INTRODUCTION

This report highlights data from births occurring to Maryland residents in 2008 collected through the Pregnancy Risk Assessment Monitoring System (PRAMS). PRAMS is a surveillance system established by the Centers for Disease Control and Prevention (CDC) in 1987 to obtain information about maternal behaviors and experiences that may be associated with adverse pregnancy outcomes. Data are collected by surveying women who have recently delivered live born infants.

PRAMS projects are conducted through cooperative agreements between the CDC and state health departments. PRAMS projects are currently underway in 37 states, New York City and South Dakota (Yankton Sioux Tribe). All surveys include a core set of standardized questions, which allows for multi-state analyses. In addition, each state can add questions tailored to meet its needs. The core section of the survey includes questions relating to prenatal care, obstetric history, smoking, alcohol use, physical abuse, contraception, economic status, maternal stress, and infant health. The Maryland-specific section of the survey includes questions on assisted reproduction, contraceptive use, depression, oral health, chronic disease, physical activity, and infections.

The PRAMS project in Maryland is a collaborative effort of the Center for Maternal and Child Health (CMCH), the Vital Statistics Administration (VSA) of the Maryland Department of Health and Mental Hygiene, and the CDC. Maryland began collecting PRAMS data from mothers who delivered in 2000.

METHODOLOGY

Sampling and Data Collection

Women eligible to participate in PRAMS are selected from Maryland’s live birth certificate files. Each month, a stratified, random sample of approximately 200 live births is selected. The sample is stratified by maternal age (<35 years, ≥35 years) and infant birth weight (<2500 grams, ≥2500 grams). This sampling frame over-samples mothers who have delivered a low birth weight infant (<2500 grams) as well as mothers who are 35 years of age or older.

PRAMS combines two modes of data collection, a survey conducted by mailed questionnaire with multiple follow-up attempts, and if mail is not successful, a survey conducted by telephone interview. Survey questionnaires and other materials are available in both English and Spanish.

The first mailing, which is done two to four months after delivery, is a letter that introduces PRAMS to the mother and informs her that a questionnaire will soon arrive. Within seven days of this letter, the questionnaire packet is mailed. This packet includes the 76-item survey, informed consent page, calendar, and resource brochure. The mothers also receive either a 30-minute pre-paid phone card or $5 Target gift card incentive in their Mail 1 packets. As an added attempt to increase response rates, entry into a random monthly drawing for a $100 Target
gift card reward is available to those mothers who complete the survey by mail. Seven to 10 days after the initial packet is mailed, a tickler that serves as a thank you and reminder note is sent. Mothers who do not respond to the tickler within seven to 14 days are mailed a second questionnaire packet. A third questionnaire packet is mailed to all remaining nonrespondents seven to 14 days later. Telephone follow-up is initiated for all nonrespondents.

Data collected through PRAMS are linked to birth certificate data, which allows for the survey data to be weighted to reflect the total birth population. Sampling, nonresponse and noncoverage adjustment factors are applied to the data in order to make the results generalizable to the state’s population of women delivering live born infants during the study period. Further information on PRAMS methodology, including weighting procedures, may be found on the CDC website at http://www.cdc.gov/PRAMS/methodology.htm.

Survey Response and Data Analysis

CDC recommends that states obtain a response rate of at least 70% for analysis of PRAMS. The weighted response rate among women delivering in Maryland between January 1, 2008 and December 31, 2008 was 73.4%. During this period, 1,713 mothers completed the PRAMS questionnaire with a weighted response reflecting 69,471 mothers. The weighted figure included 32,326 births to White Non-Hispanic women and 22,810 births to Black Non-Hispanic women. Survey findings in this report are shown by race/Hispanic origin (White Non-Hispanic, Black Non-Hispanic, Asian and Hispanic), maternal age and maternal years of education.

ACKNOWLEDGMENTS

The Maryland PRAMS Project would like to acknowledge the CDC PRAMS Team for their technical assistance and support, especially Denise D’Angelo, MPH, our project manager who has expertly guided and assisted our program. Additionally, our thanks go to the Maryland PRAMS Steering Committee for their invaluable input to many aspects of our project.

Most importantly, we very much appreciate all the 1,713 mothers who took the time to complete the questionnaires that are represented in this report. Their answers will contribute greatly towards our continuing efforts to improve the health of Maryland mothers and babies.

Maryland PRAMS Highlights--2008

Preconception factors

- Forty-two percent of all pregnancies were unintended.
- Fourteen percent of mothers reported a pregnancy loss in the twelve months preceding the current pregnancy.
- Sixty-six percent of women reported having health insurance just before pregnancy, and 7% reported they were covered by Medicaid or Health Choice.
- Thirty percent of women reported taking a multivitamin daily in the month before conception.
- Ten percent of mothers who were attempting to become pregnant used fertility treatments; 41% reported using fertility drugs, 7% used artificial insemination, and 31% used assisted reproductive technology.

Prenatal factors

- Seventy-eight percent of mothers began prenatal care during the first trimester of pregnancy, and 1% received no care.
- Sixty-six percent of women reported that health insurance or an HMO paid for their prenatal care; 29% reported that Medicaid or Health Choice paid for their care.
- Forty-two percent of women participated in the WIC program during pregnancy.
- Sixty-six percent of mothers reported one or more medical complications during pregnancy; severe nausea, preterm labor, and kidney or bladder infections were the most common complications.
- Eighty-one percent of mothers had a dental visit during pregnancy, and 22% needed to be seen for a dental problem.

Infant health and related factors

- Twelve percent of newborns were admitted to a neonatal intensive care unit.
- Fifty-two percent of newborns were discharged from the hospital within two days of delivery, and 7% remained in the hospital for 6 or more days.
- Eighty-one percent of infants were breastfed after delivery, and 68% were breastfed four weeks or longer.
- In terms of sleeping position, 69% of infants were usually placed on their backs to sleep, and 12% on their stomachs.
- Ninety-eight percent of infants had a well-baby checkup.

Maternal postpartum factors

- Sixteen percent of mothers reported they were not using postpartum contraception.
- Fourteen percent of mothers smoked postpartum.
- Thirty-two percent of mothers reported that they had not discussed postpartum depression with their health care providers during prenatal or postpartum visits.

*PRAMS data includes only information on pregnancies that end in live birth

**First trimester defined by PRAMS as <13 weeks
reconception
Factors
“I kept on procrastinating on getting my birth control. Next thing you know, I’m pregnant.”

“Women and families need time prior to birth to ensure the calmest, healthiest, organized experience for the family.”

PRAMS mothers
Question 13: Thinking back to just before you got pregnant with your new baby, how did you feel about becoming pregnant?

**Distribution of Mothers by Intendedness of Pregnancy**

- **Intended pregnancies** 57.6%
  - Wanted to be pregnant then: 40.8%
  - Wanted to be pregnant sooner: 16.7%
  - Didn't want to be pregnant then or later: 8.9%

- **Unintended pregnancies** 42.4%
  - Wanted to be pregnant later: 33.5%

**Percentage of Mothers With Unintended Pregnancies**

- 25.3%
- 26.7%
- 30.1%
- 44.9%
- 55.3%
- 30.4%

*Includes only mothers ages 20 and above.
PHYSICAL ACTIVITY BEFORE PREGNANCY

Question 67: During the 3 months before you got pregnant with your new baby, how often did you participate in any physical activities or exercise for 30 minutes or more?

Distribution of Mothers by Physical Activity During the Three Month Period Before Pregnancy Began

- 1-4 days/week: 46.8%
- Less than 1 day/week: 37.3%
- 5 or more days/week: 15.9%

Percentage of Mothers Who Reported They Participated in Physical Activity Less Than Five Times Per Week

*Includes only mothers ages 20 and above.*
Question 7: During the 3 months before you got pregnant with your new baby, did you have any of the following health problems?

Mothers Reporting Health Problems During the Three Months Prior to Conception

- Anemia: 13.7%
- Asthma: 9.7%
- Hypertension: 2.9%
- Diabetes: 1.3%
- Heart conditions: 1.0%
**MULTIVITAMIN USE**

Question 3: During the *month before* you got pregnant with your new baby, how many times a week did you take a multivitamin or a prenatal vitamin? These are pills that contain many different vitamins and minerals.

**Distribution of Mothers by Frequency of Multivitamin Use in the Month Before Pregnancy**

- **Didn't take** 54.5%
- **Every day** 29.8%
- **1-3 times/week** 9.5%
- **4-6 times/week** 6.2%
- **Didn't take** 54.5%

**Percentage of Mothers Who Reported Less Than Daily Multivitamin Use in the Month Before Pregnancy**

Health Care Coverage and WIC Participation
“I think health coverage for new moms should last for 6 months to a year after a baby's birth. To have healthy children you need healthy moms.”

“If I had had insurance, I would have gone for prenatal care even in my first month, but because I had just got my job and my insurance was not yet effective and I didn't have any other insurance I started prenatal care late.”

PRAMS mothers
HEALTH INSURANCE BEFORE PREGNANCY

Question 1: Just before you got pregnant, did you have health insurance? Do not count Medicaid.

Distribution of Mothers by Health Insurance Status Just Before Pregnancy

- Insurance: 65.7%
- No insurance: 34.3%

WELL-BABY CHECKUP
Question 59: Has your baby had a well-baby checkup?

Distribution of Births by Well-Baby Checkup

- Checkup: 98.4%
- No checkup: 1.6%

Percentage of Mothers Who Reported Their Baby Did Not Have a Well-Baby Checkup

- Race and ethnicity
- Age
- Years of education*

*Includes only mothers ages 20 and above.
Note: Percentages are not reported if the number of respondents was less than five.
“I think this survey is a wonderful idea and good way to reach out to new mothers.”

PRAMS mother
First, we would like to ask a few questions about you and the time before you got pregnant with your new baby. Please check the box next to your answer.

1. *Just before you got pregnant, did you have health insurance?* Do not count Medicaid.
   - [ ] No
   - [ ] Yes

2. *Just before you got pregnant, were you on Medicaid?*
   - [ ] No
   - [ ] Yes

3. *During the month before you got pregnant with your new baby, how many times a week did you take a multivitamin or a prenatal vitamin?* These are pills that contain many different vitamins and minerals.
   - [ ] I didn’t take a multivitamin or a prenatal vitamin at all
   - [ ] 1 to 3 times a week
   - [ ] 4 to 6 times a week
   - [ ] Every day of the week

4. What is your date of birth?
   - Month: [ ]
   - Day: [ ]
   - Year: [ ]

5. *Just before you got pregnant with your new baby, how much did you weigh?*
   - [ ] Pounds OR [ ] Kilos

6. How tall are you without shoes?
   - [ ] Feet [ ] Inches
   - OR [ ] Centimeters

7. *During the 3 months before you got pregnant with your new baby, did you have any of the following health problems?* For each one, circle Y (Yes) if you had the problem or circle N (No) if you did not.
   - a. Asthma
   - b. High blood pressure (hypertension)
   - c. High blood sugar (diabetes)
   - d. Anemia (poor blood, low iron)
   - e. Heart problems

8. *Before you got pregnant with your new baby, did you ever have any other babies who were born alive?*
   - [ ] No
   - [ ] Yes
   - Go to Page 2, Question 11

9. Did the baby born *just before* your new one weigh 5 pounds, 8 ounces (2.5 kilos) or less at birth?
   - [ ] No
   - [ ] Yes

10. Was the baby *just before* your new one born more than 3 weeks before its due date?
    - [ ] No
    - [ ] Yes
11. How old were you when you had your first menstrual period?
   [ ] Years old

12. How old were you when you got pregnant with your first baby?
   [ ] Years old

The next questions are about the time when you got pregnant with your new baby.

13. Thinking back to just before you got pregnant with your new baby, how did you feel about becoming pregnant?
   [ ] I wanted to be pregnant sooner
   [ ] I wanted to be pregnant later
   [ ] I wanted to be pregnant then
   [ ] I didn’t want to be pregnant then or at any time in the future

Check one answer

14. When you got pregnant with your new baby, were you trying to get pregnant?
   [ ] No
   [ ] Yes
   Go to Question 17

15. When you got pregnant with your new baby, were you or your husband or partner doing anything to keep from getting pregnant? (Some things people do to keep from getting pregnant include not having sex at certain times [rhythm] or withdrawal, and using birth control methods such as the pill, condoms, cervical ring, IUD, having their tubes tied, or their partner having a vasectomy.)
   [ ] No
   [ ] Yes
   Go to Question 19

16. What were your or your husband’s or partner’s reasons for not doing anything to keep from getting pregnant?
   Check all that apply
   [ ] I didn’t mind if I got pregnant
   [ ] I thought I could not get pregnant at that time
   [ ] I had side effects from the birth control method I was using
   [ ] I had problems getting birth control when I needed it
   [ ] I thought my husband or partner or I was sterile (could not get pregnant at all)
   [ ] My husband or partner didn’t want to use anything
   [ ] Other
   Please tell us:

__________________________________________

64
17. Did you receive treatment from a doctor, nurse, or other health care worker to help you get pregnant with your new baby?  
(This may include infertility treatments such as fertility-enhancing drugs or assisted reproductive technology.)
- No — Go to Question 19
- Yes

18. Did you use any of the following treatments during the month you got pregnant with your new baby?  
[Check all that apply]
- Fertility-enhancing drugs prescribed by a doctor (fertility drugs include Clomid®, Serophene®, Pergonal®, or other drugs that stimulate ovulation)
- Artificial insemination or intrauterine insemination (treatments in which sperm, but NOT eggs, were collected and medically placed into a woman's body)
- Assisted reproductive technology (treatments in which BOTH a woman's eggs and a man's sperm were handled in the laboratory, such as in vitro fertilization [IVF], gamete intrafallopian transfer [GIFT], zygote intrafallopian transfer [ZIFT], intracytoplasmic sperm injection [ICSI], frozen embryo transfer, or donor embryo transfer)
- Other medical treatment — Please tell us:

The next questions are about the prenatal care you received during your most recent pregnancy. Prenatal care includes visits to a doctor, nurse, or other health care worker before your baby was born to get checkups and advice about pregnancy. (It may help to look at the calendar when you answer these questions.)

19. How many weeks or months pregnant were you when you were sure you were pregnant?  
(For example, you had a pregnancy test or a doctor or nurse said you were pregnant.)
- Weeks
- Months
- I don't remember

20. How many weeks or months pregnant were you when you had your first visit for prenatal care?  
(Do not count a visit that was only for a pregnancy test or only for WIC (the Special Supplemental Nutrition Program for Women, Infants, and Children).)
- Weeks
- Months
- I didn't go for prenatal care

21. Did you get prenatal care as early in your pregnancy as you wanted?
- No
- Yes
- I didn’t want prenatal care — Go to Page 4, Question 23
22. Here is a list of problems some women can have getting prenatal care. For each item, circle Y (Yes) if it was a problem for you during your most recent pregnancy or circle N (No) if it was not a problem or did not apply to you.

If you did not go for prenatal care, go to Question 25.

23. How was your prenatal care paid for? Check all that apply

- Medicaid
- Personal income (cash, check, or credit card)
- Health insurance or HMO (including insurance from your work or your husband's work)
- Other Please tell us:
24. During any of your prenatal care visits, did a doctor, nurse, or other health care worker talk with you about any of the things listed below? Please count only discussions, not reading materials or videos. For each item, circle Y (Yes) if someone talked with you about it or circle N (No) if no one talked with you about it.

63. During the 12 months before your new baby was born, what was your total household income before taxes? Include your income, your husband’s or partner’s income, and any other income you may have used. (All information will be kept private and will not affect any services you are now getting.)

64. During the 12 months before your new baby was born, how many people, including yourself, depended on this income?

___ People

65. During the 12 months before you got pregnant with your new baby, did you have a miscarriage, fetal death (baby died before being born), or stillbirth?

□ No → Go to Question 67

□ Yes
If you had more than one miscarriage, fetal death, or stillbirth during the 12 months before you got pregnant with your new baby, please answer the next question for the most recent one.

66. How long did that pregnancy last?
   - Less than 20 weeks (less than 4 months)
   - 20 to 28 weeks (4 to 6 months)
   - More than 28 weeks (more than 6 months)

On the last few pages, there are questions on a variety of topics. Your answers should be for your most recent birth and the pregnancy leading up to that birth.

67. During the 3 months before you got pregnant with your new baby, how often did you participate in any physical activities or exercise for 30 minutes or more? (For example, walking for exercise, swimming, cycling, dancing, or gardening.) Do not count exercise you may have done as part of your regular job.
   - Less than 1 day per week
   - 1 to 4 days per week
   - 5 or more days per week

68. During your most recent pregnancy, did a doctor, nurse, or other health care worker tell you that you had a urinary tract infection (UTI), a sexually transmitted disease (STD), or any vaginal infection, including bacterial vaginosis or Group B Strep (Beta Strep)?
   - No
   - Yes

69. At any time during your most recent pregnancy, did you seek help for depression from a doctor, nurse, or other health care worker?
   - No
   - Yes

70. At any time during your most recent pregnancy or after delivery, did a doctor, nurse, or other health care worker talk with you about “baby blues” or postpartum depression?
   - No
   - Yes

71a. Since your new baby was born, how often have you felt down, depressed, or hopeless?
   - Always
   - Often
   - Sometimes
   - Rarely
   - Never

71b. Since your new baby was born, how often have you had little interest or little pleasure in doing things?
   - Always
   - Often
   - Sometimes
   - Rarely
   - Never

72. Since your new baby was born, did you seek help for depression from a doctor, nurse, or other health care worker?
   - No
   - Yes
73. This question is about things that may have happened during your most recent pregnancy. For each thing, circle Y (Yes) if it happened to you or circle N (No) if it did not.

During your most recent pregnancy—

a. Your husband or partner threatened you or made you feel unsafe in some way ............ N Y
b. You were frightened for the safety of yourself or your family because of the anger or threats of your husband or partner ........ N Y
c. Your husband or partner tried to control your daily activities, for example, controlling who you could talk to or where you could go ......................... N Y
d. Your husband or partner forced you to take part in any sexual activity when you did not want to (including touch that made you uncomfortable) ..................... N Y

74. This question is about the care of your teeth during your most recent pregnancy. For each item, circle Y (Yes) if it is true or circle N (No) if it is not true.

No Y

a. I needed to see a dentist for a problem ..................... N Y
b. I went to a dentist or dental clinic ...................... N Y
c. A dental or other health care worker talked with me about how to care for my teeth and gums ..................... N Y

75. When did you have your teeth cleaned by a dentist or dental hygienist? For each of the three time periods, circle Y (Yes) if you had your teeth cleaned then or circle N (No) if you did not have your teeth cleaned then.
