HIV BEHAVIORAL SURVEILLANCE IN THE BALTIMORE-TOWSON METROPOLITAN AREA

**FOURTH ANNUAL HIV BEHAVIORAL SURVEILLANCE
COMMUNITY MEETING
APRIL 28, 2014**

**Colin Flynn, Chief
HIV Surveillance, Epidemiology and Evaluation**

**Maryland Department of Health and Mental Hygiene
Prevention and Health Promotion Administration**

MISSION AND VISION

MISSION

- The mission of the Prevention and Health Promotion Administration is to protect, promote and improve the health and well-being of all Marylanders and their families through provision of public health leadership and through community-based public health efforts in partnership with local health departments, providers, community based organizations, and public and private sector agencies, giving special attention to at-risk and vulnerable populations.

VISION

- The Prevention and Health Promotion Administration envisions a future in which all Marylanders and their families enjoy optimal health and well-being.

Definition

- Behavioral surveillance, for public health purposes, is the systematic and ongoing collection of data about risk and health-related behaviors with the purpose of correlating trends in behaviors with changes in disease over time.
 - Lansky, *et al.* Public Health Reports, 2007.

National HIV Behavioral Surveillance (NHBS)

- CDC funded project
- Data collection began in 2004
- In up to 25 metropolitan areas (has varied over time)
- Major divisions of metropolitan areas with the greatest numbers of AIDS cases in the U.S.

National HIV Behavioral Surveillance (NHBS)

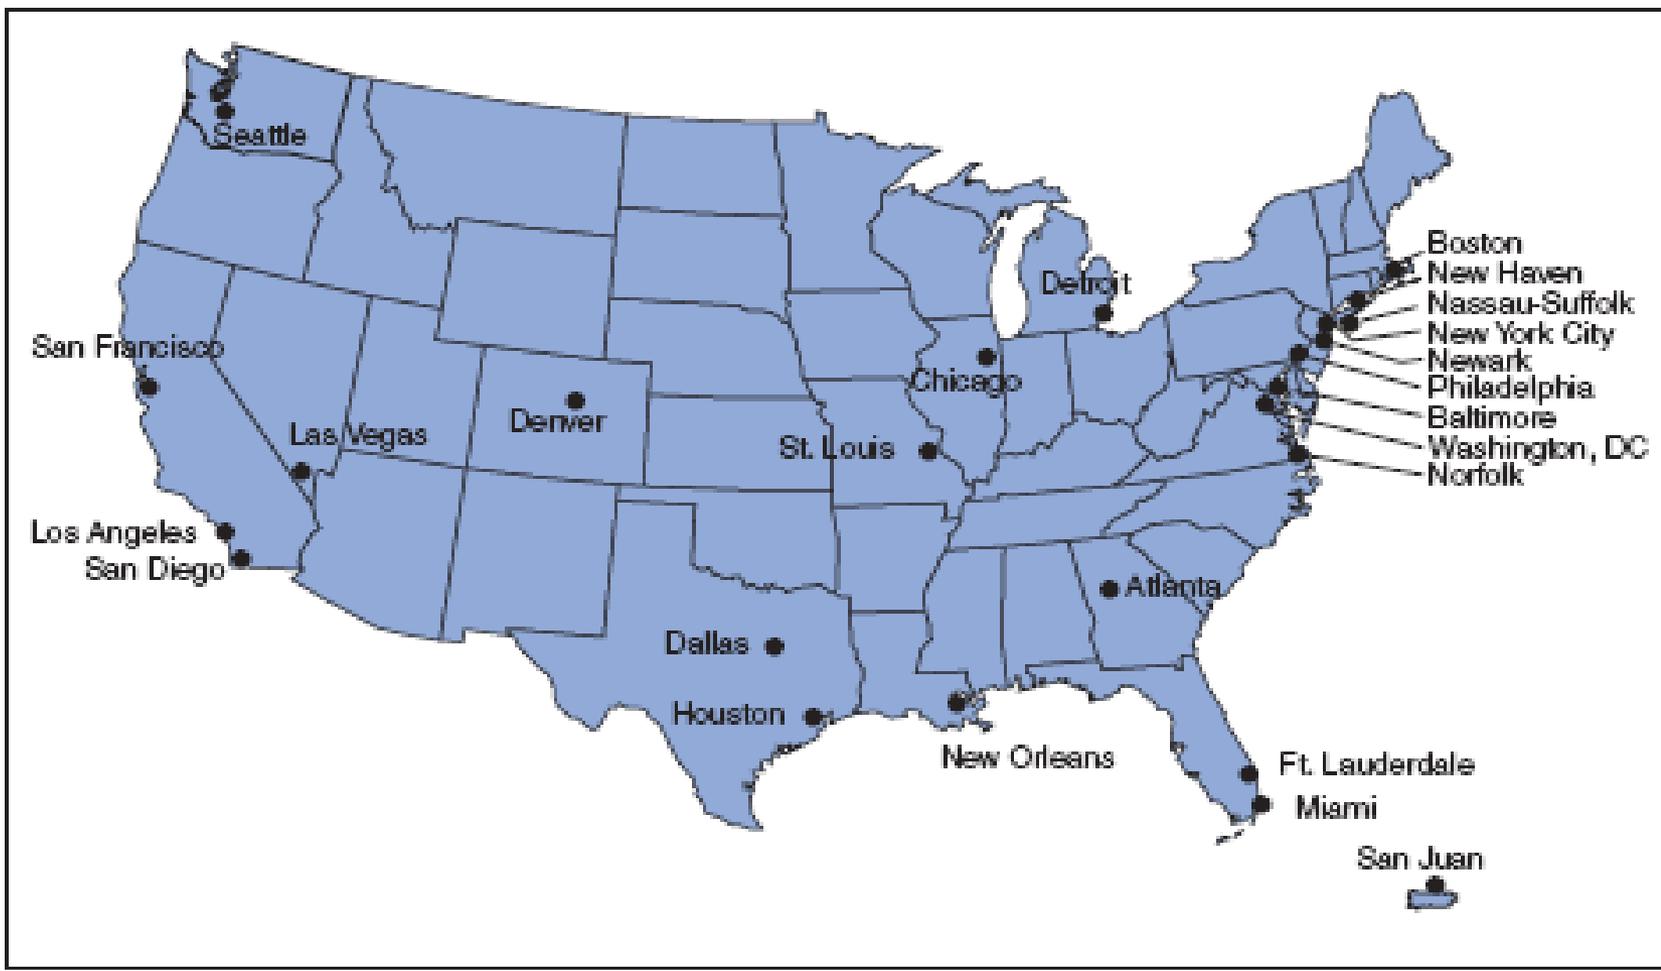

- Based on methods developed in the Young Men's Survey (YMS)
- Funded under a cooperative agreement between the CDC and DHMH
- 2014 – Year 4 of the current 5 year cooperative agreement

NHBS Sites

FIGURE 1. Participating metropolitan statistical areas in the National Human Immunodeficiency Virus Behavioral Surveillance System — United States

NHBS – Baltimore

- DHMH contract with Johns Hopkins Bloomberg School of Public Health for field operations
 - Dept. of Epidemiology: Frank Sifakis, David Celentano
 - Dept. of Health, Behavior and Society: Danielle German, David Holtgrave
- Collaborative project of CDC, DHMH, and JHU

NHBS – Baltimore – BESURE

The BEhavioral SUrveillance REsearch Study

BESURE Logistics

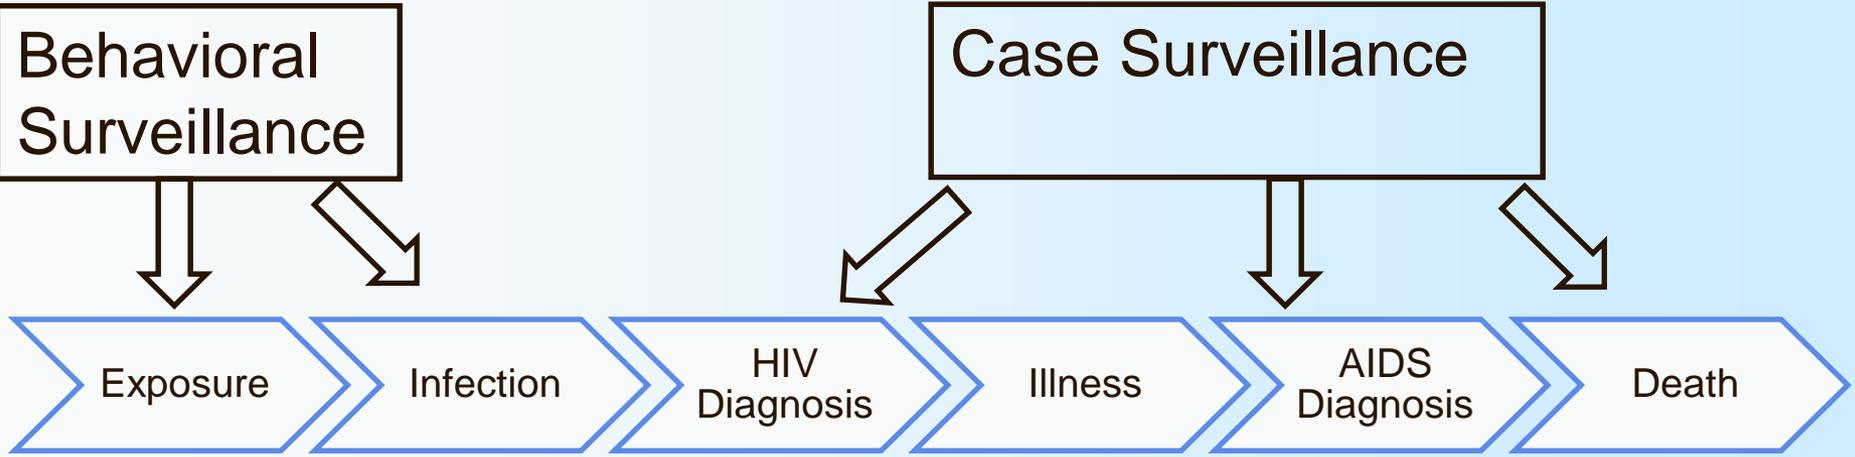

NHBS Objectives

- To assess prevalence of and trends in
 - HIV risk behaviors
 - HIV testing behaviors
 - Exposure to and use of prevention services among persons at high risk for infection
 - HIV prevalence and incidence

HIV Disease Spectrum and Surveillance

Case vs. Behavioral Surveillance

Case Surveillance

- Infected population
- HIV positives
- Mandated reporting
- Data abstracted from medical records
- All diagnosed cases (N \approx 30,000 in Maryland)
- Dozens of demographic and clinical variables

Behavioral Surveillance

- Population at risk
- HIV negatives and positives
- Research study
- Data from participant interviews and blood tests
- 500 sampled participants per population per year
- Hundreds of behavioral variables

NHBS Target Populations

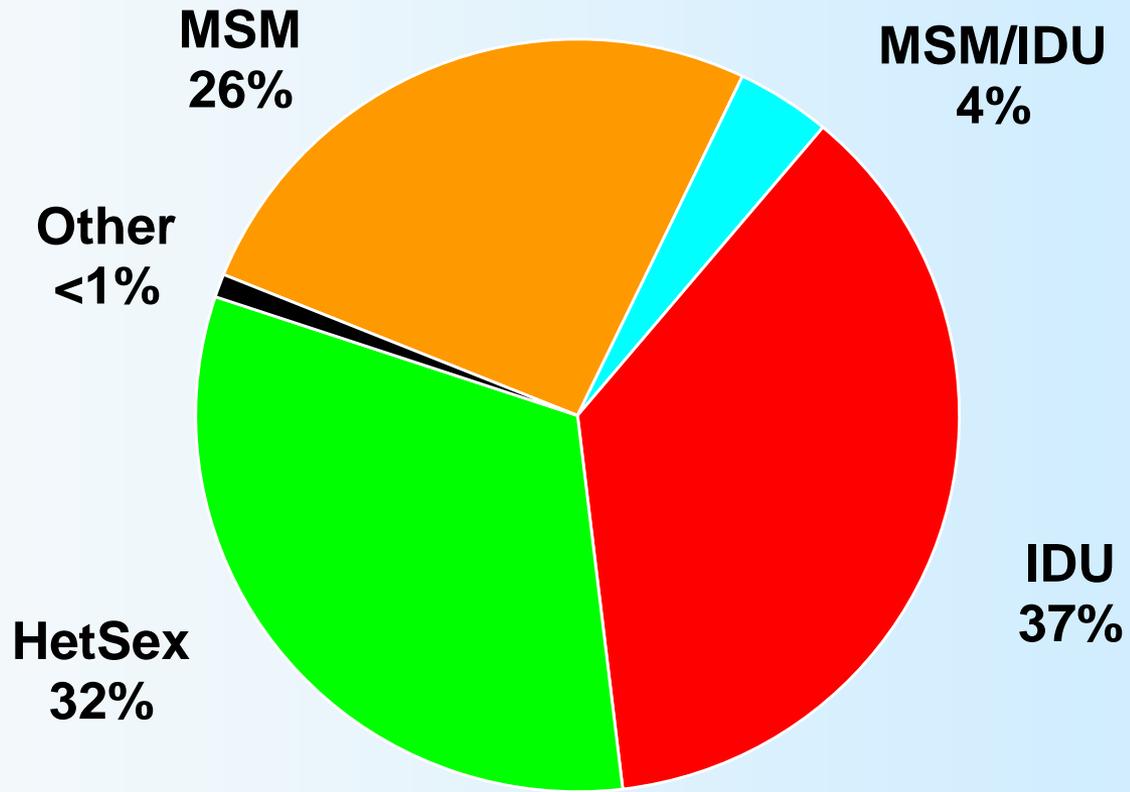

- Men who have sex with men (MSM)
- Injection drug users (IDU)
- Heterosexuals at risk for HIV (HET)

Living Adult/Adolescent HIV Cases by Risk, Central Region, 12/31/11

N (with Risk) = 13,311 (80% of Total)

Using data as reported through 12/31/2012

NHBS Recruitment Methods

- Venue-based sampling (VBS)
- Respondent-driven sampling (RDS)

NHBS Cycles

	MSM	IDU	HET
Wave 1	VBS 2004-2005	RDS 2006	VBS and RDS 2007
Wave 2	VBS 2008	RDS 2009	RDS 2010
Wave 3	VBS 2011	RDS 2012	RDS 2013
Wave 4	VBS 2014	RDS 2015	???

VBS = venue-based sampling
 RDS = respondent-driven sampling

NHBS Data Reports

- MMWR articles
- Journal articles
- Conference presentations
- Planning group presentations
- MSM Response Team presentations
