

We take precautions for you.

Because our patients are important to us, we take important steps to protect you and your health.

These Steps Include:

Performing hand hygiene

... by washing our hands before and after patient care with soap and water or using an alcohol-based hand sanitizer.

Wearing gloves

... each time hands are in any part of the mouth. Gloves are changed between each patient.

Disposing of used needles and sharp objects

... by placing them in a puncture proof container.

Putting on a mask, eye protection, and gown

... so everyone is protected from splash or splatter of blood or body fluids.

Sterilizing all dental instruments and using FDA-approved devices

... including dental handpieces (dental drills).

Cleaning our surroundings and equipment

... by using surface cleaners and disinfectants and following the infection control guidelines published by the Centers for Disease Control and Prevention (CDC).

If you don't think all these precautions are being taken, talk with your health care provider or contact the Maryland State Board of Dental Examiners @ 410-402-8501.
