

E. BILLING FOR VACCINES FOR CHILDREN PROGRAM

Providers must use vaccines provided by the *Vaccines for Children (VFC) Program*¹ for patients from birth to the 19th birthday. At present, the State reimburses the provider for administrative costs associated with administering VFC vaccines. The provider should bill the “usual and customary” charge for administration of each vaccine to the State. You should use the appropriate CPT code for the vaccine/toxoid or immune globulin in conjunction with the modifier – SE (State and/or Federally-funded programs/services). You will not be reimbursed for vaccine administration unless the modifier – SE is added to the end of the appropriate CPT vaccine code.

For VFC immunization administration codes, see the Table below:

For vaccines not included in the VFC Program, but considered medically necessary vaccines (e.g., flu vaccines for high-risk patients), and for patients 19-20 years of age, Medicaid will reimburse providers for the acquisition cost of vaccines purchased by the provider. Managed Care Organizations (MCOs) are also required to cover such vaccines. Use the CPT codes with no modifier for the applicable immunizations administered to the Medicaid recipient. A separate administration fee is **not paid** for provider stock used for MA patients.

Students who are behind on their immunizations can be scheduled for additional inter-periodic preventive visits to “catch up” on their vaccinations using the appropriate Evaluation and Management (E&M) CPT code based on “complexity” and time with a V20, ICD-9 diagnosis code. However, a visit for the sole purpose of providing a vaccine with no other service rendered **may not be billed**.
