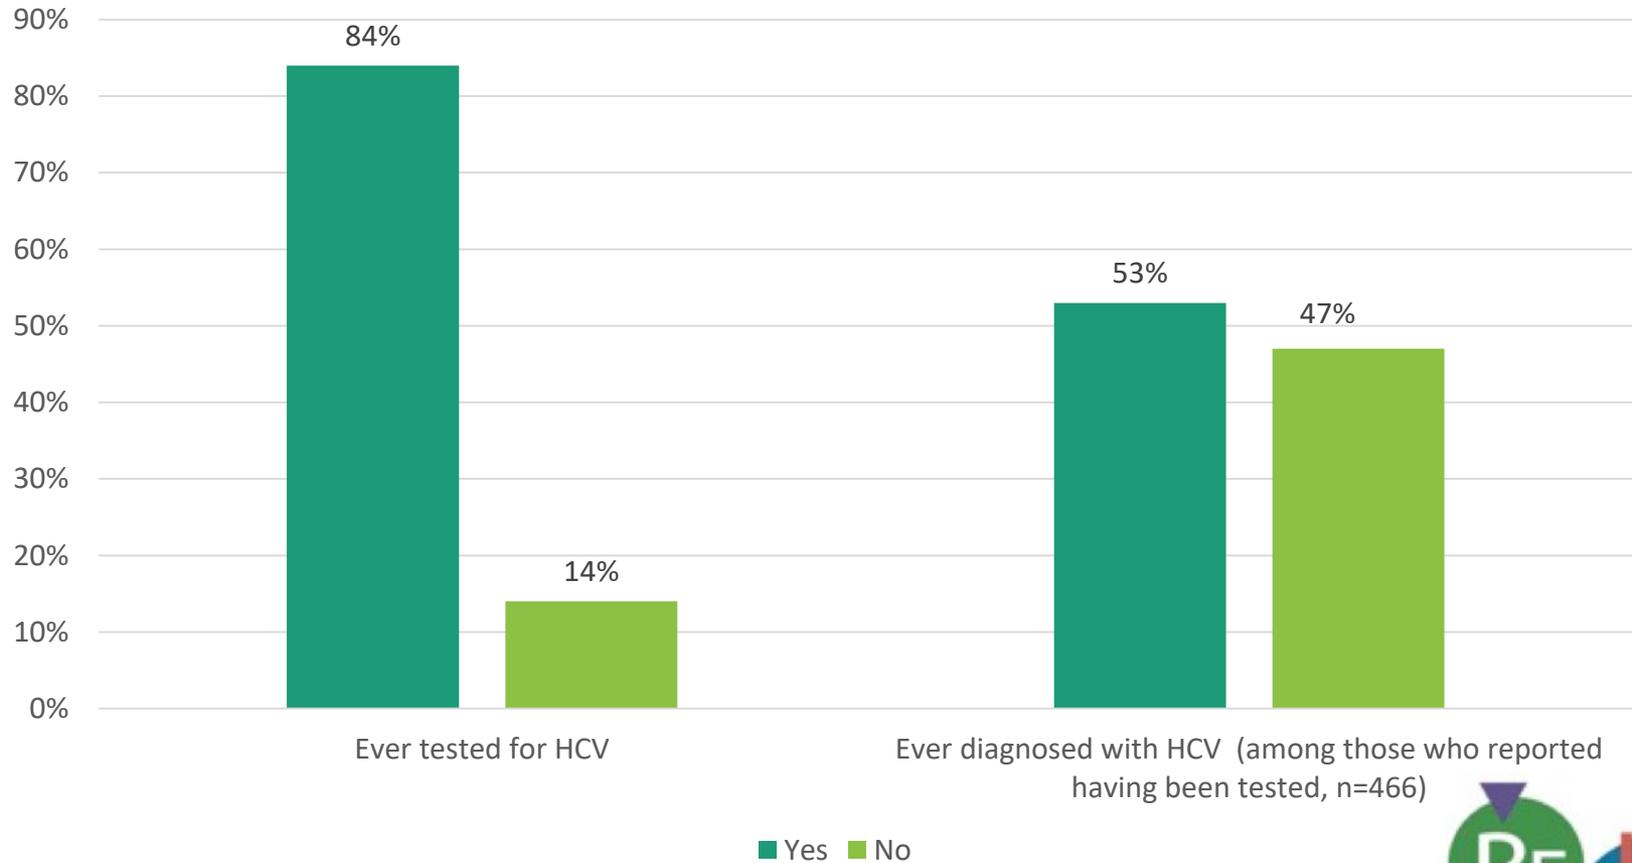

among those aware of PrEP (n=141)

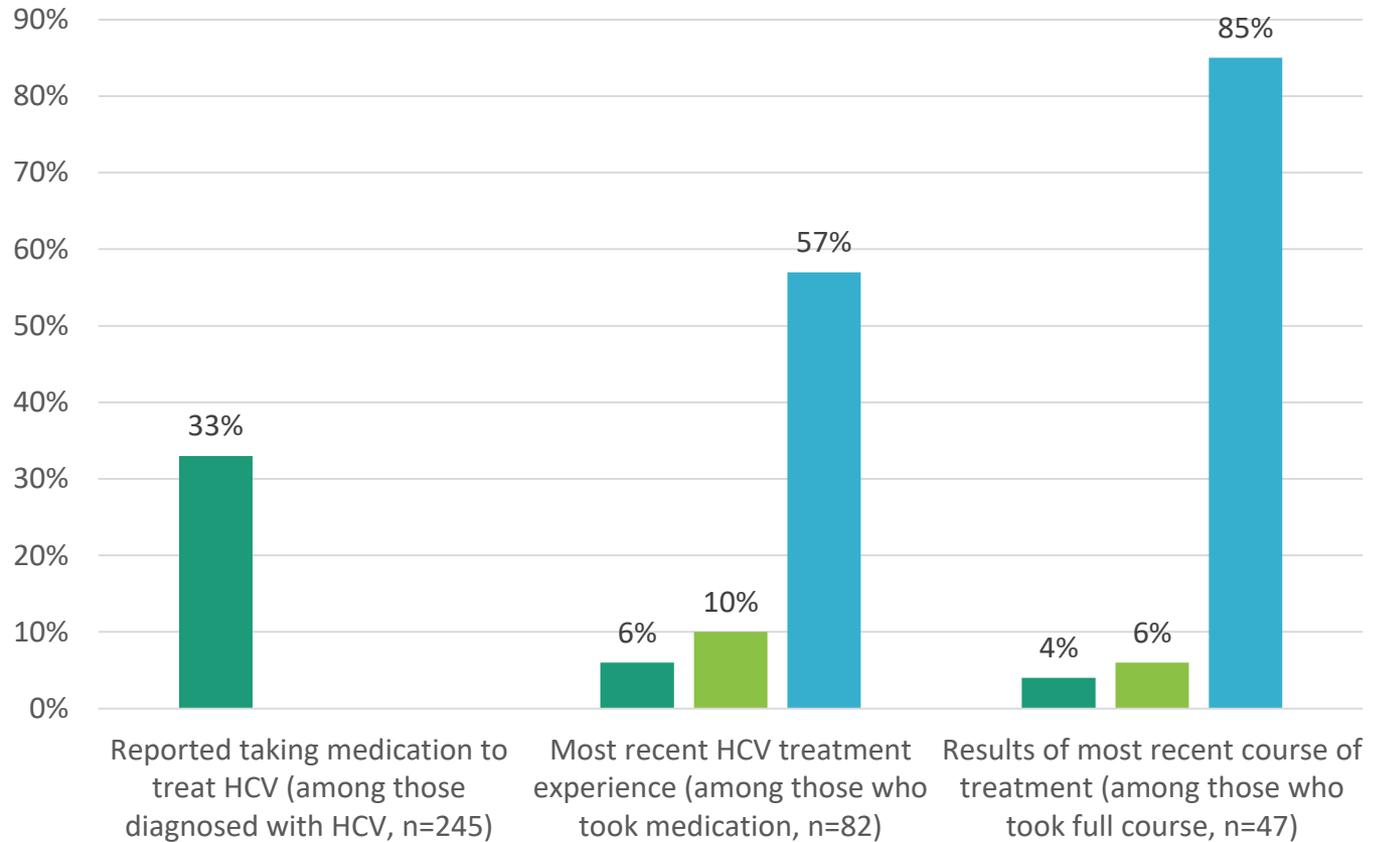

6 participants reported taking PrEP in the past 12 months. 3 of those reported taking PrEP daily.

# HCV testing (self-report): PWID 2018

# HCV treatment: PWID 2018

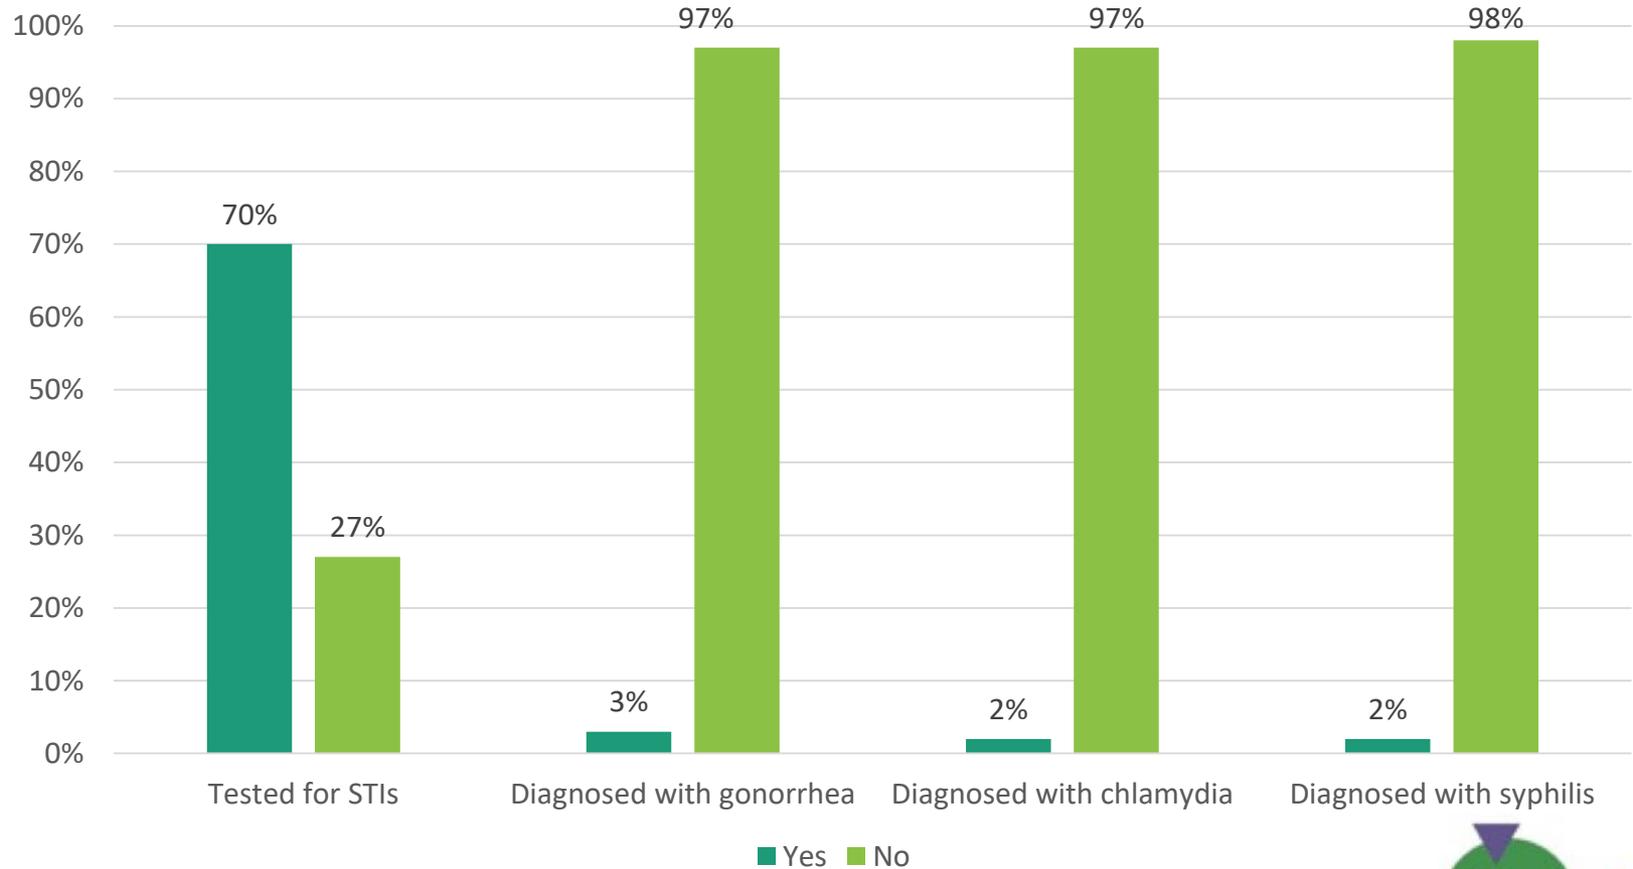

Yes

Did not completing course  
Still taking treatment  
Completed full course

Did not respond  
Responded but relapsed  
Virus cleared

# Past year STI testing (self-report): PWID 2018

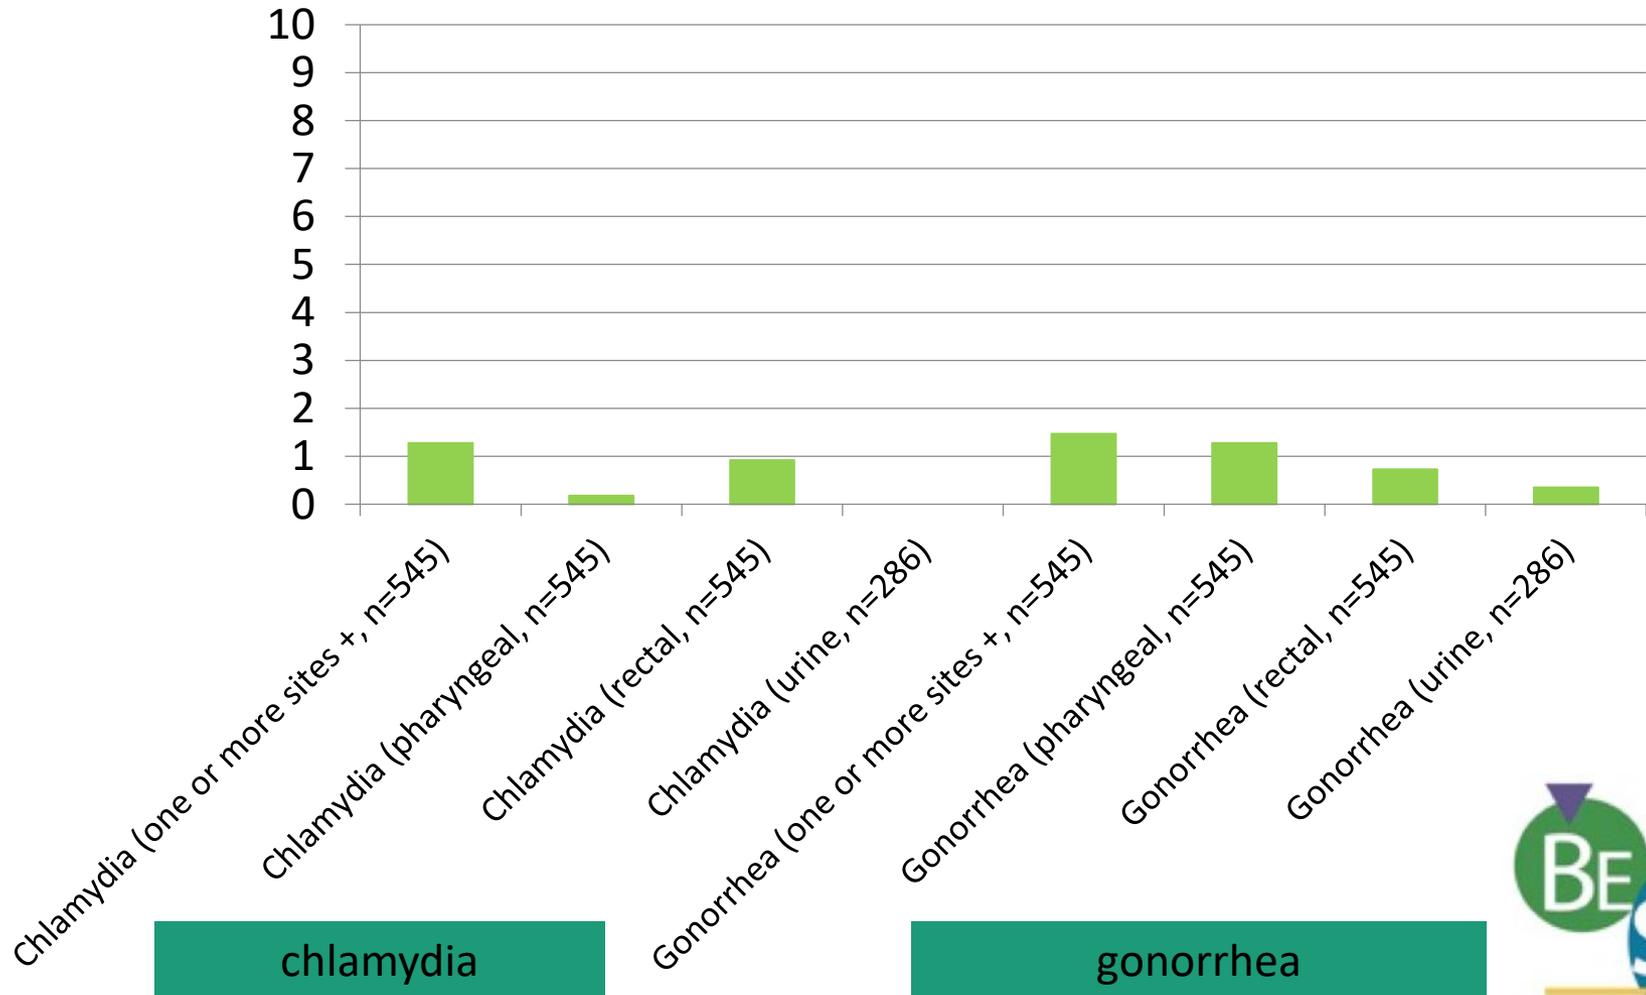

# STI prevalence

among 545  
participants tested

1.3% chlamydia (n=7)

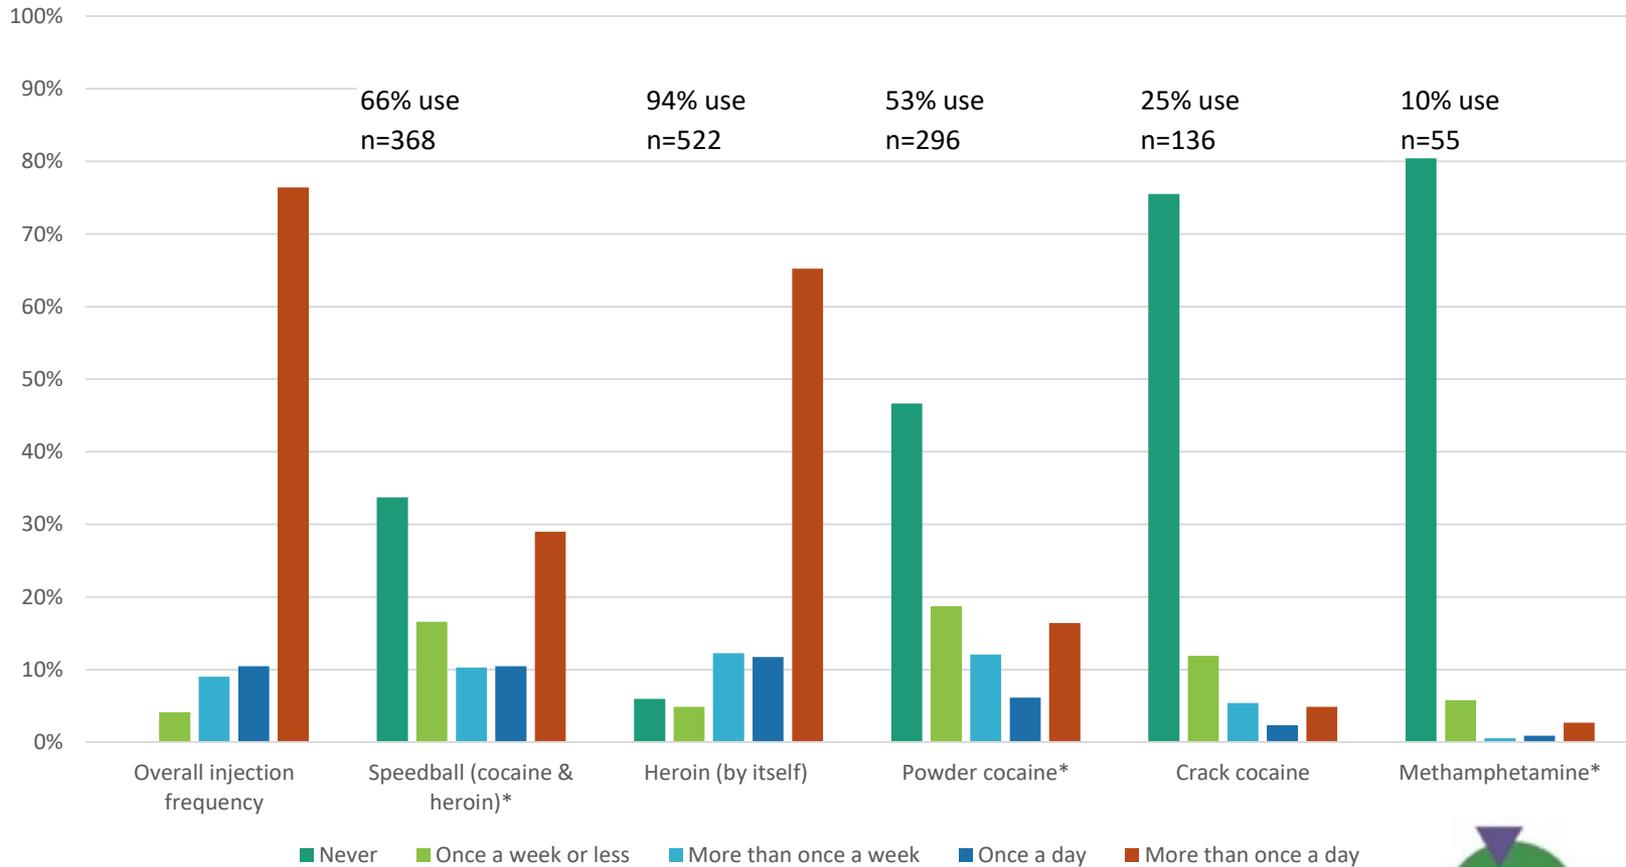

1.5% gonorrhea (n=8)

# Selected Local Data

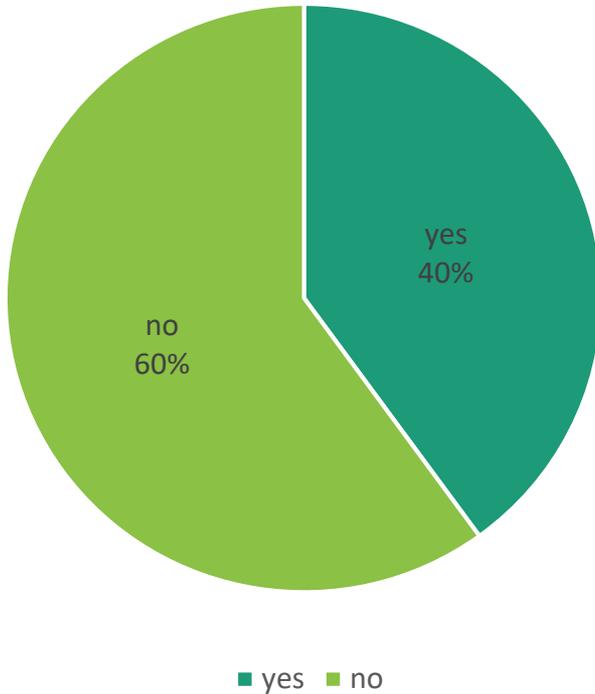

# Past year injection frequency: PWID 2018

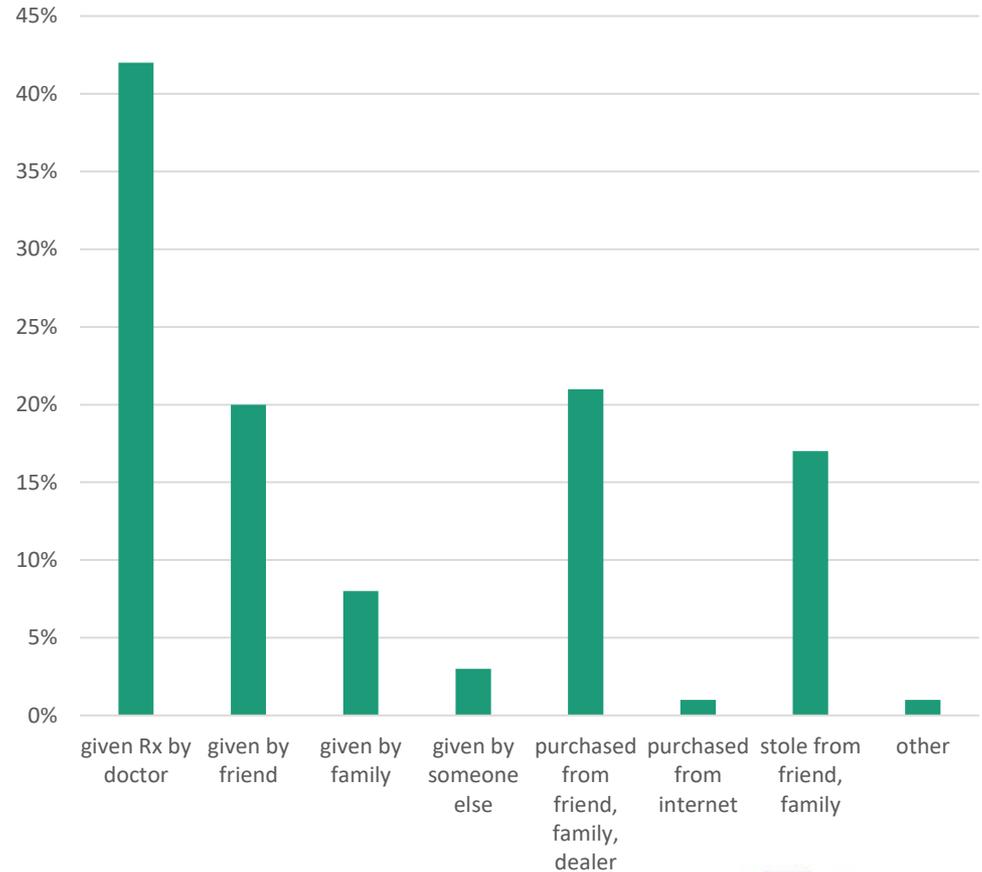

\*Differed by county of residence in chi2 test (p<0.05)

*Were you hooked on painkillers before you injected drugs for the very first time?*

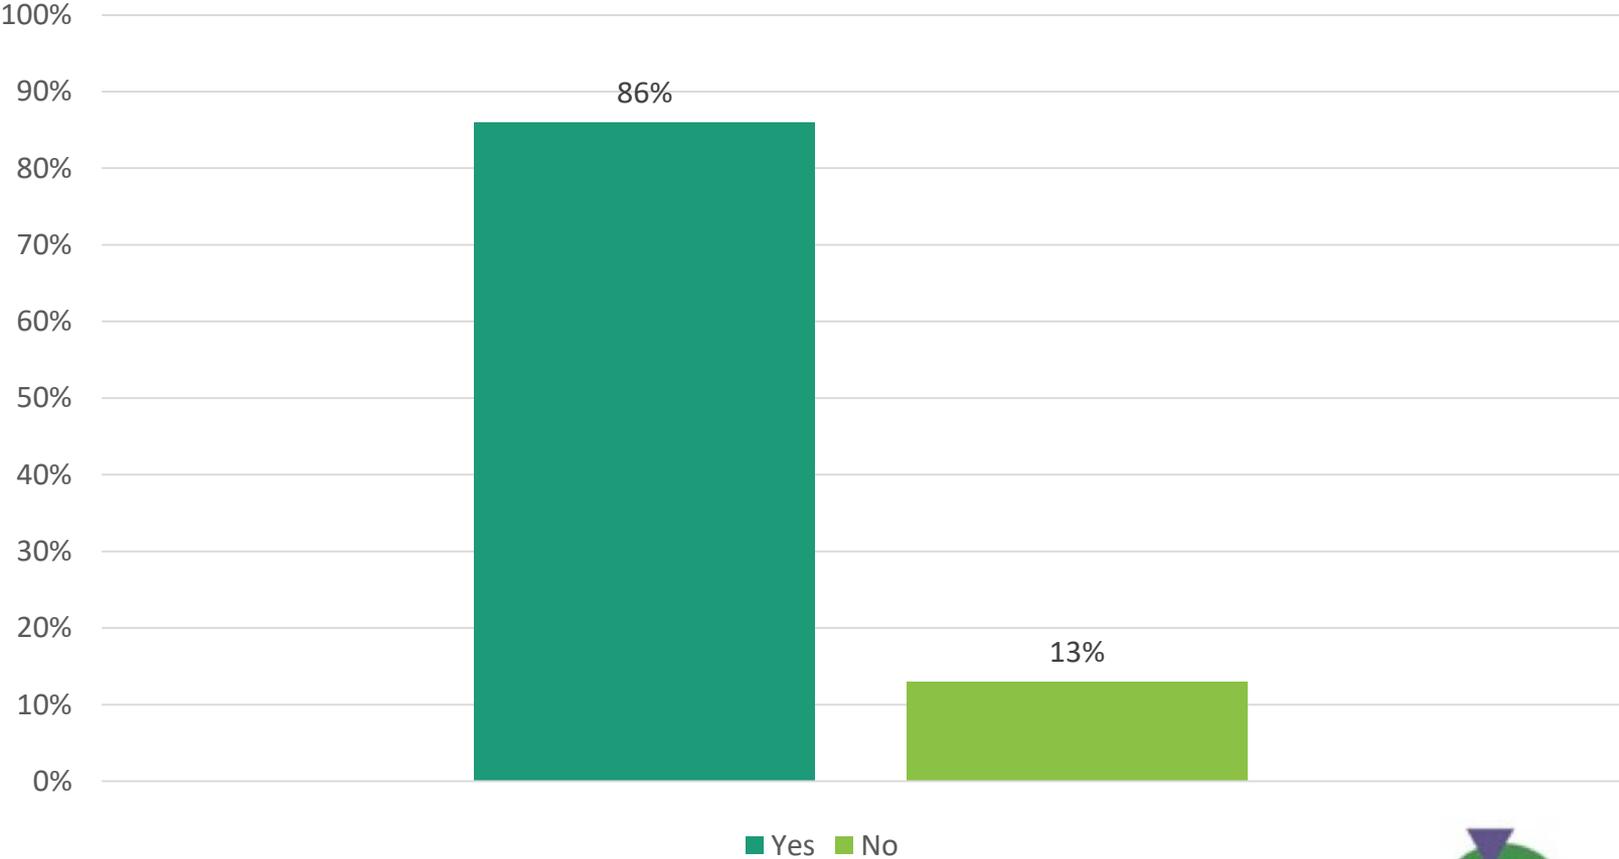

*When you first used those painkillers, how did you obtain the drug?*

among 233 participants who reported being hooked on painkillers before first injection

*In the past 30 days, have you heard or suspected that drugs you were using were cut or laced with Fentanyl?*

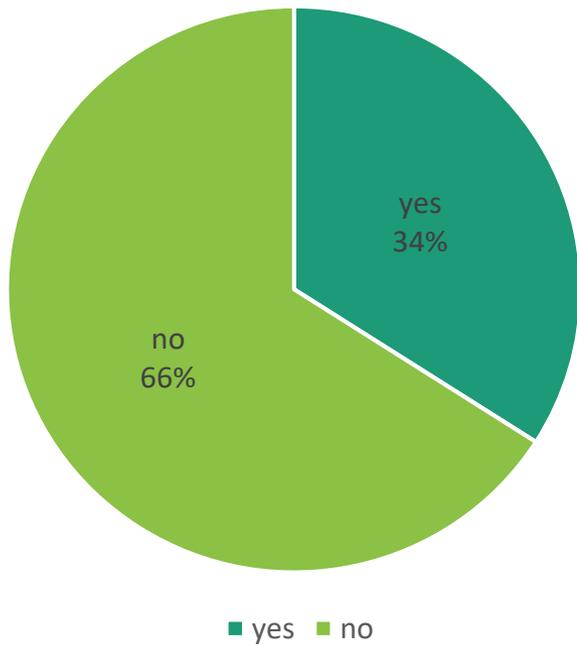

n=527

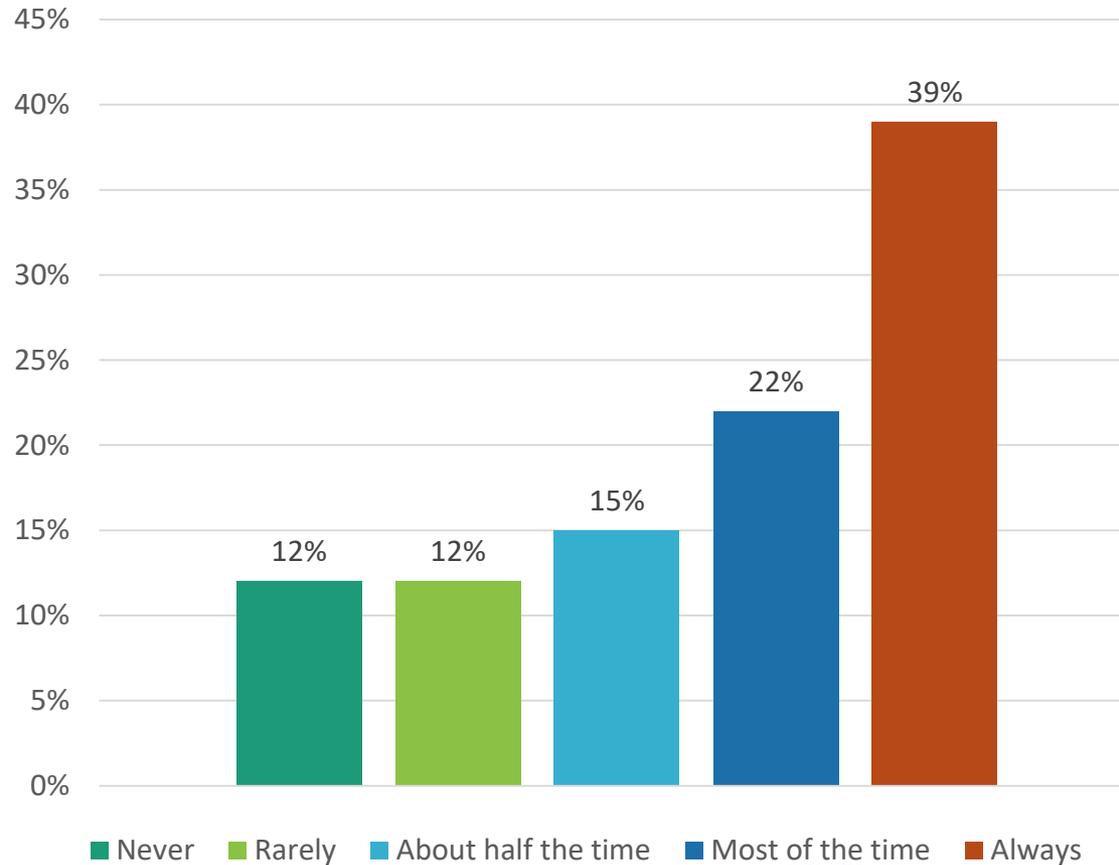

*In the past 12 months, did you overdose on heroin or painkillers? By overdose, I mean if you passed out, turned blue, or stopped breathing from using drugs.*

### Overdose prevalence

*In the past 12 months, when you injected drugs, how often was Narcan or Naloxone available to you in case of an overdose? It could have been yours or someone else's.*

among 511 participants who reported having heard of Narcan.

*In the past 12 months, how many times have you used Narcan or Naloxone on yourself or someone else?*

among 511 participants who reported having heard of Narcan.

45% (n=232) reported 0 times

54% (n=275) reported between 1 and 31 times

mean among those reporting at least 1 use=3.40

*In the past 12 months, that is, since [current month] of last year, how many times have you seen someone overdose from heroin, fentanyl, or opioid painkillers?*

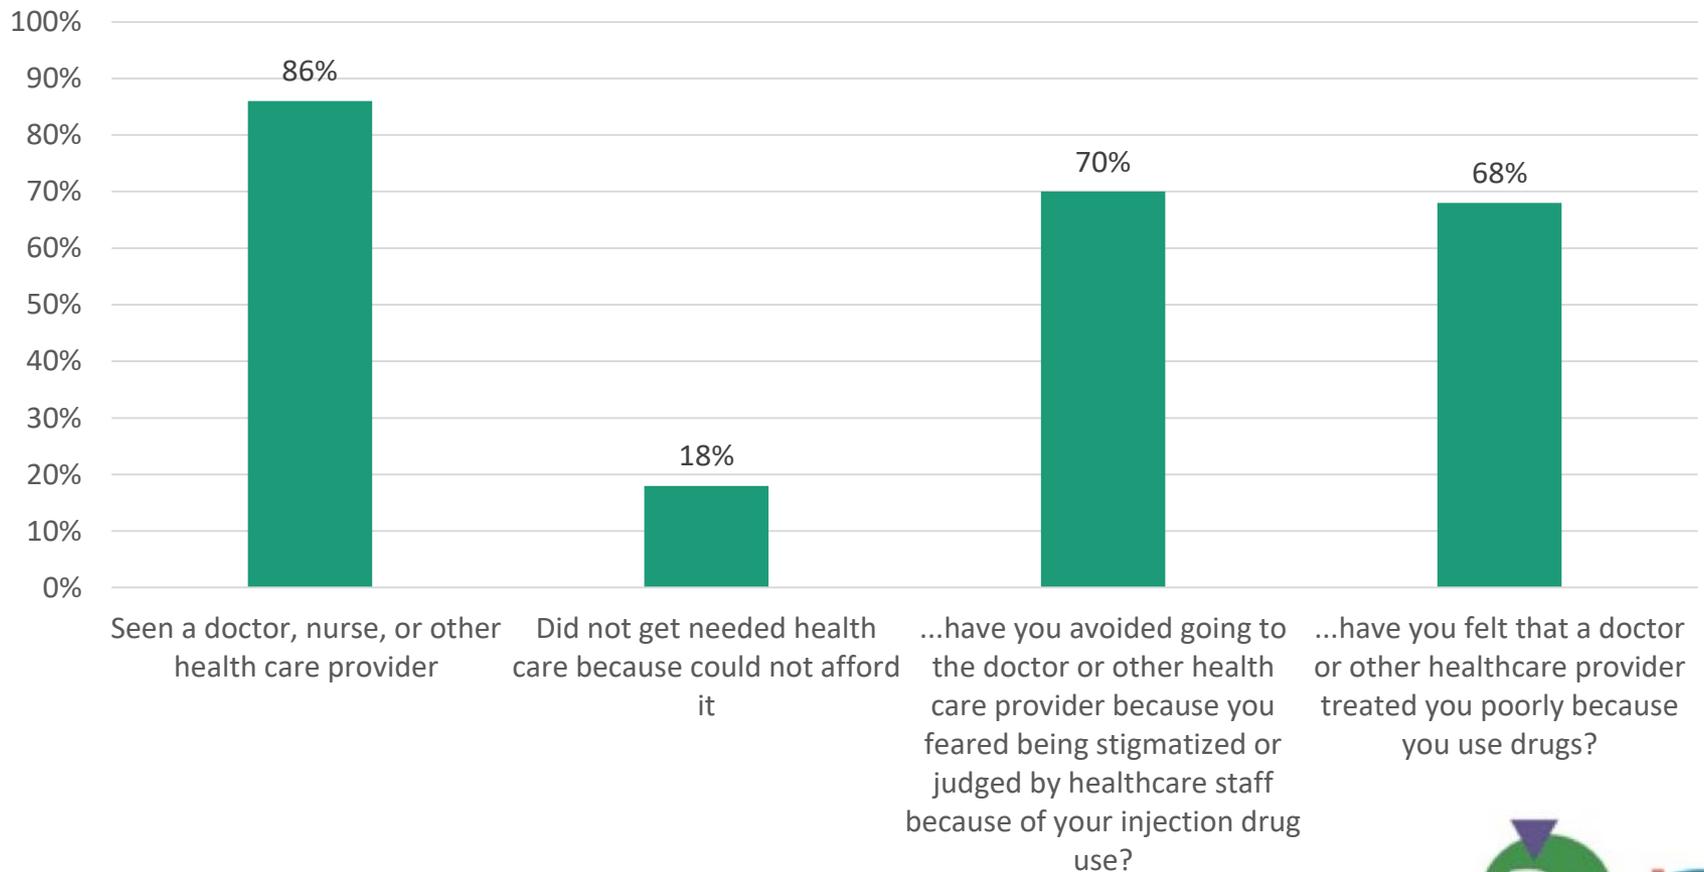

17% (n=96) reported 0 times

77% (n=453) reported having witnessed between 1 and 300 opioid overdoses

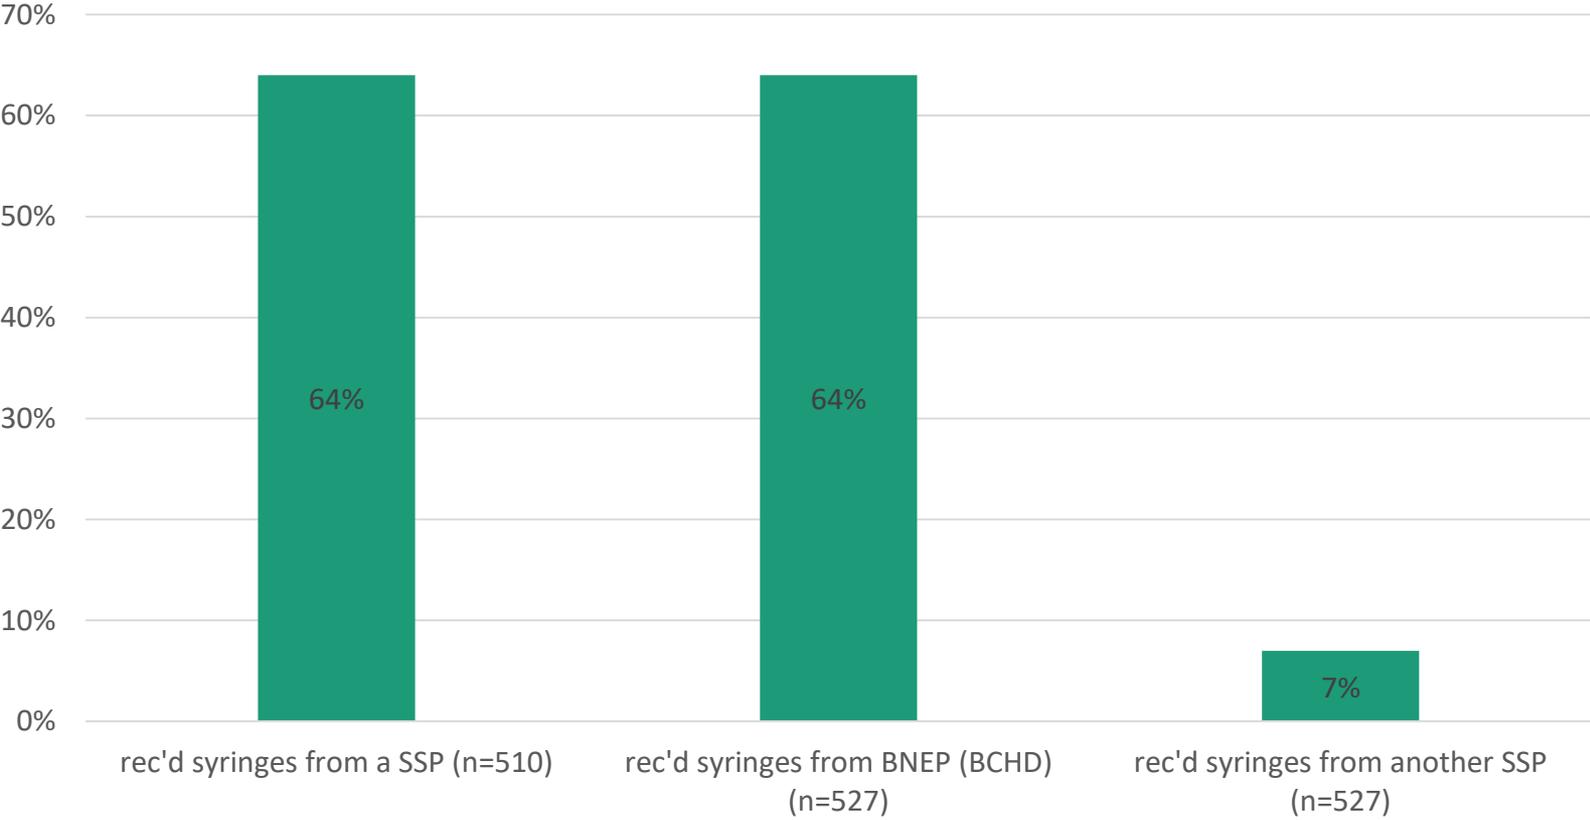

mean among those reporting witnessing at least one opioid overdose=7.08

# Past year health care experience among PWID, BESURE 2018

# Received syringes from Syringe Service Program among PWID, BESURE 2018

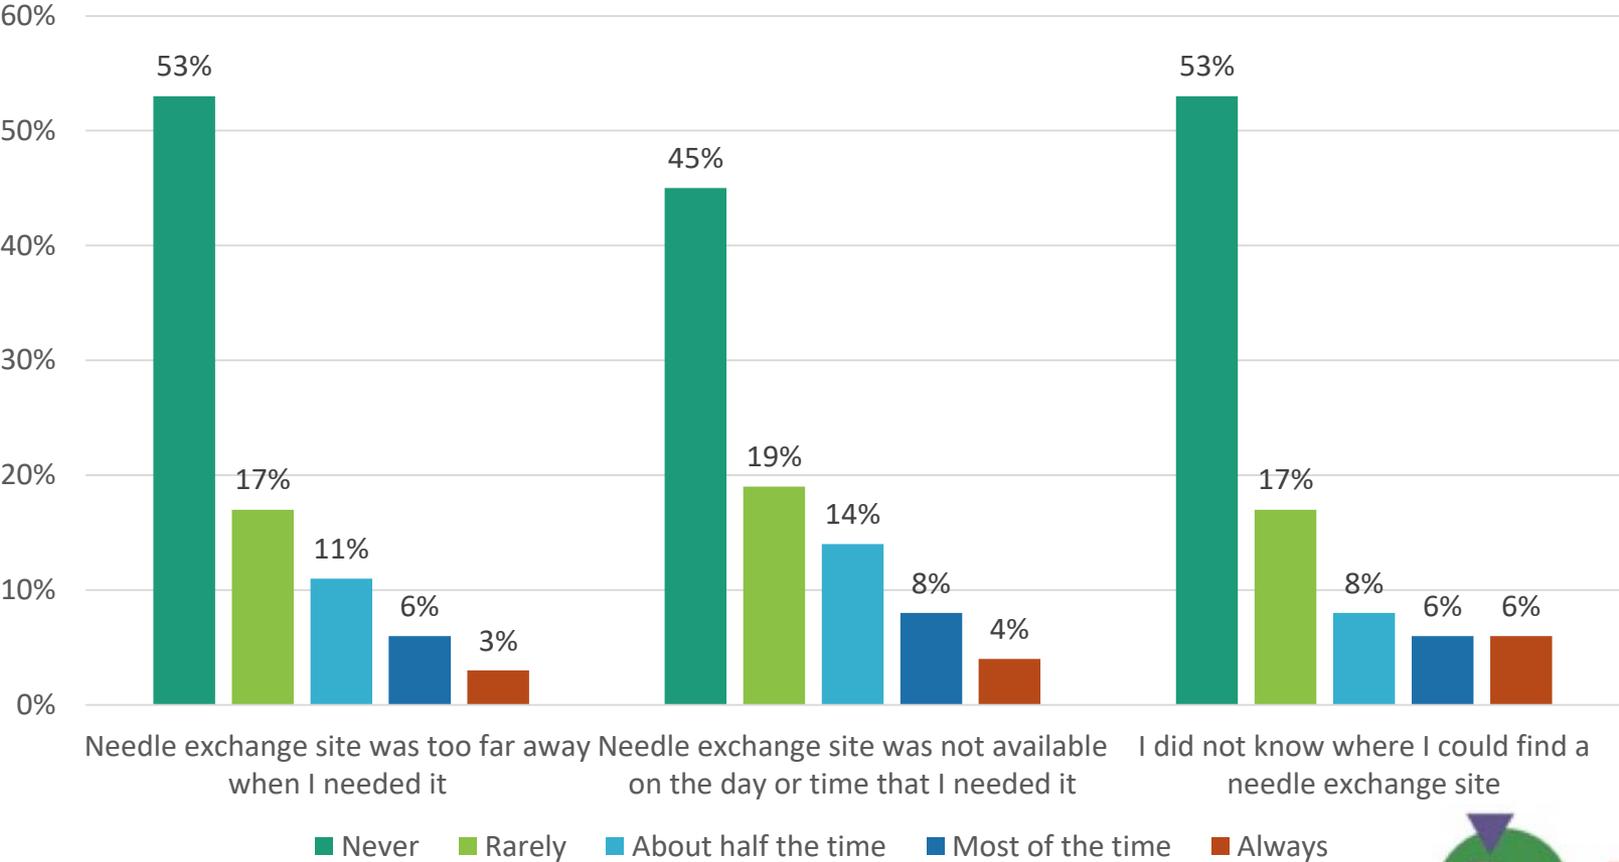

Among 92% who received new sterile syringe in past year

# Syringe Exchange Services

*In the past year when trying to access needle exchange programs, how often have you faced each of the following?*

# Looking Ahead to HET5

Next steps

# Looking ahead to HET5

- February-May 2019: Formative research
- June/July 2019 : Operational preparations, community awareness, continued community engagement
- July 2019: Begin survey
- December 2019 or hopefully sooner: Conclude

# What have we done with our data

- Share with city & state health departments & CDC
- Share with community partners directly, at workgroup meetings, at forums
- Community presentations
- Grant proposals
- Academic publications
- Direct services
- Report of findings

# BESURE Baltimore

The **B**ehavioral **S**urveillance **R**esearch (BESURE) Study is a community health project that measures prevalence of HIV, health and social issues, health-related behaviors and access to services among key groups in Baltimore. BESURE is in its 13th year and has become a primary source of information on the health of people in our community. The results of the study directly inform program planning to improve health outcomes and fight the spread of HIV in Baltimore.

The BESURE-Transgender project, *a new endeavor of the BESURE team* and supported by the Maryland Department of Health, is intended to identify the strengths and assets, and understand health, social, and service needs of transgender and gender non-conforming individuals living in and around Baltimore City. The information collected will guide health and wellness services in Maryland.

# CLEAR

**Communities Leveraging Evidence for Action and Resources (CLEAR)**, a project of BESURE, seeks to identify the strengths and assets, and understand health, social, and service needs of transgender and non-binary individuals living in and around Baltimore City.

CLEAR's three project components include:

- 1) **Understanding the local landscape of transgender and non-binary individuals' health and wellness.** We do this through offering opportunities to participate in surveys and interviews. To learn more, please contact Brendon (brendonh@jhu.edu).
- 2) **Providing referrals to trans-affirming services and resources.** We do this through building relationships with organizations across the city that offer services related to housing, employment, health, and more. To learn more, please contact August (august.cason@jhu.edu).
- 3) **Building individual and community capacity through programming.** We do this through offering in-person and online workshops on topics of money management, preparing for an interview, navigating health insurance, writing a grant, and more. To learn more, please contact Londyn (londyn@jhu.edu).

In addition to full-time staff, CLEAR also has Community Advisory Board and Co-Investigator team and is supported by the Maryland Department of Health.
