"I really like that you are doing this survey and that you are sharing it so that other women can have good pregnancies." "Everything was great. Thank you so much for the support and thank you for your program." "I wonder if questions about miscarriage and stillbirth might be helpful in this questionnaire. Thank you for these efforts. Maybe we will never know why some babies are born healthy, some not and some die, but it feels good to know that people are trying to find answers." PRAMS mothers

INTRODUCTION

This report highlights data from births occurring to Maryland residents in 2015 collected through the Pregnancy Risk Assessment Monitoring System (PRAMS). PRAMS is a surveillance system established by the Centers for Disease Control and Prevention (CDC) in 1987 to obtain information about maternal behaviors and experiences that may be associated with adverse pregnancy outcomes. Data are collected by surveying women who have recently delivered live born infants.

PRAMS projects are conducted through cooperative agreements between the CDC and state health departments. PRAMS projects for 2015 births were underway in 40 states and New York City, representing 78% of all U.S. live births. All surveys include a core set of standardized questions, which allows for multi-state analyses. In addition, each state can add questions tailored to meet its needs. The core section of the survey includes questions relating to prenatal care, obstetric history, smoking, alcohol use, physical abuse, contraception, economic status, maternal stress, and infant health. The Maryland-specific section of the survey includes questions on maternal employment, assisted reproduction, pre-pregnancy health, co-sleeping, contraceptive use, depression, oral health, chronic disease, physical activity, infections, and labor induction.

The PRAMS project in Maryland is a collaborative effort of the Maternal and Child Health Bureau (MCHB), the Vital Statistics Administration (VSA) of the Maryland Department of Health (MDH), and the CDC. Maryland began collecting PRAMS data from mothers who delivered in 2000.

METHODOLOGY

Sampling and Data Collection

Women eligible to participate in PRAMS are selected from Maryland's live birth certificate files and need to be Maryland residents who have delivered in the state. Each month, a stratified, random sample of approximately 200 live births is selected. The sample is stratified by infant birth weight (<2500 grams, ≥2500 grams). This sampling frame over-samples mothers who have delivered a low birth weight infant (<2500 grams).

PRAMS combines two modes of data collection; a survey conducted by mailed questionnaire with multiple follow-up attempts, and if mail is not successful, a survey conducted by telephone interview. Survey questionnaires and other materials are available in both English and Spanish.

The first mailing, which is done two to four months after delivery, is a letter that introduces PRAMS to the mother and informs her that a questionnaire will soon arrive. Within seven days of this letter, the questionnaire packet is mailed. This packet includes the 84-item main survey along with an informed consent page, calendar, and resource brochure. In addition, a manicure file is sent as an incentive for completing the survey. Seven to 10 days after the

initial packet is mailed, a tickler that serves as a thank you and reminder note is sent. Mothers who do not respond to the tickler within seven to 14 days are mailed a second questionnaire packet. A third questionnaire packet is mailed to all remaining nonrespondents seven to 14 days later. Telephone follow-up is initiated for all nonrespondents.

Data collected through PRAMS are linked to birth certificate data, which allows for the survey data to be weighted to reflect the total birth population. Sampling, nonresponse, and noncoverage adjustment factors are applied to the data in order to make the results generalizable to the state's population of women delivering live born infants during the study period. Further information on PRAMS methodology, including weighting procedures, may be found on the CDC website at http://www.cdc.gov/prams/methodology.htm.

Survey Response and Data Analysis

The CDC recommends that states obtain a response rate of at least 60% for analysis of PRAMS 2015 births data. The weighted response rate among women delivering in Maryland between January 1, 2015 and December 31, 2015 was 65%. During this 12-month period, 1,288 mothers completed the PRAMS questionnaire with a weighted response reflecting 66,226 mothers. The weighted figure included 28,619 births to white non-Hispanic, 20,119 births to black non-Hispanic, 4,773 births to Asian, 10,557 births to Hispanic women, 59 births to American Indian, 1,618 Other/Mixed, and 480 Missing race/ethnicity. Survey findings in this report are shown by race/Hispanic origin (White Non-Hispanic, Black Non-Hispanic, Asian Non-Hispanic, and Hispanic), maternal age and maternal years of education.

ACKNOWLEDGMENTS

The Maryland PRAMS Project would like to acknowledge the CDC PRAMS Team for their technical assistance and support, especially Denise D'Angelo, MPH, our project manager who has expertly guided and assisted our program since 2002. Additionally, our thanks go to the Maryland PRAMS Steering Committee for their invaluable input to many aspects of our project.

Most importantly, we very much appreciate the 1,288 mothers who took the time to complete the questionnaires that are represented in this report. Their answers will contribute greatly towards our continuing efforts to improve the health of Maryland mothers and babies.

Maryland PRAMS Highlights--2015

Preconception factors

- Forty-one percent of all live births were unintended (includes women who said they were 'not sure' how they felt about the pregnancy).
- Twenty-two percent of women reported they were covered by Medicaid or Health Choice just before pregnancy and 17% were uninsured.
- According to their body mass index (BMI) just before pregnancy, 25% of mothers were overweight and 25% were obese.
- Thirty-five percent of women reported taking a multivitamin daily in the month before conception.
- Before pregnancy, 13% of women reported they had **anxiety** and 9% had **depression.**
- During the 3 months just before pregnancy, 14% of women smoked, 51% consumed alcohol, and 14% had at least one episode of binge drinking.
- In the 12 months before pregnancy, 42% of women had not had a **dental cleaning**.
- Twenty-six percent of mothers reported they had a preconception health visit.

Prenatal factors

- Eighty-one percent of mothers began prenatal care during the first trimester of pregnancy, and 1% began in the third trimester or received no care.
- Forty-five percent of women participated in the WIC program during pregnancy.
- Nineteen percent of mothers needed to see a dentist about a problem during pregnancy and 15% saw a dentist about a problem.

- Seventy-two percent of mothers reported that HIV testing was discussed during prenatal care visits; 64% reported getting an HIV test.
- Physical abuse by a current husband or partner was reported by 3% of mothers.
- Six percent of women smoked during the last three months of pregnancy. Ten percent of women reported using alcohol and 0.5% of women reported a binge-drinking episode during the last three months of pregnancy.
- Fifty-nine percent of women were vaccinated for seasonal flu during the 12 months before delivery or during pregnancy.
- Labor induction was reported by 41% of mothers.
- Thirty-six percent of women used Medicaid or Health Choice for their prenatal care and 5% were uninsured.
- Eleven percent of women had gestational diabetes.

Infant health and related factors

- Eighty-seven percent of infants were breastfed after delivery, and 68% were breastfed eight weeks or longer.
- In terms of **sleeping environment**, 79% of infants were usually placed on their backs to sleep and 27% slept with another person.

Maternal postpartum factors

- Twenty-five percent of mothers reported they were not using postpartum contraception.
- Nine percent of mothers smoked postpartum.
- Twelve percent of mothers reported symptoms of postpartum depression.

Increase the proportion of infants who were breastfed (ever).	85%	86%	88%	89%	87%	81.9%

^{*}Includes data from May 1, 2012 – December 31, 2012 (8 months)

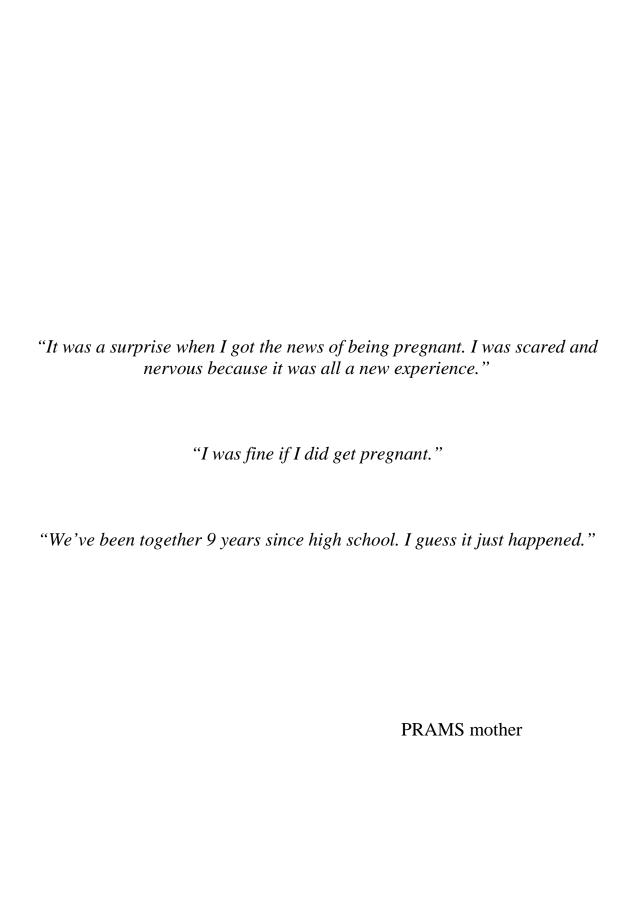

^{**}PRAMS data includes only information on pregnancies that end in live birth; In 2012, option "I wasn't sure what I wanted" was not considered intended;

^{***}First trimester defined by PRAMS as <13weeks

^{****}Binge drinking = 4 or more drinks in a two hour sitting, starting 2009 births. Prior to 2009, binge drinking = 5 or more drinks in one episode.

Preconception Factors

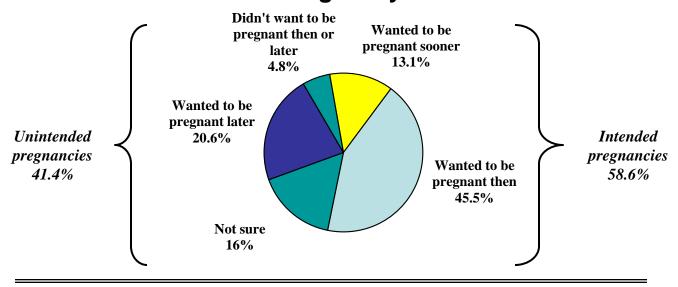

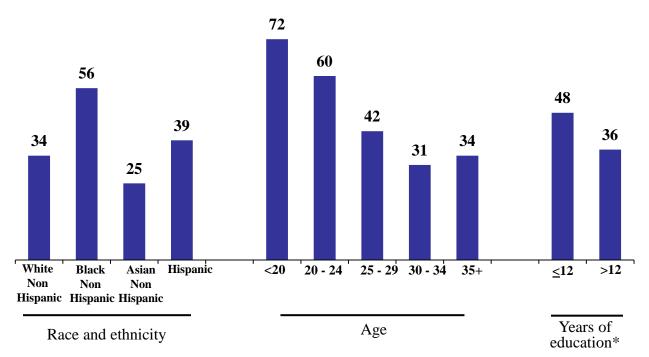

INTENDEDNESS OF PREGNANCY

Question 13: Thinking back to *just before* you got pregnant with your *new* baby, how did you feel about becoming pregnant?

Distribution of Mothers by Intendedness of Pregnancy

Percentage of Mothers With Unintended Pregnancies

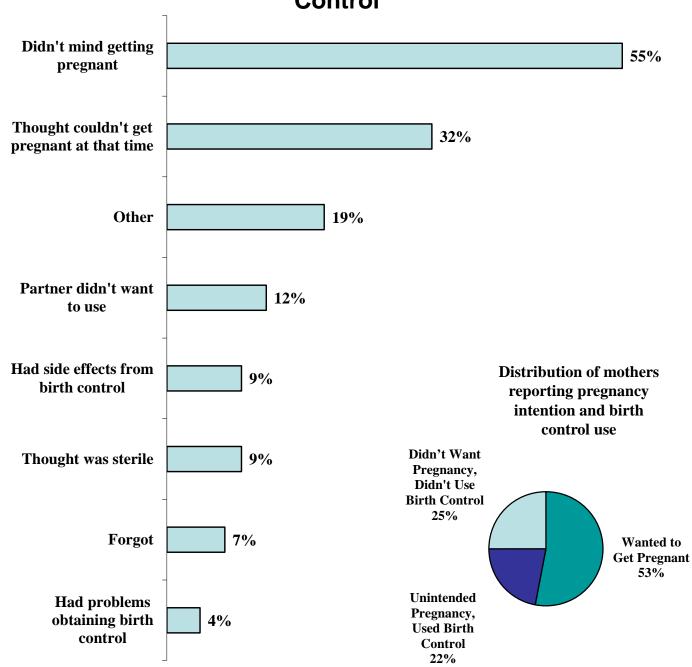

PREGNANCY INTENTION AND BIRTH CONTROL USE

Question 15: When you got pregnant with your new baby, were you trying to get pregnant? Question 16: When you got pregnant with your new baby, were you or your husband or partner doing anything to keep from getting pregnant?

Question 17: What were your reasons or your husband's or partner's reasons for not doing anything to keep from getting pregnant?

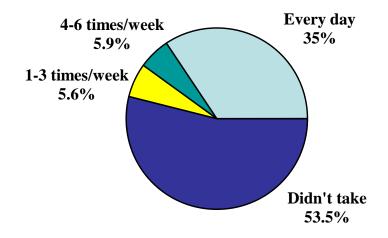

Mothers Reporting Reasons for Not Using Birth Control

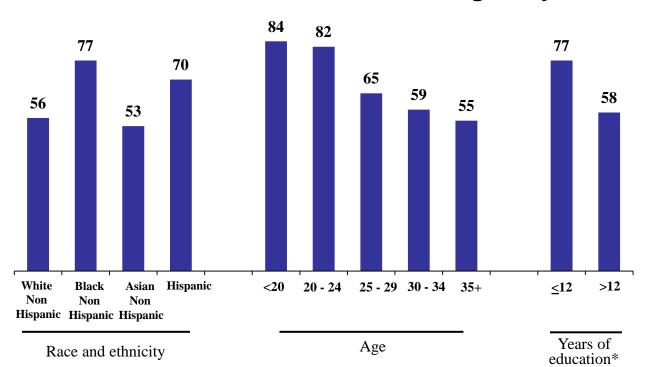

MULTIVITAMIN USE

Question 9: During the *month before* you got pregnant with your new baby, how many times a week did you take a multivitamin, a prenatal vitamin, or a folic acid vitamin?

Distribution of Mothers by Frequency of Multivitamin Use in the Month Before Pregnancy

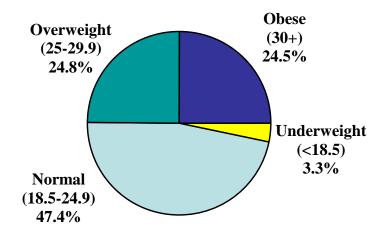

Percentage of Mothers Who Reported Less Than Daily Multivitamin Use in the Month Before Pregnancy

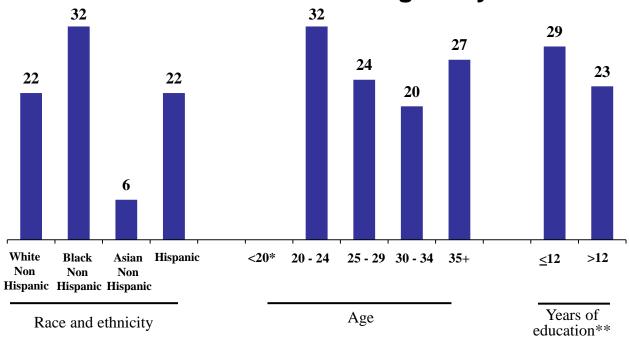

PRE-PREGNANCY BMI

Question 1: How tall are you without shoes? Question 2: *Just before* you got pregnant with your new baby, how much did you weigh?

Distribution of Mothers by BMI Status Before Pregnancy

Percentage of Mothers Who Were Classified as Obese Before Pregnancy

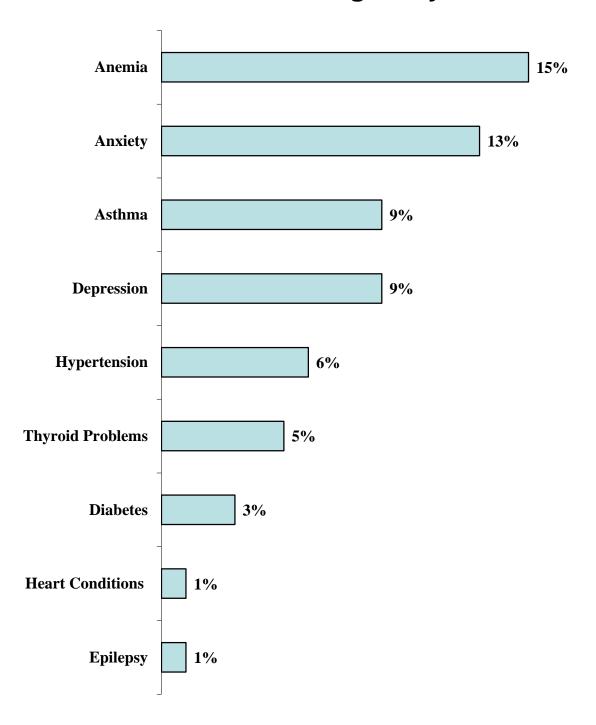

^{*} Mothers <20 years of age had BMI >30 (and were not classified as obese via childhood growth charts) Note: Percentages are not reported if the number of respondents was less than five.

PRE-PREGNANCY HEALTH PROBLEMS

Question 11: *Before* you got pregnant with your new baby, did a doctor, nurse, or other health care worker tell you that you had any of the following health conditions?

Question 12: During the *3 months before* you got pregnant with your new baby, did you have any of the following health conditions?

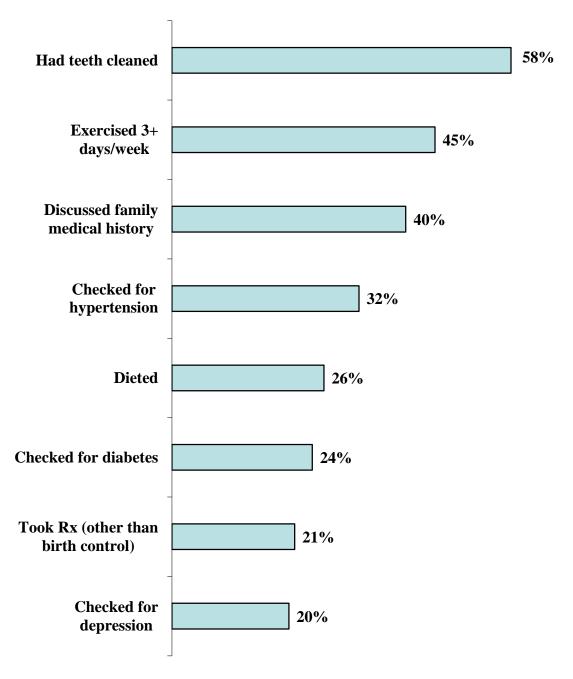

Mothers Reporting Health Problems Before Pregnancy

PRE-PREGNANCY ACTIVITIES

Question 7: At any time during the *12 months before* you got pregnant with your new baby, did you do any of the following things?

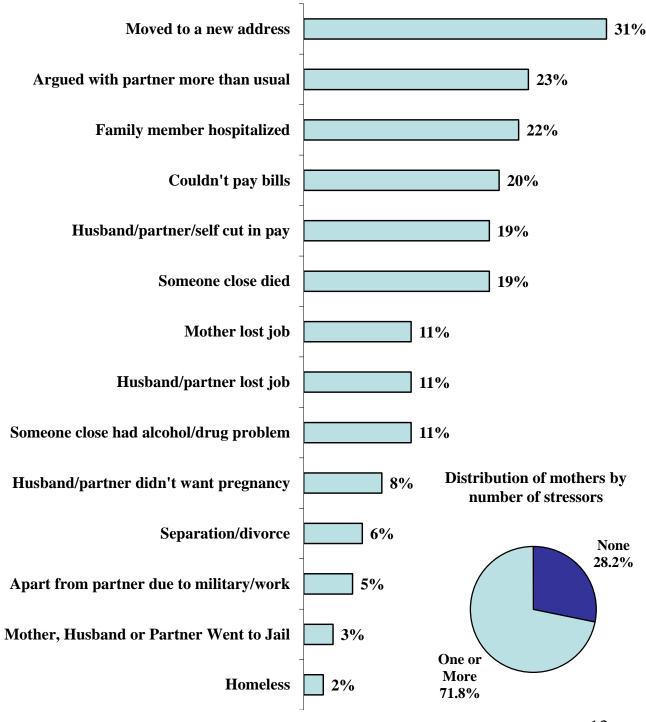

Mothers Reporting Activities During the Twelve Months Prior to Pregnancy

STRESS

Question 44: This question is about things that may have happened during the *12 months before* your new baby was born. For each item, circle YES if it happened to you or NO if it did not.

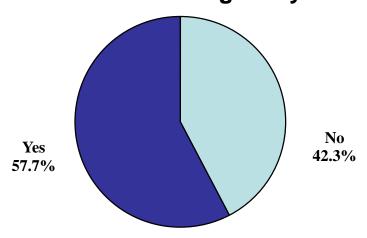

Mothers Reporting Stress by Type of Event

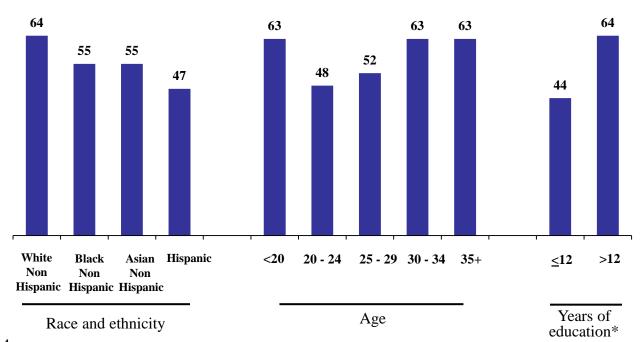

ORAL HEALTH

Question 7: At any time during the *12 months before* you got pregnant with your new baby, did you have your teeth cleaned by a dentist or dental hygienist?

Mothers Reporting on Teeth Cleaning 12 Months Before Pregnancy

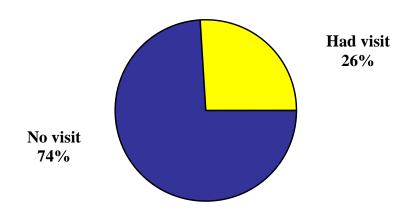

Percentage of Mothers Who Reported Having Had their Teeth Cleaned 12 Months Before Pregnancy

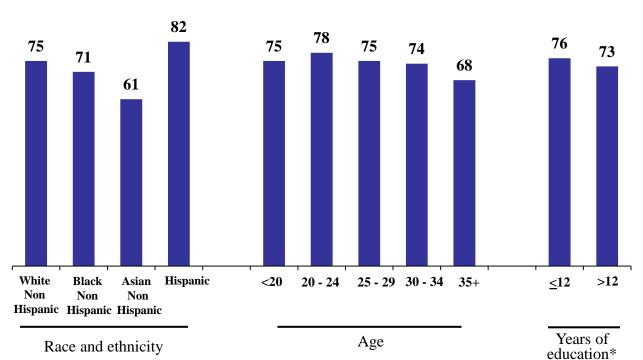

PRECONCEPTION HEALTH VISIT

Question 10: *Before* you got pregnant with your new baby, did a doctor, nurse, or other health care worker talk to you about how to improve your health before pregnancy?

Distribution of Mothers by Preconception Health Visit

Percentage of Mothers Who Reported No Preconception Health Visit

*Includes only mothers ages 20 and above.

Prenatal Factors

"It took a while for the health insurance to go through, so that's why I first went for prenatal care so late into my pregnancy. I had health issues that should have been addressed earlier in my pregnancy."

"When you get pregnant it is very important to get prenatal care, if you can't afford medical insurance the Department of Social Services will help you. When I found out I was pregnant with my firstborn, I was afraid because I didn't know how to raise a baby. I was still in high school."

"I have 2 children. In both cases, I was talked into a c-section, which did not seem necessary. Due to increased risks that come along with c-sections, this may be an interesting avenue of research. Thank you!"

"They should speak before you hit the mark of how much weight you should gain, because when I hit the 30 pound mark that's when they told me to stop gaining weight."

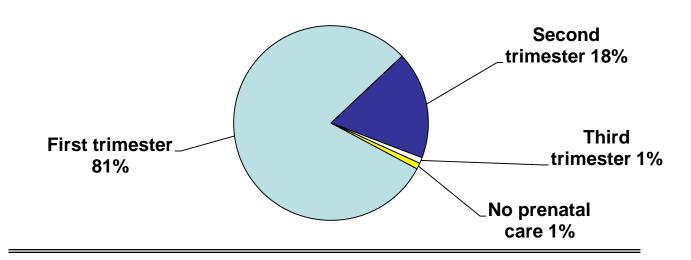

"My doctor spoke about everything, he made sure to cover all the subjects."

PRAMS mothers

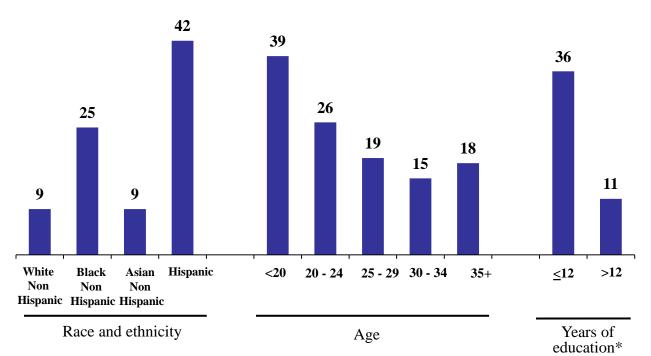

TRIMESTER PRENATAL CARE BEGAN

Question 21: How many weeks or months pregnant were you when you had your first visit for prenatal care?

Distribution of Mothers by Trimester Prenatal Care Began

Percentage of Mothers Who Did Not Begin Prenatal Care During the First Trimester of Pregnancy

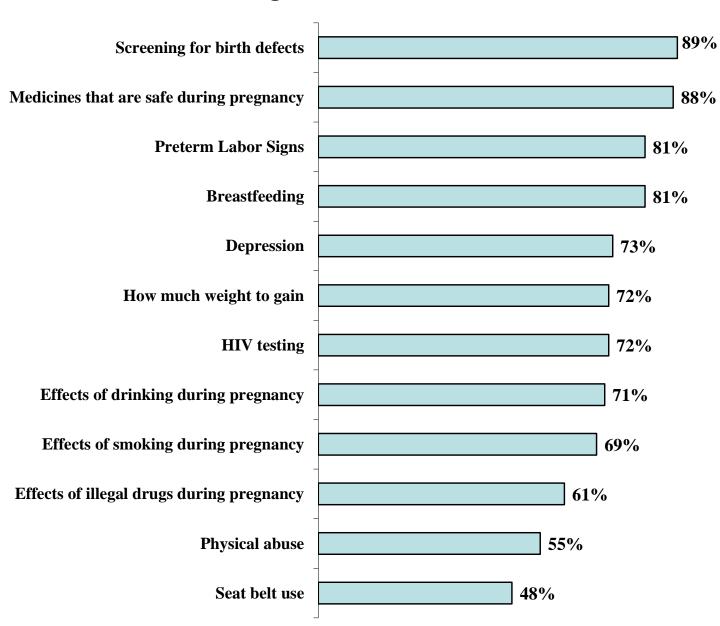

*Includes only mothers ages 20 and above.

TOPICS DISCUSSED DURING PRENATAL CARE VISITS

Question 23: *During any of your prenatal care visits*, did a doctor, nurse, or other healthcare worker talk with you about any of the things listed below?

Please count only discussions, not reading materials or videos.

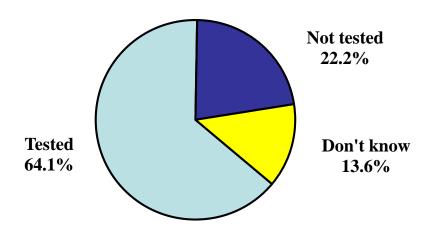

Mothers Reporting That Selected Topics Were Discussed During Prenatal Care Visits

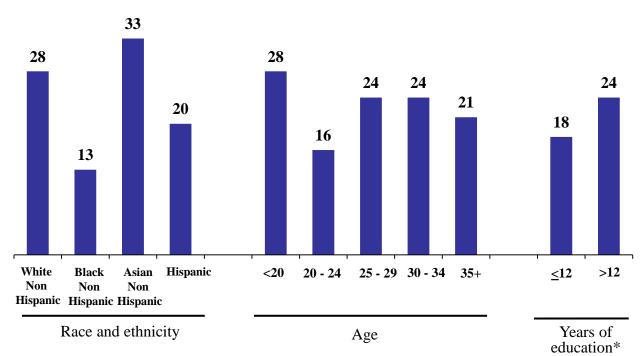

HIV TESTING

Question 25: At any time during *your most recent* pregnancy or delivery, did you have a test for HIV (the virus that causes AIDS)?

Distribution of Mothers by HIV Testing Status

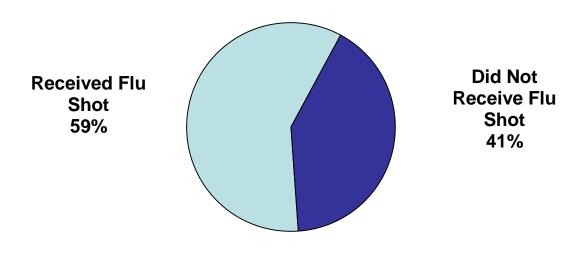

Percentage of Mothers Who Reported They Did Not Have an HIV Test During Pregnancy or Delivery

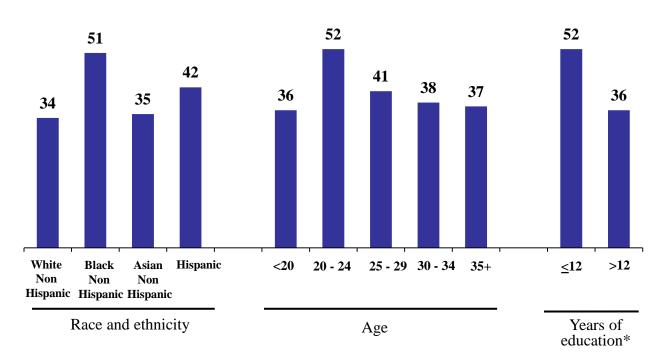

INFLUENZA IMMUNIZATIONS

Question 27: During the 12 months before the delivery of your new baby, did you get a flu shot?

Distribution of Mothers by Flu Immunization Status Year Before Delivery

Percentage of Mothers Who Reported They Did Not Get a Flu Shot Year Before Delivery

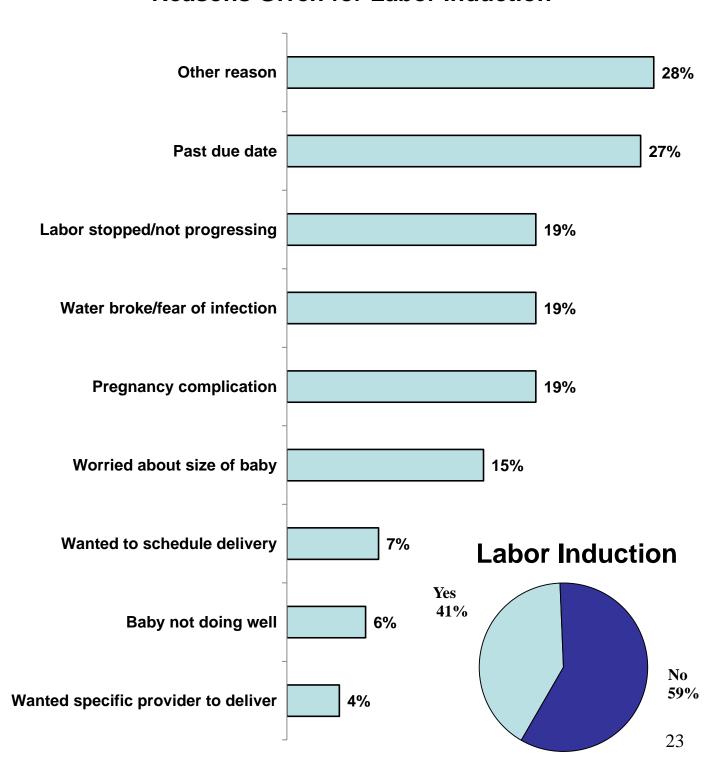

REASONS FOR LABOR INDUCTION

Question 48: Did your doctor, nurse, or other health care worker try to induce your labor (start your contractions using medicine)?

Question 49: Why did your doctor, nurse, or other health care worker try to induce your labor (start your contractions using medicine)?

Reasons Given for Labor Induction

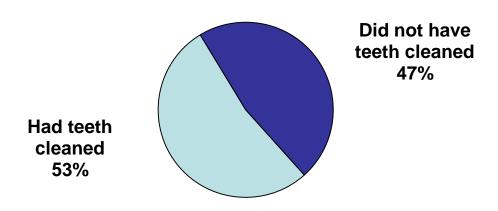

TEETH CLEANING

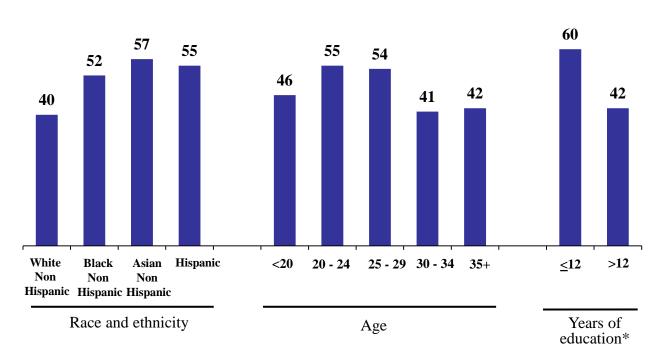

Question 29: This question is about the care of your teeth *during your most recent pregnancy*. Question 29c: I had my teeth cleaned by a dentist or dental hygienist.

For each item, check **No** if it is not true or does not apply to you or **Yes** if it is true.

Distribution of Mothers by Teeth Cleaning During Pregnancy

Percentage of Mothers Who Did Not Have Their Teeth Cleaned During Pregnancy

ORAL HEALTH PROBLEMS

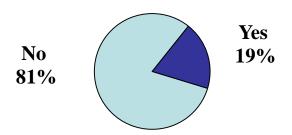

Question 29e: I needed to see a dentist for a problem (during pregnancy).

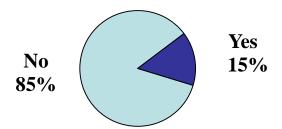

Question 29f: I went to a dentist or dental clinic about a problem (during pregnancy).

Question 30: Did any of the following things make it hard for you to go to a dentist or dental clinic about the problem you had during your most recent pregnancy?

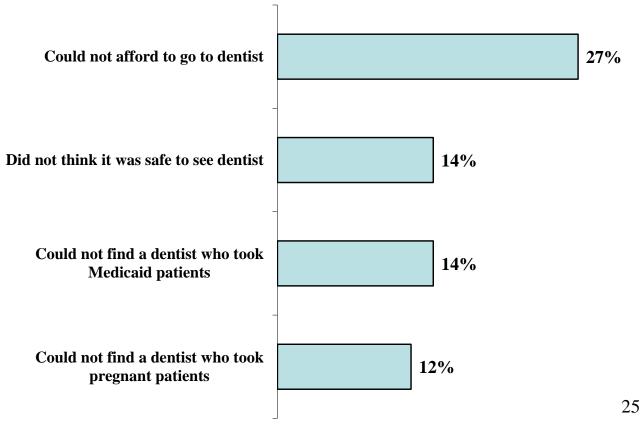

Distribution of Mothers Who Needed to See a Dentist about a Problem During Pregnancy

Distribution of Mothers Who Went to See a Dentist about a Problem During Pregnancy

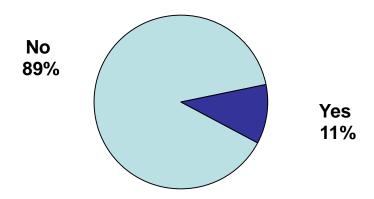

Factors Making it Difficult to See a Dentist About a Problem During Pregnancy

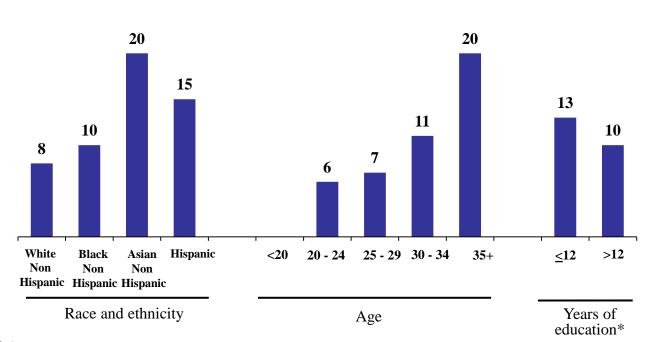

GESTATIONAL DIABETES

Question 34: During *your most recent* pregnancy, were you told by a doctor, nurse, or other health care worker that you had gestational diabetes (diabetes that started during this pregnancy)?

Distribution of Mothers by Gestational Diabetes Status

Percentage of Mothers Who Had Gestational Diabetes

26

^{*}Includes only mothers ages 20 and above.

Health Care Coverage, WIC, Home Visiting, and Employment

"It would be helpful if Maryland had leave for mothers following childbirth until the infants have at least received their first series of vaccines at 6 months. The time needed between a mother and child is priceless and very important for development."

"I didn't get to get my dental done from having morning sickness all day long every day. Then when I had her, it was gone off my insurance."

"I hope my answers help you. Mothers having enough leave is such a big deal. How could someone go back at 6 weeks? Or even 12? We really need to find a way to allow babies to have their mothers for longer. I'm really lucky that I have a flexible job, but babies excel with good care and patience that is enhanced by mothers who are there and not worried about pay, work, or anything else."

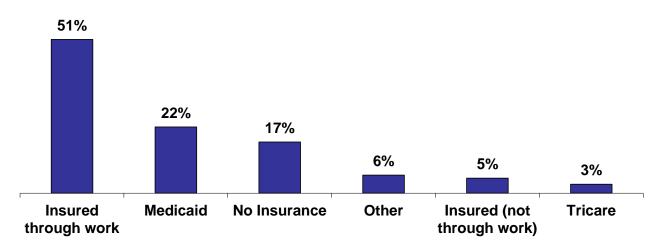

"I wish we could get WIC or childcare vouchers because we are financially challenged at the moment and have been for the last few years."

PRAMS mothers

HEALTH INSURANCE BEFORE PREGNANCY

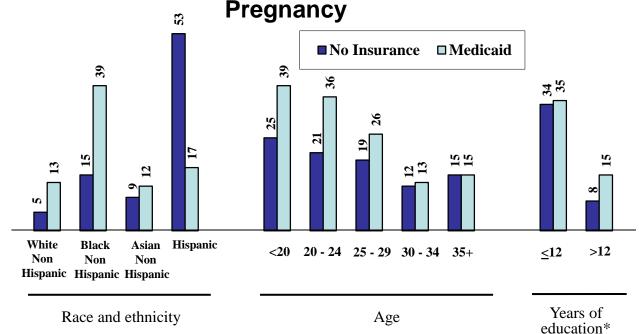

Question 8: During the *month before* you got pregnant with your new baby, what kind of *health insurance* did you have?

Health Insurance Status Just Before Pregnancy**

** Respondents were instructed to identify all sources of payment, therefore percentages do not sum to 100.

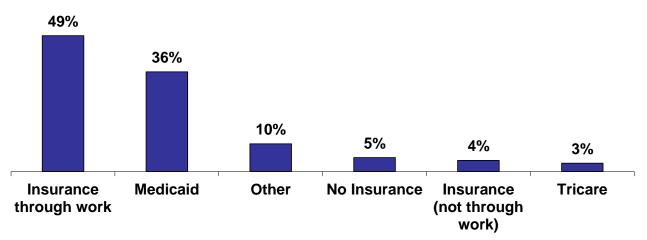

Percentage of Mothers Who Reported Having Medicaid or No Health Insurance Just Before

SOURCE OF PAYMENT FOR PRENATAL CARE

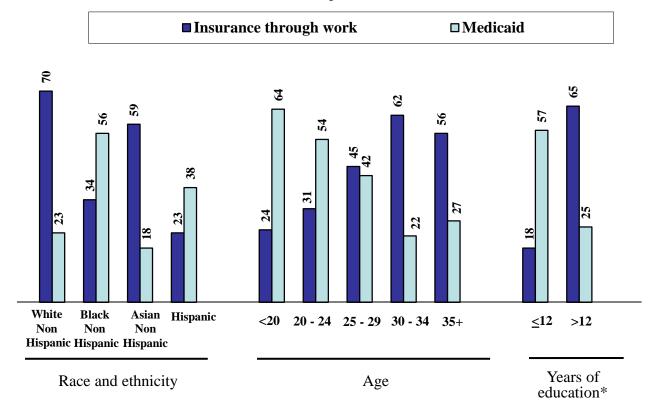

Question 22: During *your most recent* pregnancy, what kind of *health insurance* did you have to pay for your *prenatal care*?

Source(s) of Payment for Prenatal Care**

** Respondents were instructed to identify all sources of payment, therefore percentages do not sum to 100.

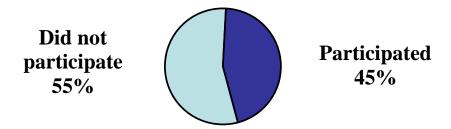

Percentage of Mothers Who Identified Insurance or Medicaid as a Source of Payment for Prenatal Care

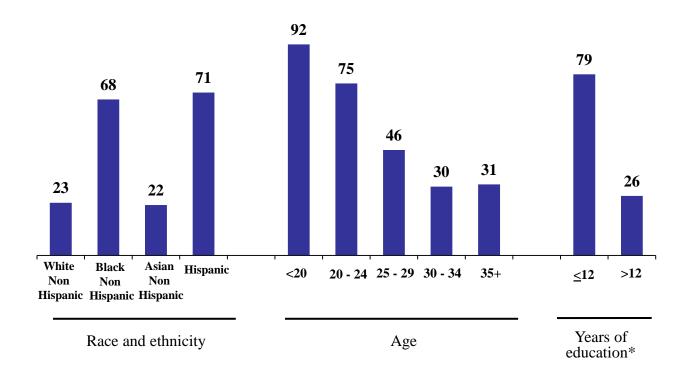

WIC PARTICIPATION

Question 33: During *your most recent* pregnancy, were you on WIC (the Special Supplemental Nutrition Program for Women, Infants, and Children)?

Distribution of Mothers by Participation in the WIC Program During Pregnancy

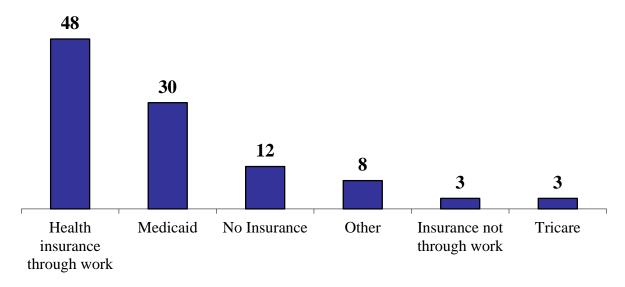

Percentage of Mothers Who Participated in the WIC Program During Pregnancy

CURRENT HEALTH INSURANCE

Question 68: What kind of *health insurance* do you have *now*? Check all that apply.

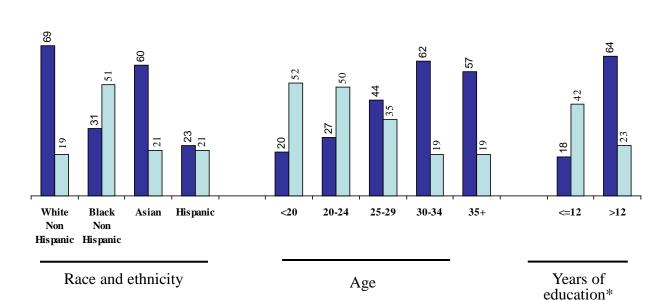

Source(s) of Current Health Insurance**

^{**}Respondents were instructed to identify all sources of insurance, therefore percentages do not sum to 100.

Percentage of Mothers Who Identified Currently Having Insurance or Medicaid

■ Insurance through work □ Medicaid

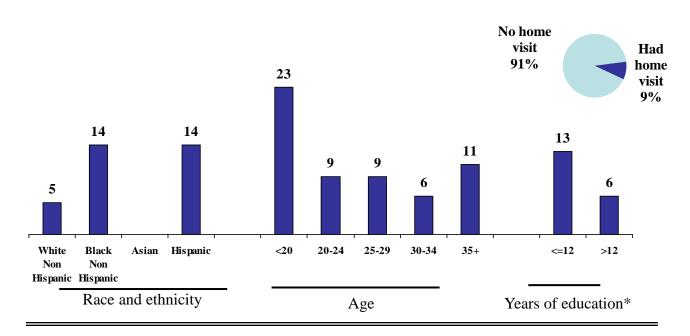

32

HOME VISITING

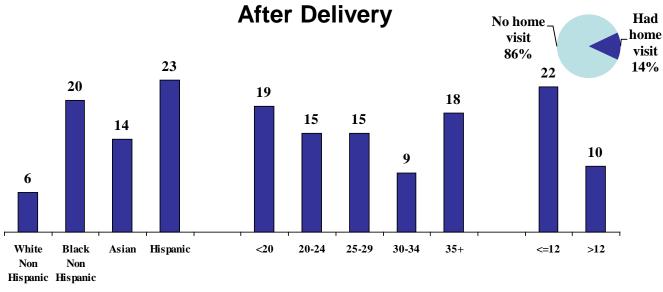

Question 32: During *your most recent* pregnancy, did a home visitor come to your home to help you prepare for your new baby?

Question 61: *Since your new baby was born*, has a home visitor come to your home to help you learn how to take care of yourself or your new baby?

Distribution of Mothers who had a Home Visit During Pregnancy

Distribution of Mothers who had a Home Visit

Race and ethnicity

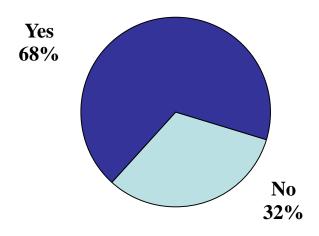

Age

Years of education*

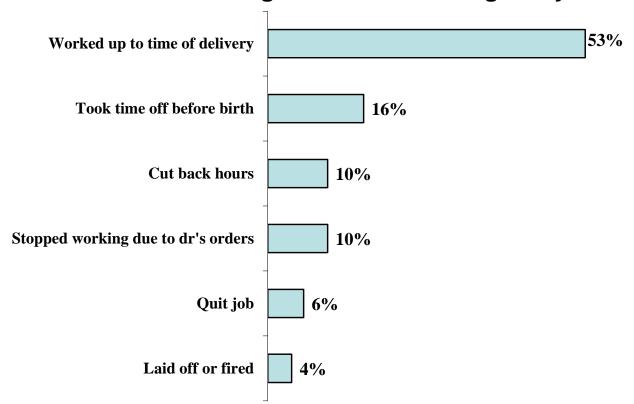

MATERNAL EMPLOYMENT

Question 76: At any time during *your most recent* pregnancy, did you work at a job for pay? Question 77: Which of the following best describes your work schedule during the *last month* of your most recent pregnancy?

Distribution of Mothers Who Worked At a Job For Pay During Pregnancy

Work Schedule During Last Month of Pregnancy

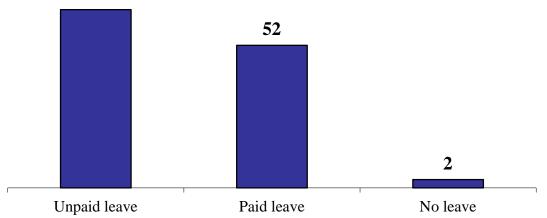

WORKPLACE LEAVE

Question 79: Which of the following describes the leave or time you took off from work *after* your new baby was born?

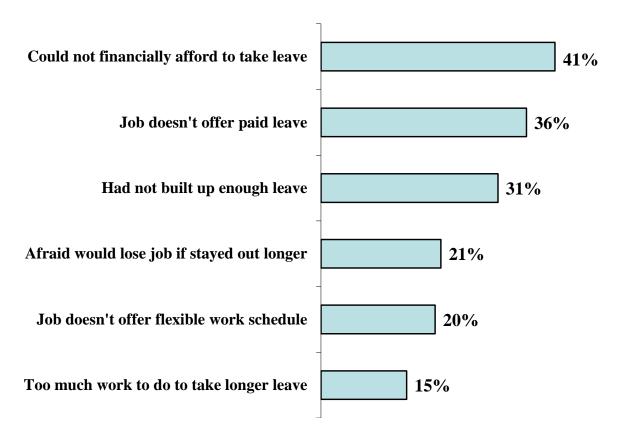

Question 80: Did any of the things listed below affect your decision about taking leave from work *after* your new baby was born?

Distribution of Leave That Mothers Took After Delivery*

^{*}Respondents were instructed to check all that apply, therefore percentages do not sum to 100.

Factors Affecting Decision to Take Leave

Selected Risk Factors

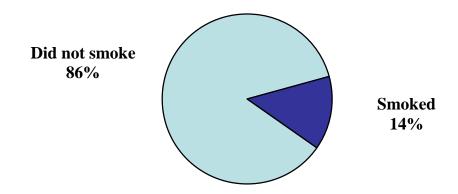

"I was very unhappy during my pregnancy. My child's father was physically and mentally abusive."
"I am happy I was able to quit smoking when I found out I was pregnant. I do believe smoking has a factor on an unborn child."
"I had wine. I had one because I was nervous. They said red wine was good for the baby's heart. Red wine has antioxidants."
"I believe that everyone who smokes should quit the day they find out they are pregnant. It is better for the child and mother. Unfortunately for me it was hard not to pick it back up 2 months after breastfeeding."
PRAMS mothers

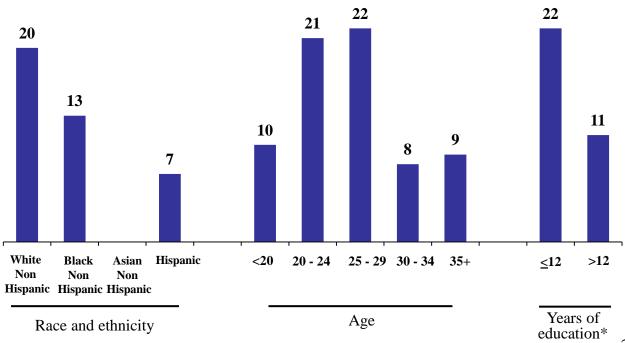

SMOKING BEFORE PREGNANCY

Question 36: In the *three months <u>before</u>* you got pregnant, how many cigarettes did you smoke on an average day?

Distribution of Mothers by Smoking Status During the Three Month Period Before Pregnancy Began

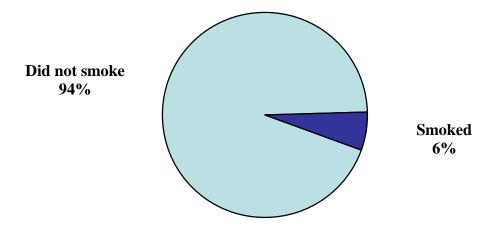

Percentage of Mothers Who Reported They Smoked During the Three Month Period Before Pregnancy Began

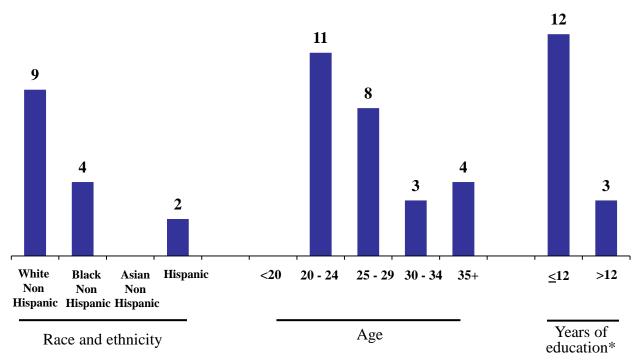

SMOKING DURING PREGNANCY

Question 37: In the <u>last 3</u> months of your pregnancy, how many cigarettes did you smoke on an average day?

Distribution of Mothers by Smoking Status During the Last Three Months of Pregnancy

Percentage of Mothers Who Reported They Smoked During the Last Three Months of Pregnancy

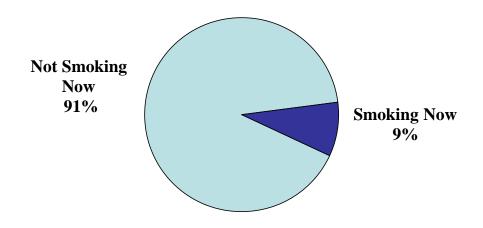

^{*}Includes only mothers ages 20 and above.

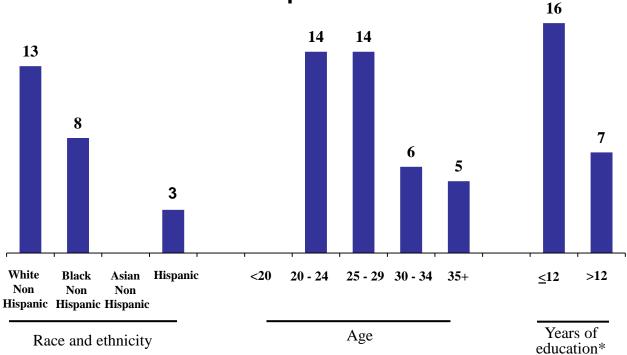

SMOKING AFTER PREGNANCY

Question 38: How many cigarettes do you smoke on an average day now?

Distribution of Mothers by Smoking Status in the Postpartum Period

Percentage of Mothers Who Reported They Smoked in the Postpartum Period

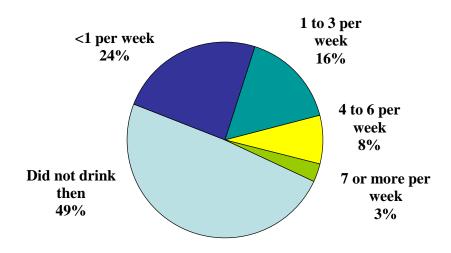

*Includes only mothers ages 20 and above.

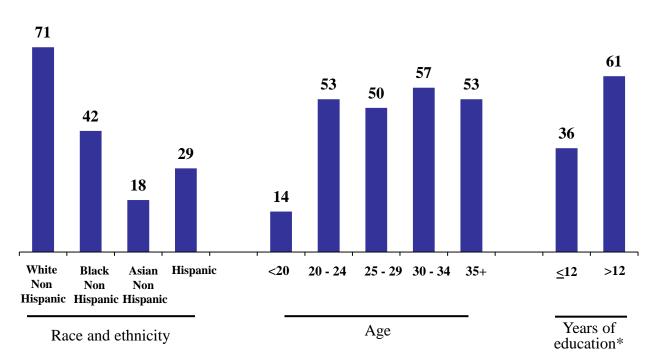

ALCOHOL USE BEFORE PREGNANCY

Question 40: During the *3 months <u>before</u>* you got pregnant, how many alcoholic drinks did you have in an average week?

Distribution of Mothers by the Number of Alcoholic Drinks During the Three Month Period Preceding Pregnancy

Percentage of Mothers Who Reported Any Alcohol Use in the Three Months Preceding Pregnancy

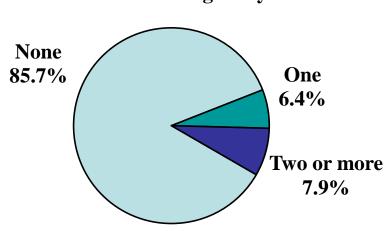

ALCOHOL BINGES BEFORE AND DURING PREGNANCY

Question 41: During the *3 months <u>before</u>* you got pregnant, how many times did you drink 4 alcoholic drinks or more in a two hour time span?

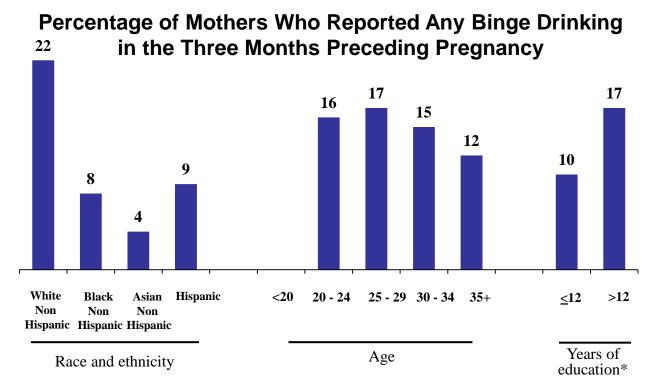

Question 43: During the <u>last 3</u> months of your pregnancy, how many times did you drink 4 alcoholic drinks or more in a 2 hour time span?

Distribution of Mothers by the Number of Alcohol Binges (4+ Drinks in One Sitting) Before and During Pregnancy

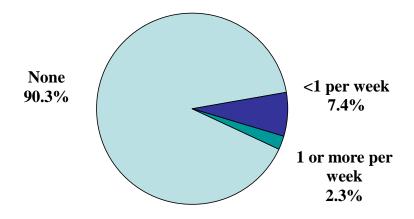

0.5%

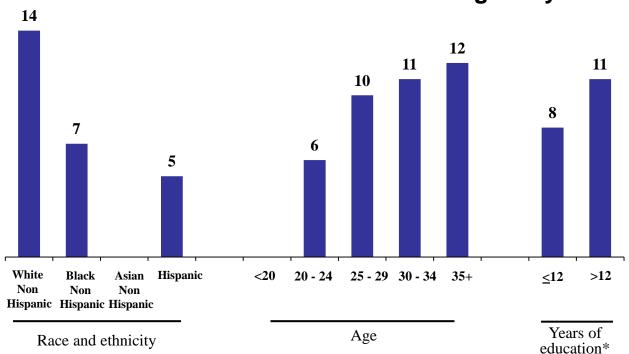

ALCOHOL USE DURING PREGNANCY

Question 42: During the <u>last 3</u> months of your pregnancy, how many alcoholic drinks did you have in an average week?

Distribution of Mothers by the Number of Alcoholic Drinks During the Last Three Months of Pregnancy

Percentage of Mothers Who Reported Any Alcohol Use in the Last Three Months of Pregnancy

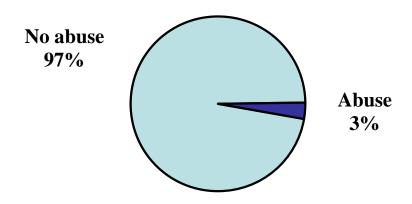

*Includes only mothers ages 20 and above.

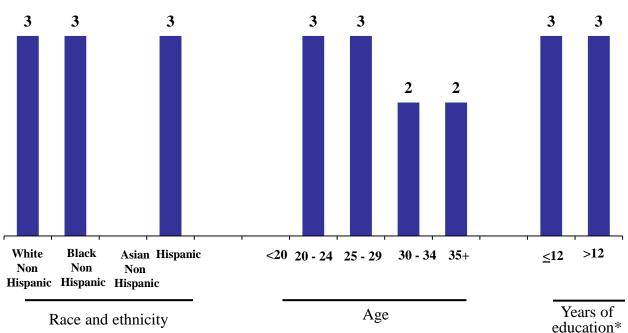

PHYSICAL ABUSE BEFORE PREGNANCY

Question 45: During the *12 months before* you got pregnant with your new baby, did your husband or partner push, hit, slap, kick, choke, or physically hurt you in any other way?

Distribution of Mothers by Abuse Before Pregnancy by Husband or Partner

Percentage of Mothers Who Reported Being Physically Abused Before Pregnancy by a Husband or Partner

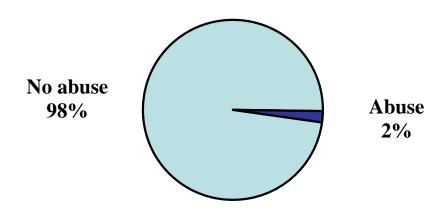

*Includes only mothers ages 20 and above.

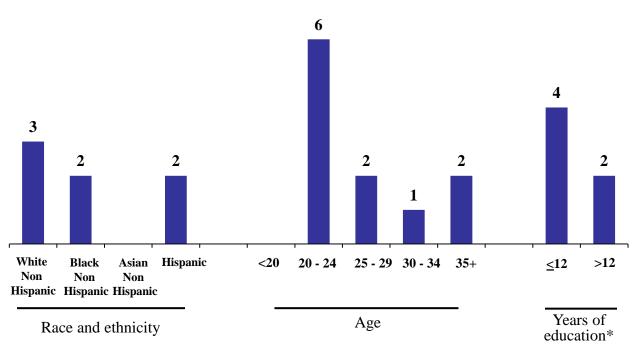

PHYSICAL ABUSE DURING PREGNANCY

Question 46: During *your most recent* pregnancy, did your husband or partner push, hit, slap, kick, choke, or physically hurt you in any other way?

Distribution of Mothers by Abuse During Pregnancy by Husband or Partner

Percentage of Mothers Who Reported Being Physically Abused During Pregnancy by a Husband or Partner

*Includes only mothers ages 20 and above.

Postpartum Factors

"I was lucky to be able to take some paid leave after birth (6 weeks). It was hard to go back so soon, given baby's erratic sleep schedule and my recovery (c-section). I don't know how mothers who don't have leave manage. Fathers who can't take leave also miss out on a critical part of family bonding. Parental leave should be available to all – paid. We are so penny wise – pound foolish in this country. We 'save' money on not funding parental leave, but how much do we 'spend' on poorer outcomes – health, crime, divorce, poverty?"

"The free classes the health department offered for breastfeeding and Lamaze were very informative and helpful."

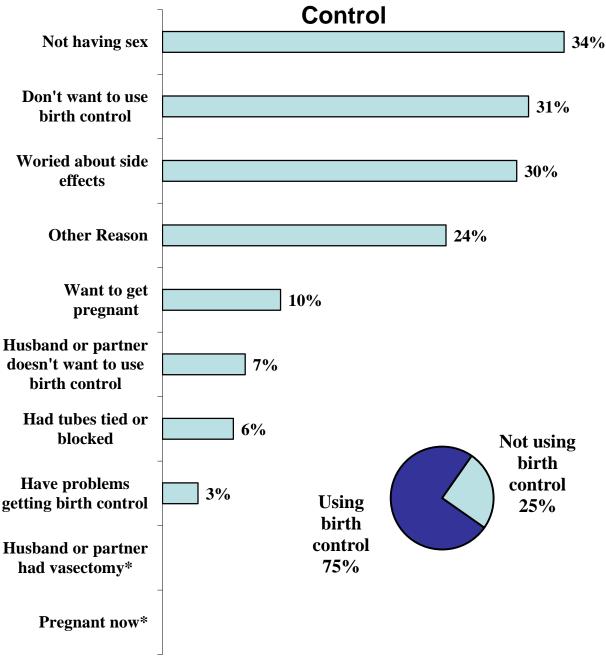

"The most difficult time for me was 3 weeks after the birth of my child. I had problems with breastfeeding, baby was screaming all the time, and I even felt that maybe I should not have even had a baby...I thought my life was over and that I will never get back to doing normal things ever again. But it got better."

PRAMS mothers

REASONS FOR NO POSTPARTUM BIRTH CONTROL

Question 62: Are you or your husband or partner doing anything *now* to keep from getting pregnant? Question 63: What are your reasons or your husband's or partner's reasons for not doing anything to keep from getting pregnant *now*? Check all that apply.

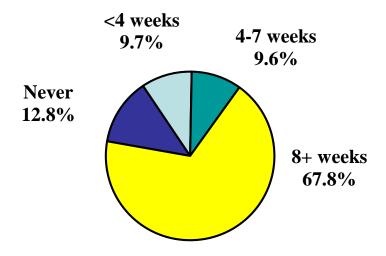

Reasons Reported for Not Using Postpartum Birth

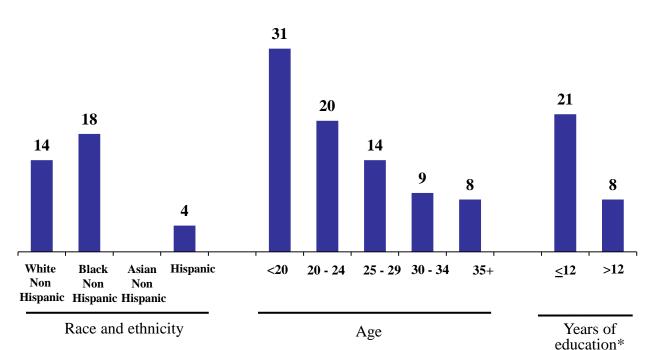

BREASTFEEDING

Question 58: How many weeks or months did you breastfeed or pump milk to feed your baby?

Distribution of Mothers by Length of Time Infant Was Breastfed

Percentage of Mothers Who Reported Never Breastfeeding

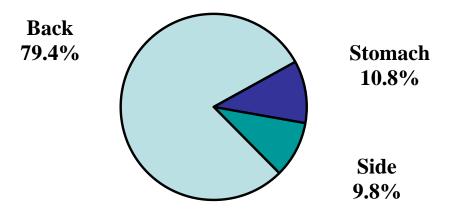

*Includes only mothers ages 20 and above.

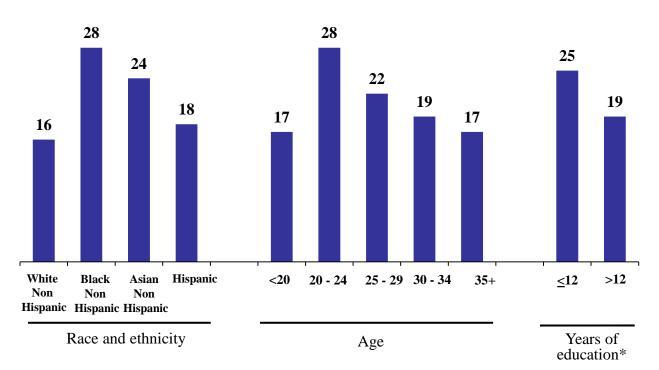

SLEEP POSITION

Question 59: In which one position do you most often lay your baby down to sleep now?

Distribution of Infants by Sleep Position

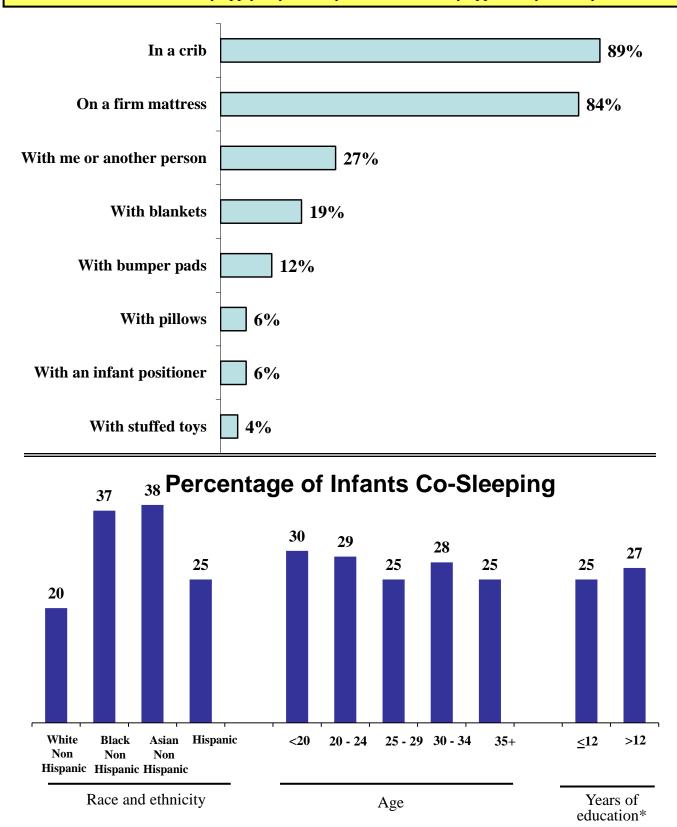

Percentage of Infants Not Placed on Back to Sleep

51

SLEEP ENVIRONMENT

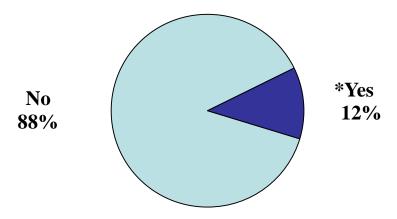

Question 60: Listed below are some things that describe how your new baby usually sleeps. Check **No** if it doesn't usually apply to your baby or **Yes** if it usually applies to your baby.

SYMPTOMS OF POSTPARTUM DEPRESSION

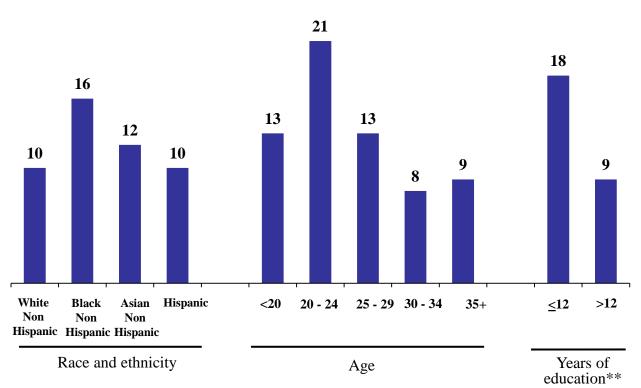

Question 66: Since your new baby was born, how often have you felt down, depressed, or hopeless? Question 67: Since your new baby was born, how often have you had little interest or little pleasure in doing things?

Distribution of Mothers by Postpartum Depression

*Includes mothers who reported having symptoms "Always" or "Often" to Questions 66 or 67

Percentage of Mothers Who Reported Postpartum Depression

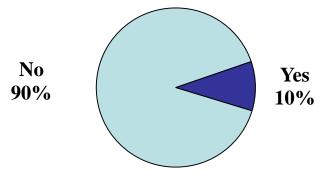

POSTPARTUM DEPRESSION DIAGNOSED

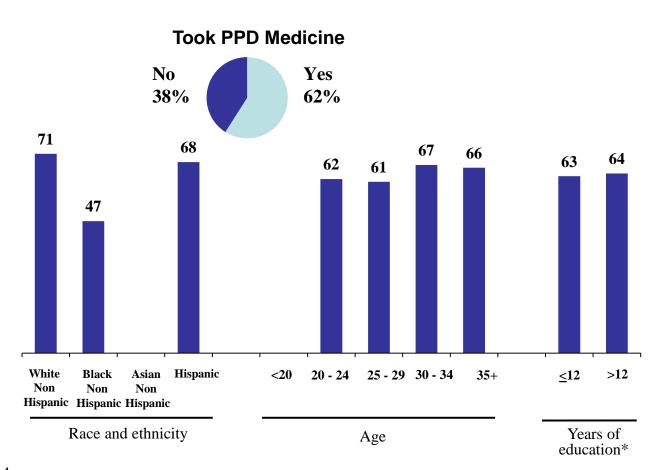

Question 74: Since your new baby was born, has a doctor, nurse, or other health care worker told you that you had depression?

Question 75: Since your new baby was born, have you taken prescription medicine for your depression?

Distribution of Mothers by Diagnosis of Postpartum Depression (PPD)

Percentage of Mothers Diagnosed With Postpartum Depression Who Took Prescription Medicine

Phase 7 Questionnaire

"I would like to thank (PRAMS) for letting me be a part of this research project."		
"The survey would have been helpful during pregnancy. I didn't know I should have done all of the HIV tests and anxiety tests. If I knew before, I would have asked the doctor about it. It is really helpful for the women who are pregnant now. They can understand what to ask their doctors."		
PRAMS mothers		

Please check the box next to your answer or follow the directions included with the question. You may be asked to skip some questions that do not apply to you.

	BEFORE PREGNANCY		
T	he first questions are about you.		
1.	How tall are you without shoes?		
	Feet Inches		
	OR Centimeters		
2.	Just before you got pregnant with your new baby, how much did you weigh?		
	Pounds OR Kilos		
3.	What is <u>your</u> date of birth?		
	Month Day Year		
4.	Before you got pregnant with your new baby, did you ever have any other babies who were born alive?		
igcup	□ No → Go to Question 7 □ Yes		
5.	Did the baby born <i>just before</i> your new one weigh 5 pounds, 8 ounces (2.5 kilos) or <i>less</i> at birth?		
	□ No □ Yes		

	born <i>earlier</i> than 3 weeks before his or her due date?	
	□ No □ Yes	
The next questions are about the time before you got pregnant with your new baby.		
7.	At any time during the 12 months before you got pregnant with your new baby, did you do any of the following things? For each item, check No if you did not do it or Yes if you did it.	
	No Yes
