

CONSIDER MEASLES

Symptoms

Assess for:

Fever

Rash

Cough

Conjunctivitis

Runny nose

Exposures

Assess for:

Exposure to a
measles case

**Travel to or
residence in** an
area with measles

Exposure to an **ill
visitor** from an area
with measles

If measles is suspected based on clinical and/or exposure history:

mask and isolate patient

AND

determine patient vaccination history and immunocompetence

AND

consult with local health department to discuss measles testing.
