Let’s talk about **Monkeypox**

**Monkeypox is a rare infection.** A small number of cases have been recently reported in the U.S., Canada, and Europe—areas where it isn’t usually found. Here’s what you should know:

**Monkeypox can make you sick.** It causes a rash or sores (pox). It can also make you feel like you have the flu.

- **Flu-like symptoms can include:**
  - Fever
  - Headache
  - Muscle aches and backache
  - Swollen glands
  - Chills
  - Fatigue

- A rash or sores can be on the hands, feet, chest, face, penis, or inside or on the mouth, vagina, and anus (butt).
- Sores will go through several stages before healing. This can take several weeks.
How is monkeypox spread?
Through close, personal, or skin-to-skin contact with someone who has monkeypox, including:
▶ Their rash, sores, or scabs
▶ Objects, fabrics, and surfaces they touched
▶ Their respiratory droplets or saliva
This can happen during:
▶ Talking closely with someone
▶ Hugging, kissing, touching, massage
▶ Close, sexual contact

What should I do if I have a new rash, sores, or other symptoms?
▶ Call your healthcare provider
▶ If you don’t have a provider or health insurance visit health.maryland.gov/CSTIP/local to find a health department near you
