No-Cost Cancer Screening Programs in Maryland

**Give your local health department
or local program a call today!**

health.maryland.gov

Why should you get screened for cancer?

Getting screened for cancer helps find cancer at an early stage before signs and symptoms of cancer appear. When cancer is found at an earlier stage, it can be treated more easily.

Who can qualify for no-cost cancer screening?

Local health departments and other organizations are funded by the Maryland Department of Health through the Maryland Breast and Cervical Cancer Program (BCCP), and the Cigarette Restitution Fund (CRF)-Cancer, Prevention, Education, Screening and Treatment (CPEST) Program to provide no-cost cancer screenings, particularly breast, cervical, colorectal, and lung cancer screening, to women and men across Maryland who meet program eligibility requirements:

- Live in Maryland.
- Have limited income.
- Have no health insurance or insurance that does not fully pay for cancer screenings.
- Belong to the following age groups:
 - » For breast cancer screening — 40 to 64 years old, or over 65 and do not have Medicare Part B.
 - » For cervical cancer screening — 21 to 64 years old, or over 65 and do not have Medicare Part B.
 - » For colorectal cancer screening — 45 to 85 years old.
 - » For lung cancer screening, 50 to 80 years old and with history of smoking.

If you do not meet the age requirements but have symptoms and/or family history of cancer, please give us a call to see if you qualify.

What if you have health insurance that covers your screening?

We can assist you through our patient navigation services at no cost to you if you meet the program eligibility requirements.

What services are offered?*

Breast Cancer Screening

- Mammogram
- Additional tests, if necessary, to rule out cancer

Cervical Cancer Screening

- Pap test (also called Pap smear)
- Human Papillomavirus (HPV) test
- Additional tests, if necessary, to rule out cancer

Colorectal Cancer Screening

- Colonoscopy
- FIT/FIT-DNA (at home stool test)

Other Types of Cancer Screening

- Lung cancer screening
- Skin cancer screening

Patient Navigation Services

We can help you:

- Understand the screening process.
- Find a doctor in your area.
- Understand your test results.
- Understand any follow-up tests your doctor recommends.
- Find transportation to your appointments.
- Find a translator for your spoken language, if needed.

*Please note that these services may not be offered at all local health departments or programs, so please call for availability.

What can you do to reduce your risk of cancer?

- Keep a healthy weight.
- Eat healthy.
- Exercise regularly.
- Don't smoke.
- Avoid or limit alcohol use.
- Protect yourself from ultraviolet (UV) rays.
- Get vaccinated against certain viral infections, such as Hepatitis B and HPV.

Where can you find more information on cancer?

You can find information on cancer through your local health department, Maryland Department of Health, Centers for Disease Control and Prevention, American Cancer Society, and the National Cancer Institute.
