

Maryland Vaccine Program (MVP)

Free Vaccines for Uninsured and Underinsured Adults

Vaccines are an important way to protect yourself, your family and your community from a range of infectious diseases. The Maryland Vaccine Program (MVP) is a new, state-funded initiative that expands access to recommended vaccines for adults throughout Maryland. The program eliminates cost as a barrier to essential immunization to help ensure all Marylanders have access to life-saving immunizations.

Who is Eligible?

The MVP provides vaccines **free-of-charge** to adults aged **19 years and older*** who are:

- **Uninsured** individuals who do not have health insurance.
- **Underinsured** individuals who have health insurance but still face barriers to immunization (e.g., insurance doesn't cover vaccines or there is a high copay for vaccines)

*Children who are uninsured or underinsured are eligible for free vaccines from the long-standing [Vaccines for Children program](#).

What vaccines are available?

The MVP provides vaccines recommended by the [American Academy of Family Physicians \(AAFP\)](#). Vaccines available at your local health department might include:

- COVID-19
- Haemophilus influenzae type b (Hib)
- Hepatitis A
- Hepatitis B
- Human Papillomavirus (HPV)
- Influenza
- Measles, Mumps, and Rubella (MMR)
- Meningococcal
- Mpox
- Pneumococcal
- Polio
- RSV (Respiratory Syncytial Virus)
- Tetanus, Diphtheria, Pertussis (Tdap)
- Varicella (Chickenpox)
- Zoster (Shingles)

Where can I get a vaccine?

Vaccines are currently available through **all local health departments** across the state. Contact your local health department for details on vaccine availability and scheduling protocols.
