“I completed this survey because I think this type of information is so important and I am surprised that so few caregivers try to obtain this information from patients... We spent more time with the hospital administration getting our insurance straightened out than we did trying to find out why my baby was born prematurely.”

- Survey
INTRODUCTION

This report highlights data from births occurring in-state to Maryland residents in 2009 collected through the Pregnancy Risk Assessment Monitoring System (PRAMS). PRAMS is a surveillance system established by the Centers for Disease Control and Prevention (CDC) in 1987 to obtain information about maternal behaviors and experiences that may be associated with adverse pregnancy outcomes. Data are collected by surveying women who have recently delivered live born infants.

PRAMS projects are conducted through cooperative agreements between the CDC and state health departments. PRAMS projects are currently underway in 37 states, New York City and South Dakota (Yankton Sioux Tribe). All surveys include a core set of questions, which allows for multi-state analyses. In addition, each state can add questions tailored to meet its needs. The core section of the survey includes questions relating to prenatal care, obstetric history, smoking, alcohol use, physical abuse, contraception, health care coverage, maternal stress, and infant health. The Maryland-specific questions of the survey were chosen from a CDC-approved questions list. Topics include pre-pregnancy care, assisted reproduction, cesarean section, depression, oral health, chronic disease, physical activity, and flu vaccination.

The PRAMS project in Maryland is a collaborative effort of the Center for Maternal and Child Health (CMCH), the Vital Statistics Administration (VSA) of the Maryland Department of Health and Mental Hygiene, and the CDC. Maryland began collecting PRAMS data from mothers who delivered in 2000.

METHODOLOGY

Sampling and Data Collection

Women eligible to participate in PRAMS are selected from Maryland’s live birth certificate files. Each month, a stratified, random sample of approximately 200 live births is selected. The sample is stratified by maternal age (<35 years, ≥35 years) and infant birth weight (<2500 grams, ≥2500 grams). This sampling frame over-samples mothers who have delivered a low birth weight infant (<2500 grams) as well as mothers who are 35 years of age or older.

PRAMS combines two modes of data collection, a survey conducted by mailed questionnaire with multiple follow-up attempts, and if mail is not successful, a survey conducted by telephone interview. Survey questionnaires and other materials are available in both English and Spanish.

The first mailing, which is done two to four months after delivery, is a letter that introduces PRAMS to the mother and informs her that a questionnaire will soon arrive. Within seven days of this letter, the questionnaire packet is mailed. This packet includes the 73-item survey with additional flu supplement questions, informed consent page, PRAMS brochure, calendar, and resource brochure. In addition, a pocket calendar is sent as an incentive for completing the survey. As an added attempt to increase response rates, entry into a random
monthly drawing for a $100 Target gift card reward is available to those mothers who completed
the survey by mail. Seven to 10 days after the initial packet is mailed, a tickler that serves as a
thank you and reminder note is sent. Mothers who do not respond to the tickler within seven to
14 days are mailed a second questionnaire packet. A third questionnaire packet is mailed to all
remaining nonrespondents seven to 14 days later. Telephone follow-up is initiated for all non-
respondents and interviews by phone are for survey completion..

Data collected through PRAMS are linked to birth certificate data, which allows for the
survey data to be weighted to reflect the total birth population. Sampling, nonresponse and
noncoverage adjustment factors are applied to the data in order to make the results generalizable
to Maryland women delivering live born infants in the state during the study period. Further
information on PRAMS methodology, including weighting procedures, may be found on the

Survey Response and Data Analysis

Starting with 2007 births, the CDC recommends that states obtain a response rate of at
least 65% for the analysis and dissemination of PRAMS data. For births occurring prior to
2007, the recommended response rate for data analysis was 70%. The weighted response rate
among women delivering in Maryland between January 1, 2009 and December 31, 2009 was
69.3%. During this period, 1,583 mothers completed the PRAMS questionnaire with a weighted
response reflecting 67,669 mothers. The weighted figure included 31,075 births to white non-
Hispanic women and 22,066 births to black non-Hispanic women. Survey findings in this report
are shown by race/Hispanic origin (White Non-Hispanic, Black Non-Hispanic, Asian and
Hispanic), maternal age and maternal years of education.

ACKNOWLEDGMENTS

The Maryland PRAMS Project would like to acknowledge the CDC PRAMS Team for
their technical assistance and support, especially Denise D’Angelo, M.P.H. our project manager
who has expertly guided and assisted our program. Additionally, our thanks go to the Maryland
PRAMS Steering Committee for their invaluable input to many aspects of our project.

Most importantly, we very much appreciate all the 1,583 mothers who took the time to
complete the questionnaires that are represented in this report. Their answers will contribute
greatly towards our continuing efforts to improve the health of Maryland mothers and babies.

Maryland PRAMS Highlights--2009

Preconception factors

- Forty-five percent of live births were unintended.
- Eleven percent of women reported using Medicaid just before pregnancy and 21% were uninsured.
- According to their body mass index (BMI) just before pregnancy, 21% of mothers were overweight and 22% were obese.
- Thirty-two percent of women reported taking a multivitamin daily in the month before conception.
- Six percent of mothers used fertility treatments to help conceive.
- Within the year before pregnancy, 49% of women had not had a dental cleaning.
- Thirty-two percent of mothers reported they had a preconception health visit to discuss how to prepare for a healthy pregnancy.

Prenatal and delivery factors

- Seventy-nine percent of mothers began prenatal care during the first trimester of pregnancy, and <1% received no care.
- Forty-three percent of women participated in the WIC program during pregnancy.
- Sixty-five percent of mothers reported one or more medical complications during pregnancy. Severe nausea and vaginal bleeding were the most common complications.
- Seventy-seven percent of mothers reported that HIV testing was discussed during prenatal care visits; 73% got an HIV test. Ten percent of mothers did not know if they were tested.
- Thirty percent of women were vaccinated for seasonal flu, 8% for H1N1 and 30% for both.
- Three percent of mothers reported being physically abused by a current husband or partner during pregnancy.
- Nine percent of women smoked during the last three months of pregnancy. Ten percent of women reported consuming alcohol and 2% of women reported binge-drinking during the last three months of pregnancy.
- The delivery method for 34% of mothers was by cesarean section.
- Thirty-two percent of women reported that Medicaid paid for their delivery; 2% was uninsured.

Infant health and related factors

- Fourteen percent of newborns were admitted to a neonatal intensive care unit.
- Fifty-six percent of newborns were discharged from the hospital within two days of delivery, and 8% remained in the hospital for 6 or more days.
- Eighty-four percent of infants were breastfed after delivery, and 61% were breastfed eight weeks or longer.
- In terms of infant sleep, 74% of infants were usually placed on their backs to sleep; 12% always slept with someone else in the same bed.

Maternal postpartum factors

- Sixteen percent of mothers reported they were not using postpartum contraception.
- Thirteen percent of mothers smoked postpartum.
- Seven percent of mothers reported that a health care worker had told them they had postpartum depression.

*PRAMS data includes only information on pregnancies that end in live birth

**First trimester defined by PRAMS as <13 weeks
Pre-Pregnancy Factors
“We had a 6 month old at the time and I just didn’t think we’d get pregnant as fast as we did since it took almost a year with our first child.”

PRAMS mother
INTENDEDNESS OF PREGNANCY

Question 15: Thinking back to *just before* you got pregnant with your *new* baby, how did you feel about becoming pregnant?

Distribution of Mothers by Intendedness of Pregnancy

- **Didn't want to be pregnant then or later**: 12%
- **Wanted to be pregnant sooner**: 18%
- **Wanted to be pregnant later**: 33%
- **Wanted to be pregnant then**: 37%

Percentage of Mothers With Unintended Pregnancies

- **Intended pregnancies**: 55%
- **Unintended pregnancies**: 45%

Race and ethnicity

- White Non Hispanic: 33%
- Black Non Hispanic: 68%
- Asian: 35%
- Hispanic: 39%

Age

- <20: 73%
- 20-24: 69%
- 25-29: 42%
- 30-34: 36%
- 35-39: 27%
- 40+: 27%

Years of education*

- <=12: 56%
- >12: 36%

*Includes only mothers ages 20 and above.
PREGNANCY INTENTION AND BIRTH CONTROL USE

Question 16: When you got pregnant with your new baby, were you trying to get pregnant?
Question 17: When you got pregnant with your new baby, were you or your husband or partner doing anything to keep from getting pregnant?
Question 18: What were your reasons or your husband’s or partner’s reasons for not doing anything to keep from getting pregnant?

**Mothers Reporting Reasons for Not Using Birth Control**

- Didn't mind getting pregnant: 47%
- Thought Couldn't Get Pregnant: 34%
- Partner didn't want to use: 20%
- Had side effects from birth control: 13%
- Thought was sterile: 8%

**Distribution of mothers reporting pregnancy intention and birth control use**

- Didn’t Want Pregnancy, Didn't Use Birth Control: 26%
- Unintended Pregnancy, Used Birth Control: 27%
- Wanted to Get Pregnant: 47%
FERTILITY TREATMENT

Question 19: Did you take any fertility drugs or receive any medical procedures from a doctor, nurse, or other health care worker to help you get pregnant with your new baby? (This may include infertility treatments such as fertility-enhancing drugs or assisted reproductive technology.)

Distribution of Mothers Who Were Attempting to Become Pregnant by Use of Fertility Treatment

Trying to get pregnant, Didn't Use Fertility Treatment
39%

Trying to get pregnant, Used Fertility Treatment
6%

Not trying to get pregnant
55%

Percentage of Mothers Who Reported Using Fertility Treatment

*Includes only mothers ages 20 and above.

Note: Percentages are not reported if the number of respondents was less than five.
**MULTIVITAMIN USE**

Question 3: During the *month before* you got pregnant with your new baby, how many times a week did you take a multivitamin, a prenatal vitamin, or a folic acid vitamin?

---

### Distribution of Mothers by Frequency of Multivitamin Use in the Month Before Pregnancy

* Mothers <20 years of age had BMI >30 (and were not classified as obese via childhood growth charts)
**Includes only mothers ages 20 and above.
Note: Percentages are not reported if the number of respondents was less than five.
Question 11: During the 3 months before you got pregnant with your new baby, did you have any of the following health problems?

- Anemia: 14%
- Anxiety: 10%
- Depression: 10%
- Asthma: 8%
- Thyroid Problems: 4%
- Hypertension: 3%
- Diabetes: 2%
- Heart Conditions: 1%
- Epilepsy: <1%
PRE-PREGNANCY ACTIVITIES

Question 1: At any time during the 12 months before you got pregnant with your new baby, did you do any of the following things?

Mothers Reporting Activities During the Twelve Months Prior to Pregnancy

- Had teeth cleaned: 54%
- Exercising 3+ days/week: 36%
- Dieting: 28%
- Discussed family medical history: 24%
- Taking Rx (other than birth control): 20%
- Checked for hypertension: 11%
- Checked for depression: 9%
- Checked for diabetes: 8%
TOPICS DISCUSSED DURING PRE-PREGNANCY HEALTHCARE VISITS

Question 8: Before you got pregnant with your new baby, did a doctor, nurse, or other health care worker talk with you about how to prepare for a healthy pregnancy and baby?

Mothers Reporting Topics Discussed During Pre-Pregnancy Visits

- Taking vitamins: 78%
- Safety of medications: 64%
- Healthy weight: 62%
- How alcohol affects baby: 61%
- How smoking affects baby: 60%
- How illegal drugs affect baby: 56%
- Updating immunizations: 42%
- Visiting a dentist: 38%
- Controlling medical conditions: 36%
- Getting genetic counseling: 34%
- Getting treatment for depression: 22%

Distribution of mothers reporting that a health care worker discussed how to prepare for a healthy pregnancy:

- Yes: 32%
- No: 68%
**STRESS**

Question 40: This question is about things that may have happened during the 12 months before your new baby was born.
For each item, circle YES if it happened to you or NO if it did not.

Mothers Reporting Stress by Type of Event

*Includes only mothers ages 20 and above.
Prenatal Factors
“Prenatal care is vital to the success of a healthy pregnancy and delivery. I was pregnant with a set of identical twins who shared a placenta. Without the prenatal care I had, they would not have survived.”

PRAMS mother
Distribution of Mothers by Trimester Prenatal Care Began

- First trimester: 79%
- Second trimester: 20%
- Third trimester: 1%
- No prenatal care: <1%

Percentage of Mothers Who Did Not Begin Prenatal Care During the First Trimester of Pregnancy

*Includes only mothers ages 20 and above.*
Question 24: Did any of these things keep you from getting prenatal care at all or as early as you wanted?

Reasons Given for Not Beginning Prenatal Care As Early in Pregnancy As Desired

- Didn't have insurance or enough money: 40%
- Didn't know she was pregnant: 39%
- Couldn't get appointment: 37%
- Didn't have Medicaid card: 33%
- Doctor/health plan would not start care earlier: 20%
- Keeping pregnancy secret: 15%
- Too busy: 14%
- No transportation: 11%
- No Leave: 11%
- No childcare: 10%
- Didn't want prenatal care: 4%

Began early enough: 81%
Did not begin early enough: 19%
Question 26: During any of your prenatal care visits, did a doctor, nurse, or other healthcare worker talk with you about any of the things listed below? Please count only discussions, not reading materials or videos.

Mothers Reporting That Selected Topics Were Discussed During Prenatal Care Visits

- Medicines that are safe during pregnancy: 89%
- Screening for birth defects: 86%
- Early labor: 84%
- Breastfeeding: 81%
- Preterm Labor Signs: 81%
- HIV testing: 77%
- Effects of drinking during pregnancy: 71%
- Depression: 69%
- Effects of smoking during pregnancy: 68%
- Effects of illegal drugs during pregnancy: 62%
- Seat belt use: 49%
- Physical abuse: 48%
COMPLICATIONS DURING PREGNANCY

Question 31: Did you have any of these problems during your most recent pregnancy? For each item, circle YES if you had the problem or circle NO if you did not.

Mothers Reporting Pregnancy Complications by Type of Complication

- Severe nausea: 26%
- Vaginal bleeding: 21%
- Kidney or bladder infection: 18%
- Preterm labor: 17%
- High blood pressure: 11%
- Gestational diabetes: 10%
- Problems with the placenta: 6%
- Premature rupture of membranes: 5%
- Automobile accident: 3%
- Incompetent cervix: 2%
- Blood transfusion: 2%

Distribution of mothers by number of complications:
- None: 35%
- One or more: 65%
HIV TESTING

Question 27: At any time during your most recent pregnancy or delivery, did you have a test for HIV (the virus that causes AIDS)?

Distribution of Mothers by HIV Testing Status

- Tested 73%
- Not tested 17%
- Don't know 10%

Percentage of Mothers Who Reported They Did Not Have an HIV Test During Pregnancy or Delivery

- Race and ethnicity
  - White Non Hispanic
  - Black Non Hispanic
  - Asian
  - Hispanic

- Age
  - <=12
  - >12

- Years of education*

*Includes only mothers ages 20 and above.
Distribution of Mothers by Flu Immunization Status

- **H1N1 Shot Only**: 8%
- **Seasonal Shot Only**: 30%
- **Both H1N1 and Seasonal Shots**: 16%
- **Neither flu shot**: 46%

Percentage of Mothers Who Reported They Did Not Have Any Flu Shots

Please mark your answers. Follow the directions included with the questions. If no directions are presented, check the box next to your answer or fill in the blanks. Because not all questions will apply to everyone, you may be asked to skip certain questions.

**BEFORE PREGNANCY**

First, we would like to ask a few questions about you and the time before you got pregnant with your new baby.

1. At any time during the 12 months before you got pregnant with your new baby, did you do any of the following things? For each item, circle Y (Yes) if you did it or circle N (No) if you did not.

<table>
<thead>
<tr>
<th>No</th>
<th>Yes</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. I was dieting (changing my eating habits) to lose weight</td>
<td>N Y</td>
</tr>
<tr>
<td>b. I was exercising 3 or more days of the week</td>
<td>N Y</td>
</tr>
<tr>
<td>c. I was regularly taking prescription medicines other than birth control</td>
<td>N Y</td>
</tr>
<tr>
<td>d. I visited a health care worker to be checked or treated for diabetes</td>
<td>N Y</td>
</tr>
<tr>
<td>e. I visited a health care worker to be checked or treated for high blood pressure</td>
<td>N Y</td>
</tr>
<tr>
<td>f. I visited a health care worker to be checked or treated for depression or anxiety</td>
<td>N Y</td>
</tr>
<tr>
<td>g. I talked to a health care worker about my family medical history</td>
<td>N Y</td>
</tr>
<tr>
<td>h. I had my teeth cleaned by a dentist or dental hygienist</td>
<td>N Y</td>
</tr>
</tbody>
</table>

2. During the month before you got pregnant with your new baby, were you covered by any of these health insurance plans?

- Health insurance from your job or the job of your husband, partner, or parents
- Health insurance that you or someone else paid for (not from a job)
- Medicaid or HealthChoice
- TRICARE or other military health care
- Other source(s) Please tell us: 

3. During the month before you got pregnant with your new baby, how many times a week did you take a multivitamin, a prenatal vitamin, or a folic acid vitamin?

- I didn’t take a multivitamin, prenatal vitamin, or folic acid vitamin at all
- 1 to 3 times a week
- 4 to 6 times a week
- Every day of the week

4. What were your reasons for not taking multivitamins, prenatal vitamins, or folic acid vitamins during the month before you got pregnant with your new baby?

- I wasn’t planning to get pregnant
- I didn’t think I needed to take vitamins
- The vitamins were too expensive
- The vitamins gave me side effects (such as constipation)
- Other Please tell us: 

Go to Page 2, Question 5
5. *Just before* you got pregnant with your new baby, how much did you weigh?

- [ ] Pounds OR [ ] Kilos

6. How tall are you without shoes?

- [ ] Feet [ ] Inches

OR [ ] Meters

7. What is your date of birth?

- [ ] / [ ] / 19

Month Day Year

8. *Before* you got pregnant with your new baby, did a doctor, nurse, or other health care worker talk with you about how to prepare for a healthy pregnancy and baby?

- [ ] No → Go to Question 10
- [ ] Yes

9. *Before* you got pregnant with your new baby, did a doctor, nurse, or other health care worker talk with you about any of the things listed below? *Please count only discussions,* not reading materials or videos. For each item, circle Y (Yes) if someone talked with you about it or circle N (No) if no one talked with you about it.

   a. Taking vitamins with folic acid before pregnancy.
   b. Being a healthy weight before pregnancy.
   c. Getting my vaccines updated before pregnancy.
   d. Visiting a dentist or dental hygienist before pregnancy.
   e. Getting counseling for any genetic diseases that run in my family.
   f. Controlling any medical conditions such as diabetes and high blood pressure.
   g. Getting counseling or treatment for depression or anxiety.
   h. The safety of using prescription or over-the-counter medicines during pregnancy.
   i. How smoking during pregnancy can affect a baby.
   j. How drinking alcohol during pregnancy can affect a baby.
   k. How using illegal drugs during pregnancy can affect a baby.
10. **Before you got pregnant with your new baby, were you ever told by a doctor, nurse, or other health care worker that you had Type 1 or Type 2 diabetes?** This is not the same as gestational diabetes or diabetes that starts during pregnancy.

- [ ] No
- [ ] Yes

11. **During the 3 months before you got pregnant with your new baby, did you have any of the following health problems?** For each one, circle Y (Yes) if you had the problem or circle N (No) if you did not.

<table>
<thead>
<tr>
<th>No</th>
<th>Yes</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. Asthma</td>

</tbody>
</table>

12. **Before you got pregnant with your new baby, did you ever have any other babies who were born alive?**

- [ ] No
- [ ] Yes

13. **Did the baby born just before your new one weigh more than 5 pounds, 8 ounces (2.5 kilos) at birth?**

- [ ] No
- [ ] Yes

14. **Was the baby just before your new one born more than 3 weeks before his or her date?**

- [ ] No
- [ ] Yes

15. **Thinking back to just before you got pregnant with your new baby, how did you feel about becoming pregnant?**

- [ ] I wanted to be pregnant sooner
- [ ] I wanted to be pregnant later
- [ ] I wanted to be pregnant then
- [ ] I didn’t want to be pregnant then or at any time in the future

16. **When you got pregnant with your new baby, were you trying to get pregnant?**

- [ ] No
- [ ] Yes

17. **When you got pregnant with your new baby, were you or your husband or partner doing anything to keep from getting pregnant?** (Some things people do to keep from getting pregnant include not having sex at certain times [natural family planning or rhythm] or withdrawal, and using birth control methods such as the pill, condoms, vaginal ring, IUD, having their tubes tied, or their partner having a vasectomy.)

- [ ] No
- [ ] Yes

---

Go to Page 4, Question 18

Go to Page 5, Question 21

Go to Page 4, Question 19
18. What were your reasons or your husband’s or partner’s reasons for not doing anything to keep from getting pregnant?

☐ I didn’t mind if I got pregnant
☐ I thought I could not get pregnant at that time
☐ I had side effects from the birth control method I was using
☐ I had problems getting birth control when I needed it
☐ I thought my husband or partner or I was sterile (could not get pregnant at all)
☐ My husband or partner didn’t want to use anything
☐ Other ➔ Please tell us:

20. Did you use any of the following fertility treatments during the month you got pregnant with your new baby?

☐ Fertility-enhancing drugs prescribed by a doctor (fertility drugs include Clomid®, Serophene®, Pergonal®, or other drugs that stimulate ovulation)
☐ Artificial insemination or intrauterine insemination (treatments in which sperm, but NOT eggs, were collected and medically placed into a woman’s body)
☐ Assisted reproductive technology (treatments in which BOTH a woman’s eggs and a man’s sperm were handled in the laboratory, such as in vitro fertilization [IVF], gamete intrafallopian transfer [GIFT], zygote intrafallopian transfer [ZIFT], intracytoplasmic sperm injection [ICSI], frozen embryo transfer, or donor embryo transfer)
☐ Other medical treatment ➔ Please tell us:

If you were not trying to get pregnant when you got pregnant with your new baby, go to Question 21.

19. Did you take any fertility drugs or receive any medical procedures from a doctor, nurse, or other health care worker to help you get pregnant with your new baby? (This may include infertility treatments such as fertility-enhancing drugs or assisted reproductive technology.)

☐ No ➔ Go to Question 21
☐ Yes

Go to Question 20

Go to Question 21
DURING PREGNANCY

The next questions are about the prenatal care you received during your most recent pregnancy. Prenatal care includes visits to a doctor, nurse, or other health care worker before your baby was born to get checkups and advice about pregnancy. (It may help to look at the calendar when you answer these questions.)

21. How many weeks or months pregnant were you when you were sure you were pregnant?  
(For example, you had a pregnancy test or a doctor or nurse said you were pregnant.)

- _____ Weeks OR _____ Months
- ❑ I don’t remember

22. How many weeks or months pregnant were you when you had your first visit for prenatal care?  
Do not count a visit that was only for a pregnancy test or only for WIC (the Special Supplemental Nutrition Program for Women, Infants, and Children).

- _____ Weeks OR _____ Months
- ❑ I didn’t go for prenatal care

Go to Question 23

23. Did you get prenatal care as early in your pregnancy as you wanted?

❑ No
❑ Yes — Go to Page 6, Question 25

24. Did any of these things keep you from getting prenatal care at all or as early as you wanted? For each item, circle T (True) if it was a reason that you didn’t get prenatal care when you wanted or circle F (False) if it was not a reason for you or if something does not apply to you.

<table>
<thead>
<tr>
<th>True</th>
<th>False</th>

Go to Question 63

Go to Question 62

If your baby is still in the hospital, go to Question 61.
62. What are your reasons or your husband’s or partner’s reasons for not doing anything to keep from getting pregnant now?

Check all that apply

☐ I am not having sex
☐ I want to get pregnant
☐ I don’t want to use birth control
☐ My husband or partner doesn’t want to use anything
☐ I don’t think I can get pregnant (sterile)
☐ I can’t pay for birth control
☐ I am pregnant now
☐ Other ——— Please tell us:

63. Below is a list of feelings and experiences that women sometimes have after childbirth. Read each item to determine how well it describes your feelings and experiences. Then, write on the line the number of the choice that best describes how often you have felt or experienced things this way since your new baby was born. Use the scale when answering:

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td>Never</td>
<td>Rarely</td>
<td>Sometimes</td>
<td>Often</td>
<td>Always</td>
<td></td>
</tr>
</tbody>
</table>

a. I felt down, depressed, or sad . . . ___
b. I felt hopeless . . . . . . . . . . . . . . . ___
c. I felt slowed down . . . . . . . . . . . . . ___
d. I felt panicky . . . . . . . . . . . . . . . ___
e. I felt restless . . . . . . . . . . . . . . . ___

64. Since your new baby was born, has a doctor, nurse, or other health care worker told you that you had depression?

☐ No
☐ Yes

65. Since your new baby was born, has a doctor, nurse, or other health care worker told you that you had anxiety?

☐ No
☐ Yes

66. How old were you when you had your first menstrual period?

___ Years old

67. How old were you when you got pregnant for the first time?

___ Years old

68. How old were you when your first baby was born?

___ Years old
69. Have you ever had your teeth cleaned by a dentist or dental hygienist?

- No  Go to Question 71
- Yes

70. How long has it been since you had your teeth cleaned by a dentist or a dental hygienist?

- Within the past year (less than 12 months)
- 1 to less than 2 years (12 to 23 months)
- 2 to less than 5 years
- 5 or more years

The last questions are about the time during the 12 months before your new baby was born.

71. During the 12 months before your new baby was born, what was your yearly total household income before taxes? Include your income, your husband’s or partner’s income, and any other income you may have received. (All information will be kept private and will not affect any services you are now getting.)

- Less than $10,000
