

2015-2016 Immunization Status of Maryland Students

Background and Notes:

The immunization data is obtained through the Annual School Immunization Survey. The Annual School Immunization Survey is a self-reporting survey that each Maryland school, public and private, is required to complete and submit to the Maryland Department of Health, Center for Immunization by November 15th each year, per COMAR regulations 10.06.04.09. The survey assesses the coverage and exemption data for all Kindergarten students. This is intended to be a representative sample of immunization coverage in Maryland.

Parents provide student immunization information to the schools. Schools aggregate this information and report the information to the Maryland Department of Health in the fall of each year. The data in this document display school immunization and exemption rates. The Maryland Department of Health does not have the ability to verify the accuracy of the information that was submitted by the schools.

Vaccine Requirements: For students in Kindergarten, the minimum immunization requirements for attending a Maryland school in the 2015-16 school year include: 3 doses of DTaP vaccine, 3 doses of Polio vaccine, 2 doses of MMR vaccine, 2 doses of varicella vaccine, and 3 doses of Hep B vaccine.

Coverage Rate: The percentage of students that are fully immunized against a specific vaccine preventable disease meeting the minimum immunization school requirements. According to COMAR 10.06.04, a parent or guardian shall provide evidence of age appropriate immunity to the preschool or school authority. A student is considered to not have age appropriate immunity if they need one or more doses of a particular vaccine to meet the vaccine requirements based on the student's grade.

Schools may not have data represented in this spreadsheet. The school may not have submitted their immunization survey or they may not have any children in that age group for the year.

Data is omitted for schools with fewer than 10 students. This is done to protect the privacy and maintain anonymity among the children assessed.

For the Annual School Immunization Survey, information is not collected on the particular vaccine a child is exempt from. Therefore, children reporting a medical or religious exemption are not included in the coverage rate calculations for each vaccine.

NOTE: If you are a school representative and think that your information is incorrect, please contact the Maryland Department of Health, Center for Immunization at mdh.izinfo@maryland.gov.

Percent of Kindergarteners Vaccinated by School 2015-2016

To protect privacy, schools with kindergarten enrollment of fewer than 10 children have their data redacted and indicated with (**).
Children with medical or religious exemptions are not included in the calculations for each individual vaccine's coverage rates

Note: Columns E-G do not include children with medical/religious exemptions
