The list of ImmuNet **Organization Reports** is located on the left menu navigator. Organizations can generate each report based on their needs. Below are brief descriptions for each report.

### **AFIX Reports**

Helps organizations generate immunization rate(s) for specific age, age group and/or vaccine; patient list, missing immunizations, and missed opportunity reports for IQIP (active patients in the organization).  
*For more information, see the [AFIX Guide](#).*

### Reminder/Recall Custom Letters

Generation of letters based on the patient list generated for reminder/recall.  
 For more information, refer to the *Reminder/Recall Output Options* section under the [Forms and Reports](#) chapter of the [ImmuNet User Manual](#).

 A screenshot of the ImmuNet web interface for generating reminder/recall letters. The form includes sections for Patient Address, Selection, Paragraph 1 (First Part), Paragraph 2 (Second Part), Immunization History, Immunization Recommendations, and Closing. Each section has a text area and a checkbox to include or exclude that section. At the bottom, there are buttons for 'Print' and 'Cancel'.

### Vaccine Usage/Wastage Summary

Produces a vaccine transaction report for sites with non-historical immunization data.  
 For more information, refer to the *Vaccine Usage/Wastage Summary* section under the [Forms and Reports](#) chapter of the [ImmuNet User Manual](#).
